"(f) An obligor's right of rescission shall expire three years after the date of consummation of the transaction or upon the sale of the property, whichever occurs earlier, notwithstanding the fact that the information and forms required under this section or any other disclosures required under this chapter have not been delivered to the obligor, except that if (1) any agency empowered to enforce the provisions of this title institutes a proceeding to enforce the provisions of this section within three years after the date of consummation of the transaction, (2) such agency finds a violation of section 125, and (3) the obligor's right to rescind is based in whole or in part on any matter involved in such proceeding, then the obligor's right of rescission shall expire three years after the date of consummation of the transaction or upon the earlier sale of the property, or upon the expiration of one year following the conclusion of the proceeding, or any judicial review or period for judicial review thereof, whichever is later.

"(g) In any action in which it is determined that a creditor has violated this section, in addition to rescission the court may award relief under section 130 for violations of this title not relating to the right to rescind.".

(b) Section 103 of the Truth in Lending Act is amended—

(1) by redesignating subsection (t) as subsection (w); and

(2) by inserting after subsection (s) the following:

"(t) The term 'dwelling' means a residential structure or mobile home which contains one to four family housing units, or individual units of condominiums or cooperatives.

"(u) The term 'residential mortgage transaction' is one in which a mortgage, deed of trust, purchase money security interest arising under an installment sales contract, or equivalent consensual security interest is created or retained against the consumer's dwelling to finance the acquisition or initial construction of that dwelling.".

OPEN END DISCLOSURES

SEC. 1213. (a) Section 127(a) of the Truth in Lending Act is amended—

(1) by adding at the end of paragraph (1) thereof the following new sentence: "If no such time period is provided, the creditor shall disclose that fact.";

(2) by striking out paragraph (5), and redesignating paragraphs (6), (7), and (8) as paragraphs (5), (6), and (7), respectively; and

(3) by amending redesignated paragraphs (5) and (6) to read as follows:

"(5) Identification of other charges which may be imposed as part of the plan, and their method of computation, in accordance with regulations of the Board.

"(6) In cases where the credit is or will be secured, a statement that a security interest has been or will be taken in (A) the property purchased as part of the credit transaction, or (B) property not purchased as part of the credit transaction identified by item or type.".

(b) Section 127(b)(2) of such Act is amended to read as follows:

"(2) The amount and date of each extension of credit during the period, and a brief identification, on or accompanying the statement of each extension of credit in a form prescribed by the Board sufficient to enable the obligor either to identify the transaction or to relate it to copies of sales vouchers or similar instruments previously furnished, except that a creditor's failure to disclose such information in accordance with this paragraph shall not be deemed a failure to comply with this chapter or this title if (A) the creditor maintains procedures reasonably adapted to procure and provide such information, and (B) the creditor responds to and treats any inquiry for clarification or documentation as a billing error and an erroneously billed amount under section 161. In lieu of complying with the foreging requirements, in the case of any transaction in which the creditor and seller are the same person, as defined by the Board, and that person's open end plan has fewer than 15,000 accounts, the creditor may elect to provide only the amount and date of each extension of credit during the period and the seller's name and location where the transaction took place if (A) a brief identification of the transaction has been previously furnished, and (B) the creditor responds to and treats any inquiry for clarification or documentation as a billing error and an erroneously billed amount under section 161.".

(c) Section 127(b) of the Truth in Lending Act is amended by striking out paragraph (7) and by redesignating paragraphs (8), (9), (10), and (11) as paragraphs (7), (8), (9), and (10), respectively.

(d) Redesignated paragraph (7) of section 127(a) of the Truth in Lending Act is amended by striking out "each of two billing cycles per year, at semiannual intervals" and inserting in lieu thereof "one billing cycle per calendar year, at intervals of not less than six months or more than eighteen months".

(e) Subsection (c) of section 127 of the Truth in Lending Act is repealed.

(f) Section 143 of the Truth in Lending Act is amended by striking out "or the appropriate rate determined under section 127(a)(5)".

(g) Section 161(a) of the Truth in Lending Act is amended by redesignating the references to sections 127(b)(11) and 127(a)(8) as references to section 127(b)(10) and 127(a)(7), respectively.

OTHER THAN OPEN END DISCLOSURES

SEC. 214. (a) Subsection (a) of section 128 of the Truth in Lending Act is amended to read as follows:

"(a) For each consumer credit transaction other than under an open end consumer credit plan, the creditor shall disclose each of the following items, to the extent applicable:

"(1) The identity of the creditor required to make disclosure.

"(2) The 'amount financed' using that term, which shall be the amount of credit of which the consumer has actual use. This amount shall be computed as follows, but the computations need not be disclosed and shall not be disclosed with the disclosures conspicuously segregated in accordance with subsection (b)(1):

"(A) take the principal amount of the loan or the cash price less downpayment and trade-in;

"(B) add any changes which are not part of the finance charge or of the principal amount of the loan and which are financed by the consumer, including the cost of any items excluded from the finance charge pursuant to section 106;

"(C) subtract any charges which are part of the finance charge but which will be paid by the consumer at the time of the consummation of the transaction, or have been withheld from the proceeds of the credit; and

"(D) subtract any required deposit balance, in accordance with regulations of the Board.

"(3) The 'finance charge', not itemized, using that term.

"(4) The finance charge expressed as an 'annual percentage rate', using that term. This shall not be required if the amount financed does not exceed $75 and the finance charge does not exceed $5, or if the amount financed exceeds $75 and the finance charge does not exceed $7.50.

"(5) The sum of the amount financed, any required deposit balance, and the finance charge, which shall be termed the 'total of payments'.

"(6) The number, amount, and due dates or period of payments scheduled to repay the total of payments.

"(7) In a sale of property or services in which the seller is the creditor required to disclose pursuant to section 121(b), the 'total sale price', using that term, which shall be the total of the cash price of the property or services, additional charges, and the finance charge.

"(8) Descriptive explanations of the terms 'amount financed', 'finance charge', 'annual percentage rate', 'total of payments', and 'total sale price' as specified by the Board. The descriptive explanation of 'total sale price' shall include reference to the amount of the downpayment.

"(9) Where the credit is secured, a statement that a security interest has been taken in (A) the property which is purchased as part of the credit transaction, or (B) property not purchased as part of the credit transaction identified by item or type.

"(10) Any dollar charge or percentage amount which may be imposed by a creditor solely on account of a late payment, other than a deferral or extension charge.

"(11) A statement indicating whether or not the consumer is entitled to a rebate or credit, or is subject to a penalty, if the obligation is refinanced or prepaid in full pursuant to acceleration or otherwise.

"(12) A statement that the consumer should refer to the appropriate contract document for any information it provides about nonpayment, default, the right to accelerate the maturity of the debt, and prepayment rebates and penalties.

"(13) In any residential mortgage transaction, a statement whether a subsequent purchaser or assignee of the consumer may assume the debt obligation on its original terms and conditions.".

(b) Section 128(b) of such Act is amended to read as follows:

"(b)(1) Except as otherwise provided in this chapter, the disclosures required under subsection (a) shall be made before the credit is extended. Except for the disclosures required by subsection (a)(1) of this section, all disclosures required under subsection (a) and any disclosure provided for in subsection (b), (c), or (d) of section 106 shall be conspicuously segregated from all other terms, data, or information provided in connection with a transaction, including any computations or itemization.

"(2) In the case of a residential mortgage transaction, as defined in section 103(u), which is also subject to the Real Estate Settlement Procedures Act, good faith estimates of the disclosures required under subsection (a) shall be made in accordance with regulations of the Board under section 121(c) before the credit is extended, or shall be delivered or placed in the mail not later than three business days after the creditor receives the consumer's written application, whichever is earlier. If the disclosure statement furnished within three days of the written application contains an annual percentage rate which is subsequently rendered inaccurate within the meaning of section 107(c), the creditor shall furnish another statement at the time of settlement or consummation.".

(c) Section 128(c) of the Truth in Lending Act is amended—

(1) by inserting "(1)" after "(c)";

(2) by striking out "deferred payment price" and inserting in lieu thereof "total sale price"; and

(3) by adding at the end thereof the following new paragraph:

"(2) If a creditor receives a request for a loan by mail or telephone without personal solicitation and the terms of financing, including the annual percentage rate for representative amounts of credit, are set forth in the creditor's printed material distributed to the public, or in the contract of loan or other printed material delivered to the obligor, then the disclosures required under subsection (a) may be made at any time not later than the date the first payment is due.".

(d)(1) Section 129 of the Truth in Lending Act is repealed.

(2) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 129 and inserting in lieu thereof:

"129. [Repealed].".

(c)(1) Section 126 of the Truth in Lending Act is repealed.

(2) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 126 and inserting in lieu thereof:

"126. [Repealed].".

(f)(1) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 128 and inserting in lieu thereof:

"128. Consumer credit not under open end credit plans.".

(2) The caption of section 128 of such Act is amended by striking out "Sales" and inserting in lieu thereof "Consumer credit".

CIVIL LIABILITY

SEC. 715. (a) Section 130 of the Truth in Lending Act is amended—

(1) by striking out "in such action" in subsection (a)(2)(B) and inserting in lieu thereof "under this subparagraph in any class action or series of class actions arising out of the same failure to comply by the same creditor";

(2) in subsection (a)(3), by inserting "or in any action in which a person is determined to have a right of rescission under section 125" after "liability";

(3) by amending subsections (b), (c), and (d) to read as follows:

"(b) A creditor or assignee has no liability under this section or section 108 or section 112 for any failure to comply with any requirement imposed under this chapter or chapter 5, if within sixty days after discovering an error, whether pursuant to a final written examination report or notice issued under section 108(e)(1) or through the creditor's or assignee's own procedures, and prior to the institution of an action under this section or the receipt of written notice of the error from the obligor, the creditor or assignee notifies the person concerned of the error and makes whatever adjustments in the appropriate account are necessary to assure that the person will not be required to pay an amount in excess of the charge actually disclosed, or the dollar equivalent of the annual percentage rate actually disclosed, whichever is lower.

"(c) A creditor or assignee may not be held liable in any action brought under this section or section 125 for a violation of this title if the creditor or assignee shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid any such error. Examples of bona fide error include, but are not limited to, clerical, calculation, computer malfunction and programing, and printing errors, but an error of legal judgment with respect to a person's obligations under this title is not a bona fide error.

"(d) When there are multiple obligors in a consumer credit transaction or consumer lease, there shall be no more than one recovery of damages under subsection (a)(2) for a violation of this title.";

(4) by adding at the end of subsection (e) the following new sentence: "This subsection does not bar a person from asserting a violation of this title in an action to collect the debt which was brought more than one year from the date of the occurrence of the violation as a matter of defense by recoupment or set-off in such action, except as otherwise provided by State law.";

(5) by inserting ", section 108(b), section 108(c), section 108(e)," after "this section" in subsection (f);

(6) by adding the following new sentence at the end of subsection (g): "This subsection does not bar any remedy permitted by section 125."; and

(7) by amending subsection (h) to read as follows:

"(h) Any person may not take any action to offset any amount for which a creditor or assignee is potentially liable to such person under subsection (a)(2) against any amount owing by such person, unless the amount of the creditor's or assignee's liability under this title has been determined by judgment of a court of competent jurisdiction in an action of which such person was a party. This subsection does not bar a consumer then in default on the obligation from asserting a violation of this title as an original action, or as defense or counterclaim to an action to collect amounts owed by the consumer brought by a person liable under this title.".

(b) Section 130(a) of the Truth in Lending Act is amended—

(1) by inserting ", including any requirement under section 125," immediately after "this chapter"; and

(2) by adding at the end thereof the fol-

lowing: "In connection with the disclosures referred to in section 127, a creditor shall have a liability determined under paragraph (2) only for failing to comply with the requirements of section 125 or of section 127(a) or of paragraph (4), (5), (6), (7), (8), (9), or (10) of section 127(b) or for failing to comply with disclosure requirements under State law for any term which the Board has determined to be substantially the same in meaning under section 111(a)(2) as any of the terms referred to in section 127(a) or any of those paragraphs of section 127(b). In connection with the disclosures referred to in section 128, a creditor shall have a liability determined under paragraph (2) only for failing to comply with the requirements of section 125 or of paragraph (2), (3), (4), (5), (6), or (9) of section 128(a), or for failing to comply with disclosure requirements under State law for any term which the Board has determined to be substantially the same in meaning under section 111(a)(2) as any of the terms referred to in any of those paragraphs of section 128(a). With respect to any failure to make disclosures required under this chapter or chapter 4 or 5 of this title, liability shall be imposed only upon the creditor required to make disclosure, except as provided in section 131.".

LIABILITY OF ASSIGNEES

SEC. 1216. (a) Section 131 of the Truth in Lending Act is amended to read as follows:

"§ 131. Liability of assignees

"(a) Except as otherwise specifically provided in this title, any civil action for a violation of this title or proceeding under section 108 which may be brought against a creditor may be maintained against any assignee of that creditor only if the violation for which such action or proceeding is brought is apparent on the face of the disclosure statement, except where the assignment was involuntary. For the purpose of this section, violations apparent on the face of the disclosure statement include, but are not limited to (1) disclosure which can be determined to be incomplete or inaccurate from the face of the disclosure statement or other documents assigned, or (2) disclosures not made in the terminology required by this title.

"(b) Except as provided in section 125(c), in any action or proceeding by or against any subsequent assignee of the original creditor without knowledge to the contrary by the assignee when he acquires the obligation, written acknowledgement of receipt by a person to whom a statement is required to be given pursuant to this title shall be conclusive proof of the delivery thereof and, except as provided in subsection (a), of compliance with this chapter. This section does not affect the rights of the obligor in any action against the original creditor.

"(c) Any consumer who has the right to rescind a transaction under section 125 may rescind the transaction as against any assignee of the obligation, regardless of whether such assignee is a creditor under this title.".

(b) Section 115 of the Truth in Lending Act is repealed.

(c)(1) The table of sections of chapter 1 of the Truth in Lending Act is amended by striking out item 115 and inserting in lieu thereof:

"115. [Repealed].".

(2) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 131 and inserting in lieu thereof:

"131. Liability of assignees.".

LIABILITY OF CREDIT CARDHOLDER

SEC. 1217. Section 133(a) of the Truth in Lending Act is amended to read as follows:

"(a) A cardholder shall be liable for the unauthorized use of a credit card only if the card is an accepted credit card; the liability is not in excess of $50, the card issuer gives adequate notice to the cardholder of the potential liability, the card issuer has provided the cardholder with a description of a means by which the card issuer may be notified of loss or theft of the card, which description may be provided on the face or reverse side of the statement required by section 127(b) or on a separate notice accompanying such statement, the unauthorized use occurs before the card issuer has been notified that an unauthorized use of the credit card has occurred or may occur as the result of loss, theft, or otherwise, and the card issuer has provided a method whereby the user of such card can be identified as the person authorized to use it. For the purpose of this section, a card issuer has been notified when such steps as may be reasonably required in the ordinary course of business to provide the card issuer with the pertinent information have been taken, whether or not any particular officer, employee, or agent of the card issuer does in fact receive such information.".

DISSEMINATION OF ANNUAL PERCENTAGE RATES

SEC. 1218. (a) Chapter 2 of the Truth in Lending Act is amended by adding at the end thereof the following new section:

"§ 136. Dissemination of annual percentage rates

"(a) The Board shall collect, publish, and disseminate to the public, on a demonstration basis in a number of standard metropolitan statistical areas to be determined by the Board, the annual percentage rates charged for representative types of nonsale credit by creditors in such areas. For the purpose of this section, the Board is authorized to require creditors in such areas to furnish information necessary for the Board to collect, publish, and disseminate such information.

"(b) The Board is authorized to enter into contracts or other arrangements with appropriate persons, organizations, or State agencies to carry out its functions under subsection (a) and to furnish financial assistance in support thereof.".

(b) The analysis of such chapter is amended by adding at the end thereof the following new item:

"136. Dissemination of annual percentage rates.".

CREDIT ADVERTISING

SEC. 1219. (a) Section 143 of the Truth in Lending Act is amended to read as follows:

"§ 143. Advertising of open end credit plans

"No advertisement to aid, promote, or assist directly or indirectly the extension of consumer credit under an open end credit plan may set forth any of the specific terms of that plan unless it also clearly and conspicuously sets forth all of the following items:

"(1) Any minimum or fixed amount which could be imposed.

"(2) Where periodic rates may be used to compute the finance charge, the periodic rates expressed as annual percentage rates.

"(3) Any other term that the Board may by regulation require to be disclosed.".

(b) Section 144 of the Truth in Lending Act is amended by striking out paragraphs (1) through (4) of subsection (d) thereof, and inserting in lieu thereof the following:

"(1) the downpayment, if any,

"(2) the terms of repayment,

"(3) the rate of the finance charge expressed as an annual percentage rate.".

CORRECTION OF BILLING ERRORS

SEC. 1220. (a) Section 161(b) of the Truth in Lending Act is amended—

(1) by redesignating paragraph (6) as paragraph (7); and

(2) by inserting after paragraph (5) the following:

"(6) Failure to transmit the statement required under section 127(b) of this Act to the last address of the obligor which has been disclosed to the creditor, unless that address was furnished less than twenty days before the end of the billing cycle for which the statement is required.".

(b) Section 161(c) of such Act is amended by inserting after "account" the first time it is used a comma and the following: "which may include finance charges on amounts in dispute,".

CREDIT BALANCES

SEC. 721. (a) Section 165 of the Truth in Lending Act is amended to read as follows:

"§ 165. Treatment of credit balances

"Whenever a credit balance in excess of $1 is created in connection with a consumer credit transaction through (1) transmittal of funds to a creditor in excess of the total balance due on an account; (2) rebates of unearned finance charges or insurance premiums; or (3) amounts otherwise owed to or held for the benefit of an obligor, the creditor shall—

"(A) credit the amount of the credit balance to the consumer's account;

"(B) refund any part of the amount of the remaining credit balance, upon request of the consumer; and

"(C) make a good faith effort to refund to the consumer by cash, check, or money order any part of the amount of the credit balance remaining in the account for more than six months, but no further action is required in any case where the consumer's current location is not known by the creditor and cannot be traced through the consumer's last known address or telephone number.".

(b) The table of sections of chapter 4 of the Truth in Lending Act is amended by striking out item 165 and inserting in lieu thereof:

"165. Treatment of credit balances.".

GOVERNMENT EXEMPTION

SEC. 1222. (a) Section 113 of the Truth in Lending Act is amended to read as follows:

"§ 113. Effect on governmental agencies

"(a) Any department or agency of the United States which administers a credit programs in which it extends, insures, or guarantees consumer credit and in which it provides instruments to a creditor which contain any disclosures required by this title shall, prior to the issuance or continued use of such instruments, consult with the Board to assure that such instruments comply with this title.

"(b) No civil or criminal penalty provided under this title for any violation thereof may be imposed upon the United States or any agency thereof, or upon any State or political subdivision thereof, or any agency of any State or political subdivision.

"(c) A creditor participating in a credit program administered, insured, or guaranteed by any department or agency of the United States shall not be held liable for a civil or criminal penalty under this title where the violation results from the use of an instrument required by any such department or agency.

"(d) A creditor participating in a credit program administered, insured, or guaranteed by any department or agency of the United States shall not be held liable for a civil or criminal penalty under the laws of any State (other than laws determined under section 111 to be inconsistent with this title) for any technical or procedural failure, such as a failure to use a specific form, to make information available at a specific place on an instrument, or to use a specific typeface, as required by State law, which is caused by the use of an instrument required to be used by such department or agency.".

(b) The table of sections of chapter 1 of the Truth in Lending Act is amended by striking out item 113 and inserting in lieu thereof:

"113. Effect on governmental agencies.".

ORAL DISCLOSURES

SEC. 1223. (a) Section 146 of the Truth in Lending Act is amended to read as follows:

"§ 146. Use of annual percentage rate in oral disclosures

"In responding orally to any inquiry about the cost of credit, a creditor, regardless of the method used to compute finance charges, shall state rates only in terms of the annual percentage rate, except that in the case of an open end credit plan, the periodic rate also may be stated and, in the case of an other than open end credit plan where a major component of the finance charge consists of interest computed at a simple annual rate, the simple annual rate also may be stated. The Board may, by regulation, modify the requirements of this section or provide an exception from this section for a transaction or class of transactions for which the creditor cannot determine in advance the applicable annual percentage rate."

(b) The table of sections of chapter 3 of the Truth in Lending Act is amended by striking out item 146 and inserting in lieu thereof:

"146. Use of annual percentage rate in oral disclosures.".

EFFECTIVE DATE

SEC. 1224. The amendments made by this title shall take effect upon the expiration of two years after the date of enactment of this title. All regulations, forms, and clauses required to be prescribed under the amendments made by this title shall be promulgated at least one year prior to such effective date. Notwithstanding the foregoing, any creditor may comply with the amendments made by this title, in accordance with the regulations, forms, and clauses prescribed by the Board, prior to such effective date.

TITLE XIII—MISCELLANEOUS

SEC. 1301. Section 302(h) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1451(h)) is amended by adding at the end thereof the following: "The term 'residential mortgage' also includes a secured loan or advance of credit the proceeds of which are intended to finance the rehabilitation, renovation, modernization, refurbishment, or improvement of properties securing mortgages which the Corporation may purchase as 'residential mortgages' under the first sentence of this subsection. The maximum principal obligation of loans purchased by virtue of the preceding sentence shall not exceed the dollar limits prescribed by the Federal Home Loan Bank Board with respect to similar types of loans made by Federal savings and loan associations. A 'secured loan or advance of credit' is one in which a security interest is taken in the rehabilitated, renovated, modernized, refurbished, or improved property.".

SEC. 1302. In the first fiscal year after enactment of this Act in which the Secretary of the Treasury authorizes the sale of gold to the public, not less than ten percent by weight of the gold offered for sale in such fiscal year shall be offered in units containing not more than one troy ounce of gold. Notwithstanding any other provision of this Act, the number units of one ounce or less to be produced and sold in any fiscal year after the first fiscal year in which such units are offered for sale shall be adjusted to meet anticipated demand.

SEC. 1303. Paragraph (2) of section 3(c) of Public Law 94-222 (15 U.S.C. 1666f note) is amended to read as follows:

"(2) The amendment made by paragraph (1) shall cease to be effective on February 27, 1981.".

SEC. 1304. The last sentence of section 245 of the National Housing Act is amended—

(1) by inserting "(1)" before "limiting the amount of interest"; and

(2) by inserting before the period at the end thereof a comma and the following: "or (2) requiring a minimum amortization of principle or otherwise relating to the amortization of principle under the mortgage or loan".

SEC. 1305. Public Law 95-229 (92 Stat. 26) is amended:

(1) by striking out in the title "during 1777";

(2) by striking out in the first sentence of the first section the number "104,000" and inserting in lieu thereof "208,000"; and

(3) by striking out in the second sentence of the first section "December 31, 1978" and inserting in lieu thereof "December 31, 1979".

SEC. 1306. Public Law 95-128, Title VIII (12 U.S.C. Section 2902) is amended by adding a new subsection (4) to Section 803 as follows:

"(4) A financial institution whose business predominately consists of serving the needs of military personnel who are not located within a defined geographic area may define its "entire community" to include its entire deposit customer base without regard to geographic proximity."

TITLE XIV—STANDBY LETTERS OF CREDIT

SEC. 1401. The Federal Deposit Insurance Act is amended (1) by redesignating sections 22 and 23 as 23 and 24 respectively, and (2) by inserting immediately after section 21 the following new section 22: "Sec. 22. (a) The purpose of this section is to regulate standby letters of credit, guarantees, surety agreements and certain acceptances issued by commercial banks.

(b) This section shall apply to any insured bank, to any bank holding company as defined in the Bank Holding Company Act of 1956, as amended, and to any agency, branch, Federal agency, Federal branch, foreign bank, commercial lending company, State agency, or State branch as those terms are defined in section 1(b) of the International Banking Act of 1978.

(c) Beginning July 1, 1979, no entity enumerated in (b) above shall (1) incur any liability arising from any irrevocable undertaking directly or indirectly to make or arrange a payment on a domestic borrowing in the event another entity or person fails to do so, or (2) incur any liability arising from the acceptance of a time draft (other than liabilities arising from the acceptance of time drafts of the kinds described in section 13 of the Federal Reserve Act) where the transaction is functionally equivalent to a domestic borrowing. The term 'domestic borrowing' means any borrowing of 270 days or less the proceeds of which are used to finance directly or indirectly the sale or lease of any personal property located or to be located within the United States, any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands.

TITLE XV—EXPORT-IMPORT BANK ACT AMENDMENTS OF 1978

SHORT TITLE

SEC. 1501. That this Title may be cited as the "Export-Import Bank Act Amendments of 1978".

PRENOTIFICATION

SEC. 1502. Section 2(b)(3) of the Export-Import Bank Act of 1945 is amended—

(1) by striking out "No" in the first sentence and inserting in lieu thereof "Except as provided by the fourth sentence of this paragraph, no";

(2) by striking out "$60,000,000" in the first sentence and inserting in lieu thereof "$100,000,000"; and

(3) by adding at the end thereof the following: "If the Bank submits a statement to the Congress under this paragraph and either House of Congress is in an adjournment for a period which continues for at least 10 days after the date of submission of the statement, then any such loan or guarantee of combination thereof may, subject to the second sentence of this paragraph, be finally approved by the Board of Directors upon the termination of the 25-day period referred to in the first sentence of this paragraph or upon the termination of a 35-calendar-day period (which commences upon the date of submission of the statement), whichever occurs sooner".

FRACTIONAL CHARGES

SEC. 1503. Section 2(c)(1) of the Export-Import Bank Act of 1945 is amended by striking out "$20,000,000,000" and inserting in lieu thereof "$25,000,000,000".

DENIAL OF EXPORT APPLICATIONS

SEC. 1504. Section 2(b)(1)(B) of the Export-Import Bank Act of 1945 is amended by striking out the remainder of the paragraph after "and employment in the United States," and inserting in lieu thereof "and shall give particular emphasis to the objective of strengthening the competitive position of United States exporters and thereby of expanding total United States exports. Only in cases where the President determines that such action would be in the national interest and where such action would clearly and importantly advance United States policy in such areas as international terrorism, nuclear proliferation, environmental protection and human rights, should the Export-Import Bank deny applications for credit for non-financial or non-commercial considerations".

AUTHORIZATION

SEC. 1505. Section 7(a) of the Export-Import Bank Act of 1945 is amended by striking out "$25,000,000,000" and inserting in lieu thereof "$40,000,000,000".

EXTENSION OF AUTHORITY

SEC. 1506. Section 8 of the Export-Import Bank Act of 1945 is amended by striking out "December 31, 1978" and inserting in lieu thereof "September 30, 1983".

ENERGY POLICY

SEC. 1507. (a) Section 2(b)(1) of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(C) Consistent with the policy of section 501 of the Nuclear Non-Proliferation Act of 1978 and section 119 of the Foreign Assistance Act of 1961, the Board of Directors shall name an officer of the Bank whose duties shall include advising the President of the Bank on ways of promoting the export of goods and services to be used in the development, production, and distribution of nonnuclear renewable energy resources, disseminating information concerning export opportunities and the availability of Bank support for such activities, and acting as a liaison between the Bank and the Department of Commerce and other appropriate departments and agencies.".

(b) Section 9(b) of such Act is amended by adding at the end thereof the following: "In addition, the Bank shall include in the report a description of specific activities and programs undertaken by it to achieve the policy of section 501 of the Nuclear Non-Proliferation Act of 1978, and section 119 of the Foreign Assistance Act of 1961, as required by section 2(b)(1)(C) of this Act.".

EXPORT CREDIT COMPETITION

SEC. 1508. (a) The President is authorized and requested to begin negotiations at the ministerial level with other major exporting countries to end predatory export financing programs and other forms of export subsidies, including mixed credits, in third country markets as well as within the United States. The President shall report to the Congress prior to January 15, 1979, on progress toward meeting the goals of this section.

(b) The Export-Import Bank of the United States is authorized to provide guarantees, insurance, and extensions of credit at

rates and terms and other conditions which are, is the opinion of the Board of Directors of the Bank, competitive with those provided by the government-supported export credit instrumentalities of other nations.

SEC. 1509. Section 2(b) of the Export-Import Bank Act of 1945 is amended by inserting at the end thereof the following new paragraph:

"(7) The Bank shall supplement but not compete with private capital and the programs of the Commodity Credit Corporation to insure that adequate financing will be made available to assist the export of agricultural commodities, except that, consistent with Section 2(b)(1)(A) of this Act, the Bank in assisting any such export transactions shall, in cooperation with the export financing instrumentalities of other governments, seek to minimize competition in government-supported export financing, and shall, in cooperation with other appropriate United States Government agencies, seek to reach international agreements to reduce government subsidized export financing. In order to carry out the purposes of this subsection, the Bank shall consult with the Secretary of Agriculture and where the Secretary of Agriculture has recommended against Bank financing of the export of a particular agricultural commodity, shall take such recommendation into consideration in determining whether to provide credit or other assistance for any export sale of such commodity, and shall consider the importance of agricultural commodity exports to the United States export market and the nation's balance of trade in deciding whether or not to provide assistance under this subsection. The Bank shall include in the report to Congress under Section 9(a) of this Act a description of the measures undertaken by it pursuant to this subsection.".

SEC. 1510. Section 2(b)(1)(A) of the Export-Import Bank Act of 1945 is amended by striking the words "goods and related services" in the first sentence and inserting in lieu thereof "manufactured goods, agricultural products, and other goods and services".

SEC. 1511. The Bank shall implement such regulations and procedures as may be appropriate to insure that full consideration is given to the extent to which any guarantee, insurance, credit, or participation in any extension of credit is likely to have an adverse effect on industries, including agriculture, and employment in the United States, either by reducing demand for goods produced in the United States or by increasing imports to the United States. To carry out the purposes of this subsection, the Bank shall request, and the United States International Trade Commission shall furnish, a report assessing the impact of the Bank's activities on industries and employment in the United States. Such report shall include an assessment of previous guarantees, insurance, loans, or extensions of credit or participations therein and shall provide recommendations concerning general areas which may adversely affect domestic industries, including agriculture, and employment. A copy of such report shall be included in the Bank's report under section 9.

SEC. 1512. (a)(1) Upon receipt of information that foreign sales to the United States are being offered involving foreign official export credits which exceed limits under existing standstills, minutes, or practices to which the United States and other major exporting countries have agreed, the Secretary of the Treasury shall immediately conduct an inquiry to determine whether "noncompetitive financing" is being offered.

(2) If the Secretary determines that such foreign "noncompetitive" financing is being offered, he shall request the immediate withdrawal of such financing by the foreign official export credit agency involved.

(3) If the offer is not withdrawn or if there is no immediate response to the withdrawal request, the Secretary of the Treasury shall notify the country offering such financing and all parties to the proposed transaction that the Eximbank may be authorized to provide competing United States sellers with financing to match that available through the foreign official export financing entity.

(b) The Secretary of the Treasury shall only issue such authorization to the Bank to provide guarantees, insurance and credits to competing U.S. sellers, if he determines that:

(1) The availability of foreign official noncompetitive financing is likely to be a determining factor in the sale, and

(2) The foreign noncompetitive financing has not been withdrawn on the date, the Bank is authorized to provide competitive financing.

(c) Upon receipt of authorization by the Secretary of the Treasury, the Export-Import Bank may provide financing to match that offered by the foreign official export credit entity, provided however that loans, guarantees and insurance provided under this authority shall conform to all provisions of the Export-Import Bank Act of 1945, as amended.

SEC. 1513. No environmental rule, regulation, or procedure shall become effective with regard to exports subject to the provisions of 22 U.S.C. 3201 et seq., the Nuclear Non-Proliferation Act of 1978, until such time as the President has reported to Congress on the progress achieved pursuant to Sec. 407 of the Act (42 U.S.C. 2153e) entitled "Protection of the Environment" which requires the President to seek to provide, in agreements required under the Act, for cooperation between the parties in protecting the environment from radioactive, chemical or thermal contaminations arising from peaceful nuclear activities.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TIME-LIMITATION AGREEMENT—S. 791

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as S. 791, the omnibus parks bill, is called up and made the pending business, there be a 30-minute time limitation on the bill, to be equally divided between Mr. HANSEN and Mr. ABOUREZK, that there be 10 minutes on any amendment, debatable motion, appeal, or point of order, if such is submitted to the Senate, and that the agreement be in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. Mr. President, reserving the right to object, will the majority leader add that no amendment dealing with the Alaskan land matter be in order on this bill?

Mr. ROBERT C. BYRD. I include that.

Mr. BAYH. Mr. President, reserving the right to object.

Mr. PROXMIRE. Did the amendment not include the Alaskan land bill; is that correct?

Mr. STEVENS. That is correct.

Mr. ROBERT C. BYRD. That is correct.

Mr. BAYH. Mr. President, reserving the right to object, I inquire of the leader how this particular bill relates in the schedule. Will it be possible also to get a time limit agreement on the bill which is commonly known as the Pennsylvania Avenue bill?

Mr. ROBERT C. BYRD. There is already a time agreement on it.

Mr. STEVENS. We got that last night.

Mr. BAYH. May I ask the leader to include in the unanimous-consent request that no amendment dealing with the change in the name of the Indiana Dunes Park shall be in order?

Mr. ROBERT C. BYRD. I include that in my request.

Mr. HEINZ. Mr. President, reserving the right to object, four or five bills ago the majority leader indicated we would be back on the Sugar Act, and I have been waiting patiently for the last 4 or 5 hours, 6 or 7 hours, and I am perfectly prepared to wait all night but it would be extremely useful if the majority leader could indicate——

Mr. ROBERT C. BYRD. I hope the Senator is not saying that in a threatening manner.

Mr. HEINZ. No. I am just inquiring of the majority leader what he intended to do about the Sugar Act.

Mr. ROBERT C. BYRD. The Senator wants to get back on the Sugar Act tonight?

Mr. HEINZ. The Senator would like to know what the majority leader's plans are on it.

Mr. ROBERT C. BYRD. I have to say truthfully I did not have any definite plans in that regard. We may get back to it tonight and we may not.

I wish to do these park bills if we could.

Mr. HEINZ. I understand that. I really do need to know.

Mr. ABOUREZK. We did not intend to bring this up before the sugar bill. We intended to get the agreement now because everyone has cleared it.

Mr. THURMOND. Mr. President, reserving the right to object, and I shall not object, I want a time limit on this.

Mr. PROXMIRE. I yielded to the Senator from New Mexico and he yielded to the majority leader.

The PRESIDING OFFICER. The Senator from West Virginia has the floor.

Several Senators addressed the Chair.

Mr. STEVENS. Let us get some time agreements.

That is what we are speaking of.

Mr. THURMOND. Mr. President, reserving the right to object, and I shall not object to the time limit provided in other bills if it is understood that no other bills will be included in this or be allowed as an amendment. For instance, I am strongly opposed at this late hour and date to bring up S. 1874.

Mr. ROBERT C. BYRD. Mr. President, if the Senator will listen to me, I included in the request that no nongermane amendment be in order.

Mr. THURMOND. For instance, I want it understood that the Illinois Brick could not be offered here.

Mr. ROBERT C. BYRD. It is a nongermane amendment; is it not?

Mr. THURMOND. I do not object in view of that.

SUGAR LEGISLATION

Mr. HEINZ. Mr. President, reserving the right to object, the majority leader will recall around lunchtime today, at 1 or 1:30, when the majority leader pro-

pounded a unanimous-consent request that we take up hospital cost containment separately I asked him what his plans were with respect to the Sugar Act and at that point the majority leader assured me that he would take it up immediately after hospital cost containment was disposed of. That was about 3 hours ago.

Mr. ROBERT C. BYRD. Mr. President, I would like us to check the transcript on that. I am not disputing the Senator's word, but I do not recall assuring anyone that I would definitely go back to that bill. It is back on the calendar at the moment. I do not think I would assure anyone of that. However, I do not contest the Senator's word. I could have said it. But I just do not believe I did. I would like to see my transcript and if the transcript says I did that is what we will go to next. But I do not remember that.

Mr. CRANSTON. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. Can we get the agreement on this? This has nothing to do with sugar.

Mr. MELCHER addressed the Chair.

Mr. HEINZ. What does?

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. PROXMIRE. While the transcript is being checked, will the Senator permit the Senator from New Mexico to finish 1 minute and then act on this?

Mr. ROBERT C. BYRD. In 1 minute 10 Senators can object on the floor on any question, if the Senator will let me proceed.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I have done everything I could for him to get his bill.

Mr. PROXMIRE. The Senator certainly has.

Mr. ROBERT C. BYRD. I certainly hope the majority leader may be allowed the flexibility.

Mr. CRANSTON. Mr. President, the request is not to bring up the bill tonight. The request is just to get unanimous-consent agreement to bring it up when the schedule permits. It is not necessarily coming up right now.

Mr. HEINZ. Well, maybe the majority leader can tell me what he does intend to take up next.

Mr. ROBERT C. BYRD. If I knew what I intended to take up next I would have no hesitancy to tell the able Senator, but I just do not know at the moment. I am not trying to trick the Senator or preclude him in any way. I just do not know. At this stage of the game it takes a magician really to stand here and predict what is going to come up next all the time. Sometimes I can do it, but I really cannot.

Mr. HEINZ. Further reserving the right to object, Mr. President, I admire the skill of the majority leader all the time. He operates with skill and I can only say that a magician's skill pales in comparison.

Mr. ROBERT C. BYRD. The Senator completely disarms me.

Mr. HEINZ. That would be the day.

[Laughter.]

Mr. ROBERT C. BYRD. I would also include in the request that Mr. MELCHER be allowed to bring up one nongermane amendment on which there will be a 15-minute time limitation, the time to be equally divided in accordance with the usual form, and I will ask Mr. MELCHER to state the contents of the amendment.

Mr. HEINZ. Mr. President, will the majority leader be willing to add that when we return to the sugar bill that it be in order for me to call up an amendment to the sugar bill? I do not imagine it will take long to dispose of it, but I would like to know whether he can do it tonight or tomorrow morning or tomorrow afternoon.

Mr. ROBERT C. BYRD. The Senator would certainly have that right to call up the amendment to the sugar bill because there is no agreement.

Mr. HEINZ. I understand, and I recognize I have that right. In fact, I have 60 amendments I could call up to the sugar bill, and I hope it would not be necessary for me to call up all 60 of those amendments to require votes of all those amendments. They are all germane amendments even if cloture is invoked on Saturday, and they would be germane amendments.

Mr. ROBERT C. BYRD. You know, we have a way of handling amendments under cloture.

Mr. HEINZ. We noticed.

Mr. ROBERT C. BYRD. It was developed last year, and I am sort of itching for the opportunity to try out that new mechanism. But I say in all seriousness——

Mr. ABOUREZK. The Vice President is gone. He is out of town.

Mr. ROBERT C. BYRD. Will the Senator let us proceed? It has certainly nothing to do with the sugar bill.

Mr. HEINZ. Mr. Leader, I would really like——

Mr. ROBERT C. BYRD. Let us have a little sweetness at this time.

Mr. HEINZ. That is exactly what the Senator from Pennsylvania is trying to do, to determine exactly when the sweetener in the Sugar Act is going to come up.

Mr. HELMS. He wants sugar in the morning and sugar in the evening, that is what he wants.

[Laughter.]

Mr. ROBERT C. BYRD. I dipped in the sugar bowl and all I got were lumps.

[Laughter.] I will play that fiddle tune for you.

[Laughter.]

Mr. HEINZ. Mr. President, can I suggest a quorum?

Mr. ROBERT C. BYRD. I really think we have imposed unduly. The Senator is just not going to get out of me something I cannot assure him of with certitude. If I could tell him what I intend to do I would do it.

Mr. President, I now renew my request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. What was the request?

Mr. ROBERT C. BYRD. The same request.

Mr. SCHMITT. Mr. President, reserving the right to object, I believe the distinguished Senator from Montana has an amendment about which we never heard.

Mr. ABOUREZK. If I might say in the request is the consent agreement for the nongermane amendment by the Senator from Montana. That is all he was interested in.

Mr. SCHMITT. I understand. We never heard the title of the amendment.

Mr. ABOUREZK. I do not know the title of the amendment. It is an amendment he is going to offer.

Mr. SCHMITT. We understand that, but it is nice to know what we have agreed to being nongermane.

Mr. ROBERT C. BYRD. Mr. President, will someone find Senator MELCHER? He is just off the floor.

Mr. ABOUREZK. It is a limitation on land exchange between the Forest Service and the Burlington Northern Railroad, and it requires congressional approval if the exchange gets to be too big.

Mr. SCHMITT. Mr. President, I have no objection.

Mr. ROBERT C. BYRD. I have renewed the request, may I say to the distinguished Senator, if he is agreeable.

Mr. STEVENS. Mr. President, what is the pending business?

Mr. ROBERT C. BYRD. I have made the request on the parks bill.

Mr. STEVENS. It was my understanding that the Pennsylvania Avenue Development Corporation bill would come first. That was Senator HANSEN's request.

Mr. ABOUREZK. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank all Senators. I thank the Senator from Pennsylvania (Mr. HEINZ).

AIRCRAFT AND AIRPORT NOISE REDUCTION ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1196, S. 3279, the aircraft noise bill.

Mr. ABOUREZK. Mr. President, was that a unanimous-consent request?

Mr. ROBERT C. BYRD. Yes.

Mr. ABOUREZK. I object.

The PRESIDING OFFICER. The objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate proceed to the consideration of Calendar Order No. 1196, and I offer a cloture motion.

Mr. ABOUREZK. Mr. President, I wish to be recognized.

The PRESIDING OFFICER. Without objection, the clerk will report the cloture motion.

Mr. ABOUREZK. Mr. President, I seek recognition.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, without objection, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate upon the mo-

tion to proceed to the consideration of S. 3279, the Aircraft and Airport Noise Reduction Act of 1978.

Wendell H. Ford, Alan Cranston, Warren G. Magnuson, John Melcher, James B. Pearson, Ted Stevens, Barry Goldwater, Robert Dole, Malcolm Wallop; Wendell R. Anderson, Clifford P. Hansen, John A. Durkin, Frank Church, Daniel K. Inouye, Spark M. Matsunaga, Edward Zorinsky, Paul G. Hatfield, Patrick J. Leahy.

Mr. ABOUREZK. Mr. President, I seek recognition.

Mr. ROBERT C. BYRD. I did not lose the floor.

The PRESIDING OFFICER. The Senator from West Virginia has the floor.

Mr. ABOUREZK. Mr. President, a parliamentary inquiry.

Mr. ROBERT C. BYRD. Mr. President, I do not yield for that purpose.

Mr. ABOUREZK. When a motion is made, does not the Senator making the motion lose his right to the floor?

The PRESIDING OFFICER. The Senator from West Virginia has the floor, and has a right to it.

Mr. ROBERT C. BYRD. May I say to the Senator from South Dakota, I did not lose the floor in offering a cloture motion.

Mr. President, I withdraw the motion to proceed to the consideration of S. 3279.

The PRESIDING OFFICER. The motion to proceed is withdrawn. The Senator from West Virginia has the floor.

Mr. ROBERT C. BYRD. I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

PENNSYLVANIA AVENUE DEVELOPMENT

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2566.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2566) entitled "An Act to amend the Pennsylvania Avenue Development Corporation Act of 1972 to authorize appropriations and borrowings from the United States Treasury for further implementation of the development plan for Pennsylvania Avenue between the Capitol and the White House, and for other purposes", do pass with the following amendment:

Page 5, after line 11, insert:

TITLE II

SEC. 201. (a) There is hereby established the Jackson Hole Scenic Area Commission (hereinafter referred to as the "Commission"). The Commission shall be composed of nine members, as follows: (A) the Secretary of the Interior or his representative; (B) the Secretary of Agriculture or his representative; (C) the Governor of Wyoming or his representative; (D) a member of the Teton County Board of County Commissioners to be chosen by the county commission; (E) the mayor or a member of the town council of the town of Jackson, to be selected by the town council; and (F) four civilian members-at-large selected from among the residents of Teton County by the county commissioners, to be representative of a broad spectrum of community interests, and at least one of whom shall own commercial agricultural or ranch land within Teton County and shall be actively engaged in agricultural or ranching operations for commercial purposes.

(b) The representative of the Teton County Board of County Commissioners shall act as Chairman until a Chairman is elected by vote of the Commission.

(c) Unless otherwise required by this title the Commission shall act by affirmative vote of the majority of its nine members. Voting by proxy shall not be allowed.

(d) The frequency, time, and place of meetings shall be determined by the Commission, all meetings shall be open to the public.

(e) The Commission shall have the power to appoint and fix compensation of such additional personnel and such temporary and intermittent services as may be necessary to accomplish the purposes of this title without regard to the provisions of the civil service laws and the Classification Act of 1949.

(f) The Commission shall have the power to hold hearings and administer oaths, and make such rules consistent with the provision of this title as are necessary for the operation of the Commission.

(g) Civilian Commission members shall receive not more than $100 per day plus reasonable travel and other expenses incurred in the course of Commission business, reimbursed at current Federal rates.

SEC. 202. (a) The Commission shall develop a proposed Jackson Hole Scenic Area Plan (hereinafter referred to as the "Plan") which shall consider all privately owned lands in Teton County, except those private lands situated within Grand Teton National Park, as generally indicated on map dated July 1978, which shall be on file and available for public inspection in the offices of the governmental agencies and entities which are members of the Commission. The Plan shall include:

(1) a description of the lands within the Area;

(2) an evaluation and identification of the values present in such lands, with particular attention to the identification of areas of important scenic, wildlife, ecologic, hydrologic, and agricultural concern;

(3) a determination of land uses incompatible with the values of the above areas of concern;

(4) identification, mapping, and designation of all lands, the acquisition of which, or of interest therein, should principally be the concern of: (i) the National Park Service and United States Fish and Wildlife Service as "Interior Department Interest Areas"; and (ii) the United States Forest Service as "Agriculture Department Interest Areas" (hereinafter referred to as "interest areas");

(5) designation of the remainder of the Area as "State and local interest Area" within which the acquisition of lands, or interest therein, should be the concern of State and local agencies which have authority to acquire or hold lands on behalf of the public;

(6) recommendations for the immediate emergency acquisition of lands, or interests in lands, on which a proposed land use action is incompatible with, and poses an immediate threat to, the values identified in the Plan;

(7) recommendations for the acquisition of lands, or lesser interests therein, within the various Interest Areas identified, mapped, and designated pursuant to this title, or for regulatory controls which should be adopted by State or local government with respect to the use of such lands; and

(8) recommendations for procedures for updating and amending the plan after its approved by the Congress, and for assuring coordinated administration of the Scenic Area.

(b) Prior to adoption of the proposed Plan, the Commission shall hold at least one public hearing within the County of Teton for the purpose of receiving public comment on the proposed Plan. Notice of the date, time and location of such hearing shall be published in a local newspaper of general circulation at least once a week for two consecutive weeks, and shall contain information as to where a copy of the proposed Plan may be inspected. The proposed Plan shall not be adopted until at least thirty days after the last hearing.

(c) The Commission shall, upon adoption of the proposed Plan by a two-thirds vote of the entire Commission, submit the proposed Plan concurrently to the Secretary of the Interior and the Secretary of Agriculture (hereinafter referred to as the "Secretaries") for their review and approval or rejection. If neither Secretary has informed the Commission of his disapproval within sixty days from the date of submittal, the Plan shall be deemed to have been approved. If either Secretary disapproves the proposed Plan, he shall advise the Commission of the reasons therefor, together with his recommendations for revisions. The Plan shall be resubmitted by the Commission within sixty days. This process shall be repeated until a Plan is approved by both Secretaries and by a two-thirds vote of the entire Commission.

(d) Without regard to any other provisions of this title, it shall be the duty of the Commission to submit the Plan, together with any recommendations for additional legislation, to the Congress not later than one year from the effective date of this Act.

SEC. 203. The Commission shall be dissolved—

(a) upon submission of the Plan to the Congress, or

(b) upon expiration of a one-year-period commencing on the effective date of this Act, whichever occurs first.

SEC. 204. There are authorized to be appropriated not to exceed $250,000 to defray the expenses of the Commission, including salaries and costs incident to preparation of the Plan.

SEC. 205. (a) Pursuant to the intent of this title, the Secretary of the Interior and the Secretary of Agriculture, as they may jointly agree, are authorized, after consultation with the Commission, to acquire lands, or interests in lands, within Jackson Hole which are manifestly of critical scenic or ecological importance in their relationship to Federally owned lands, and which are demonstrably threatened by a change in land use which is incompatible with the purposes of this title. Any lands or interests in lands so acquired shall be managed by the Secretary in a manner appropriate to conserve, protect, and enhance the scenic and natural resource values of such lands until such time as he believes it in the best interests of proper management to transfer such lands or interests therein to a qualified State or local agency which will manage such lands or interests therein in accordance with the purposes of this title.

(b) For the purpose of acquiring lands or interests in lands described in this section, there are authorized to be appropriated not to exceed $5,000,000. Acquisition may commence only after written notice of intention to do so, with detailed justification therefor, has been made by either Secretary to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, and written concurrence has been received by such Secretary from both committees.

Mr. STEVENS. Mr. President, may I make a parliamentary inquiry?

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. There is a time agreement on this bill. Can we be apprised as to what the time agreement is?

The PRESIDING OFFICER. There is no time agreement. The Chair will observe that one was attempted, but objected to.

Mr. STEVENS. There was no time agreement on the Pennsylvania Avenue Development Corporation? Yes, last night.

Mr. ROBERT C. BYRD. Mr. President, that was done yesterday. Perhaps it was objected to; I do not know.

The PRESIDING OFFICER. There is a time agreement, of 20 minutes to be equally divided between the Senator from Oregon (Mr. MARK O. HATFIELD) and the Senator from South Dakota (Mr. ABOUREZK). Who yields time?

Mr. ABOUREZK. Mr. President, we are just trying to get our act together. I ask unanimous consent that we can have a short quorum call, without the time being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I would ask both cloakrooms to inform Senators that this may yet be a late evening, and rollcall votes may and very likely will occur. It is very important that as much work as can be done today be done today, in order that the Senate may be in a better position to adjourn sine die on Saturday evening at some point.

I suggest the absence of a quorum, under the same conditions.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ABOUREZK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 2077

(Purpose: Strike title II in its entirety)

Mr. ABOUREZK. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABOUREZK) proposes an unprinted amendment numbered 2077: Strike title II in its entirety.

Mr. ABOUREZK. Mr. President, this amendment would delete in its entirety title II, which involves the Jackson Hole Scenic Area proposal. It would add—I guess we are ready to go on that, are we? I move the adoption of the committee amendment, and yield back the remainder of our time.

The PRESIDING OFFICER. The amendment of the Senator from South Dakota, since it attempts to strike the entire House amendment, is not in order. The question is on agreeing to the House amendment.

Mr. ABOUREZK. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time not be charged to either side. We have to wait for one other Senator.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. President, the Senator can achieve his purpose——

The PRESIDING OFFICER. A quorum call is in progress.

Mr. ROBERT C. BYRD. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. The Senator from South Dakota can achieve his purpose by voting down the House amendment. Mr. President, I suggest the absence of a quorum without the time being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VIETNAM VETERANS WEEK

Mr. ROBERT C. BYRD. Mr. President, I hold in my hand a copy of House Joint Resolution 1147, a joint resolution authorizing and requesting the President to designate the 7-day period beginning on May 28, 1979, as "Vietnam Veterans' Week."

I understand there is no opposition to this. At the behest of the distinguished Senator from Pennsylvania (Mr. HEINZ) I ask unanimous consent that the Senate proceed for not more than 2 minutes to the consideration of House Joint Resolution 1147, that it be considered as having been read the first and second time, and that the Senate proceed to its immediate consideration.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, it is cleared on this side and we have no objection to proceeding to its consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 1147) authorizing and requesting the President to designate the 7-day period beginning on May 28, 1979, as "Vietnam Veterans Week."

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read twice by its title.

Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, I thank the majority leader for calling up this joint resolution authorizing and requesting the President to designate the week beginning May 28, 1979, as "Vietnam Veterans Week."

When I introduced a companion measure here in the Senate last July, the Senate Joint Resolution 151 received the cosponsorship of Senator ANDERSON, BAKER, CHILES, DECONCINI, DOMENICI, FORD, HASKELL, JOHNSTON, LUGAR, PERCY, SARBANES, SCHMITT, STEVENS, WALLOP, THURMOND, WILLIAMS, YOUNG, BURDICK, HART, RANDOLPH, RIBICOFF, MOYNIHAN, HATHAWAY, NELSON, ROTH, MATHIAS, MELCHER, and RIEGLE. As the only Vietnam-era veteran who has served to date in the Senate, I am proud that so many of my colleagues support me in this important initiative.

The week-long period would be a fitting and proper tribute to those men and women who dedicated their efforts, and in so many cases, their lives to the service of their country.

Since the end of the war in Southeast Asia, the Vietnam veterans have been quietly forgotten. Their readjustment has been a slow and most difficult one because they are struggling to be accepted into a society that would rather forget this period of our history. Whatever feelings one may have about the U.S. involvement in Southeast Asia, dedication rendered by those who served this country well must not be overlooked.

The Vietnam veteran, in many cases, is still faced with a high rate of unemployment and an unacceptable degree of underemployment. Many of those with special health care needs have been unable to avail themselves of adequate care. Additionally, the Vietnam veteran is encountering the hardship of an increase in the cost of education coupled with a decrease in funding available. And clouding those issues is the unfortunate negative image suffered by the Vietnam veteran because of his service in a controversial and unpopular conflict. It is that image that we must now seek to erase in order to afford Vietnam veterans the national respect they so richly deserve for the honorable service they rendered to this country.

"Vietnam Veterans Week" is a long overdue, yet appropriate way to express our gratitude to those who risked their lives to uphold the Government of the United States of America. I respectfully urge the Members to support this important resolution.

Mr. President, I would just like to say a special word of thanks to Senator THURMOND.

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order.

Mr. HEINZ. Mr. President, I would like to say a special word of thanks to Senator THURMOND who has had a tremendous interest in the problems of veterans, who also is ranking minority member on the Judiciary Committee and was so instrumental in clearing this resolution.

Also, I know, in the interest of passing

this legislation tonight, he temporarily set aside his interest in offering an amendment to it; namely, one urging the President to appoint an Assistant Secretary or a Deputy Assistant Secretary for Vietnam Veterans' Employment Affairs.

I also want to thank Senator EASTLAND and the members of the Judiciary Committee, and, most importantly, the members of the House Vietnam Veterans' Caucus, who were really instrumental in drafting this resolution.

Mr. RANDOLPH. Will the Senator yield?

Mr. HEINZ. I am happy to yield.

Mr. RANDOLPH. I commend the Senator from Pennsylvania (Mr. HEINZ). I will also say that the full membership, of the Veterans' Committee in the Senate, favor the passage of this legislation.

Mr. HEINZ. And the record certainly shows that the Senator from West Virginia (Mr. RANDOLPH) was an early and ardent supporter of this legislation.

Mr. THURMOND. Will the Senator yield?

Mr. HEINZ. I yield.

Mr. THURMOND. I commend the able Senator from Pennsylvania. I want to say I feel we have not done enough for the veterans of Vietnam. I think the Congress has done what it could, but I believe the executive branch needs to do more to try to find jobs for these Vietnam veterans.

I did start to amend this joint resolution to provide that the President would appoint a person to fill the position of the Deputy Assistant Secretary of Labor for Veterans Affairs. I thought it might delay or prevent this resolution from being adopted, so I did not offer it.

Again I commend the Senator from Pennsylvania.

Mr. HEINZ. The Senator from South Carolina has been too modest. He has been very accommodating. I am sure I express the sense of the House and Senate when I thank him for his sensitivity.

Mr. President, I yield back any time which remains.

The PRESIDING OFFICER. All time has been yielded back.

The joint resolution is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the joint resolution.

The joint resolution was read the third time.

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, Shall it pass?

The joint resolution—House Joint Resolution 1147—was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. HEINZ. Mr. President, I hope the majority leader will yield to me for the purpose of thanking him. I am all too ready, willing, and able to do so. I do so. He is a gentleman, a scholar, and also extremely eloquent.

Mr. ROBERT C. BYRD. Mr. President, the Senator's remarks are most welcome. One good turn deserves another.

The PRESIDING OFFICER. Without objection, the motion to lay on the table the motion to reconsider the vote by which the joint resolution was passed is agreed to.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senate is not in order. Senators will take their seats or retire to the cloakroom.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, this is the second time today I find I have to go to the mourner's bench. With a humble and contrite heart, I confess to the distinguished Senator from Pennsylvania that his recollection is better than mine, and that I did say, indeed, in response to his question—that upon the disposition of the hospital cost containment matter we would return to the pending business—I answered with the one word, "Yes."

I hope the Senator will accept my humble apology. I assure him that as soon as the park bill is disposed of, we will resume the consideration of the Sugar Act. I hope the Senator will accept my humble apology.

Mr. HEINZ. Mr. President, if the Senator will yield, this Senator will say that no apology has been asked for and none should be given on the part of the majority leader. I am pleased to be able to return to that matter, and I thank the Senator.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. CHURCH. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

CERTAIN LAND CONVEYANCES—H.R. 7971

Mr. CHURCH. Mr. President, the distinguished Senator from Pennsylvania has kindly consented that after the disposition of the omnibus park bill he would be willing for the Senate to proceed to the consideration of H.R. 7971.

Mr. ROBERT C. BYRD. Can we get a time agreement on that?

Mr. CHURCH. I would suggest 5 minutes would be sufficient.

Mr. ROBERT C. BYRD. Will the Senator help me to get a time agreement on that so that I can keep my promise?

Mr. CHURCH. Yes, this bill has been cleared on both sides of the aisle, twice now—last night and again tonight—with the two amendments I will offer to it. So there is no objection that I know of.

I can take care of the two amendments within 5 minutes.

Mr. JAVITS. Mr. President, will the distinguished Senator advise me of the nature of this bill?

Mr. ROBERT C. BYRD. Mr. President, may I say to the distinguished Senator from New York this is Calendar Order No. 1205, on page 23 of the calendar, H.R. 7971, an act to validate the conveyance of certain land in the State of California by the Southern Pacific Transportation Co.

TIME-LIMITATION AGREEMENT—H.R. 7971

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a 10-minute time limitation on that bill, equally divided between Mr. CHURCH and the Senator from Oregon (Mr. MARK O. HATFIELD), a time limitation on any amendment thereto of 10 minutes, to be equally divided in accordance with the usual form, the same limitation with respect to any debatable motions, appeals, or points of order, and that the agreement be in the usual form.

Mr. CHURCH. I thank the Senator.

SUGAR

Mr. ROBERT C. BYRD. Mr. President, if it is agreeable with the distinguished Senator from Pennsylvania, we shall proceed with that bill first and then go back to the sugar bill.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, with the understanding that the time not be charged against either side.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. In order best to utilize the time of the Senate, if the distinguished Senator from South Dakota and the distinguished Senator from Oregon are agreeable, they are going to require a few more minutes.

Mr. ABOUREZK. We are ready.

Mr. ROBERT C. BYRD. I yield the floor.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. ABOUREZK. I yield briefly to the Senator from New Jersey (Mr. CASE).

PENNSYLVANIA AVENUE DEVELOPMENT

The Senate continued with the consideration of S. 2566.

UP AMENDMENT NO. 2078

Mr. ABOUREZK. Mr. President, on S. 2566, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. ABOUREZK) proposes an unprinted amendment numbered 2078.

Mr. ABOUREZK. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the House engrossed amendment, add the following new titles.

TITLE II

SAN ANTONIO MISSIONS NATIONAL HISTORICAL PARK

SEC. 201. (a) In order to provide for the preservation, restoration, and interpretation of the Spanish Missions of San Antonio, Texas, for the benefit and enjoyment of present and future generations of Americans, there is hereby established the San Antonio Missions National Historical Park (hereafter in this section referred to as the "park") consisting of Concepcion, San Jose, San Juan, and Espara Missions, together with areas and features historically associated therewith, as generally depicted on the drawing entitled "Boundary Map, San Antonio Missions National Historical Park", numbered 930-80,022-C and dated May 1978, which shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior, and in the offices of the superintendent of the park. After advising the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives, in writing, the Secretary may make minor revisions of the boundaries of the park when necessary by publication of a revised drawing or other boundary description in the Federal Register.

(b) For the purposes of this section, the Secretary is authorized—

(1) to acquire by donation, purchase with donated or appropriated funds, or exchange, lands and interests therein constituting the following generally described areas in the historic missions district of the city of San Antonio, Texas—

(A) Mission San Jose y San Miguel de Aguayo;

(B) Mission Nuestra Senora de la Purisima Concepcion de Acuna;

(C) Mission San Francisco de la Espada;

(1) Espada Acequia, the section of approximately five miles along the west side of and parallel to the San Antonio River;

(E) Espada Dam and Aqueduct;

(F) Mission San Juan Capistrano;

(G) San Juan Acequia, on the east side of the San Antonio River; and

(II) such lands and interests therein which the Secretary determines are necessary or desirable to provide for public access to, and interpretation and protection of, the foregoing; and

(2) to enter cooperative agreements with the owners of any historic properties, including properties referred to in paragraph (1), in furtherance of the purposes of this section.

Each agreement under paragraph (2) shall provide among other things that the owner will hold and preserve the historic property in perpetuity and will not undertake or permit the alteration or removal of historic features or the erection of markers, structures, or buildings without the prior concurrence of the Secretary, and that the public shall have reasonable access to those portions of the property to which access is necessary in the judgment of the Secretary for the proper appreciation and interpretation of its historical and architectural value. Pursuant to such cooperative agreeemnts and notwithstanding any other provision of law to the contrary the Secretary may, directly or by contract, construct, reconstruct, rehabilitate, or develop such buildings, structures, and related facilities including roads, trails, and other interpretative facilities on real property not in Federal ownership and may maintain and operate programs in connection therewith as he deems appropriate. Any lands or interest therein owned by the Catholic Archdiocese of San Antonio, the State of Texas, or any political subdivision of such State, including the San Antonio River Authority, may be acquired by donation only.

(c) (1) With the exception of any property deemed necessary by the Secretary for visitor facilities or administration of the park, any owner or owners of improved property on the date of its acquisition by the Secretary may, as a condition of such acquisition, retain for themselves and their successors or assigns a right of use and occupancy of the property for noncommercial residential purposes, for twenty-five years, or, in lieu thereof, for a term ending at the death of the owner or his spouse, whichever is later. The owner shall elect the term to be reserved. The Secretary shall pay to the owner the fair market value of the property on the date of such acquisition less the fair market value on such date of the right retained by the owner.

(2) A right of use and occupancy retained or enjoyed pursuant to this subsection may be terminated with respect to the entire property by the Secretary upon his determination that the property or any portion thereof had ceased to be used for noncommercial residential purposes and upon tender to the holder of a right an amount equal to the fair market value, as of the date of tender, of that portion of the right which remains unexpired on the date of termination.

(3) The term "improved property", as used in this subsection, shall mean a detached, noncommercial residential dwelling, the construction of which was begun before January 1, 1978 (hereinafter referred to as a * * * the dwelling is situated, the said land being in the same ownership as the dwelling, as the Secretary shall designate to be reasonably necessary for the enjoyment or the dwelling for the sole purpose of noncommercial residential use, together with any structure accessory to the dwelling which are situated on the land so designated.

(d) The Secretary is authorized and directed to take prompt and appropriate action in accordance with the provisions of this section and any cooperative agreement hereunder to assure the protection and preservation of the historical and architectural values of the missions and the areas and features historically associated therewith within the boundaries of the park. The park shall be administered by the Secretary in accordance with this section and provisions of law generally applicable to units of the National Park System, including the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1 et seq.) and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461-467).

(c) (1) There is hereby authorized to be established by the Secretary, a San Antonio Missions Advisory Commission. The Commission shall be composed of seven members, each appointed for a term of two years by the Secretary, as follows:

(A) one member to be appointed from recommendations made by the Governor of the State of Texas;

(B) one member to be appointed from recommendations made by the County Commissioners of Bexar County, Texas;

(C) one member to be appointed from recommendations made by the City Council of the City of San Antonio, Texas;

(D) one member to be appointed to represent non-Federal property owners whose property is operated and maintained in accordance with cooperative agreements with the Secretary pursuant to subsection (b) (2);

(E) one member from the membership of a local conservation or historical organization; and

(F) two members representing the general public.

The Secretary shall designate one member to be Chairman of the Commission and may fill any vacancy in the same manner in which the original appointment was made.

(2) Members of the Commission shall serve without compensation as such, but the Secretary may pay expenses reasonably incurred by the Commission and may reimburse members for reasonable expenses incurred in carrying out their responsibilities under this section on vouchers signed by the Chairman.

(3) All appointments to the Commission shall be made by the Secretary within six months after the date of the enactment of this Act and the Secretary, or his designee, shall from time to time, but at least semiannually, meet and consult with the Advisory Commission on matters relating to the park and with respect to carrying out the provisions of this section.

(4) Unless extended by Act of Congress, this Commission shall terminate ten years after the date of its first meeting with the Secretary or his designee.

(f) (1) There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this section, but not more than $10,000,000 for the acquisition of lands and interests in lands.

(2) For the development of essential public facilities there are authorized to be appropriated not more than $500,000. Within one year from the date of enactment of this Act, the Secretary shall develop and transmit to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate a final master plan for the development of the park consistent with the objectives of this section, indicating (A) the facilities needed to accommodate the health, safety, and interpretive needs of the visiting public; (B) the location and estimated cost of all facilities; and (C) the pro'ected need for any additional facilities within the park.

TITLE III—TO ABOL'SH THE MAR-A-LAGO NATIONAL HISTORIC SITE

SEC. 301. That (a) the Act of October 21, 1972 (Public Law 92-527; 86 Stat. 1049) is hereby repealed; the Mar-A-Lago National Historic Site in Palm Beach, Florida, and the Mar-A-Lago National Historic Site Advisory Commission, as established by such Act, are hereby abolished.

(b) Within 120 days after the date of the enactment of this Act, the Secretary of the Interior shall take such action as may be necessary to transfer the real and personal property which, before the date of the enactment of this Act, comprised the Mar-A-Lago National Historic Site (including any improvements, repairs, and additions thereto) to the Marjorie Merriweather Post Foundation of the District of Columbia. Such action shall be consistent with the terms and conditions of the deed of conveyance from Marjorie M. Post to the United States (dated December 18, 1972).

TITLE IV

SEC. 401. The Secretary of the Interior shall prepare and transmit to the President of the United States, the Committee on Interior and Insular Affairs of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate a study of Historical Camden, consisting of approximately 90 acres of land in Camden, South Carolina, to determine the feasibility and desirability of establishing such area as a unit of the National Park System. The study shall be transmitted not later than two years following the date on which funds are appropriated for the study and shall include cost estimates for any necessary acquisition, development, operation and maintenance, as well as any alternatives for the administration and protection of the area.

Mr. ABOUREZK. Mr. President, this amendment would add to the Pennsylvania Avenue development bill several provisions follow:

To establish the San Antonio Missions National Historical Park in Texas.

To repeal the Mar-A-Lago National Historic Act.

Study of Historic Camden, S.C.

I move adoption of the amendment.

Mr. MOYNIHAN. Will the Senator yield?

Mr. ABOUREZK. Yes, I yield.

Mr. MOYNIHAN. Mr. President, I rise for a simple purpose. The Pennsylvania Avenue enterprise is one with which I have been involved for a very long while. I was a young member of the Kennedy administration when this began and did this job for President Kennedy. When he left for Texas on his last trip, his final word to us was to have the plans for Pennsylvania Avenue ready when he returned; but of course, he did not.

It is well-known that when Mrs. Kennedy left the White House, she gave President Johnson a short list of things she thought the President might wish to see finished in his name. High on that list was the Pennsylvania Avenue plan. So I rise to ask the Senator from South Dakota if the amendments—I have no reason to object to these amendments, but I hope they are not of a nature that will jeopardize the primary purpose of the legislation.

Mr. ABOUREZK. No, it enhances it.

Mr. MOYNIHAN. I am happy to hear that.

For those who are involved in urban planning and urban renewal, I only note that this is 17 years since the enterprise first began.

Mr. ABOUREZK. I thank the Senator from New York.

I yield 1 minute to the Senator from South Carolina.

Mr. MOYNIHAN. Mr. President, if the Senator will allow me just to continue my remarks to say that from the first, I should like to record, there has been one Member of the U.S. Congress who has been unfailingly faithful to this purpose. That is my distinguished friend from the State of Washington (Mr. JACKSON).

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I thank the distinguished Senator from South Dakota for the consideration he has given this important matter. Camden is one of the most historic places in the United States.

Mr. President, I rise in support of the amendment offered by the distinguished junior Senator from South Carolina and myself. This amendment authorizes the Secretary of Interior to conduct a feasibility and desirability study of the admission of "Historic Camden" into the National Park Service. The study is to be funded at $20,000.

Camden, established in 1732, is the oldest inland city in South Carolina. One of South Carolina's most famous American Revolutionary battles took place in Camden. "Historic Camden" is a 90-acre monument to this battle and historic city.

"Historic Camden" was opened in 1970 by the Camden Historical Commission. The commission has done an outstanding job of locating and rebuilding the Revolutionary period fortifications and of restoring General Cornwallis' headquarters in the Kershaw House. Over 25,000 persons visit this historic attraction annually.

Over the years, the Historical Commission has labored long and hard to secure funds for the development of "Historic Camden." Funds were successfully obtained from the Department of Interior, the Department of Housing and Urban Development, the Coastal Plains Regional Commission, the National Endowments for the Arts, and the General Assembly in South Carolina. In addition, funds have been obtained from the city of Camden, Kershaw County, and extensive private contributions. Today, the total cash investment exceeds over $1.2 million.

Mr. President, I urge my colleagues to join me in supporting this amendment. "Historic Camden" needs the resources and expertise of the National Park Service if the site is to continue to be properly developed and managed. We should approve this amendment today to insure that this landmark is preserved as a part of our national heritage.

THE FUTURE OF PENNSYLVANIA AVENUE

Mr. CHURCH. Mr. President, the authorization for the Pennsylvania Avenue Development Corporation will permit further implementation of the plan for the renewal and restoration of Pennsylvania Avenue. The shape and direction of the changes that will be effected along that historic street are and ought to be matters of great interest to this body.

Our Nation's Capital, the place where America's national destiny is daily shaped, visually reflects the character of the American people. Its great beauty rests essentially on the character of its buildings and its open vistas, resulting from the master plan of Pierre Charles L'Enfant, as submitted to this body in 1791. First and foremost, Pierre L'Enfant viewed the city as a total environment. Two of the overriding principles to emerge from his plan were: First, the dominance of the Capitol—the center of democracy and the will of the people, and second, the significance of the vista as emphasizing beauty, openness, and the freedom of the individual.

To preserve these features during the planning and development of the Nation's Capital, the limitation on building heights has been the most essential planning tool. In carrying out the principles of the L'Enfant plan, Washington's most unique characteristic—its horizontal quality—was zealously guarded by the Congress, the McMillan Senate Commission of 1901, and the official planning bodies charged with protecting Washington's beauty.

The recent decision of the District of Columbia Zoning Commission authorizing an increase in building heights along a five-block area on the north side of Pennsylvania Avenue from the long-adhered-to limitation of 130 feet to 160 feet gives cause for concern about its potential effect on Washington's inherent beauty and the historic character of the Pennsylvania Avenue National Historic Site.

No area of this city was more important to L'Enfant and none more integral to our national history than Pennsylvania Avenue. It is more than an architectural setting. It is a direct connection between the legislative and executive branches of Government. It is the center stage for countless dramas in almost 200 years of our national life. Thus, living history up to this very moment has forged the integrity of Pennsylvania Avenue along the route traveled by Presidents, visiting heads of state, and people from all walks of life.

The Pennsylvania Avenue Development Corporation is charged by the act of October 27, 1972 (Public Law 92–578) to carry out a development plan for Pennsylvania Avenue and environs and to further the purposes for which the Pennsylvania Avenue National Historic Site was officially designated in 1965 by the Secretary of the Interior with the concurrence of the President. The primary purposes of this corporation is to preserve the essential historic character of the national pathway where so much of our national history is reflected. Preservation of these historic values requires great sensitivity to the events of history and to the setting in which they occurred. As the plans of the Pennsylvania Avenue Development Corporation go forward, it is critically important that the basic principles of the L'Enfant plan be utilized as a guide in preserving the beauty and historic integrity of Pennsylvania Avenue. In all future planning, great care should be given to building heights within the Pennsylvania Avenue National Historic Site, with particular reflection upon the wisdom of adhering to a 130-foot limitation in building heights.

As the Pennsylvania Avenue Development Corporation proceeds with its planning, I believe it is of paramount importance for the Corporation to consult closely with the Senate and House committees concerned, particularly in the early planning stages, so that the interest of all the American people in protecting the inherent beauty and historical character of Washington may be expressed. Such consultation should include all facets of the future plans, and in particular those which would involve an increase in building heights above 130 feet or a rerouting of the historic avenue itself.

In addition to the necessary role of the Congress to provide a focal point for the national interest, the views of citizen organizations should be given the most careful consideration by the Pennsylvania Avenue Development Corporation as it moves forward with its plans.

Congress also has a duty to preserve and interpret the principles which guided L'Enfant and to make certain that in the eagerness to embrace the needed enhancement of Pennsylvania Avenue, we do not lose sight of its living history nor the most essential ingredients—its low profile and openness—which have contributed to Washington's beauty and stamped its unique character for 187 years.

Mr. HEINZ. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ABOUREZK. I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2079

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 2079.

At the end of the House engrossed amendment insert the following new title:

TITLE V

SEC. 501. (a) In order to preserve and interpret for the benefit of present and future generations the site of the first military training camp established in the United States, the Secretary of the Interior is authorized to acquire by donation, purchase, or exchange, the real property described in subsection (b) for the establishment and administration of a national historic site.

(b) The real property referred to in subsection (a) is that real property in Beaver County, Pennsylvania, containing twenty-two acres more or less, in the northernmost part of Harmony Township, adjacent to Baden Borough, which is bordered by Duss Avenue, State Highway 65, and Logan Lane.

(c) The property acquired under this section shall be known as the "Legionville National Historic Site", and it shall be administered by the Secretary of the Interior, acting through the National Park Service, in accordance with the Act of August 25, 1916, entitled "An Act to establish a National Park Service, and for other purposes" (16 U.S.C. 1, 2–4) and the Act of August 21, 1935, entitled "An Act to provide for the preservation of historic American sites, buildings, objects, and antiquities of national significance, and for other purposes" (16 U.S.C. 461–467).

(d) The Secretary may not expend more than $500,000 from the Land and Water Conservation Fund for land acquisition nor more than $500,000 for the development of essential facilities: *Provided*, That no funds for the development of essential facilities shall be authorized prior to October 1, 1978.

(e) Within three years from the date of the enactment of this Act the Secretary shall develop and transmit to the Committee on Energy and Natural Resources of the Senate and to the Committee on Interior and Insular Affairs of the House of Representatives a general management plan for the use and development of the site consistent with the purposes of this section, indicating—

(1) the lands and interests in lands adjacent or related to the site which are deemed necessary or desirable for the purposes of resource protection, scenic integrity, or management and administration of the area in furtherance of the purposes of this section and the estimated cost hereof;

(2) the number of visitors and types of public use within the site which can be accommodated in accordance with the protection of its resources; and

(3) the location and estimated cost of facilities deemed necessary to accommodate such visitors and uses.

Mr. HEINZ. Mr. President, this is a noncontroversial amendment that I have discussed with the majority and minority on this bill.

Mr. President, this amendment is of particular importance to Pennsylvania and is fully in line with intent of this legislation. The measure has previously passed the Senate but was not considered in the House.

The amendment would establish the Legionville National Historic Site in Beaver County, Pa. Legislation to establish this national park, S. 1104, was approved by this body nearly 1 year ago, on October 28, 1977.

Organizations and individuals who have endorsed this measure in Pennsylvania are dedicated in their efforts to the establishment of this national historic site and have worked long and hard for this designation. Nationally, the American Legion, which derives its name from this campsite, has endorsed this proposal for the Legionville National Historic Site. President Carter, in his visit to this area for the Aliquippa Town meeting, was also apprised of the historic value of this site, and thus gained a personal understanding of the rich heritage of Legionville, which has been recognized since 1918, when the Commonwealth of Pennsylvania and the Daughters of the American Revolution declared Legionville a historic site.

As my colleagues may remember, Legionville is significant to our national heritage, in that it was the first military training camp in the United States and the base for the first "Legion of the United States" under Gen. Anthony Wayne. It was here that the first regular army of the United States under the aggressive command of General Wayne trained for 2 years to become a crack fighting force. And it was from here that General Wayne and the first "Legion of the United States" set out to secure the Northwest Territories for settlement.

This expedition was the third attempt of our new struggling Nation to protect the settlers moving into the Ohio Valley from constant Indian attacks. The two previous expeditions had been badly beaten by the Indians, and these regions of the land which were to become the great States of Ohio, Illinois, Indiana, and Michigan remained unsafe for settlement. The protection of these brave American pioneers and the security of these territories became a grave concern of the first administration. To resolve this threatening situation, President Washington appointed Anthony Wayne as the commander of the first regular army of the United States and directed him to mold these troops into an effective fighting force.

Wayne set up camp on the site of an old Indian village and kept the army there for 2 years of intensive and uninterrupted military training. The camp immediately became known as Legionville, because of the presence of this first "Legion of the United States." These ragged soldiers were shaped into an effective fighting unit, the first regular army of the United States, and under the command of General Wayne encountered and defeated the Indians at the Battle of Fallen Timbers, bringing peace to this region and enabling passage to the West to again proceed.

As an important center of the military in our Nation's early history, Legionville attracted many famous individuals. Among those serving under General Wayne were William Henry Harrison, Wayne's aide-de-camp, and later President of the United States; Lt. William Clark, who served at Legionville before teaming with Meriweather Lewis for their famous expedition up the Missouri River to the Pacific; and Zebulon Pike, who served as one of our generals during the War of 1812 and for whom Pike's Peak is named.

Even before this military training camp, Legionville, in the middle 1700's was the site of one of the largest Indian settlements of that time. This settlement, known as Logstown by the Indians, was visited by George Washington during his scouting of the region's French forts in the early 1750's. Recently, this Indian site has undergone a renewed archeological interest with some evidence to merit support for a university conducted excavation.

Yet, in spite of this rich historical significance, Legionville is one of the few remaining major Indian and revolutionary-era sites still undeveloped and unrestored in the United States. With the support of my Pennsylvania colleague, Senator RICHARD SCHWEIKER, who cosponsored the Senate bill, I again ask approval of this measure as an amendment to this parks legislation.

Mr. ABOUREZK. Mr. President, we have discussed the amendment and it has been passed by the Senate. We accepted the amendment on our side.

Mr. MARK O. HATFIELD. We accept it on our side.

Mr. HEINZ. I move adoption of the amendment.

Mr. ABOUREZK. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HEINZ. I move to reconsider the vote by which the amendment was agreed to.

Mr. ABOUREZK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JACKSON HOLE SCENIC AREA

Mr. WALLOP. Mr. President, may I inquire of the distinguished manager of the bill if the amendment to remove the Jackson Hole Scenic Area bill is a pending matter?

Mr. ABOUREZK. No, we moved to delete title 2, but I found out that the procedural situation was that such a motion would not be in order. I have not deleted it, so it is not a pending matter.

Mr. WALLOP. Is such a motion to be made in that form appropriate?

Mr. ABOUREZK. Not on the Senate floor.

Mr. WALLOP. Am I to understand that the Jackson Hole Scenic area bill——

Mr. ABOUREZK. It would be in conference as a House-passed measure. However, I can say that the committee intends to disagree with the Jackson Hole amendment and attempt to delete it in conference.

I yield 4 minutes to the Senator from Wyoming on my time.

Mr. WALLOP. Mr. President, I understand the controversy that is connected with this and the difficulty it causes various people on the floor. How-

ever, I had intended to offer as a substitute to the proposed amendment from the distinguished floor manager of this bill a proposal that would have reduced the Jackson Hole Scenic area bill to nothing but a study it would have taken out all emergency acquisition authority and funds and therefore removed all question of possible condemnation, and would have allowed the $250,000 for the study to remain intact.

Mr. President, Jackson Hole in Wyoming is one of the most singular physical natural resource attractions that exists in the United States.

I have a number of statements that I ask unanimous consent to have printed in the RECORD at a point subsequent to my remarks. The first is a statement by the Governor of Wyoming in support of a Jackson Hole Scenic Area; the second is the testimony of the Teton County Board of Commissioners before the joint House-Senate field hearing on this legislation last June.

Third is a letter from the county of Teton signed by three county commissioners.

Fourth is a letter from the U.S. Department of the Interior signed by Robert L. Herbst, Assistant Secretary for Fish and Wildlife and Parks, on this matter in support of the House-passed version of this legislation but asking that Congress insure its funds cannot be used for condemnation.

Finally, I am inserting a petition signed by 51 major landowners in favor of this legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF ED HERSCHLER

Mr. Chairman, my name is Dan Spangler. I am an assistant to the Governor's Planning Coordinator. I am appearing today on behalf of Governor Ed Herschler. Governor Herschler regrets that he is unable to attend this hearing due to a previous commitment.

The Jackson Hole Scenic Area Bill represents a praiseworthy and innovative concept. It is the culmination of long and hard work by residents of Teton County, who developed the concept and drafted the initial proposal. I applaud their initiative and heartily approve of a local government assuming this kind of leadership. Local action of this type is far superior to the usual case where we are reacting to edicts coming from the federal level.

A number of state agencies have had the opportunity to review and comment on this bill in its initial stages. This provided an opportunity to contribute ideas and suggestions from the state's perspective.

The State of Wyoming shares the concerns of Teton County and of the nation about the future of Jackson Hole. It is of great importance to preserve the magnificent scenery, abundant wildlife, and Western heritage of this area for local residents and for the millions of Americans who visit here each year. National demands for outdoor recreation will continue to grow rapidly.

From the view of state government, tourism is one of our economic mainstays and the Jackson Hole Area is a prime drawing card. However, this resource faces a threat of over-development. The pressures upon agricultural land owners to sell for housing and commercial purposes are tremendous. How can we preserve these natural wonders while at the same time allowing for healthy economic growth? Large scale expansion of the present Park boundaries is not the answer. This results in ejectment of private citizens from their homes and lands while further reducing the county's tax base. Alternatively, an overly-strict system of zoning and other land use controls would unfairly deprive land owners of property values without compensation.

The scenic area proposal represents a middle ground between these two extremes. Landowners can retain their property while scenic areas are protected with the landowner being compensated for the value of his development rights.

Unfortunately, it is not in the power of the State of Wyoming to implement such a program by itself. Wyoming has the second lowest population of the fifty states. With its limited resources, it cannot undertake a preservation program of this magnitude. The 4 million people who annually visit Jackson Hole are approximately ten times the number residing in the entire State of Wyoming. Thus, the approach of this legislation, to include all levels of government, is particularly appropriate.

You may be assured that the agencies of Wyoming State Government will accept their roles as outlined in the bill and will fulfill the responsibilities placed upon them by the scenic area plan.

Section 5(c) of the bill gives the Secretaries of Interior and Agriculture the authority to veto the proposed plan. In order to provide an additional element of state and local control to offset this federal authority, I propose that the Governor of the State of Wyoming also be accorded this veto power.

I endorse the use of scenic easements as the major tool for carrying out the program. The ranch lands of Teton County should remain in private ownership, to preserve the tax base and to retain productive uses.

Reliance upon easements enables the goals of the scenic area to be met, while the rights of property owners are protected.

Teton County has enacted a comprehensive land use plan which considers the environmental constraints on its land and sets density limits. However, we cannot fairly ask the relatively few landowners of Teton County to preserve, at their expense, a landscape and way of life for the entire nation to enjoy. That burden must be spread among the many who benefit.

The Jackson Hole Scenic Area Bill proposes an idea which has great potential for use in other significant national interest areas. I can conceive of no more appropriate place to initiate the concept than in Jackson Hole. Surrounded by federally owned land, enjoyed by vast numbers of Americans each year, there is no area whose preservation should be of greater concern to the nation.

The State of Wyoming would be pleased to be a participant in the Jackson Hole Scenic Area Plan. I appreciate your interest and concern in arranging these hearings and in permitting me to present these views.

STATEMENT OF THE BOARD OF COUNTY COMMISSIONERS OF TETON COUNTY, WYO.

Mr. Chairman and distinguished members of the Senate and House of Representatives, I am Max May, Chairman of the Board of County Commissioners of Teton County, Wyoming. On behalf of the Commissioners, I welcome you to Jackson Hole and thank you for being here today. The following statement represents the views of the Teton County Commissioners.

In the Rocky Mountain West, we hear a lot about boom towns and impacted communities. You may not think of Jackson Hole in that category, but many people are beginning to. For here, surrounded by nearly 18 million acres of national parks, forests and wildlife refuges, is a community impacted by its own beauty. Four million visitors come here each year. They come to the national parks and forests, but they find great enjoyment in seeing the privately-owned ranches of this valley, the haymeadows and wide open spaces which have been part of Jackson Hole since it was first settled. But change is coming rapidly; road side development, new shopping centers and subdivisions are beginning to crowd out those peaceful ranch lands and change the character of the entire area.

Teton County has long believed that the scenic and wildlife values on our private lands must be preserved, to complement the federal lands around us. We've done what we can to encourage that preservation. But we believe the Jackson Hole Scenic Area bill is the only certain, permanent way to do the job.

In recent years, county-wide surveys, questionnaires and elections have shown that Teton County residents place high priority on preserving Jackson Hole's scenic and environmental resources. With that support, we as a County Commission have taken the lead in seeking ways to accomplish that. In 1975 and 1976, we were represented on the Steering Committee which advised the National Park Service on its study of possible boundary expansion of Grand Teton National Park. Subsequently we appointed the Teton County Citizens Group, to examine alternatives to Park boundary expansion and to recommend other ways to preserve the special qualities of our private lands. We funded and encouraged the work of the Study Group. The result of its efforts is the Jackson Hole Scenic Area bill, a truly cooperative effort of County government, local residents, and local representatives of federal and state agencies. This Commission endorsed the bill and recommended it be introduced in Congress.

In proposing the legislation, several concerns have guided our thinking: Will the tax base of the County be preserved? Are property rights protected? Will local government and local citizens have a strong voice in the planning and administration of the Scenic Area? We believe this bill, with a few modifications which I will mention later, responds very well to those concerns.

Reliance on easements, rather than fee title acquisition, assures that the land will remain on the tax rolls and that the economic base of the County will be preserved. Easements also assure protection of private property rights. A landowner can sell some or all of his development rights and receive fair market value. He continues to own the land and use it productively; he can sell it or leave it to his heirs. In addition, the structure of the Scenic Area Commission guarantees a strong local voice in the planning and administration of the Scenic Area. The local government functions as a partner with the state and federal government.

As I mentioned, we do propose a few modifications in the bill, to clarify our intent and that of the community regarding these local concerns. We submit these recommendations in writing, but I will summarize them here. We ask that the amount of fee title acquisition permitted be reduced from five per cent of the county's privately-owned land to one per cent; this change emphasizes the continuation of private ownership and of traditional land uses, so important to the Scenic Area concept.

We request that the bill specify that all acquisition be at fair market value, established at the time of acquisition by a Board of Appraisers, consisting of one appraiser selected by the federal government, one selected by the County Commission, and a third selected jointly by both. We suggest clarification of the composition of the Scenic Area Commission and a requirement that the four at-large local members be selected by a county election. The bill should make clear that the Scenic Area Commission does not establish any monetary values on land. And we ask that the section allowing 2.5 percent of the appropriation to be used for development of public access or improvements be

deleted. These and other proposed changes merely "fine-tune" the proposal; none results in any major shift in the concept.

As federal officials, responsible for the pocketbooks and well-being of all the nation's taxpayers, you too have your concerns. For example, we've been asked why Teton County doesn't use its zoning powers to simply zone certain lands as agricultural or open space. Although our land use plan sets densities based on environmental constraints of land, we do not believe land can be legally or ethically regulated for the sole purpose of preserving aesthetic values, unless fair compensation is offered to landowners for this taking. Teton County, of course, does not have the resources to provide that compensation.

But is Jackson Hole really a national interest area, where spending federal dollars can be justified? The public investment in 18 million acres of land surrounding Jackson Hole, and the four million people who enjoy its beauty and recreational opportunities each year, are clear evidence that it is. The private lands cannot be isolated from the rest. Visitors enjoy both public and private lands, for different reasons. So do the big game and other wildlife that are so abundant here.

The price tag? Yes, $200 million dollars is a great deal of money, and we are aware that that sum may need to be modified. We continue to believe that it is an accurate maximum figure for protecting all of the scenic and wildlife values which the public now expects to find here. If preservation priorities are more limited, however, significant and worthwhile impacts can no doubt be made with fewer dollars.

You also ask, most correctly, what is Teton County doing for itself? On January 1 this year, we implemented a Comprehensive Land Use Plan, representing over four years of effort and over $115,000 of County funds. I submit for the record a copy of our Plan, which is enforced by our County Planning Commission and planning staff. In addition to regulating land use, densities, and standards for development, the Plan establishes a County Scenic Preserve, enabling the County to acquire fee title or easements on lands for the purpose of scenic preservation. The County's limited resources mean that almost all such preservation will necessarily be by gift, bequest or dedication of land.

A 208 Water Quality Study is also nearing completion here, in an attempt to preserve our pristine water quality. This is a joint effort of the Environmental Protection Agency, the National Park Service, U.S. Forest Service, Wyoming Game and Fish Department, United States Fish and Wildlife Service, and Teton County.

In addition, several months ago, we appointed and funded a Growth Study Committee. We were concerned about the apparent high rate of growth in Teton County, and directed this citizens' group to document growth figures as accurately as possible and prepare recommendations on growth management. The first phase of their task is nearly completed, and they will present testimony later today.

Thus we believe that Teton County *has* taken the lead in its own behalf. This County is willing and prepared to do its part to complement the Scenic Area bill. But with a population of less than 10,000 people, and the lowest assessed valuation of any county in Wyoming, Teton County cannot alone preserve those resources which the American public enjoys here.

If Jackson Hole does become a national Scenic Area, if you share the belief of many people that this entire valley is a national treasure, we urge the federal government and its agencies to consider additional steps to reinforce and complement that belief. A guarantee of grazing privileges on public lands at nominal fees would do much to encourage continuation of ranching here and thus help preserve the scenic and open lands so important to the goals of the Scenic Area. The Forest Service should limit timbering, oil and gas exploration and mining to areas in Jackson Hole where those activities would not detract from the purposes of a Scenic Area. If Jackson Hole really is a special place for all Americans, then its lands must be considered as one entity; all federal, state and local policies should be established with full recognition of the qualities and uses which the public values here.

In summary, we believe that the Jackson Hole Scenic Area bill is our only hope to preserve permanently the scenic and wildlife values on the privately-owned portion of this world-famous valley. It is a way for federal, state and local governments to join forces, to protect an area of supreme national interest, without sacrificing economic interests of the community or the general public. The bill is truly an innovative grass-roots effort.

Without this legislation, you may well return here in five years to find, not the ranch lands, not the hay meadows, not the open spaces, but sprawling suburbia in the midst of the largest complex of federal wilderness and recreational resources in the contiguous United States. If that happens, then despite the magnificence of Grand Teton National Park and all the other protected federal areas, both public and private lands will have been diminished. We will all have suffered an irretrievable loss.

Thank you again for the opportunity to present these views to you today, and for your interest in Jackson Hole.

STATE OF WYOMING,
COUNTY OF TETON,
Jackson, Wyo., July 25, 1978.

Hon. MALCOLM WALLOP,
U.S. Senate,
Dirksen Senate Office Bldg.,
Washington, D.C.

DEAR MALCOLM: We are very pleased that the omnibus parks bill recently passed by the House of Representatives includes legislation authorizing development of a Jackson Hole Scenic Area plan and a $5 million emergency acquisition fund. We hope the Senate parks bill will include similar provisions for Jackson Hole. Although some important issues remain unresolved in this modified legislation, we believe planning for the Scenic Area should proceed and authority for critical acquisitions should exist while these precedent-setting issues are fully discussed.

However, we are concerned about the ambiguity of condemnation authority in the House proposal. Since there is no mention of such authority, there are varying opinions about whether it exists in this proposal; we have heard strong views on both sides of the issue. Since there are probably as many opinions as people to give them, we think it is important that the matter be clarified. We therefore urge you to make clear in the legislative intent that this modified bill includes no condemnation authority or, if necessary, to insert a clause in the bill that acquisition authorized by this legislation may be only on a "willing buyer-willing seller" basis.

Frankly, we don't think condemnation would be a practical problem in the one-year period authorized by the legislation; such controversial action during this trial period would very likely jeopardize future acceptance of the entire Scenic Area concept. Moreover, the need to obtain approval for any acquisition from both House and Senate committees would be a further deterrent to controversial actions.

Nevertheless, there should be no uncertainty during the first year. While we realize that later legislation may need to include some limited condemnation authority, those limits have not been fully discussed or agreed upon. Until such time, we think the small amount of acquisition authorized in the present bill can be accomplished very satisfactorily on a willing buyer-willing seller basis.

We are extremely grateful for the support and assistance you have given to the Scenic Area proposal during the past year. We urge your continued leadership in working for a modified Jackson Hole bill this year.

Sincerely,

J. MAX MAY,
Chairman,
Teton County Board of Commissioners.

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., October 5, 1978.

Hon. MALCOLM WALLOP,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WALLOP: I would like to take opportunity to outline the Administration's commitment to the goals of your proposal to create a Jackson Hole Scenic Area. This letter is a followup to the telephone conversation which you had in early August with Deputy Assistant Secretary David Hales, who offered to confirm it in writing.

We believe that the Jackson Hole valley is a resource in which there is national interest and concern and for which some further form of protection is desirable. The National Park Service has been concerned with the changing nature of private ranchlands bordering Grand Teton National Park for several years, and in 1975 initiated a boundary study which recommended in its report that a Jackson Hole Scenic Area be established. The report noted that "The lands in Jackson Hole are of mutual concern to both public agencies and private interests because of their scenic qualities . . . If indiscriminate development is allowed to replace these traditional uses, the rural character of Teton County will be impaired and the region's pastoral setting will be degraded." The report recommended the establishment of a Jackson Hole Scenic Area rather than major boundary expansion.

We consider the question of the preservation of critical private lands in Jackson Hole an important priority which is of national concern as well as of state and local significance.

However, the Administration does not support Title X of H.R. 12536 as passed by the House of Representatives and awaiting action in the Senate. At a hearing on H.R. 12536 before the Senate Parks and Recreation Subcommittee recently, Deputy Assistant Secretary Hales testified that the Administration instead intends to develop our own proposal for legislation for Jackson Hole. We intend to begin working immediately with local people to develop a proposal which is mutually acceptable to the National Park Service and the Department of the Interior, the Department of Agriculture, the state of Wyoming, Teton County, and yourself. As Mr. Hales told the Subcommittee, the Administration would aim to have this proposal to Congress early in 1979, hopefully as early as March. It seems clear that expediency is required if we are to act effectively.

In closing, let me simply add my appreciation for your interest and work to preserve Jackson Hole, and my hope that we can continue to work together in this matter.

Sincerely,

ROBERT L. HERBST,
Assistant Secretary for
Fish and Wildlife and Parks.

My name is Buffy Hauge. I am one member of the large family that owns what has been known in this valley since 1929 as the Snake River Ranch.

I have the pleasure of presenting to you today a joint statement signed by fifty-some people who own land in Jackson Hole.

"We, the undersigned, representing the ownership of over 16,735 acres in Jackson Hole, strongly support the Scenic Area con-

cept. We feel this is the only realistic means of preserving the scenic foreground, wildlife habitat and ranching setting provided by the private lands in Jackson Hole and critically important to the surrounding federal holdings.

Although we do not all agree with all the provisions of the proposed Jackson Hole Scenic Area bill (S. 2162, H.R. 9135), we still strongly urge its adoption. With a few changes to make the bill better express what its authors clearly intended, we feel it will strike a fair balance between local and national interests in Jackson Hole.

We may also comment on the bill individually."

The 16,735 some acres these people represent constitute, by my rough count, about one third of the 50,000 some acres of undeveloped land in Jackson Hole, if you exclude from the gross private acreage lands within the Park, lands west of the Tetons, land in the Town of Jackson, developed land in Teton County and the riparian land whose ownership is still disputed by the Bureau of Land Management. The land the signers of this statement own lies in every major part of Jackson Hole except Spring Gulch. It includes places from Hog Island to Buffalo Valley, from the north fork of Fall Creek to the head of the Gros Ventre. Some of these people are cattle ranchers. Some have guest ranches. Some support their land through other work. Some of these people the current bill suits just fine and others are highly perturbed by the prospect of increasing the federal government's role in their lives but see no real alternative.

Mr. WALLOP. Mr. President, I make the following statement in support of the amendment I would have offered as a substitute.

Mr. President, I would like to take this opportunity to express my profound disappointment that the Energy and Natural Resources Committee has decided to move to delete title II, the Jackson Hole Scenic study area provision, from S. 2566.

My amendment would very simply restore a slightly modified title II Jackson Hole Scenic Area study provision to S. 2566. The House of Representatives has twice passed this study provision, first as title X of H.R. 12536, the omnibus parks bill, and recently as title II of this legislation. My amendment is the same as the House provision except for one change. The House provision provides $5 million for emergency acquisition of easements or lands in Teton County during the 1-year study period which it authorizes. My bill deletes the authorization for those emergency acquisition funds. There has been some concern in Teton County and here in Congress about providing these funds before the study is completed and Congress has a chance to see whether or not we want to create a Jackson Hole Scenic Area. Also there is some question as to whether or not these funds could be used to condemn lands during this study period. I have consulted with the residents and county commissioners of Teton County about this matter, and have concluded that it is probably best to delete the emergency acquisition authority and funding at this time. This of course makes any possibility of condemnation under this authority moot.

Mr. President, last September I introduced S. 2162, the Jackson Hole Scenic Area bill. The concept behind the legislation was conceived originally by the National Park Service, and developed by the landowners and local residents of Teton County, Wyo. who asked me to introduce the bill they developed. I strongly supported the legislation when I introduced it, and support it possibly even more strongly now. It sets forth a radically new and innovative concept for preserving private owned, nationally significant scenic lands through scenic easement acquisition. This approach to preservation was designed to protect the singular, esthetic values of the world-renowned Jackson Hole Valley, and to serve as a model for the future protection of other lands in America.

I support the concept of a Jackson Hole Scenic Area very strongly, and know many people in Teton County, the State of Wyoming, and across the country share my feelings on this subject. The chairman very graciously and at considerable inconvenience to himself agreed to chair a joint Senate-House field hearing this summer, which I attended and which I think was perhaps the finest discussion of any issue I have had the privilege of attending since I have been in the U.S. Senate. A number of valid questions were brought up at those hearings, questions about the extent of the need for this legislation, its cost, its effects on the land values and in Jackson Hole, and other important considerations. Because these questions should be answered before a scenic area is established, Representative RONCALIO of Wyoming introduced a modified version of the original Jackson Hole Scenic Area bill as part of the omnibus parks bill, on which it passed.

My amendment would, like the House provision, establish a nine-member Jackson Hole Scenic Area Commission, composed of Federal, State, and local representatives. This Commission would be directed to develop a proposed Jackson Hole Scenic Area plan which would evaluate the scenic, wildlife, and other natural qualities of the private lands in Jackson Hole and recommend ways to preserve them through State and local regulatory controls and Federal purchase of scenic easements, or development rights, and possibly a very small amount of land acquisition. Public hearings would be held, and the Secretaries of the Interior and Agriculture would review the proposed plan, which would be submitted to Congress within 1 year for review.

Mr. President, this legislation would complement existing efforts by the county to find ways to preserve the extraordinary scenic values in Jackson Hole. The county recently adopted a stringent land use plan which I am told is the most stringent regulatory effort in the northern Rockies. The county is conducting a growth control study which would incorporate growth control measures into the existing land use plan. The county developed this legislation, and I believe that a majority of the residents continue to firmly support it.

Mr. President, I want to emphasize once again that this provision authorizes only a study, which will be subject to public hearings, administration review, and which come back to and be reconsidered by Congress before any scenic area is established. I have talked at length to the members of the committee about this bill, and hope that with the changes I am proposing they will be able to accept it with the intention of reviewing it thoroughly next year.

Mr. President I would ask now to receive, if I may, some assurances from the distinguished chairman of the energy and Natural Resources Committee, that a matter of as major consequence as this to not only the State of Wyoming but to the Nation would have the committee's specific attention should such a bill be introduced in the next session of the Congress, assuming all of us are back, and the Lord be willing.

Mr. JACKSON. Mr. President, I gather the inquiry was directed to the junior Senator from Washington. Mr. President, I want to assure the distinguished junior Senator from Wyoming that when he introduces the legislation next year, as I understand his plan, we will consider the legislation very carefully.

It is not going to be shoved aside. I can give him that assurance, that there will be a hearing and the opportunity to consider the matter very carefully.

Mr. WALLOP. I thank my colleague from Washington.

I would only add that this is a bill which I was asked by local residents to introduce and which I personally support very strongly.

Since I introduced it, some local people have indicated opposition to it, and there have been some political circumstances which may or may not indicate feelings about it.

But after the elections, and if the community is still interested, it is the intention of the Senator from Wyoming to introduce this again. It is the intention of the Senator from Wyoming to push very hard that the bill be expedited, because, as the country well knows, there is not much time left before the remaining areas which need protection may well be developed. This legislation proposes one way in which those who own private land in Teton County can be compensated for the very rights which might otherwise be taken by acquisition by Grand Teton National Park if it chose to expand its boundaries, or by county zoning.

This is to avoid a taking, to provide the country with something of value, to provide the landowners with fair compensation, and to, hopefully, provide a way of doing it that all people will find fair and agreeable.

I hope I can count on the assurances of the committee in this regard.

The PRESIDING OFFICER. The time of the Senator from South Dakota has expired.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana seeks recognition.

Mr. ABOUREZK. Just 30 seconds.

The PRESIDING OFFICER. Without objection, for 30 seconds.

Mr. ABOUREZK. I could, like most managers of legislation, tell the Senator from Wyoming I will give it top priority

in the next Congress, but I do not think he would believe me.

I will say that I do know the distinguished chairman of the full committee does intend to give it top priority, and I am confident of that.

I thank the Senator for his interest and concern in this park area because I was up there and conducted the hearings with the Senator.

Mr. WALLOP. I thank my colleague.

I would only say that I thank him very deeply on behalf of myself and for committing future Congresses to behave.

Mr. ABOUREZK. I am happy to be able to do it.

The PRESIDING OFFICER. The Senator from Indiana.

UP AMENDMENT NO. 2080

(Purpose: To establish the Indiana Dunes National Lakeshore)

Mr. BAYH. Mr. President, I send to the desk an amendment on behalf of myself and my distinguished colleague (Mr. LUGAR) and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. BAYH), for himself and Mr. LUGAR, proposes an unprinted amendment numbered 2080.

Mr. BAYH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following new section:

SEC. . INDIANA DUNES NATIONAL LAKESHORE

(a) the last sentence of the first section of the Act entitled "An Act to provide for the establishment of the Indiana Dunes National Lakeshore, and for other purposes", approved November 5, 1966, as amended (16 U.S.C. 460u), is amended by inserting immediately before "which map", the following: "including the areas identified on such map as 'Study Areas', except the area designated as 'II-A'."

(b) Section 4 of such Act as amended (16 U.S.C. 460 u-3), is amended to read as follows:

"SEC. 4. (a) The Secretary's authority to acquire property by condemnation shall be suspended with respect to all improved property located within the boundaries of the lakeshore during all times when an appropriate zoning agency shall have in force and applicable to such property a duly adopted, valid zoning ordinance approved by the Secretary in accordance with the provisions of section 4A of this Act.

"(b) The term 'improved property', whenever used in this Act, shall mean, in the case of improved property located within the areas identified as 'Study Areas', a detached, one family dwelling, construction of which was begun before July 1, 1977, in the case of improved property located within the boundaries delineated on a map identified as 'A Proposed Indiana Dunes National Lakeshore', dated September 1966, and bearing the number 'LNPNE-1008-ID', such a dwelling construction of which was begun before January 4, 1965, and in the case of any other improved property, located within the lakeshore, such a dwelling construction of which was begun before February 1, 1973; together with so much of the land on which the dwelling is situated, such land being in the same ownership as the dwelling, as the Secretary shall designate to be reasonably necessary for the enjoyment of the dwelling for the sole purpose of noncommercial residential use, together with any structures accessory to the dwelling which are situated on lands so designated. The amount of land so designated shall in every case be not more than three acres in area, and in making such designation the Secretary shall take into account the manner of noncommercial residential use in which the dwelling and land have customarily been enjoyed: *Provided*, That the Secretary may exclude from the land so designated any beach or waters, together with so much of the land adjoining such beach or waters, as he may deem necessary for public access thereto or public use thereof. All rights of use and occupancy shall be subject to such terms and conditions as the Secretary deems appropriate to assure the use of such property in accordance with the purposes of this Act.

"(c) The Secretary shall be afforded the opportunity to purchase such improved property if the owner thereof desires to sell that property, before a sale to bona fide private party is consummated, except that such opportunity to so acquire shall terminate upon the expiration of the thirty-day period following the date of notification to the Secretary concerning an offer to purchase by such private party.

(c) Such Act is further amended by inserting immediately after section 4 thereof the following new section:

"SEC. 4A. (a) As soon as practicable after the enactment of this section, the Secretary shall issue regulations specifying standards for approval by him of zoning ordinances for the purposes of this Act. The Secretary may issue amended regulations specifying standards for approval by him of zoning ordinances whenever he shall consider such amended regulations to be desirable due to changed or unforeseen conditions. The Secretary shall approve any zoning ordinance and any amendment to any approved zoning ordinance submitted to him which conforms to the standards contained in the regulations in effect at the time of adoption of such ordinance or amendment by the zoning agency. Such approval shall not be withdrawn or revoked, by issuance of any amended regulations after the date of such approval, for so long as such ordinance or amendment remains in effect as approved.

"(b) The standards specified in such regulations and amended regulations for approval of any zoning ordinance or zoning ordinance amendment shall contribute to the effect of (1) prohibiting the commercial and industrial use, other than any commercial or industrial use which is permitted by the Secretary, of all property covered by the ordinance within the boundaries of the lakeshore; and (2) promoting the preservation and development, in accordance with the purposes of this Act, of the area covered by the ordinance within the lakeshore by means of acreage, frontage, and setback requirements and other provisions which may be required by such regulations to be included in a zoning ordinance consistent with the laws of the State of Indiana.

"(c) No zoning ordinance or amendment thereof shall be approved by the Secretary which (1) contains any provision which he may consider adverse to the preservation and development, in accordance with the purposes of this Act, of the area comprising the lakeshore; or (2) fails to have the effect of providing that the Secretary shall receive notice of any variance granted under and any exception made to the application of such ordinance or amendment.

"(d) If any improved property, with respect to which the Secretary's authority to acquire by condemnation has been suspended according to the provisions of this Act is made the subject of a variance under or exception to such zoning ordinance, or is subjected to any use, which variance, exception, or use fails to conform to or is inconsistent with any applicable standard contained in regulations issued pursuant to this section and in effect at the time of passage of such ordinance, the Secretary may, in his discretion, terminate the suspension of his authority to acquire such improved property by condemnation.

"(e) The Secretary shall furnish to any party in interest requesting the same a certificate indicating, with respect to any property located within the lakeshore as to which the Secretary's authority to acquire such property by condemnation has been suspended in accordance with provisions of this Act, that such authority has been so suspended and the reasons therefor.".

(d) The first Sentence of section 5(a) of such Act, as amended (16 U.S.C. 460u-5), is amended to read as follows: "Except for owners of property within the area on the map referred to in the first section of this Act as area II-B, any owner or owners, having attained the age of majority, of improved property on the date of its acquisition by the Secretary may, as a condition of such acquisition, retain the rights of use and occupancy of the improved property for noncommercial residential purposes for a term ending on his or her death or the death of his or her spouse, whichever occurs last, or for a term of twenty-five years, or such lesser term as the owner or owners may elect at the time of acquisition by the Secretary. In the case of owners of property within such area II-B, such owners shall have the same right or rights as that afforded other owners in the preceding sentence, if it is determined by the Secretary, on a case-by-case basis, and in consultation with State and local officials, that water pollution problems are not likely to occur as a result of the failure on the part of the Secretary to acquire such property. All rights of use and occupancy shall be subject to such terms and conditions as the Secretary deems appropriate to assure the use of such property in accordance with the purposes of this Act.".

(e) Section 9 of such Act is amended by striking out "$60,812,100" and inserting in lieu thereof "89,812,100".

(f) Section 15 of such Act (16 U.S.C. 460u-14) is amended to read as follows:

"SEC. 15. (a) Within one year after the date of the enactment of this section, the Secretary shall submit, in writing, to the Committee on Interior and Insular Affairs and to the Committee on Appropriations of the United States Congress a detailed plan which shall indicate—

"(1) the lands which he has previously acquired by purchase, donation, exchange or transfer for administration for the purpose of the lakeshore, and

"(2) the annual acquisition program (including the level of funding) which he recommends for the ensuing five fiscal years.

"(b) It is the express intent of the Congress that the Secretary should substantially complete the land acquisition program contemplated by this Act, within six years after the date of enactment of this section.".

(g) Such Act is further amended by adding the following new section:

"SEC. 21. The Secretary, in consultation with the Secretary of Transportation, shall conduct a study of various modes of public access into and within the lakeshore, including roads, public transportation facilities, and nonmotorized access.

"(a) In carrying out the study, the Secretary shall utilize to the greatest extent practicable the resources and facilities of the organizations designated as clearinghouses under title IV of the Intergovernmental Cooperation Act of 1968 as implemented by Office of Management and Budget Circular A-95, and which have comprehensive planning responsibilities in the regions where the lakeshore is located. The Secretary

shall make provision for timely and substantive consultation with the Highway Department of the State of Indiana, local elected officials, and the general public in the formulation and the implementation of the study.

"(b) This study shall be completed and presented to the Congress no later than October 1, 1979.

"(c) The study shall address the adequacy of access facilities for members of the public who desire to visit and enjoy the lakeshore. Consideration shall be given to alternatives for alleviating the dependence solely on automobile transportation and resulting congestion, environmental impacts, and management difficulties. The study shall inventory the condition of roads in and out of the lakeshore, and the condition of the public transportation rolling stock. The study of public transportation facilities shall cover the distance from cities of thirty-five thousand population or more within fifty miles of the lakeshore. It shall further include the identification of routes, available facilities, and assets of transit operators within this area, and shall discuss their increase or decrease of passengers and their financial condition over the previous five-year period.

"(d) The study shall include proposals deemed necessary to assure equitable visitor access and public enjoyment by all segments of the population, including those who are physically or economically disadvantaged. It shall provide for retention of the natural, scenic, and historic values for which the lakeshore was established, and shall propose plans and alternatives for the protection and maintenance of these values as they relate to transportation improvements.

"(e) The study shall present alternative plans to improve, construct, and/or extend access roads, public transportation, and bicycle and pedestrian trails. It shall include accurate estimates of the costs of such alternatives, to be based upon statistical data available for similar expenditures, and shall discuss existing and/or proposed sources of funding for the implementation of the recommended plan alternatives.

"(f) There is hereby authorized to be appropriated not to exceed $250,000 for this study.".

Mr. BAYH. Mr. President, the amendment which I have sent to the desk on behalf of my colleague and myself would be a major step in the 60-year-old process of finishing the full, original plan of the Indiana Dunes Park.

About a half-century ago, the State of Indiana made the first effort and established a State park.

In 1966 the Congress of the United States established for the first time a national lake shore, some 500 acres.

We in the State of Indiana and the country are indebted to the late Paul Douglas and the distinguished junior Senator from Washington (Mr. JACKSON) without whose leadership we would not have had that park bill.

The first phase was followed in 1976 with a second phase of about 3,600 acres. The measure which we will recommend now to the Senate would annex two of the three study areas established in the 1976 legislation, approximately 700 acres.

It brings to the park the Beverly Shores Island, which is right in the middle of the park. The island has some homes and about 500 additional undeveloped acres. There is also a strip of land along Highway 12.

For those who have not had a chance to go to the dunes, it is a beautiful, rolling, scenic, God-provided area.

It is a parkland now, but Northwest Indiana is one of the most rapidly growing industrial areas in America. We want to finish filling out the park so we can have a total environment of a park and not have Kentucky Fried Chicken stands and McDonald's——

The PRESIDING OFFICER. The Chair would ask that the Senate be in order in the remainder of the session. It would be appreciated if Senators could be heard.

The Senator from Indiana.

Mr. BAYH. And Shakey Pizza Parlors in the middle of some of the most wonderful, beautiful creations of nature.

The additions we propose have been supported by the Park Service and by Interior. To be honest with my colleagues, this was completely the case until 9 o'clock the night before the hearings were held in August. Then a decision was made by OMB, and without any notice to any of us who were supporting the park, that instead of supporting expansion enthusiastically, the administration would delay the decision on it.

I suggest if we delay, it will cost more; and if we delay, every month that goes by—having been there, I know—we are having people move in and building the kind of commercial structures that are totally incompatible with a national park.

The PRESIDING OFFICER. The time of the Senator from Indiana has expired.

The Senator has 4 minutes on the amendment.

Mr. ABOUREZK. Does Senator LUGAR need some time?

Mr. BAYH. I think it is critical that Senator LUGAR have time.

Mr. JACKSON. Mr. President, I ask unanimous consent that the distinguished junior Senator from Indiana have 5 minutes, and that 5 minutes be allowed for the other side.

The PRESIDING OFFICER Without objection, it is so ordered.

The Senator from Indiana.

Mr. LUGAR. Mr. President, I deeply appreciate the courtesy of the distinguished Senator from Washington.

I join my colleague, the senior Senator from Indiana, in his eloquent plea for the acquisition of land that is very important to our State, and we believe important to the country.

The Indiana Dunes National Lakeshore Park is as beautiful as the senior Senator from Indiana has described it.

The importance of this amendment is that of simple justice and equity for the people of the Beverly Shores community, of 652 acres, in the midst of a national park. The problems for these people in terms of their local government, and of their property are immense. Many of them wish to think of how they are going to meet the future and have proper sales of property over the course of time—at least a proper life as they see it there.

They are in a quandary. Frankly, the senior Senator from Indiana and the junior Senator from Indiana have been in a quandary, too, with constituents in this condition.

We believe it is in the best interests of environmental affairs in northern Indiana and the enjoyment of the park by the people of the United States of America to complete the two aspects of the park that this amendment addresses. They are the problems of the residents of Beverly Shores and the strip of land along Highway 12.

I plead with my colleagues for a project which is extremely important to our State, and we believe it is extremely important to the development of this great national park. We believe this request for expansion of the park comes at a time when it will be least expensive, and the moment for action is timely.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. LUGAR. I yield.

Mr. PERCY. Mr. President, I join my distinguished colleagues from Indiana.

This is a moment when my predecessor, Paul Douglas, should be on the floor. Of all the people I have known throughout the course of my life who have loved the Indiana dunes, none loved them more than the senior Senator from Illinois, Paul Douglas. He spent a great deal of time in that area. He walked over every square foot of it.

I went to the dunes with my Boy Scout troop when I was a boy, as Boy Scout troops from Chicago do year in and year out.

This is one of the great wonders of the Midwest. Compared with other States, we have little in the way of natural resources. We have Lake Michigan and the Indiana dunes.

For the millions of people living within the metropolitan Chicago area, the Indiana dunes provide a retreat which is within easy driving distance. The people in Chicago do not have the mountains of Colorado or the Adirondacks, but we do have the Indiana dunes. This effort to add additional acres to the lakeshore is not only a sound investment but also it will protect the area from over development.

I commend my distinguished colleagues. I know I speak on behalf of Senator STEVENSON, who feels equally strongly about this measure, and I recommend the adoption of the amendment.

Mr. LUGAR. I appreciate the comment of the Senator from Illinois, as well as his tribute to former Senator Paul Douglas. Everybody who loves the dunes recognizes the value of the tribute the senior Senator from Illinois has paid.

Mr. President, I yield the floor.

Mr. JACKSON. Mr. President, I have been long interested in the Indiana dunes and worked with the late Paul Douglas, who devoted a great part of his life in public affairs to the cause of recreation and conservation. This was one of the areas of top interest to Senator Paul Douglas.

I have some serious reservations about this amendment, but I certainly will agree to let it go to conference.

I point out that the acquisition cost is $30 million to $35 million. The area we are talking about, Beverly Shores Island area, is a real problem in terms of park administration. They have some of the nicest homes in the area, and that is what we are really talking about.

The Park Service has opposed granting of the so-called zoning authority. The reason is that the zoning authority

had been deleted because it worked against the acquisition of the in holding, and there will not be any real public recreation unless the houses are acquired, so that there will be areas available for public use.

We are talking about a residential area here, Mr. President, and I have serious reservations about the authority being requested in this amendment in terms of zoning.

Mr. JOHNSTON. Mr. President, will the Senator yield for a question?

Mr. JACKSON. I yield.

Mr. JOHNSTON. Can the Senator tell me what the cost per acre of Beverly Shores would be?

Mr. MARK O. HATFIELD. $35 million.

Mr. LUGAR. 652 acres.

Mr. JACKSON. 652 acres.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. BAYH. Apparently, we are looking at different cost figures. The Park Service advised us that it was $29 million, which still makes it a very expensive park per acre. But 500 of the 650 acres do not have any houses. Those 500 acres will be commercially developed, if we do not act.

Mr. JACKSON. These were the costs as of 1976, and we all know that real property values are going up, depending on the location of the area, at astronomical rates. But it is over $50,000 an acre.

As the one who authored the Indiana dunes matter in the Senate, I have a deep interest, and I want to do the right thing. But I do want to call the attention of the Senate to the amount of money involved.

This is what disturbs me: You are not going to acquire the inholdings; you are going to protect those inholdings; and those inholdings will stay there.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. JOHNSTON. If we are going to pay $50,000 an acre, do we get the homes right away? We pay $50,000 an acre, but do we get the homes right away?

Mr. JACKSON. We do not get fee title.

Mr. JOHNSTON. And we pay $50,000 for the right to get the property?

Mr. JACKSON. I think it is the Cape Cod formula, as I recall, is it not?

Mr. BAYH. I think the Senator from Louisiana knows the answer to that question, because he was the very able chairman of the subcommittee before, and we had a little difference of opinion on this.

This is exactly the same formula applied to several other parks. When you have a park with a lot of people living in the area and you want to provide recreation facilities, you have a problem.

I point out to the Senator from Washington that no other Member of this body has done more to get us where we are right now than has the Senator from Washington. What I am saying now is not in any way to be interpreted as a lack of gratitude, but the original park bill, which he and Paul Douglas and BIRCH BAYH and all of us were trying to get passed originally, had this particular property in it. We wanted that in there; and because we let it go this long, it has cost a lot more.

Mr. JACKSON. Mr. President, it is obvious that we have a real problem, and I want the Senate to understand.

I just checked with staff, and the provision in terms of acquisition would be either 25 years or life tenancy before there would be fee title. This does present a serious problem. However, in the interest of moving the overall legislation, the omnibus bill, I shall not ask for a rollcall vote on this.

I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. ABOUREZK. I yield myself 1 minute.

Mr. President, we had a hearing on this amendment, but we did not mark it up in the committee. It is an extremely controversial amendment, and the legislation itself is very controversial.

I think the committee needs and deserves more time to consider this thing before anything happens on it.

I yield back the remainder of my time.

Mr. BAYH. Mr. President, will the Senator yield me 1 minute?

Mr. ABOUREZK. I yield.

Mr. BAYH. I thank the Senator for the courtesy he has shown us, and I thank the Senator from Washington for the tremendous shot in the arm he gave to get the Indiana Dunes National Lakeshore off the ground originally.

I think the Senator knows that, absent a 9 p.m. decision by the Budget Bureau, the Park Service, and Interior both supported acquisition of these parcels. They are not against this proposal. They suggest it should be deferred, and we all know that when it is deferred the price goes up.

I appreciate the courtesy of my good friend from South Dakota.

Mr. ABOUREZK. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment of the Senator from Indiana.

The amendment was agreed to.

The PRESIDING OFFICER. Are there further amendments to be proposed?

Mr. ABOUREZK. Wait just a minute.

UP AMENDMENT NO. 2081

Mr. CHILES. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) for himself and Mr. STONE proposes an unprinted amendment numbered 2081:

At the end of the House engrossed amendment, add the following new title:

TITLE

(a) (1) In recognition of the need for and desirability of protecting the St. Johns and Oklawaha River corridors in Florida as a unit or units of the National Park System, the Secretary of the Interior (hereinafter referred to as the "Secretary") in cooperation with the Secretary of Agriculture where national forest lands are involved, shall conduct a feasibility/suitability study to determine a suitable boundary for such unit or units of the System. Such study shall be conducted in consultation with appropriate units of local government concerned.

(2) A report of the study conducted pursuant to subsection (a) of this section shall be submitted by the Secretary to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate not later than one year following the date on which funds are appropriated for the purpose of the study. Such report shall include a map or other description of the natural, scenic, and cultural features within the boundary, and the recommendation of the Secretary with respect to such further legislation as may be appropriate.

(b) (1) Authority for further construction of a high-level lock barge canal from the Saint Johns River across Florida to the Gulf of Mexico in accordance with Public Law 675, Seventy-seventh Congress (56 Stat. 703), is terminated on the effective date of this section.

(2) The Secretary of the Army, acting through the Chief of Engineers, is authorized to operate and maintain the existing facilities and their appurtenant lands of the Cross-Florida Barge Canal project as he determines to be necessary, pending further disposition by law of the project and its facilities and lands.

(3) The boundary of the Ocala National Forest, Florida, is hereby extended to include the lands north and west of the Oklawaha River as shown on the map dated July 1978, on file with the Chief of the Forest Service, Department of Agriculture, Washington, District of Columbia, and available to the public in the office of the appropriate regional forester, forest supervisor, and forest ranger.

(4) Within the boundary of the Ocala National Forest as extended by paragraph (3) of this subsection, lands or interests in lands and improvements owned by the United States and administered by the Corps of Engineers, Department of the Army, shall be transferred to the Secretary of Agriculture to be administered and made a part of the Ocala National Forest, Florida, when the Secretary of the Army deems such action to be appropriate, but not later than the end of the fiscal year ending September 30, 1980: *Provided*, That the Secretary of the Army, acting through the Chief of Engineers, may operate and maintain the existing facilities of the Cross-Florida Barge Canal project within the extended boundaries of the Ocala Forest pending further disposition.

(5) The Secretary of Agriculture shall acquire lands and interests in lands held on the effective date of this section by the Canal Authority of the State of Florida within the boundary of the Ocala National Forest, as extended, with donated or appropriated funds, by purchase, gift, or exchange. For acquisition of lands or interests in lands held by the Canal Authority of the State of Florida, the Secretary of Agriculture shall pay not less than the purchase price paid by the Canal Authority plus interest compounded annually at the average rate at which the Authority borrowed funds for project acquisition purposes over the total period of financial commitment by the Authority.

(6) There are authorized to be appropriated beginning with the fiscal year ending September 30, 1980, such sums as may be necessary to carry out the provisions of this subsection.

(c) There is authorized to be appropriated such sum as may be necessary to carry out the provisions of subsection (a) of this section.

(d) The provisions of this section shall take effect on July 1, 1979.

Mr. CHILES. Mr. President, this amendment provides for the resolution of a long-standing situation in the State of Florida, namely, the disposition of the Cross Florida Barge Canal.

The Barge Canal project has a long and difficult history in Florida. Terminating the project is long overdue. The majority of Floridians agree that the canal should not be built and that its

adverse impact outweighs any possible remaining benefits.

The President in his environmental message of May 23, 1977, called for termination of the Barge Canal project.

The Governor and Florida cabinet have recommended against completion of the canal.

Further, the Army Corps of Engineers, after a thorough reexamination of the project, giving consideration to all environmental and economic factors, has concluded that completion is not warranted.

It is clear that the Barge Canal is not a viable undertaking on either environmental or economic grounds.

This amendment provides for a study of the St. Johns and Oklawaha River corridors in Florida to determine the need for protecting these lands as possible units of the National Park System.

Second, it terminates authority for further construction of the Cross Florida Barge Canal.

Third, it provides for the transfer of canal lands with the Ocala National Forest to the administration of the Department of Agriculture.

I would point out that the second and third sections of this amendment have been considered and reported by the committees of jurisdiction: The Environment and Public Works Committee and the Agriculture Committee. These two provisions have already passed the Senate as S. 3337. Thus the only subject not already acted upon by the Senate is the authorization for a study.

Mr. President, it is patently clear that construction of this canal would not be a prudent expenditure of taxpayers dollars and that it will not be built. If the canal lands are to be retained for public usage it is necessary that Congress decide the question and protect the lands until their final use can be determined.

On behalf of myself and Senator STONE we wish to move this amendment.

I point out that this amendment has already passed the Senate as S. 3337, passed unanimously in the Senate. Thus, the only subject not already passed upon by the Senate is the authorization for a study.

This plan calls for the deauthorization of the Cross Florida Barge Canal and a study.

We have discussed this with the staff, and I am prepared to yield back my time.

Mr. ABOUREZK. Mr. President, I say we have discussed the amendment. We accept it and we ask that it be adopted.

● Mr. STONE. Mr. President, I rise in support of this amendment which would deauthorize the Cross-Florida Barge Canal. The Senate has already passed this measure and it has the support of the administration and the Governor and cabinet of the State of Florida.●

Mr. JACKSON. Vote.

Mr. ABOUREZK. I yield back the remainder of my time.

The PRESIDING OFFICER. The quetion is on agreeing to the amendment of the Senator from Florida.

The amendment was agreed to.

(Mr. BUMPERS assumed the chair).

● Mr. HOLLINGS. I rise in support of the committee amendment which authorizes the Department of Interior to conduct a feasibility study to include historic Camden, S.C., within the National Park Service.

A major Revolutionary War site, historic Camden has long been maintained by an active group of volunteers, led by M. Hope Boykin, who now needs the resources and expertise of the Park Service to carry through the fine work that is currently being done and to complete the story of the war for independence which is being told at Kings Mountain, Cowpens, and Ninety Six.

I especially want to thank the distinguished chairman of the Parks Subcommittee, Mr. ABOUREZK, for accepting my amendment and recognizing the need for the Park Service to complete development of this historic Revolutionary War site.

I have received strong endorsements for this initiative from Dr. Charles Lee of the South Carolina Department of Archives and History, Mr. Austin Sheheen, Jr. of the Kershaw County Council and Mrs. Hope Boykin of the Camden Historical Commission.●

● Mr. BENTSEN. Mr. President, it is my pleasure to rise in support of the proposed San Antonio Missions National Historical Park. I have introduced legislation to establish this park, and I enthusiastically endorse its inclusion in this bill.

In the midst of what often seems to be a period of incomprehensible development and rapid historical change, the San Antonio Missions provide a marvelous example of the architectural designs of an important and colorful time in our Nation's past. The San Antonio Missions complex reveals to us the beginnings of civilization in the Southwestern region of our country, and in terms of our Nation's heritage the missions can be compared in importance to the long-recognized national shrines of our eastern seaboard.

The proposed part would include four missions in the southern part of San Antonio which are noted for their outstanding historical and architectural value. In addition to the missions, the park would include an associated irrigation system which provides an extraordinary example of 18th century engineering. Its handmade acequias, the great stone aqueduct, and the uniquely constructed concave dam continue to irrigate farm and ranch lands today just as they did in the 1700's.

The missions acted as a primary tool of civilization in the area, serving not only as religious institutions, but also as fortresses for missionaries and settlers. Through these missions Spain conveyed to the new world its religion, culture, and way of life—influences which remain to a significant degree in the Southwestern region of our Nation today.

Recognition of the national significance of the missions has been given through the designation of Mission Concepcion as a National Historic Landmark and Mission San Jose as a National Historic Site. The Espada Dam, Aqueduct and Acequia have also been designated National Historic Landmarks. In addition, the San Juan and Espada Missions are listed on the National Register of Historic Places.

However, these preliminary steps which we have taken to protect portions of these historical treasures are proving to be inadequate. Unfortunately, the historical integrity of the mission network as a whole is in jeopardy because of the failure to protect the system against physical deterioriation and the growth of commercial construction in the area. This park designation would halt this creeping destruction of one of our priceless national treasures. I have been privileged to live in a time when I could see and enjoy these historic missions. It would be a short-sighted folly for us now, through neglect and inaction, to allow the ravages of time and development to deny future generations of Americans the same rights and privileges which we have enjoyed.

I am not alone in this belief, Mr. President. Concern over the need for protection of the missions and support for the creation of the National Historical Park is very strong at the local level, as evidenced by the success of the field hearing conducted on this issue by the House National Parks Subcommittee.

Further, in its suitability-feasibility study completed in 1975, the National Park Service concluded that each of these historic structures—four missions and the dam, acequia, and aqueduct—has historical and architectural significance of exceptionally high order. When taken as a group, as proposed here, the study concluded that their significance is even more outstanding.

Mr. President, I have strongly supported this proposal since its inception. Many hours of careful work and study have gone into this proposal, particularly in drawing the boundary lines so as to have the least possible impact on residents of the area. Those residents who are inside the park boundaries will not be displaced, but will be permitted to remain in their homes.

In addition, the park has been structured so that no money will be spent to acquire lands or property owned by the church or by the State or any of its subdivisions. All such property which is to be transferred to the Federal Government will be acquired by donation only.

Mr. President, I hope that my colleagues will agree with me that this Nation's future generations deserve to inherit the legacy of our past embodied in these unique missions. They are continuing symbols of the work and dedication that built the Southwest, and in my opinion deserve the finest possible preservation, treatment, and interpretation, that a national park would provide.

The PRESIDING OFFICER. Are there further amendments to be proposed?

Mr. ABOUREZK. Mr. President, I ask unanimous consent that the Senate concur in the amendment of the House to S. 2566 with amendments of the Senate as a substitute therefor and request a conference with the House, and the Chair be authorized to appoint conferees on the part of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the Chair appointed Mr. JACKSON, Mr. ABOUREZK,

Mr. METZENBAUM, Mr. CHURCH, Mr. JOHNSTON, Mr. BUMPERS, Mr. MATSUNAGA, Mr. ANDERSON, Mr. LAXALT, Mr. MCCLURE, Mr. WEICKER, and Mr. MARK O. HATFIELD as conferees on the part of the Senate.

Several Senators addressed the Chair.

Mr. ABOUREZK. May we have third reading first?

The PRESIDING OFFICER. Action has been completed on the bill.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JACKSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HANSEN. Mr. President, if the majority leader will yield for an observation, I was present and I voted present on this last motion.

Mr. ROBERT C. BYRD. Mr. President, before I intercede, I wish to yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the distinguished majority leader for yielding.

Mr. President, I rise only to observe that this legislation contains within it provisions for urban parks of the kind that makes it a landmark in the history of legislation in this Congress on that subject, and as a representative of the State of New York I express my thanks to all those involved. They are friends of our city and State, and we do very much appreciate it.

NATIONAL PARKS AND RECREATION ACT OF 1978

Mr. ABOUREZK. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 791.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 791) to authorize additional appropriations for the acquisition of lands and interests in lands within the Sawtooth National Recreation Area in Idaho.

(The amendment of the House is printed in the RECORD of October 4, 1978, beginning at page 33571.)

The PRESIDING OFFICER. Who yields time?

Mr. ABOUREZK and Mr. CHURCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. ABOUREZK. I have a committee amendment.

The PRESIDING OFFICER. The Senator from South Dakota.

UP AMENDMENT NO. 2082

Mr. ABOUREZK. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABOUREZK) proposes an unprinted amendment numbered 2082.

Mr. ABOUREZK. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend the text as follows:

1. Delete Sec. 301(4) in its entirety.

2. Amend Sec. 301(12) by adding the following new sentence at the end thereof:

"Furthermore, not withstanding any other provision of law to the contrary, the Secretary may, if he determines that to do so will not have a substantial adverse affect on the preservation of the fossil and other resources within the remainder of the monument, convey approximately 60 acres acquired by the United States for purposes of the monument in exchange for non-Federal lands within the boundaries of the monument, and, effective upon such convevance, the boundaries of the monument are hereby revised to exclude the lands conveved."

3. Amend Sec. 309(a) by deleting "570" and inserting in lieu thereof, "450".

4. Amend Sec. 309(b) by inserting the following new proviso at the end thereof:

"Provided further, that the Secretary is directed to study the possible reconstruction of the historic remains of Ft. Union, and the Secretary is further directed to transmit to the Congress, within one year of the enactment of this bill, a recommendation on the reconstruction of the Fort based on historic documentation."

5. Delete Section 314(h) in its entirety and insert the following in its place:

"(h) The Congress recognizes that the Mineral King Valley area has outstanding potential for certain year-round recreational opportunities, but the development of permanent facilities for downhill skiing within the area would be inconsistent with the preservation and enhancement of its ecological values."

6. Amend Sec. 315(c) by deleting "$7,000,000" and by inserting in its place "$13,000,000".

7. Delete Sec. 322(b) in its entirety, and inserting in its place the following new subsection:

"(b) The authority of the Secretary to condemn undeveloped tracts within the Dune District as depicted on map entitled 'Fire Island National Seashore' numbered OGP-0004 dated May, 1978, is suspended so long as the owner or owners of the undeveloped property therein maintain the property in its natural state. Undeveloped property within the Dune District that is acquired by the Secretary shall remain in its natural state."

8. Delete Section 502 in its entirety and insert the following new section:

SEC. 502. (a) The Congress finds that—

(1) the Pinelands area in New Jersey, containing approximately 1,000,000 acres of pine-oak forest, extensive surface and ground water resources of high quality, and a wide diversity of rare plant and animal species, provides significant ecological, natural, cultural, recreational, educational, agricultural, and public health benefits;

(2) there is a national interest in protecting and preserving these benefits for the residents of and visitors to the area;

(3) a primary responsibility for protecting and enhancing these benefits resides with the State of New Jersey and the various local units of government having jurisdiction over the area;

(4) in view of the longstanding Federal practice of assisting the States in creating, protecting, preserving, and enhancing areas of significant regional and urban importance, and in view of the national significance of this resource, the Federal Government has an interest in assisting the State of New Jersey and its local units of government in fulfilling their responsibilities and in avoiding adverse Federally approved or assisted impacts before these responsibilities can be undertaken;

(5) the State of New Jersey and its local units of government have authority to prevent or minimize adverse uses of the land and water resources of the Pinelands area and can, to a great extent, protect the health, safety, and general welfare by the use of such authority; and

(6) there is a demonstrated need to protect, preserve and enhance the land and water resources of the Pinelands area through a new program which combines the capabilities and resources of the local, State and Federal governments and the private sector and provides an alternative to large-scale direct Federal acquisition and management in cases where such acquisition and management is inappropriate.

(b) The purposes of this section are—

(1) to protect, preserve and enhance the significant values of the land and water resources of the Pinelands area;

(2) to encourage and assist the State of New Jersey and its units of local government in the development of a comprehensive management plan for the Pinelands area in order to assure orderly public and private development in the area consistent with the findings of this section;

(3) to provide, during the development of this comprehensive plan, Federal financial assistance for the acquisition of lands in the Pinelands area that have critical ecological values which are in immediate danger of being adversely affected or destroved;

(4) to encourage and assist the State and its units of local government in developing a governmental mechanism to implement this comprehensive plan, and to provide Federal financial assistance for the acquisition of lands consistent with the comprehensive plan;

(5) to encourage adequate coordination of all government programs affecting the land and water resources of the Pinelands area.

(c) There is hereby established the Pinelands National Reserve which shall consist of the approximately 1,000,000-acre generally depicted on the map entitled "Pinelands National Reserve Boundary Map" numbered NPS/80,011 A and dated September 1978. Within the Pinelands National Reserve, there is hereby established the Federal Project Review Area, which shall consist of the approximately 486,000 acre area also depicted on the map. The map shall be on file and available for public inspection in the offices of the Department of the Interior in Washington, and in the offices of the State of New Jersey planning entity established pursuant to subsection (d), and in locations throughout the Pinelands National Reserve as determined by the planning entity.

(d) Within thirty days after the date of enactment of this section, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall request the Governor of the State of New Jersey to establish, within ninety days of such request, a planning entity to develop a comprehensive management plan for the Pinelands National Reserve. In order to carry out the purposes of this section, such planning entity shall be composed of fifteen members to be appointed as follows: one member appointed by the Secretary; one member from each of the seven counties in the Pinelands National Reserve to be appointed by the respective governing bodies of each county; and seven members to be appointed by the Governor. The membership of the planning entity shall include residents of the Pinelands National Reserve who represent economic activities such as agriculture in the area, as well as residents of New Jersey who represent conservation interests. The Secretary shall provide technical assistance and grants to the State for the development of the plan or revisions thereof: *Provided*, That such grants shall not exceed 75 percent of the cost of developing the plan, shall be made only upon application of the Governor, on behalf of the planning entity, and shall be

subject to such other conditions as the Secretary may deem appropriate to assure State and local interim protection of the area.

(e) During the development of the management plan, the planning entity shall:

(1) consult with appropriate officials of any local government or State or Federal agency which has jurisdiction over lands and waters within the area;

(2) consult with the officials of any local government which has jurisdiction over lands and waters within areas delineated in accordance with subsection (f)(2)(B);

(3) consult with interested professional, scientific and citizen organizations;

(4) consult with a citizens advisory committee which may be established by the Governor; and

(5) conduct public hearings at places within the area, and at such other places as may be appropriate, for the purpose of providing interested persons with an opportunity to express their views with respect to matters covered by the management plan.

(f) The comprehensive management plan for the Pinelands National Reserve shall include, but need not be limited to—

(1) A resource assessment which:

(A) determines the amount and type of human development and activity which the ecosystem can sustain while still maintaining the overall ecological values described in this section with special reference to (i) ground and surface water supply and quality; (ii) natural hazards, including fire; (iii) endangered, unique and unusual plants and animals and biotic communities; (iv) ecological factors relating to the protection and enhancement of blueberry and cranberry production and other agricultural activity; (v) air quality; and (vi) other appropriate considerations affecting the ecological integrity of the area; and

(B) includes an assessment of scenic, aesthetic, cultural, open space, and outdoor recreation resources of the area together with a determination of overall policies required to maintain and enhance these resources.

(2) A map showing the detailed boundary of the Pinelands National Reserve, such map to delineate:

(A) major areas within the boundary which are of critical, ecological importance;

(B) major areas and resources adjacent to the boundary that have significance to the ecological integrity of the Pinelands National Reserve; and

(C) areas of scenic, open space, cultural and recreational significance.

(3) A land use capability map and a comprehensive statement of policies for land use management of the area which:

(A) consider and detail the application of a variety of land and water protection and management techniques, including but not limited to, zoning and regulation derived from State and local police powers, development and use standards and permit systems, acquisition of conservation easements and other interests in land, public access agreements with private landowners, purchase of land for resale or lease-back, fee acquisition of public recreation sites and ecologically sensitive areas and any other method of land and water protection and management which will help meet the goals and carry out the policies of the management plan;

(B) include a policy for the use of State and local police power responsibilities to the greatest extent practicable to regulate the use of land and water resources in a manner consistent with the purposes of this section; and

(C) recognize existing economic activities within the area and provide for the protection and enhancement of such activities as farming, forestry, proprietary recreational facilities, and those indigenous industries and commercial and residential developments which are consistent with the findings and purposes of this section.

(4) A coordination and consistency component which details the ways in which local, State and Federal programs and policies may best be coordinated to promote the goals and policies of the management plan, and which details how land, water, and structures managed by governmental or nongovernmental entities in the public interest within the area may be integrated into the management plan.

(5) A public use component including, among other items, a detailed program to educate the public concerning appropriate uses of the area.

(6) A financial component, together with a cash flow timetable, which:

(A) details the cost of implementing the management plan, including, but not limited to, payments in lieu of taxes, general administrative costs, and any anticipated extraordinary or continuing costs; and

(B) details the sources of revenue for covering such costs, including, but not limited to, grants, donations and loans from local, State, and Federal departments and agencies, and from the private sector.

(7) A program to provide for the maximum feasible local government and public participation in the management of the Pinelands National Reserve.

(8) A program for State and local governmental implementation of the comprehensive management plan in a manner that will insure the continued, uniform, consistent protection of this area in accord with the purposes of this section.

(9) In conjunction with existing State programs and plannning processes, a plan to implement the provisions of the Clean Water Act and the Safe Drinking Water Act which pertain to the surface and ground waters of the Pinelands National Reserve.

(g)(1) The State of New Jersey, through the planning entity, shall adopt and submit to the Secretary a comprehensive management plan within eighteen months after the date that funds are first provided for its preparation under subsection (d). In the event the State fails to submit the plan within such time period, the Secretary may obtain reimbursement or offset from the State of all Federal funds previously granted under this section. The Secretary shall, within 90 days after the date the plan is submitted to him, either approve or disapprove the plan. Should the Secretary fail to act on the proposed plan within 90 days, the plan shall be regarded as approved. Upon approval, the Secretary shall submit the plan to the Congress for a period of 90 days prior to implementation.

(2) In determining whether or not to approve the management plan, the Secretary shall consider whether:

(A) the planning entity has afforded adequate opportunity including public hearings, for public and governmental involvement in the preparation and review of the plan, and whether such review and comment thereon were considered in the plan or revision as presented to him;

(B) he has received adequate assurances from appropriate State officials that the recommended implementation program identified in the plan will be initiated within a reasonable time after the date of approval of the plan and such program will insure effective implementation of the State and local aspects of the plan;

(C) provision is made for the participation of a Federal representative in the implementation program;

(D) the plan requires the exercise of police power responsibilities to the greatest extent practicable to regulate the use of land and water resources in a manner consistent with the purposes of this section;

(E) the plan, if implemented, would adequately protect the significant natural, ecological, agricultural, scenic, cultural and recreational resources of the Pinelands National Reserve and, consistent with such protection, provide adequate and appropriate outdoor recreational opportunities and economic activities within the area;

(F) the plan provides for the Governor of the State of New Jersey to exercise effective and continuing oversight over its implementation; and

(G) after consultation with the Secretary of Defense, the national defense mission of the military installations within, contiguous or adjacent to the Pinelands National Reserve has been adequately provided for.

(3) If the Secretary disapproves the management plan or a revision thereof, he shall, within 60 days after the date of such disapproval, advise the planning entity in writing of the reasons therefor, together with his recommendations for revision. The State of New Jersey, through the planning entity shall, within 120 days after receipt by the planning entity of notification of such disapproval, revise and resubmit the plan to the Secretary who shall approve or disapprove a proposed revision within 60 days after the date it is submitted to him. Should the Secretary fail to act on a proposed revision within 60 days, the revision shall be considered as approved.

(4) The Secretary shall consider a plan revision in accordance with the procedure set forth in paragraph (2). Such revisions must be consistent with the purposes of this section.

(5) In the event that the planning entity fails to obtain approval of the plan by the Secretary within thirty-six months after the date funds are first provided under subsection (d) for development of the plan, the Secretary shall terminate all Federal assistance for and participation in the development of such plan, and may obtain reimbursement or offset from the State of New Jersey of all Federal funds previously granted under this section.

(6) The Secretary shall provide technical assistance for and monitor at periodic intervals the implementation of the approved management plan. A local jurisdiction or the State shall obtain the approval of the Secretary prior to any modification of the approved plan. The Secretary shall consider a plan revision in accordance with the procedure set forth in paragraph (2). Such revisions must be consistent with the purposes of this section. Any jurisdiction that implements changes to the approved management plan, or adopts or acquiesces in changes to laws, regulations, or policies adopted to implement such plan, without approval of the Secretary, may be liable for reimbursement or offset of all Federal funds previously granted to it under this section without regard to such additional terms and conditions or other requirements of law that may be applicable to such grants.

(h)(1)(A) During the development of the management plan, the Secretary is authorized to make grants to the State of New Jersey for the acquisition of lands and waters or interests therein within the Pinelands National Reserve that he determines, in consultation with the State planning entity, have critical ecological values which are in immediate danger of being adversely affected or destroyed.

(B) The grants authorized by subsection (h)(1)(A) together with the grants made under paragraph (4) of this subsection, shall (i) be made in a manner consistent with the requirements of the Land and Water Conservation Fund Act; (ii) not exceed 75 percent of the total cost of all property acquired by the State pursuant to this subsection; (iii) be supplemental to any other Federal financial assistance for any other program; and (iv) be subject to such addi-

tional terms and conditions as the Secretary may deem necessary to effectuate the purposes of this section.

(2) In the event the State elects not to make acquisitions as authorized under subsection (h)(1), the Secretary, during the development of the management plan, is authorized to acquire such lands, waters or interests therein by donation, purchase with donated or appropirated funds, exchange, or otherwise, and to administer such property under the laws generally applicable to units of the National Park System or National Wildlife Refuge System in a manner to carry out the purposes of this section.

(3) After his approval of the management plan, the Secretary (A) is authorized to convey property acquired pursuant to subsection (h)(2) to State or local authorities in accordance with the management plan, under such terms and conditions as he may deem appropriate, which shall include (i) a requirement that where the Secretary transfers land acquired with appropriated funds, the State or local government shall repay not less than 25 percent of the cost of such lands to the Secretary under such terms and conditions as he may deem appropriate, and (ii) a retention of a right of reversion of title to the United States, and (B) shall accept from the State those lands acquired pursuant to subsection (h)(1), which are identified in the management plan as being appropriate for Federal ownership and management: *Provided*, that the Secretary shall reimburse to the State such sums as are necessary to (i) cover 100 percent of the original cost of acquisition as to each parcel of land so transferred and (ii) assure that as to the remainder of lands acquired pursuant to subsection (h)(1) not transferred under this subsection, the total Federal land acquisition cost does not exceed 75 percent of the purchase price of such lands.

(4) Upon approval of the management plan, the Secretary is authorized to make grants for the acquisition within the Pinelands National Reserve of lands and waters or interests therein in a manner consistent with the management plan. All applications for such grants shall be made within ten years from the date of implementation of the management plan.

(i) During the development of the management plan for the Pinelands National Reserve, all applications for Federal assistance under programs covered by Part I of OMB Circular A-95 and direct Federal actions covered by Part II of OMB Circular A-95 within the Federal Project Review Area generally depicted on the map referred to in subsection (c) which involve the construction of housing, industrial parks, highways, or sewage or water treatment facilities shall be reviewed by the planning entity, upon receipt from the New Jersey State A-95 Clearinghouse (hereinafter referred to as the Clearinghouse). If the planning entity finds that such application or proposed action would have no adverse impact on the resources and ecological values of the Federal Project Review Area, the planning entity shall so notify the Clearinghouse. If the planning entity does not so find, Congress authorizes the planning entity to notify the Clearinghouse and other affected parties that such application or proposed action shall not proceed pending further review, and the planning entity shall forward such application or notice of proposed action to the Secretary. Any such application or proposed action which the Secretary determines would be significantly adverse to the purposes of this section shall not proceed while the management plan is being developed. The review process established under this subsection shall begin upon the appropriation of funds under subsection (k).

(j) Nothing in this section shall be construed to limit or prohibit any Federal action ordered by a court of competent jurisdiction or directed by a Federal agency as essential for the protection of public health or safety, for national security or defense, or for the maintenance of environmental values within the Pinelands National Reserve or the Federal Project Review Area.

(k) There is authorized to be appropriated not to exceed $26 million to carry out the provisions of this section. Not to exceed $3 million shall be available for planning: *Provided*, That any funds not used for planning shall be available for land acquisition; *Provided further*, that $23 million shall be made available for land acquisition, as authorized by this section. Such appropriations may be made from the general fund of the Treasury or from revenues due and payable to the United States under the Outer Continental Shelf Lands Act, as amended, which would otherwise be credited to miscellaneous receipts.

9. Amend Sec. 401(7) by deleting map reference "numbered 157-20,001-A and dated January 1978," and by inserting in lieu thereof "157-20,001-B and dated October 1978,".

10. Amend Sec. 505(e) by inserting "as appropriate" between "directed" and "to".

11. Amend Sec. 505(e) by adding the following new sentence at the end thereof:

"For the purposes of this section, native Hawaiians are defined as any lineal descendants of the race inhabiting the Hawaiian Islands prior to the year 1778."

12. Delete Sec. 512 in its entirety and insert the following new section:

CROW CREEK VILLAGE ARCHEOLOGICAL SITE

"SEC. 512(a) The Secretary shall prepare and transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives within two years from the date of enactment, a feasibility/suitability study of the Crow Creek Village archeological site, Buffalo County, South Dakota, as a unit of the National Park System. The study shall include cost estimates for any necessary acquisition, development, operation and maintenance, as well as any feasible alternatives for the administration and protection of the area, including, but not limited to, Federal financial and technical assistance to the State of South Dakota, Buffalo County or other suitable entity.

(b) Notwithstanding any other provision of law, the Secretary of the Army is directed to take such actions as may be necessary to preserve and protect such site from any adverse impact on the site and to refrain from any activities which might cause such impact until two years from the date of submission of the study by the Secretary."

13. Delete Sec. 551 in its entirety and insert the following new section:

SUBTITLE B—TRAILS

"SEC. 551. The National Trails System Act (82 Stat. 919; 16 U.S.C. 1241), as amended, is further amended as follows:

(1) In section 2(a) after 'promote' insert 'the preservation of'; and after 'outdoor areas' insert 'and historic resources' ".

(2) In section 2(a) delete '(ii)' and the remainder of the sentence and insert '(ii) secondarily, within scenic areas and along historic travel routes of the Nation, which are often more remotely located'.

(3) In section 2(b) delete 'and scenic' and insert, 'scenic and historic'.

(4) In section 3 redesignate subsection '(c)' as '(d)', and insert a new subsection (c) as follows:

'(c) National historic trails, established as provided in section 5 of this Act, which will be extended trails which follow as closely as possible and practicable the original trails or routes of travel of national historical significance. Designation of such trails or routes shall be continuous, but the established or developed trail, and the acquisition thereof, need not be continuous on site. National historic trails shall have as their purpose the identification and protection of the historic route and its historic remnants and artifacts for public use and enjoyment. Only those selected land and water based components of an historic trail which are on federally owned lands and which meet the national historic trail criteria established in this Act, are established as initial Federal protection components of a national historic trail. The appropriate Secretary may subsequently certify other lands as protected segments of an historic trail upon application from State or local governmental agencies or private interests involved if such segments meet the national historic trail criteria established in this Act and such criteria supplementary thereto as the appropriate Secretary may prescribe, and are administered by such agencies or interests without expense to the United States.'

(5) In the new section 3(d) delete 'or national scienic' and insert ', national scienic or national historic'.

(6) Change the title of section 5 to read 'NATIONAL SCENIC AND NATIONAL HISTORIC TRAILS'.

(7) In section 5(a), insert in the first sentence after the word 'scenic' the words 'and national historic' and change the second sentence to read: 'There are hereby established the following National Scenic and National Historic Trails:'

(8) In section 5(a)(1), in the first sentence, after the word 'Appalachian', insert 'National Scenic' and in section 5(a)(2), in the first sentence, after 'Pacific Crest', insert 'National Scenic'.

(9) In section 5(a), delete paragraph (3) and insert in lieu the following new paragraphs:

'(3) The Oregon National Historic Trail, a route of approximately two thousand miles extending from near Independence, Missouri, to the vicinity of Portland, Oregon, following a route as depicted on maps identified as "Primary Route of the Oregon Trail 1841-1848", in the Department of the Interior's Oregon Trail study report dated April 1977, and which shall be on file and available for public inspection in the office of the Director of the National Park Service. The Trail shall be administered by the Secretary of the Interior.

'(4) The Mormon Pioneer National Historic Trail, a route of approximately one thousand three hundred miles extending from Nauvoo, Illinois, to Salt Lake City, Utah, following the primary historical route of the Mormon Trail as generally depicted on a map, identified as, "Mormon Trail Vicinity Map, figure 2" in the Department of the Interior Mormon Trail study report dated March 1977, and which shall be on file and available for public inspection in the office of the Director, National Park Service, Washington, D.C. The trail shall be administered by the Secretary of the Interior.

'(5) The Continental Divide National Scenic Trail, a trail of approximately thirty-one hundred miles, extending from the Montana-Canada border to the New Mexico-Mexico border, following the approximate route depicted on the map, identified as "Proposed Continental Divide National Scenic Trail" in the Department of the Interior Continental Divide Trail study report dated March 1977 and which shall be on file and available for public inspection in the office of the Chief, Forest Service, Washington, D.C. The Continental Divide National Scenic Trail shall be administered by the Secretary of Agriculture in consultation with the Secretary of the Interior. Notwithstanding the provisions of section 7(c), the use of motorized vehicles on roads which will be designated segments of the Continental

Divide National Scenic Trail shall be permitted in accordance with regulations prescribed by the appropriate Secretary.

(6) The Lewis and Clark National Historic Trail, a trail of approximately three thousand seven hundred miles, extending from Wood River, Illinois, to the mouth of the Columbia River in Oregon, following the outbound and inbound routes of the Lewis and Clark Expedition depicted on maps identified as "Vicinity Map, Lewis and Clark Trail" study report dated April 1977. The map shall be on file and available for public inspection in the office of the Director, National Park Service, Washington, D.C. The trail shall be administered by the Secretary of the Interior.

(7) The Iditarod National Historic Trail, a route of approximately two thousand miles extending from Seward, Alaska, to Nome, Alaska, following the routes as depicted on maps identified as "Seward-Nome Trail", in the Department of the Interior's study report entitled. "The Iditarod Trail (Seward-Nome Route) and other Alaskan Gold Rush Trails" dated September 1977. The map shall be on file and available for public inspection in the office of the Director, National Park Service, Washington, D.C. The trail shall be administered by the Secretary of the Interior.

(10) In section 5(b) after national scenic wherever it appears insert or national historic; in the first sentence after the phrase Secretary of the Interior, insert through the agency most likely to administer such trail; delete the third sentence; and delete that portion of the fourth sentence which precedes the numerical listing, and insert in lieu the following: The studies listed in subsection (c) of this section shall be completed and submitted to the Congress, with recommendations as to the suitability of trail designation, not later than three complete fiscal years from the date of enactment of their addition to this subsection, or from the date of enactment of this sentence, whichever is later. Such studies, when submitted, shall be printed as a House or Senate document, and shall include, but not be limited to:

(11) In section 5(b)(3) after the semicolon add "and in the case of national historic trails the report shall include the recommendation of the Secretary of the Interior's National Park System Advisory Board as to the national historic significance based on the criteria developed under the Historic Sites Act of 1935 (49 Stat. 666; U.S.C. 461).

(12) In section 5(b)(8) delete the word 'and' at the end of the sentence; in section 5(b)(9) change the period at the end of the sentence to a semicolon; and at the end of section 5(b) add the following new paragraphs:

'(10) the anticipated impact of public outdoor recreation use on the preservation of a proposed national historic trail and its related historic and archeological features and settings, including the measures proposed to ensure evaluation and preservation of the values that contribute to their national historic significance; and

'(11) to qualify for designation as a national historic trail, a trail must meet all three of the following criteria:

'(A) It must be a trail or route established by historic use and must be historically significant as a result of that use. The route need not currently exist as a discernible trail to qualify, but its location must be sufficiently known to permit evaluation of public recreation and historical interest potential. A designated trail should generally accurately follow the historic route, but may deviate somewhat on occasion of necessity to avoid difficult routing through subsequent development, or to provide some route variation offering a more pleasurable recreational experience. Such deviations shall be so noted on site. Trail segments no longer possible to travel by trail due to subsequent development as motorized transportation routes may be designated and marked on site as segments which link to the historic trail.

'(B) It must be of national significance with respect to any of several broad facets of American history, such as trade and commerce, migration and settlement, or military campaigns. To qualify as nationally significant, historic use of the trail must have had a far-reaching effect on broad patterns of American culture. Trails significant in the history of native Americans may be included.

'(C) It must have significant potential for public recreational use or historical interest based on historic interpretation and appreciation. The potential for such use is generally greater along roadless segments developed as historic trails, and at historic sites associated with the trail. The presence of recreation potential not related to historic appreciation is not sufficient justification for designation under this category.'.

(13) In section 5(c), add the following at the end thereof:

'(20) Overmountain Victory Trail, extending from the vicinity of Elizabethton, Tennessee, to Kings Mountain National Military Park, South Carolina.'.

(14) In section 5 delete subsection (d), and insert a new section 5(d) to read as follows:

'(d) The Secretary charged with the administration of each respective trail shall, within one year of the date of the addition of any national scenic or national historic trail to the System, and within sixty days of the enactment of this sentence for the Appalachian and Pacific Crest National Scenic Trails, establish an advisory council for each such trail, each of which councils shall expire ten years from the date of its establishment. The appropriate Secretary shall consult with such council from time to time with respect to matters relating to the trail, including the selection of rights-of-way, standards for the erection and maintenance of markers along the trail, and the administration of the trail. The members of each advisory council, which shall not exceed thirty-five in number, shall serve for a term of two years and without compensation as such, but the Secretary may pay, upon vouchers signed by the chairman of the council, the expenses reasonably incurred by the council and its members in carrying out their responsibilities under this section. Members of each council shall be appointed by the appropriate Secretary as follows:

'(i) a member appointed to represent each Federal department or independent agency administering lands through which the trail route passes, and each appointee shall be the person designated by the head of such department or agency;

'(ii) a member appointed to represent each State through which the trail passes, and such appointments shall be made from recommendations of the Governors of such States;

'(iii) one or more members appointed to represent private organizations, including corporate and individual landowners and land users, which in the opinion of the Secretary have an established and recognized interest in the trail, and such appointments shall be made from recommendations of the heads of such organizations: *Provided*, That the Appalachian Trail Conference shall be represented by a sufficient number of persons to represent the various sections of the country through which the Appalachian Trail passes; and

'(iv) the Secretary shall designate one member to be chairman and shall fill vacancies in the same manner as the original appointment.".

(15) In section 5 add two new subsections (e) and (f) as follows:

'(e) Within two complete fiscal years of the date of enactment of legislation designating a national scenic trail, except for the Continental Divide National Scenic Trail, as part of the system, and within two complete fiscal years of the date of enactment of this subsection for the Pacific Crest and Appalachian Trails, the responsible Secretary shall, after full consultation with affected Federal land managing agencies, the Governors of the affected States, the relevant advisory council established pursuant to section 5(d), and the Appalachian Trail Conference in the case of the Appalachian Trail, submit to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, a comprehensive plan for the acquisition, management, development, and use of the trail, including but not limited to, the following items:

(1) specific objectives and practices to be observed in the management of the trail, including the identification of all significant natural, historical, and cultural resources to be preserved (along with high potential historic sites and high potential route segments in the case of national historic trails), details of anticipated cooperative agreements to be consummated with other entities, and an identified carrying capacity of the trail and a plan for its implementation;

'(2) an acquisition or protection plan, by fiscal year, for all lands to be acquired by fee title or lesser interest, along with detailed explanation of anticipated necessary cooperative agreements for any lands not to be acquired; and

'(3) general and site-specific development plans, including anticipated costs.".

(f) Within two complete fiscal years of the date of enactment of legislation designating a national historic trail or the Continental Divide National Scenic Trail as part of the system, the responsible Secretary shall, after full consultation with affected Federal land managing agencies, the Governors of the affected States, and the relevant Advisory Council established pursuant to section 5(d) of this Act, submit to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, a comprehensive plan for the management, and use of the trail, including but not limited to. the following items:

'(1) specific objectives and practices to be observed in the management of the trail, including the identification of all significant natural, historical, and cultural resources to be preserved, details of any anticipated cooperative agreements to be consummated with State and local government agencies or private interests, and for national scenic or national recreational trails an identified carrying capacity of the trail and a plan for its implementation: and

'(2) the process to be followed by the appropriate Secretary to implement the marking requirements established in section 7(c) of this Act.".

(16) In section 6 in the first sentence delete 'or national scenic' and insert ', national scenic or national historic', and in the second sentence delete 'or scenic' and insert ', national scenic, or national historic'.

(17) In section 7(a) in the first sentence delete 'National Scenic Trails' and insert 'national scenic and national historic trails'; in two instances in subsection (b), and in the first sentence of subsection (c), after 'scenic', insert 'or national historic'; in subsection (c) in the second proviso, after 'recreation' delete 'or scenic' and insert ', national scenic, or national historic'; and in the fifth sentence after 'recreation' delete 'and scenic' and insert ', national scenic, and national historic'; in subsection (d) after 'recreation' delete 'or scenic' and insert ', national scenic, or national historic'; in subsection (e) after 'scenic' in both instances where it appears insert 'or national historic';

in subsection (h) in the first sentence after 'recreation' delete 'or scenic' and insert ', national scenic, or national historic', and in the second sentence after 'scenic' insert 'or national historic'; in subsection (i) after 'recreation' delete 'or scenic' and insert ', national scenic, or national historic'.

(18) In section 7(c) at the end of the fourth sentence insert the following: 'Where a national historic trail follows existing public roads, developed rights-of-way or waterways, and similar features of man's nonhistorically related development, approximating the original location of a historic route, such segments may be marked to facilitate retracement of the historic route, and where a national historic trail parallels an existing public road, such road may be marked to commemorate the historic route.'.

Other uses along the historic trails and the Continential Divide National Scenic Trail, which will not substantially interfere with the nature and purposes of the trail, and which, at the time of designation, are allowed by administrative regulations, including the use of motorized vehicles, shall be permitted by the Secretary charged with the administration of the trail.

(19) In section 7(e), in the first proviso, delete 'within two years'.

(20) In section 7(g), delete the second proviso entirely.

(21) At the end of subsection 7(g) add the following new sentence: 'For national historic trails, direct Federal acquisition for trail purposes shall be limited to those areas indicated by the study report or by the comprehensive plan as high potential route segments or high potential historic sites.'.

'No land or site located along a designated national historic trail or along the Continental Divide National Scenic Trail shall be subject to the provisions of section 4(f) of the Department of Transportation Act (49 U.S.C. 1653(f)) unless such land or site is deemed to be of historical significance under appropriate historical site criteria such as those for the National Register of Historic Places.'.

(22) In section 8 in the first sentence of subsection (a) after 'establishing park, forest, and other recreation' insert 'and historic' and after 'administered by States, and recreation' insert 'and historic'; and at the end of the first sentence insert the following: 'The Secretary is also directed to encourage States to consider, in their comprehensive statewide historic preservation plans and proposals for financial assistance for State, local, and private projects submitted pursuant to the Act of October 15, 1966 (80 Stat. 915), as amended, needs and opportunities for establishing historic trails'.

(23) In section 10, strike '(a)(1)' and insert in lieu thereof '(a)'; strike 'the subsequent fiscal year' and insert in lieu thereof 'subsequent fiscal years'; strike the paragraph numbered '(2)' in its entirety; and add a new 'subsection (c)' as follows:

'(c) There is hereby authorized to be appropriated such sums as may be necessary to implement the provisions of this Act relating to the trails designated by paragraphs 5(a), (3), (4), (5), (6), and (7): Provided, That no such funds are authorized to be appropriated prior to October 1, 1979: And provided further, That notwithstanding any other provisions of this Act or any other provisions of law, no funds may be expended for the acquisition of lands or interests in lands for the Continental Divide National Scenic Trail, the Oregon National Historic Trail, the Mormon Pioneer National Historic Trail, the Lewis and Clark National Historic Trail, and the Iditarod National Historic Trail'."

14. Delete Sec. 603 in its entirety and insert the following new section:

"SEC. 603 (a) the Act of June 27, 1960 (74 Stat. 220) as amended May 24, 1974 (88 Stat. 174, 176; 16 U.S.C. 469) is amended as follows:

(b) In section 7(b), delete the "and" following "1977;", change the period at the end of the sentence to a semicolon; and add the following words: $500,000 in fiscal year 1979; $1,000,000 in fiscal year 1980; $1,500,000 in fiscal year 1981; $1,500,000 in fiscal year 1982; and $1,500,000 in fiscal year 1983.".

(c) In section 7(c), delete the "and" following "1977;", change the period at the end of the sentence to a semicolon, and add the following words: "$3,000,000 in fiscal year 1979; $3,000,000 in fiscal year 1980; $3,500,000 in fiscal year 1981; $3,500,000 in fiscal year 1982; and $4,000,000 in fiscal year 1983.".

(d) Add the following new subsection "(d)" to section 7:

"(d) Beginning fiscal year 1979, sums appropriated for purposes of section 7 shall remain available until expended."

15. Delete Sec. 701 in its entirety and insert the following new language:

"SEC. 701. Section 3(a) of the Wild and Scenic Rivers Act is amended by adding the following new paragraph at the end thereof:

"(16) PERE MARQUETTE, MICHIGAN.—The segment downstream from the junction of the Middle and Little South Branches to its junction with United States Highway 31 as generally depicted on the boundary map entitled 'Proposed Boundary Location, Pere Marquette Wild and Scenic River,'; to be administered by the Secretary of Agriculture. After consultation with State and local governments and the interested public, the Secretary shall take such action as is provided for under subsection (b) with respect to the segment referred to in this paragraph within one year from the date of enactment of this paragraph. Any development or management plan prepared pursuant to subsection (b) shall include (a) provisions for the dissemination of information to river users and (b) such regulations relating to the recreational and other uses of the river as may be necessary in order to protect the area comprising such river (including lands contiguous or adjacent thereto) from damage or destruction by reason of over use and to protect its scenic, historic, esthetic and scientific values. Such regulations shall further contain procedures and means which shall be utilized in the enforcement of such development and management plan. For the purposes of carrying out the provisions of this Act with respect to the river designated by this paragraph, there are authorized to be appropriated not more than $8,125,000 for the acquisition of lands or interests in lands and $402,000 for development."

16. Delete Sec. 753(b) in its entirety.

17. In Sec. 762, delete "permits, Federal assistance and other Federal actions".

18. Delete Sec. 908(a) and insert in lieu thereof the following new section:

"Sec. 908(a) There is authorized to be appropriated, to carry out the provisions of this Title, not to exceed $50,000,000 from the Land and Water Conservation Fund for acquisition of lands, waters, and interests therein and such sums as necessary for the development of essential facilities."

19. Amend that portion of Sec. 1005(a) following the third sentence as follows:

"Such criteria shall be based upon factors which the Secretary determines are related to deteriorated recreational facilities or systems, and physical and economic distress."

20. Amend Sec. 1005(c)(2) to read as follows:

"conditions of existing recreation areas and facilities;"

21. Amend Sec. 1009 to read as follows:

"MATCHING REQUIREMENTS

SEC. 1009. The non-Federal share of project costs assisted under this Title may be derived from general or special purpose State or local revenues. State categorical grants, special appropriations by State legislatures, donations of land, buildings, or building materials and/or in-kind construction, technical, and planning services. No monies from the Land and Water Conservation Fund (77 Stat. 49), as amended, or from any other Federal grant program other than general revenue sharing and the community development block grant programs shall be used to match Federal grants under this program. Reasonable local costs of action program development to meet the requirements of section 1007 (a) of this Title may be used as part of the local match only when local applicants have not received program development grants under the authority of section 1007(c) of this Title. The Secretary shall encourage States and private interests to contribute, to the maximum extent possible, to the non-Federal share of project costs.

22. At the end of Sec. 317(a) insert the following new sentence:

" 'Notwithstanding any other provision of this Act, the Secretary shall not acquire the Marin County Assessor's parcels numbered 199–181–01, 199–181–06, 199–181–08, 199–181–13, and 199–181–14, located in the Muir Beach portion of the recreation area.'."

23. Delete Sec. 729 in its entirety and insert in its place the following new section:

"DESIGNATION OF ALLEGHENY RIVER FOR STUDY

"SEC. 729. Section 5(a) of the Wild and Scenic Rivers Act is amended by adding the following new paragraph at the end thereof:

" '(67) Allegheny, Pennsylvania.—The main stem from Kinzua Dam downstream to East Brady.'."

24. Amend Sec. 732(70) to read as follows:

"(70) Myakka, Florida—The segment south of the southern boundary of the Myakka River State Park."

25. Insert the following proviso preceding the period at the end of the third sentence of Sec. 507(c)(2):

Provided, However, that the value of any lands acquired by the Secretary under the exception in this sentence shall be deducted from the amount of monies available for grants to the State under Subsection (n) of this section.

26. Delete the proviso in Sec. 507(o).

27. Add a new Title XIII to read as follows:

Section 1301. Within 90 days from enactment of this Act, the Secretary of Agriculture shall report to the Committee on Interior and Insular Affairs in the House of Representatives, and the Committee on Energy and Natural Resources of the Senate, the nature and extent of the progress of any proposal to exchange lands owned by the Burlington Northern Railroad on either the Beaverhead or Gallatin National Forests in the State of Montana for lands owned by the United States elsewhere in the State of Montana. Such report shall also discuss any study or appraisal work done by any agency of the Federal government concerning the feasibility, impact, or cost of any such an exchange between the Burlington Northern Railroad and the Federal government, including the sharing of cost of such study. The Department of Agriculture shall not proceed with the processing of any exchange of more than 6,400 acres until and unless authorized to do so by a Concurrent Resolution of the Congress."

Mr. ABOUREZK. Mr. President, I say only that the committee amendment contains language which changes and deletes other language from the bill to satisfy objections from various members of the committee and the Senate.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. ABOUREZK. I yield.

Mr. JAVITS. Mr. President, I would like to address my remarks to several sections of this omnibus parks bill with which New Yorkers are very much concerned.

First, Mr. President, I am pleased to

see the urban and recreation recovery program which I cosponsored along with Senator METZENBAUM and many others of my colleagues included in this bill. It will make some $650 million available to cities for the development of recreational opportunities which are close to home. This provision is important for several reasons: First, auto travel to distant national parks is prohibitive in light of the energy crisis, and second, cities in the throes of fiscal difficulties cannot adequately meet the recreation needs of their residents. In fact a survey of the infrastructure of many parks built by cities years ago will show them to be in disgraceful disrepair. It is hard for a city to justify spending money on its parks when other city needs like police and fire protection and sanitation services can hardly be met.

Unfortunately, it is this type of urban blight which has caused too often more affluent residents to flee the cities and to relocate in the suburbs.

Special grants make cost-effective recreation projects more feasible. For example, we envisage that schools and other structures can be used for compatible recreation purposes. Abandoned buildings and lots could also be used to meet the needs of people for community centers and neighborhood parks. Under the provisions of this bill, linear parks like jogging and bike trails and rooftop basketball, racketball, and tennis courts can be established. Mr. President, I urge my colleagues to view this section as a judicious investment in our Nation's cities.

I am pleased to see that an additional $18 million is provided for Statue of Liberty National Monument. Many people from all across the United States and the world view the Statue of Liberty as the gateway to our country and this increased appropriation makes it possible for some very necessary repairs to be made to this great American symbol, a picture of which I have on the door of my office in Russell, I might add.

St. Paul's Church, Eastchester, in Mount Vernon, N.Y., is often recognized by leaders of the Nation's press as the birthplace of the first amendment. At this site, John Peter Zenger covered the corrupt elections in 1733. Zenger's coverage of that election led to his trial for seditious libel and treason and his ultimate acquittal. That case is often cited as a reason for protection of freedom of the press.

In 1642, Anne Hutchinson sought refuge from religious persecution in St. Paul's. And so, Mr. President, I am pleased that the committee has included this provision which Senator MOYNIHAN and I support in the bill.

Likewise, I support the sections dealing with the designation of the Upper and Middle Delaware as part of the Wild and Scenic Rivers System. The inclusion of these sections represent a compromise—a compromise that has been long in coming. It allows for national protection of those segments of the Delaware the inclusion of which are less controversial. In this way one of our Nation's most beautiful rivers may remain available to posterity. Many city dwellers within the New York metropolitan area are a short drive from this beautiful river and its protection has been urged by environmentalists throughout the country.

Basically, Mr. President, I am pleased with the compromise that we have reached concerning the Fire Island section of the omnibus bill. As with any compromise, both sides will to some extent be unhappy, but in light of all of the circumstances this is the best that we can do at this time.

My experience and perspective regarding the Fire Island controversy is substantial. As a New Yorker, I spent summers on Fire Island with my children. Further, I testified at the hearings in 1963 when the establishment of the national seashore was being deliberated. I worked and hoped then, as I am working and hoping now, so that the national seashore and the private property owners can peacefully coexist. My perspective is, therefore, gained from an intimate knowledge of the area and of the problems.

As you know, under the provisions of 78 Stat. 928, which established Fire Island National Seashore, the condemnation authority of the Secretary of the Interior remains suspended in certain communities provided that those communities have in effect zoning ordinances which meet the Secretary's approval. Unfortunately, however, the localities have granted, in a number of instances, zoning variances which the Secretary finds objectionable. Pursuant to these variances, the property owners have built structures or made improvements which, in the opinion of the Secretary and some environmentalists, are incompatible with the creation of the national seashore. Cognizant that the Secretary's major, if not only, weapon was the power of condemnation, I sought in 1975 to allow the Secretary to seek injunctive relief against those who engaged in these kinds of activities. I also supported an increased authorization for Fire Island in 1975. In fact, a $2,000,000 increase was approved.

H.R. 12536 allowed for two things: First, the establishment of a 40-foot wide dune district spanning the length of the island, and second, for the Secretary of the Department of Interior to condemn houses that had been destroyed to the extent of 50 percent or more in the event of a catastrophic storm. This catastrophic storm damage provision which would have jeopardized the right of property owners to rebuild their homes has been deleted from the measure that we are voting on today.

S. 791 does establish a dune district. However, the original language which would have allowed the Secretary to condemn dune district and other properties if exterior improvements were made has been deleted. The new language leaves developed properties within exempt communities in tact. These property owners will still be able to enjoy their homes provided they comply with the terms of the 1964 act and with the operative zoning ordinances.

Under the new dune district provision, the Secretary cannot acquire any property within its boundaries so long as the owner or owners of the undeveloped lots keep them in their natural state. For all intents and purposes, Mr. President, I call this the status quo provision. Houses that are there can remain, and lots that are empty remain vacant.

This provision is designed to prevent any new development on the dunes. My amendment now included with the committee amendments, Mr. President, reads as follows: "Undeveloped property within the dune district that is acquired by the Secretary shall remain in its natural state.

Congress' rejection of the original language contained in H.R. 12536 serves to reaffirm our commitment to what has been termed the Cape Cod Formula. Under this formula property owners living within national park boundaries are allowed peacefully to coexist with the National Park Service.

Man must learn to live more harmoniously with his environment, and Fire Island is just one such noble effort to bring national recreation projects closer to where the millions of our people live.

For the record, Mr. President, I want to state clearly that nothing that we do today should be interpreted to mean that Congress wants Fire Island returned to a natural state. The adoption of such a position would contravene the substantial legislative history which surrounded the establishment of the Fire Island National Seashore in 1964.

Lastly, I support the increased appropriation of this $5 million for Fire Island, and I urge my colleagues to view these sections of the bill as a step in the right direction in terms of providing increased recreation opportunities for urban America.

In sum, Mr. President, urban residents and particularly New Yorkers can be pleased with these sections of S. 791 which recognize that their needs for an improved quality of recreation had not, heretofore, been adequately addressed at the Federal level. And I would like to thank my distinguished colleagues and their staff members who have worked with my office for the assistance they have given in putting together a bill that will increase recreation opportunities for one of our country's most densely populated urban areas.

Does this amendment contain the agreed upon language relating to the Fire Island Park which reads at the end of section (g)(1) after the words "natural state" insert "Undeveloped property within the Dune District that is acquired by the Secretary shall remain in its natural state"?

Mr. ABOUREZK. Yes, it does.

Mr. JAVITS. Does it also contain the provision respecting St. Paul's Church in Westchester County?

Mr. ABOUREZK. Indeed, it does.

Mr. JAVITS. I join Senator MOYNIHAN, who just eloquently addressed the Senate, in thanking my colleagues on this committee, the manager of the bill, Senator ABOUREZK, the ranking minority member, Senator HANSEN, for the care and sensitivity with which they have provided for these matters, the Fire Island Seashore, being of really paramount importance to the millions who surround

this area, and the sensitivity which dictated the proper treatment of this historic landmark which is St. Paul's Church.

I thank them very much.

MR. ABOUREZK. I thank the Senator.

Mr. MATSUNAGA. Mr. President, will the Senator from South Dakota yield?

Mr. ABOUREZK. I am happy to yield.

Mr. MATSUNAGA. Mr. President, as I understand the amendment which the Senator from South Dakota is offering, the 204 acres which was originally included in the House measure as an expansion of the city of Refuge National Historic Park in Hawaii is omitted in the Senate bill?

Mr. ABOUREZK. It has been deleted.

Mr. MATSUNAGA. It has been deleted?

Mr. ABOUREZK. That is correct.

Mr. HAYAKAWA. Mr. President, I ask for order. I have great difficulty hearing the Senator from Hawaii.

The PRESIDING OFFICER. If we could have order in the Chamber, the Senator from California has made a very valid point. The Chair is having trouble himself hearing the Senator from Hawaii, and that is unusual.

The Senator from Hawaii may continue.

Mr. MATSUNAGA. I thank the good Senator, the Senator from California, and I am certainly delighted to know that he would like to listen to every word that the Senator from Hawaii would like to say in the Chamber.

Mr. President, I rise in strong support of the amendment offered by the Senator from South Dakota.

Mr. President, I rise in strong support of the amendment offered by the Senator from South Dakota (Mr. ABOUREZK). Included in his amendment is a proposal to establish the Kaloko-Honokohau National Historical Park in the State of Hawaii.

As a member of the Subcommitee on Parks and Recreation of the Committee on Energy and National Resources, I solicited views from Hawaii on this Kaloko-Honokohau Park proposal last summer in conjunction with the subcommittee's hearings on H.R. 12536, the National Parks and Recreation Act of 1978. Based on the responses I have received, I can safely conclude that the people of Hawaii are overwhelmingly in favor of the proposal. Over 600 letters from Hawaii indicated strong support for the establishment of this new Hawaii National Park and only 10 letters expressed opposition to the proposal. The Governor of the State of Hawaii, the Honorable George R. Ariyoshi, supports this proposal as does the entire Hawaii congressional delegation.

Mr. President, the enactment of the Kaloko-Honokohau National Historical Park proposal is a matter of great urgency to my State. The lands proposed for acquisition by the Department of the Interior for this new national park are currently zoned for residential and resort development. A resort and residential development proposal are currently pending approval in the planning office of the county in which the park is to be situated.

The entire land portion of the proposal is currently a National Historic Landmark and has been since 1967. In 1962, the area was given a rank of "high value" in a proposal submitted by the National Park Service to place the land on the National Register of Historic Landmarks. The historic and archeological sites on this property represent a civilization which flourished long before the discovery of America by Christopher Columbus in 1492. However, the property is currently up for scale as a prime location for hotel and condominium development. It would be a great national tragedy if this land were not preserved in perpetuity as a living tribute to one of the country's four recognized aboriginal civilizations.

The park site contains 234 known, significant native Hawaiian historic and archeological sites. These sites range from three intact native Hawaiian fishponds, native Hawaiian temple sites, house platforms, petroglyphs, various religious, recreational and subsistence artifiacts and structures, and most importantly, the area contains the burial sites of many prominent members of native Hawaiian royalty, including that of King Kamehameha I, the first Hawaiian king who united the Hawaiian Islands under a single rule and thereby established peace throughout Hawaii for the first time in the history of the islands. As a tribute to his great and lasting contributions toward peace and social welfare, the State of Hawaii has placed a bronze statue of King Kamehameha I in Statutory Hall in the U.S. Capitol. Because of the existence of the burial sites of native Hawaiian royalty alone, this land is considered sacred by the native Hawaiian community.

The basis for this new national park proposal is a report compiled by the Honokohau Study Advisory Commission which was provided to the Department of the Interior in 1974. The Commission itself was established through an Act of Congress enacted as Public Law 92–346, in 1971.

While the Honokohau Study Advisory Commission report entitled, "The Spirit of Kaloko, Honokohau," outlines a rather unique national park proposal with respect to the existing units of the national park system, it has been firmly established through testimony provided by the National Park Service to the Subcommittee on Parks and Recreation that this proposal is wholly consistent with existing National Park Service guidelines on cultural preservation. It is, therefore, the intent of the Kaloko-Honokohau National Historical Park proposal that the report of the Honokohau Study Advisory Commission be adhered to as closely as possible in the development and management of the park in order to carry out the cultural preservation intent of this proposal.

The intent of the Kaloko-Honokohau Park proposal is threefold. First, the proposal will restore, stabilize, and preserve the native Hawaiian historic sites which are located in the Kaloko-Honokohau area on the Island of Hawaii in the State of Hawaii, which prior to the arrival of Capt. James Cook in 1778, the first Caucasian to visit the Hawaiian Islands, was a thriving shoreline native Hawaiian fishing community. The area is adjacent to another native Hawaiian community of great historical significance, Kailua, in which the royal palace of King Kamehameha I was situated. It is, therefore, certain that the Hawaiian royalty frequented the Kaloko-Honokohau area during their travels to and from Kailua.

Today, the community of Kailua is a resort area which bears little resemblance to the community which it was only 25 years ago. Many of the native Hawaiian historic sites which are associated with the community of Kailua have been irreparably damaged or destroyed as the result of increasing urbanization and resort developments in the area. If this national park proposal is not implemented very soon, it is certain that many, if not all of the historic sites which are associated with the Kaloko-Honokohau area may be irreparably damaged or destroyed as has been the case in Kailua and in other areas of the State, with accelerated urban development throughout the Hawaiian islands since the turn of the century.

The second intent of the Kaloko-Honokohau National Park proposal is to restore, stabilize, and preserve as a living museum vitally important remnants of the declining culture of the native Hawaiians through the development and preservation of the historic and archeological sites in the area and the implementation of cultural programs in the park which would be designed to replicate significant traditional aspects of native Hawaiian culture.

To cite a section of the report of the Honokohau Study Advisory Commission:

> Currently, there is no physical facility in the State of Hawaii that has been set aside solely for the purposes of perpetuating Hawaiian culture and arts, particularly one that is managed by native Hawaiians. Kaloko-Honokohau could provide such a facility because it embodies an integrated life style which was, at one time, found in countless communities through the islands of Hawaii. What remains in this settlement area is not just a few token archeological representations of Hawaiian culture, but the historic site of an entire community that existed as an entity within the boundaries of the Ahupua'a (traditional native Hawaiian land unit) but tied as well to adjacent communities of similar structures. It is a stage upon which the Hawaiian way of life was first performed centuries ago.

Currently, the native Hawaiians in the State of Hawaii suffer the highest rate of unemployment, the shortest life expectancy, the highest rates of acute and chronic diseases, including alcoholism, the highest rate of juvenile delinquency and crime, and the lowest rates of scholastic and professional achievement of all the nonwhite ethnic groups in the state.

As in the case with the native Americans, much of this social and physical maladaptation to the modern world can be traced directly back to a deep sense of loss and alienation over their declining 1,000-year-old culture. Like the native Americans, the native Hawaiians lost culture. Their land was the embodiment of their daily lives, social structure, religion, and most importantly, their soul.

The final specific intent of this new national park proposal is to provide a living demonstration to the rest of the world of how one, closely knit group of people, the native Hawaiians, lived for over 1,000 years before the arrival of the first white man in the island in 1778, in such total harmony with their land and environment that there was always enough food, shelter, clothing, sources of energy, and leisure time to meet their total needs.

The ecological principles which were developed by the native Hawaiians over their 1,000-year existence prior to the arrival of the white man were embodied in their religious beliefs and cultural patterns to such an extent that warfare among the various communities and islands became a highly ritualized interaction in which few if any individuals were mortally wounded and life itself became a completely harmonious endeavor with the natural environment. In short, native Hawaiians adapted to, rather than dominated their natural environment.

It has been estimated that the population of full blooded native Hawaiians was in the vicinity of 300,000 at the time of Captain Cook's arrival in the islands. Today with all our modern conveniences and way of life, the population of full-blooded native Hawaiians in the State has been reduced to 10,000, with approximately 150,000 part-Hawaiians, among a total population in the State of 890,000.

The primary reasons for this population decline among the native Hawaiians are widely known in Hawaii. They are: The introduction of communicable disease strains for which the native Hawaiians had no natural or developed immunity, the erosion over the last 200 years of the fundamental religious and cultural beliefs of the native Hawaiians as the result of the introduction of competing economic forces and religious beliefs, primarily from North America, and the introduction of a Western concept of land use and agricultural practices which progressively removed the native Hawaiians from a subsistence, agrarian lifestyle and forced them toward an urbanized, development oriented economy.

There is no disagreement in Hawaii in the assessment that native Hawaiians have been cut off from their traditional culture by the introduction of Western society into the islands. While there is disagreement over the best solution or solutions which would be necessary to correct this situation, there is little doubt that the ecologically based social, economic, cultural, and religious principles which were perfected by the native Hawaiians could prove to be of substantial value to the rest of the world if human beings are to eventually coexist peacefully on our "island" in the universe, which we call the planet Earth.

Mr. President, the Kaloko-Honokohau National Park proposal would establish a truly unique living museum of native Hawaiian culture not only for native Hawaiians or for residents of the State of Hawaii, but for all the world. Once established, the Kaloko-Honokohau National Historical Park would become a priceless addition to our rich national heritage.

In view of the importance of accurately portraying the aspects of native Hawaiians culture which were associated with the Kaloko-Honokohau area, the park proposal strongly recommends that native Hawaiians be employed in every aspect of the park's development and management to the maximum extent which is consistent with National Park Service employment policies. In any event, it is the specific intent of this proposal that those individuals who are employed in the development and management of the Kaloko-Honokohau National Historical Park should be extremely knowledgeable of and sensitive to all aspects of traditional native Hawaiian culture.

It is the intention of this park proposal to allow the State of Hawaii, if it so desires, to retain its authority over the management of the offshore area of the park and the marine resources contained therein as well as the recreational, subsistence and commercial uses of the offshore area and the access to and from Honokohau small boat harbor, which is located south of and directly adjacent to the southern boundary of the proposed park.

However, in order to improve upon the overall management of the park, the proposal also encourages the State of Hawaii and the Department of the Interior upon the establishment of the park to enter into a cooperative management agreement to develop an overall compatible management program. I strongly believe that such a cooperative management agreement should be developed by the State of Hawaii and the Department of the Interior for the proposed national park.

In determining the precise boundaries between the offshore and onshore portions of the park, in the event the State of Hawaii wishes to retain its authority over the management of the offshore area, existing Federal laws such as the Coastal Zone Management Act and the land use laws of the State of Hawaii should be consulted for any precedent which may be contained therein and which, therefore, may be of assistance in the final determination of these boundaries.

A unique offsite land use control initiative is contained in this proposal which is designed to encourage but not require the establishment of compatible uses on the land and water areas which are directly adjacent to the park through the implementation of adequate controls on air and water quality and on the scenic and esthetic values of the surrounding land and water areas. In the implementation of any such controls, the proposal further suggests the use of the traditional native Hawaiian ahupua'a (native Hawaiian land unit) concept of land and water management.

In order to assist in the implementation of appropriate historical, archeological, cultural, and interpretive programs for the park, the proposal authorizes the establishment of the Na Hoa pili o Kaloko-Honokohau (Friends of Kaloko-Honokohau), a nine-member advisory commission which will assist in the development and management of the park. The criterion for the membership and functions of the advisory commission are specified in the park proposal and have been adapted from recommendations made by the Honokohau Study Advisory Commission in its report to the Department of the Interior on the establishment of the park. I anticipate that this Commission will provide meaningful and concerted guidance to both the National Park Service and the State of Hawaii toward the proper development and management of the park.

An important matter which is not specifically addressed by the proposal but to which specific reference is made in the Honokohau Study Advisory Commission report is the establishment of a Hawaiian Historical and Cultural Research Laboratory and a Library of Pacific Collections within the park. It is my belief that the establishment of both facilities in or affiliated with the park could greatly enhance existing cultural research facilities in Hawaii and knowledge of the culture of the Pacific island peoples if the facilities were properly implemented with the master plan for the park and were properly coordinated with existing and future cultural research efforts in this area by the State of Hawaii, the Bernice Pauahi Bishop Museum, and native Hawaiian foundations, trusts, and community organizations. It is, therefore, my hope that serious consideration will be given by the Department of the Interior and the State of Hawaii toward the establishment of these cultural research facilities within or affiliated with the park.

It is also my hope that as an initial step toward the establishment of these facilities or as an adjunct to the facilities, the Department of the Interior will establish live-in cultural and education centers within the park for all those who may be interested in acquiring an in-depth knowledge of traditional native Hawaiian life and culture. In establishing any live-in cultural and education centers within the park, appropriate curriculum should be designed with the assistance of the advisory commission for the park. Participation in these programs should be open to all interested parties and individuals. However, certain provisions should be made to insure reasonable access to these programs by all native Hawaiians as defined in this park proposal. Consistent with the establishment of these centers is the concurrent establishment of a similar or joint facility to serve as a meeting hall for various community groups which are pursuing native Hawaiian cultural and educational activities.

Finally, the area within the proposed boundaries of the park contains many historically significant foot trails used by the native Hawaiians as transportation routes between the mountains and the seashore and between adjacent villages along the coastline. A trail of paramount historical importance of which a portion will be contained within the

park is the Mamala hoe Trail, named after "Mamala hoe Kanawai" (the law of the splintered paddle), the first social welfare edict in the Hawaiian Islands; a prohibition on assaults on the elderly, the disabled, women, and the young, which was established by Kamehameha I during his reign as first king of the Hawaiian Islands.

The Mamala hoe Trail circumferences the entire island of Hawaii and is still very much visible in many portions of the island. It is my sincere hope that the establishment of the Kaloko-Honokohau National Historical Park and the preservation of the portion of the Mamala hoe Trail which is within the park will lead to the preservation of the entire trail and other historic trails located throughout the State.

The establishment of the Kaloko-Honokohau National Historical Park would be the first living recognition of this country's least understood and appreciated aboriginal civilizations, that of the native Hawaiian. The development of an early but highly effective form of aquaculture, ecologically based patterns of land use and social organization, a highly sophisticated method of celestial navigation which is little understood today but which enabled the Hawaiians to navigate over vast, unexplored expanses of the Pacific ocean without difficulty, a form of medical care which used herbal medications from plants indigenous to Hawaii and the South Pacific islands, whose effectiveness have been highly praised by modern day physicians, and other accomplishments by native Hawaiians clearly indicate that their civilization was much more advanced prior to the arrival of the white man in the islands than are many other similar cultures found today in the world's tropics.

Mr. President, the Kaloko-Honokohau area is to the native Hawaiian community what the Mount Vernon Estate in Virginia is to the Virginians. Anyone who has had the opportunity to visit Mount Vernon knows that the estate is situated in one of the most peaceful and scenic locations imaginable. In fact, George Washington himself once commented that—

No estate in United America is more pleasantly situated than Mount Vernon.

Few individuals, if any, would entertain serious thought to developing the Mount Vernon area into a major resort and residential area, complete with a golf course, in view of its priceless contribution toward our national heritage. However, such thoughts have been and are currently being seriously entertained for the Kaloko-Honokohau area in Hawaii, a percel of land which has an equivalent cultural value to Mount Vernon for the Native Hawaiian community, the State of Hawaii and, therefore, the Nation as a whole.

Mr. President, the addition of Kaloko-Honokohau National Historical Park as a unit of the national park system would be a truly priceless contribution to our national heritage for it would be a living recognition of a civilization which has existed for more than 1,000 years, more than twice the age of this country as it was settled by colonists from Europe, and more than five times the age of the United States of America. Furthermore, it would be a recognition of the importance of retaining as sacred the final resting place of Kamehameha I, who was in every sense, the George Washington of the Hawaiian Islands.

Mr. President, my colleague, the senior Senator from Hawaii (Mr. INOUYE), and I both strongly support this cultural preservation proposal and we strongly urge its adoption by the Senate. In concluding my remarks on this proposal, I would like to cite a section of the Honokohau Study Advisory Commission report which in eloquent simplicity succinctly describes the ancient Hawaiian settlement at Kaloko-Honokohau:

Along the Western coastline of the island of Hawaii lies the hot, rugged lava of Kaloko, Honokohau. This seemingly barren and harsh landscape does not appear to be suitable for human existence, and yet, long before written history, the Hawaiian people built a thriving settlement upon the A'A lava, which was to last well into the 19th century when the forces of western culture brought an end to the Hawaiian way of life.

Some people find it difficult to understand why the ancient Hawaiians chose to settle upon the inhospitable lava field of Kaloko, Honokohau. The reason was, perhaps, a spiritual one, for there was a spirit in Kaloko, Honokohau. The Hawaiians who first came to the area felt its presence in every rock and tree, in the gentle waters of the shallow bays, and in the tradewinds that swept across the prehistoric lava flow. They touched the spirit and felt its mana (power).

The spirit of Kaloko, Honokohau was its life, the life that flowed in its land and the water that washed upon its shore. Like the Hawaiians who found its presence elsewhere, the people of Kaloko, Honokohau let the spirit become a part of their existence. They lived in such perfect harmony with it that they became a singular, total, and inseparable environment.

Mr. ABOUREZK. Mr. President, I yield back the remainder of my time.

I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment was agreed to.

Mr. CHURCH. Mr. President, this bill contains provisions affecting the St. Joe River in the State of Idaho, the Sawtooth National Recreational Area in my State and also the establishment of four historic trails, the Mormon Pioneer Trail, the Oregon Trail, the Lewis and Clark Trail, and the Iditarod Trail in Alaska.

ST. JOE WILD AND SCENIC RIVER PROPOSAL

Mr. President, one of the sections of the legislation which we are now debating would add 66.5 miles of the upper stretches of the St. Joe River in northern Idaho to the National Wild and Scenic Rivers System.

When Congress approved the original wild and scenic rivers legislation in 1968, the entire St. Joe was included in the study section of the bill so that it would be reviewed by Federal and State agencies. Since then, the river has been thoroughly studied by those agencies and found to be a suitable addition to the wild and scenic rivers system. However, those studies and the proposed classification of the St. Joe kindled a local controversy of fierce intensity, which kept the citizens of the St. Joe Valley polarized for years.

Earlier this year, the proponents and opponents of Federal classification of the river decided it was time to end the fued. At my encouragement, they sat down together and worked out a compromise plan which resolved their differences. On May 9, I introduced along with Senator MCCLURE their agreement in the Senate as legislation. Subsequently, I chaired a field hearing of the Parks and Recreation Subcommittee on the St. Joe bill in Wallace, Idaho. Senator MCCLURE and I have modified our original bill to take into account the concerns of the local citizens who testified in Wallace or contacted us in writing after the hearing.

The modified version of this legislation would classify the section of the main stem of the St. Joe above its confluence with the North Fork of the river to Spruce Tree Campground as a recreational river and the section of the main stem from Spruce Tree Campground upstream to St. Joe Lake as a wild river.

In order to protect the superb water quality of the upper St. Joe basin, this legislation also prohibits dredge or placer mining in the basin above the point where the North Fork of the St. Joe runs into the main stem.

The proposal would also assure that normal logging or hard-rock mining can continue in this region. Specific language has been included to guarantee road and bridge maintenance and construction, activities which are essential to both timber harvest and mining operations.

In summary, Mr. President, this proposal strikes a reasonable balance. It would protect the wild, untamed stretches of the St. Joe from careless development, while at the same time protecting the basic industries which form the backbone of the economy in this area. With the passage of this legislation, the long-brewing controversy in the St. Joe Valley will be finally brought to a peaceful end.

Mr. President, I ask unanimous consent that a statement prepared by Senator MCCLURE on the St. Joe proposal appear at this point in the RECORD.

ST. JOE WILD AND SCENIC RIVER PROPOSAL

● Mr. MCCLURE. Mr. President, I am pleased to support the amendment establishing the St. Joe River in Idaho as a Wild and Scenic River. This amendment was first introduced as a bill, S. 3052 by Senator CHURCH and myself on May 9, 1978. Hearings were held on S. 3052 August 28 in Wallace, Idaho. As a result of the testimony given by local residents at those hearings, we revised the language of the bill to better reflect the concerns expressed. Before specifically addressing those changes, I would like to briefly note, for the record, the history of this legislation.

The original St. Joe proposal evolved from the work of five individuals representing divergent interests who are residents of northern Idaho. They came together out of a desire to end the long and often heated controversy over the

future of the St. Joe River and drafted a compromise establishing approximately the upper 66 miles of the St. Joe as a wild and scenic river. The goals they sought in their proposal, as stated in their April 25, 1978 statement, were to protect private property rights, including but not all mineral rights, timber harvesting, and generally to protect the undisturbed St. Joe River.

I endorsed these goals but the proposal had not received the broad public discussion that is necessary, therefore, Senator CHURCH and I insisted on public hearings in Wallace, Idaho.

Dredge mining has for years been a potential in the upper St. Joe and various efforts have been made to try and prevent it, such as the 1976 law passed by the Idaho Legislature. The St. Joe was placed in a study category for possible inclusion as a wild and scenic river to consider other forms of protection of its scenic splendor.

In recognizing the scenic values of the St. Joe River, we should also be as quick to recognize that the economy of the area is dependent on continued timber harvests in the St. Joe basin and particularly, in Shoshone County, on mining activities. The language finally drafted is designed to protect these uses as much as possible while prohibiting the dredge mining activities in the tributaries of the main stem. As a result of such a delicate balance between uses and protection of resources, the language has been carefully drafted to state what should be continued and what should be prohibited as a result of inclusion of portions of the St. Joe in the Wild and Scenic River System. My caution and attention to detail have been to make certain this language does exactly what people desire and understand it to do. The Senate, in accepting this language, is stating their intent that this amendment be implemented with the following interpretations.

The map titled "St. Joe River Corridor Map, 1978" is marked to show the exclusion of the North Fork of the St. Joe and its tributaries from this amendment to the Wild and Scenic River Act. The designation of the St. Joe as a wild and scenic river begins above the confluence of the North Fork with the main stem. The Wild and Scenic River Act allows the management flexibility in determining the width of the river corridor and thus none of the North Fork nor its tributaries need to be included within the river corridor.

This amendment clearly states that present and future construction of roads and bridges be allowed in the recreational section so as to assure the continued use of the forest resources outside the river corridor. These uses are mainly timber harvesting and some mining and should not be precluded as a result of classifying the St. Joe as a wild and scenic river.

The language prohibiting dredge or placer mining in the main stem and the tributaries in their entirety refers solely to the method of mining and not the actual ability to mine a placer deposit by any other method other than dredging. Underground hardrock mining is in no way affected by the dredge mining prohibition in the tributaries.

It should be made clear also that the dredge and placer mining prohibition is the only portion of the amendment that affects the tributaries of the main stem both inside and outside the river corridor by the language "in their entirety." The language stating "nothing shall be deemed to prohibit the removal of sand and gravel . . . within the river corridor" shows that the sand and gravel removal is totally separate from the placer mining prohibition and that the jurisdiction of this amendment, except for the dredge or placer mining prohibition, applies only within the river corridor.

The words "under the authority of" are intended to allow any private landowner who needs sand and gravel for road maintenance purposes within the corridor to use it with the permission and under the control of the Forest Service.

The definition of sand and gravel in this amendment includes crushed rock or rock to be crushed. The Forest Service, in conjunction with private landowners, maintains roads for logging and other uses, and utilizes rock quarries adjacent to the river for road construction and maintenance. This amendment in no way contemplates restricting that use.

The St. Joe Lodge, located in the wild section, is in keeping with the primitive setting and may remain as a recreational facility for the convenience of the user.

Once again I commend the efforts of those who brought together opposing viewpoints in this proposal, those who made their views known through testimony and letters and those who helped perfect the language agreed to today. As a result of this legislation, I am hopeful that we have adequately protected the beauty of the St. Joe as well as the economic base of the many Idahoans who reside in the region of the St. Joe basin.●

SAWTOOTH N.R.A. AUTHORIZATION CEILING INCREASE

Mr. CHURCH. Mr. President, one of the provisions of the legislation we are now considering would increase the authorization ceiling for the Sawtooth National Recreation Area in Idaho.

This provision is identical to legislation approved by the Senate in the waning hours of the second session of the 94th Congress in September 1976, and twice during this Congress. It would increase the authorization figure for the acquisition of lands and interests in lands within the Sawtooth NRA from $19.8 million to $47.8 million. This increase is necessary to continue the acquisition program within the NRA which is aimed at protecting the scenic values of this area.

Since the end of fiscal year 1977, the Forest Service has had no authority to expend Federal funds to purchase properties or scenic easements within the Sawtooth area. Consequently, a very tense situation has developed. A number of Idahoans have been in touch with me during the past 2 years expressing their dismay at not being able to secure payment from the Government for their properties. For over 2 years now, these people have been in a state of limbo. The Government has negotiated contracts with these landowners, but has never kept up its end of the bargain by actually paying the landowners for the properties or easements. I have done all I could possibly do to rectify this situation. With the assistance of Senator McCLURE, I have convinced the Senate on three separate occasions to approve the Sawtooth provision. I am hopeful that with the inclusion of this proposal in the pending legislation, we will finally see that this inequitable situation is ended.

HISTORIC TRAILS

Mr. President. I am also pleased to note that the legislation we are now considering contains a version of the National Historic Trails Act, of which I am the primary sponsor.

That legislation corrects an oversight in the National Trails System Act, by establishing a new category of National Historic Trails. The legislation would also designate four routes—the Mormon Pioneer Trail, the Oregon Trail, the Lewis and Clark Trail, and the Iditarod Trail—as the first historic trails.

Without the establishment of this new trails category, the heritage of our Nation's historic migration and transportation routes could be permanently lost. This legislation provides for the identification and marking of our historic trails. However, it also contains provisions which will allow transportation corridors and other similar developments to cross the trails. In order to reduce conflicts with local landowners, the bill contains no authority for the acquisition of trail segments in private ownership. Of course, provision is made for the Government to mark privately owned segments of the trails with the consent of the owner, or to accept donation of the trail segment.

Too often in our rush toward the future we forsake the heritage of our past. The passage of this legislation will assure that the colorful chapters of American history which were written along the Oregon, Lewis and Clark, Mormon Pioneer, and Iditarod Trails will be permanently recorded in our memories and marked on the ground.

Mr. President, I congratulate the manager of the bill for the fine work he has done, and I extend to him my appreciation for his cooperation.

Mr. ABOUREZK. I say the same to the Senator. And I thank him.

Mr. McGOVERN. Mr. President, will the Senator yield?

Mr. ABOUREZK. I yield to my senior colleague from South Dakota.

Mr. McGOVERN. Mr. President, I first of all commend my distinguished colleague from South Dakota for the constructive work he has done on this legislation that he now manages in the Chamber.

MISSOURI RIVER SECTION AND THE WILD AND SCENIC RIVERS SYSTEM

Mr. President, the legislation we have before us would add a section of the Missouri River to the Wild and Scenic Rivers System as a "recreational river." This portion of the Missouri is approximately 60 miles long and stretches from Gavins Point Dam downstream to Ponca State Park, Nebr. In this reach the river forms the border between South Dakota and Nebraska. More importantly, it is also one of the last vestiges of the "free flow-

ing" Missouri remaining much in the same condition as it must have been before passage of the Flood Control Act of 1944.

The Flood Control Act provided for construction of U.S. Army Corps of Engineers dams on the Missouri mainstem, including the Fort Peck, Garrison, Oahe, Big Bend, Fort Randall, and Gavins Point Dams.

These dams benefit our Nation and the Missouri River Basin region. They provide low-cost hydroelectricity to consumers in several States. They make possible a navigation industry which operates at least 9 months out of the year, moving freight in barges from the Mississippi River System, upstream to Sioux City, Iowa, and back.

Hundreds of millions of dollars in flood damage have been saved because of the dams. A water-based recreation industry is blooming. The dams have enhanced habitat for fish and migratory waterfowl. In fact, we have recently learned that traditional operation of Garrison and Oahe Dams provides whooping crane habitat in "water short" years and are thus helping this endangered species to live and come back from near extinction.

For all the good these dams and reservoirs have provided, the States in which they were constructed did lose something—river bottom land—nearly 500,000 acres worth in South Dakota alone.

This land was some of the most fertile in our State, yielding crops in the rich, moist soil in those years when the river did not wash out the seed or drown young plants in flood water. The old Missouri River bottom lands also provided unique "edge habitat" fostering an abundance of diverse wildlife.

We might be tempted to believe we cannot have it both ways—that we cannot have both the dams and reservoirs and the river bottom land. But we can.

There exists along the Missouri between the tailwaters of each dam and the start of the next reservoir below them unique pockets of river much like they might have been before the dams were constructed. Even more importantly, there exists a nearly 60-mile stretch of river between the tailwaters of Gavins Point Dam and Ponca State Park which looks very much like it did when the Lewis and Clark expedition worked their way upstream in search of the Northwest Passage. This is the segment of the Missouri we are concerned with in this amendment. Can you imagine the unique recreational opportunity this area might provide, especially at a time when we are considering making the Missouri part of the Lewis and Clark National Historic Trail?

This designation is not the work of people seeking to preserve a free flowing river from avaricous dambuilders. It is instead a suggestion advanced by the U.S. Army Corps of Engineers in their recent "umbrella study" of the Missouri River System in Montana, North Dakota, South Dakota, and Nebraska. Missouri River Division Engineer Gen. William Read recognized this opportunity and was enough excited by it to bring it to my attention last spring.

This suggestion did not come from the corps alone, however. It was the result of a cooperative study by the corps and the Department of the Interior's Heritage Conservation and Recreation Service. It too is the result of delicate negotiations among the South Dakota and Nebraska congressional delegations, the U.S. Fish and Wildlife Service, both States' game and fish departments, and landowners represented by the Missouri River bank stabilization association who live along the river and need bank stabilization work to protect their property from river erosion.

This is what makes this amendment so remarkable. It is the result of interstate cooperation, Federal and State cooperation, and cooperation by all people having diverse interests in the future of this stretch of the Missouri. On this basis alone the designation should be justified as an example of how cooperation among diverse interests can result in the advancement of water resource development.

It was with some surprise, then, that Senators EDWARD ZORINSKY, CARL CURTIS, and I learned that the U.S. Department of the Interior testified before the Senate Parks and Recreation Subcommittee on July 26 that it was the Carter administration's decision to oppose this designation at this time.

Despite all studies which preceded this cooperative agreement and despite the existence of such a unique arrangement, it was the administration's decision that an additional study costing $1 million was needed to look into the matter further. We were not appeased, or pleased, with this suggestion.

In alarm, Senators CURTIS, ZORINSKY, and I wrote subcommittee chairman JAMES ABOUREZK about this matter. I ask unanimous consent to have our letter to Senator ABOUREZK dated July 31, printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 31, 1978.

Hon. JAMES ABOUREZK,
Chairman, Parks and Recreation Subcommittee, Senate Energy and Natural Resources Committee, Washington, D.C.

DEAR MR. CHAIRMAN: We were extremely disappointed when the National Park Service, U.S. Department of the Interior testified before the Subcommittee on July 26 that it is the Administration's decision to oppose the designation of the Missouri River from Gavins Point Dam to Ponca State Park, Nebraska, as a "recreational river". While we understand the Administration's position is dictated by budgetary constraints rather than outright opposition to the designation, we believe an explanation of the consultations which have taken place in arriving at our decision to support this designation might be helpful to the Subcommittee in its deliberations. Frankly, we believe that if "cuts" are to be made in the Omnibus Parks Bill (H.R. 12536), the Missouri River is hardly the place to begin in light of circumstances we will elaborate upon.

As the Subcommittee is aware, the U.S. Army Corps of Engineers was authorized under Section 32 of the Water Resources Development Act of 1974 to construct multiple demonstration projects of bank stabilization. Along the Missouri River, in the reach involved in this designation, the U.S. Fish and Wildlife Service and the South Dakota and Nebraska Game, Fish and Parks Departments agreed to waive requirements for environmental impact statements for these demonstration projects because the six involved would have minimal or insignificant impacts upon the human environment in the area. They were also interested in analyzing the impacts of the innovative technology being applied by the Corps in this instance upon fish and wildlife resources in the area.

However, during the last several years, because of pressures from landowners along the river desiring additional bank stabilization, the Congress has authorized the Corps to construct another three projects and is considering authorization of two more besides, bringing the total to eleven.

Because this number exceeds that agreed to by the FWS and the States of South Dakota and Nebraska, strong consideration has been given to requiring environmental impact statements be prepared for the additional structures. Needless to say, this would impede, if not altogether stymie, bank stabilization in the area. There is general agreement among all concerned that there is an undeniable need and compelling evidence for this bank stabilization.

In August 1977, the Corps issued an "umbrella study" of the Missouri River in South Dakota, Nebraska, North Dakota and Montana which recommended "recreational river" status for the reach of the Missouri in question. This recommendation was based upon the results of a joint U.S. Army Corps of Engineers/Bureau of Outdoor Recreation (now the Heritage Conservation and Recreation Service) study of the recreational river designation.

This Corps' recommendation was seized upon by all the parties involved as a solution to the very knotty problem of how to implement needed bank stabilization while at the same time protecting wildlife values. It also presented a unique opportunity for recreation along the last vestige of the "natural" Missouri much as it was before it underwent massive development.

On April 11, Congresswoman Virginia Smith of Nebraska convened a meeting of all the interested parties. The following agencies, organizations and individuals were represented:

"U.S. Fish and Wildlife Service/Area Office, Pierre, S.D.

"U.S. Fish and Wildlife Service/Region 6 Office, Denver, Colorado.

"U.S. Fish and Wildlife Service/Washington, D.C.

"S.D. Department of Game, Fish and Parks.

"Missouri River Bank Stabilization Association.

"Siouxland Interstate Metropolitan Planning Council/Sioux City, Iowa.

"U.S. Army Corps of Engineers/Missouri River Division.

"U.S. Army Corps of Engineers/Omaha District.

"U.S. Army Corps of Engineers/Chief's Office, Div. of Civil Works.

"National Park Service.

"Office of Congressman Charles Thone, Nebraska.

"Office of Congresswoman Virginia Smith, Nebraska.

"Office of Senator Edward Zorinsky, Nebraska.

"Office of Congressman James Abdnor, South Dakota.

"Office of Senator James Abourezk, South Dakota.

"Office of Senator George McGovern, South Dakota."

During this meeting, the principle compromises inherent in the legislation as approved by the House Interior Committee and passed by the House of Representatives were hammered out. There were subsequent meetings to further iron-out the language to be used in the authorizing legislation. In any

case, the language, as passed by the House, is completely acceptable to all the parties involved.

It is our understanding the Subcommittee is concerned specifically with the following portions of the authorizing legislation:

"The Secretary of the Army (acting through the Chief of Engineers) shall condition the construction or maintenance of any streambank stabilization structure or of any recreational river feature at any site under subparagraph (A)(i) upon the availability to the United States of such land and interests in land in such ownership as he deems necessary to carry out construction and maintenance and to protect and enhance the river in accordance with the purpose of this Act . . ."

". . . Notwithstanding the authority to the contrary contained in subsection 6(A) of this Act, no land or interests in land may be acquired without the consent of the owner: *Provided*, That not to exceed 5 per centum of the acreage within the designated river boundaries may be acquired in less than fee title without the consent of the owner, in such instance of the Secretary's determination that activities are occurring, or threatening to occur, thereon which constitute serious damage or threat to the integrity of the river corridor, in accordance with the values for which this river was designated. . . ."

The Subcommittee is understandably concerned that this language could set precedent for future authorizations of this kind, however, we must cite the peculiar circumstances surrounding this particular designation and the lengthy consultation which evolved this language.

The language provides that in order for there to be any bank stabilization, the landowner who is to benefit from it must also make available land for protection of fish and wildlife values. This insures there will be no bank stabilization without protection of wildlife and recreational values. This is agreed to by all parties involved with the designation.

The "5 per centum" cited in the language does not include land made available under the aforementioned condition, nor does it include that which is already in public ownership (State and/or County). This provision is agreed upon by all involved.

Simply stated, as things presently stand, there is no way to protect wildlife values along the river without this designation. This legislation corrects that problem. It also permits needed bank stabilization. It also creates a unique recreational opportunity.

We sincerely feel the Subcommittee should weigh this evidence of unprecedented cooperation before accepting the Administration's viewpoint in this matter. Frankly, we do not believe those who recommended its deletion are familiar enough with it to have passed that judgment. This proposal is not "park barrel". It is the result of careful consultation and years of work to solve very real problems confronting landowners, Federal and State agencies, and the Congress. The Nebraska and South Dakota congressional delegations went to extreme lengths to see it included in this Omnibus Parks Bill because we believe the designation's time has come.

We are convinced the proposal to expend $1-million for another year's study of the designation will serve little purpose. This designation has already been thoroughly studied. The information the Administration hopes to glean from an additional report is most likely already available to it. If it is not, however, then the Subcommittee should take note that under this designation the first thing which will happen is that the Recreational River Advisory Group will be formed, as provided for in the legislation. This group is charged with assisting the Secretaries of Army and Interior in formulating a management plan for this stretch of the river. If it is the conclusion of the parties involved that an assessment is needed to determine the relationship between the bank stabilization structures and wildlife and recreational values, the study can be accomplished within the framework provided for in this legislation.

We are afraid that without passage of this legislation the attempt to arrive at an amicable compromise will be lost forever, that the parties involved in working so hard and long to formulate this agreement will be so thoroughly frustrated that they will return to their adversary relationship. Needed bank stabilization will be stymied. If it is not, then wildlife values could be forever lost because they cannot be protected. Even more importantly, perhaps, a unique opportunity to preserve the natural recreational values of the Missouri River could be lost as well just as the natural values of other portions of the river have been. We feel such a scenario would be tragic, especially when it could be averted by your affirmative action at this time.

We sincerely urge the Subcommittee to give this designation its most serious consideration based on the information contained in this letter. Though none of us serve either upon the Subcommittee or the full Committee, if we can in any way be of assistance to you in your deliberations, please do not hesitate to call upon us.

Sincerely,

GEORGE MCGOVERN,
CARL CURTIS,
EDWARD ZORINSKY.

Mr. McGOVERN. Mr. President, additionally, I ask unanimous consent that section 708 of the house report accompanying H.R. 12536 (Rept. No. 95–1165) which concerns this designation be printed in the RECORD.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

[Report No. 95–1165]

SUPPLEMENTAL VIEWS

The Committee on Interior and Insular Affairs, to whom was referred the bill (H.R. 12536) to provide increases in appropriations ceilings, development ceilings, land acquisition, and boundary changes in certain Federal park and recreation areas, and for other purposes, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Page 1, beginning on line 3, strike out all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "National Parks and Recreation Act of 1978".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Definition.
Sec. 3. Authorization of appropriations.

Section 708. The addition of this segment of the Missouri River to the system is the result of a delicate negotiation between affected landowners; various governmental planning councils, groups and agencies; conservation interests; and members of Congress. The language provides that the Secretary of the Interior shall construct such recreation features and streambank stabilization features as he deems necessary and advisable, and shall maintain various streambank stabilization structures. No streambank stabilization structure or recreational feature is to be placed or maintained on private land without the owner and the United States first negotiating suitable arrangements for adequate protection of any land within that ownership within the river boundary in accordance with the purposes of the Wild and Scenic Rivers Act. Condemnation authority is limited to no more than 5 percent of the acreage within the designated river boundary, and that is limited to less-than-fee acquisition, and may be exercised only when an owner is damaging, or is threatening to jeopardize or damage, the integrity of the river corridor. This 5 percent acreage limitation excludes (1) those lands for which easements or fee acquisition have been or come to be negotiated associated with lands upon which interests or fee have been or are acquired for the construction of streambank stabilization structures and/or recreational facilities, and (2) those lands protected by any level of government ownership. The river is to be administered by the Secretary, under contract with the Secretary of the Army, through the Corps of Engineers.

The committee intends that the administration shall assign the necessary manpower and budgetary priority to acquisition and development required for accelerated establishment of these Wild and Scenic rivers. The committee is concerned that lack of administration sense of urgency would have a serious impact upon those private landowners affected. There is a further need for the administration to advise landowners in the affected areas immediately as to the details of land acquisition procedures and degree of estate, fee or easements to be acquired.

The committee also intends that the managing agencies develop their management plans with full public involvement as rapidly as possible. Significant attention should be paid to the problem of overuse that often occurs on designated rivers to the detriment of the resource such designation attempts to protect. Particular attention and urgency should be paid to the Pere Marquette River, Mich., to preserve one of the most famous scenic rivers in the midwest region.

Mr. MCGOVERN. Mr. President, these documents make some relevant points I believe are necessary in establishing the legislative history of this amendment so they can later be used to clarify "congressional intent" in this regard. I would also like to amplify points contained in the documents at this time.

First of all, this amendment authorizes the Secretary of the Interior to enter into a cooperative agreement with the Secretary of the Army concerning a management plan for this stretch of the Missouri. This is necessary because it is the Secretary of the Interior who is normally responsible for administration of the Wild and Scenic Rivers Act. Yet, in this instance, the river's routine management is and should be the responsibility of the Corps of Engineers.

The management plan is to provide for, but not be limited to, a program for construction and maintenance of bank stabilization work and recreational development. The Secretary of the Interior may additionally delegate day-to-day management responsibility for the recreational river development to the corps as part of the plan. He would have this right and I would assume he will so delegate it.

The House report also makes reference to a "five percentum condemnation authority" for carrying out the purposes of this designation. This figure is based upon the total acreage within the designated river boundary and limits condemnation to those instances where a landowner is damaging, or is threatening to jeopardize or damage, the integrity of

the river corridor. The 5 percent figure does not include those lands for which easements or fee acquisition have been, or come to be, negotiated in association with lands upon which interests or fee have been, or are, acquired for the construction or maintenance of streambank stabilization structures and/or any recreational facilities. It also does not include those lands currently protected by any level of public ownership.

What this understanding is indicative of is the unique characteristic of this designation. In order for a landowner to obtain needed bank stabilization work on his property, he and the United States must first negotiate a suitable arrangement to adequately protect any land within his ownership within the river boundary in accordance with the purposes of the Wild and Scenic Rivers Act.

In summary of this point, there is a "quid pro quo" under this arrangement. If a landowner wants to protect his property with bank stabilization and such a stabilization plan is authorized under the conditions of this amendment, then that streamback protection is conditioned upon his making an acceptable amount of acreage within the river corridor available for protection of wildlife habitat and other values for which this designation is intended. Both the landowner and wildlife benefit under this arrangement.

Mr. President, I am today urging adoption of this amendment because it is remarkable. In its way, it is a first. Senators ZORINSKY, CURTIS, ABOUREZK and I are excited about it. It is a unique cooperative arrangement among diverse interests seeking to meet a variety of needs while protecting a unique segment of the Missouri River. The potential for this to create a unique recreational experience is unquestionable. The segment's suitability for this designation is undeniable.

In closing, let me address the administration's proposal for an additional year's study. What was that study to accomplish? It was to look into the compatibility of the proposed corps bank stabilization structures and wildlife purposes. I believe the very fact that the Congress has funded several bank stabilization demonstration projects of this nature, the corps having built them and the Fish and Wildlife Service having analyzed their suitability for wildlife purposes in agreeing to this designation is study enough. However, if additional studies are believed to be needed, then they can be arranged for under terms of the cooperative agreement to put together a management plan and can be financed with moneys authorized for expenditure by this legislation.

Mr. HANSEN. Mr. President, I would like to express my appreciation to the distinguished senior Senator from Idaho for his sensitive concern for the two trails that cross Wyoming. He was very helpful, very keenly aware of the problem that could have resulted from the implementation of a concept that has validity in some parts of the country which would really bring great hardship upon those persons living in Wyoming through whose properties these two trails go.

I just want to thank him for his understanding, first, of the problem and his knowledge, his willingness, and his ability to help us work the problem out in a manner that I think preserves those important characteristics of the trails, which will provide for marking and information all along the way and yet will not impose upon ranchers and other property owners some of the more onerous burdens that could result, and for taking into account at the same time of the need for rights-of-way for power lines, for pipelines, and/or roads.

I thank my colleague from Idaho.

Mr. CHURCH. I am grateful to the distinguished senior Senator from Wyoming for those typically generous remarks, and I want him to know how much I appreciated his help in our effort to establish these trails.

Several Senators addressed the Chair.

Mr. CRANSTON. Mr. President, I rise in support of S. 791 the omnibus parks bill providing for increases in appropriation ceilings, development ceilings, land acquisition, and boundary changes in certain units of the national park system.

This bill contains an important provision establishing the Santa Monica Mountains National Recreation Area in Los Angeles and Ventura Counties. The Los Angeles metropolitan area with its 10 million people has less open space for public recreation uses than any other major city in the United States. Los Angeles and Ventura Counties need this park. Through the creation of the Santa Monica Mountains National Recreation Area, we will be acquiring new parklands which are within minutes of downtown Los Angeles and tying them together with some of the Nation's finest beaches and mountain scenery. Although the Congress has done much for California, it has not previously provided parklands for this area of the State. There are 17 congressional districts in the two counties—more districts than in most States. And there are no national parks in these 17 congressional districts.

I am pleased that this bill recognizes the great need to preserve the mountains and seashore and provide for southern California's park needs. I want to take this opportunity to express my deep appreciation to the chairman of the Senate Energy and Natural Resources Committee (Mr. JACKSON), the chairman of the Parks and Recreation Subcommittee (Mr. ABOUREZK) and the ranking minority member (Mr. HANSEN) for their support of the Santa Monica Mountains National Recreation Area. I also want to thank the distinguished majority leader (Mr. BYRD) for bringing this omnibus parks bill to the Senate floor before adjournment.

Mr. President, the Santa Monica Mountains provision in this bill designates the national recreation area, directs the Secretary of Interior to identify the areas within the boundaries to be acquired by the Federal Government, and authorizes a total funding of $125 million for the land acquisition program, with a maximum of $15 million available in fiscal year 1979, $40 million for fiscal year 1980, $45 million for fiscal year 1981, $10 million for fiscal year 1982, and $15 million for fiscal year 1983.

Although there are single-family dwellings in the mountains and along the seashore, it is not our intention for the Federal Government to acquire developed properties. The bill specifically provides that except where continued private ownership is clearly incompatible wtih the proposed park, no developed private land will be condemned and acquired.

In order to protect the buffer areas not acquired by the Federal Government, the legislation authorizes a $30 million, 100-percent grant program. The California State Legislature recently enacted legislation authorizing $14,900,000 under the Nejedly-Hart Bond Act for land acquisition in the Santa Monica Mountains provided that Federal funds are available to reimburse the State fully for such projects.

Mr. President, there is tremendous support for establishing a Santa Monica Mountains National Recreation Area. The State of California, the city of Los Angeles, the county of Los Angeles, and the county of Ventura all support a Santa Monica Mountains, National Recreation Area. So do Congressmen TONY BEILENSON, BARRY GOLDWATER, and BOB LAGOMARSINO, who sponsored a nearly identical bill which passed the House. Mr. President, I request unanimous consent that a more complete list of supporters of the national recreation area be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1).

Mr. CRANSTON. Mr. President, I would like to give special thanks to some of the many individuals who worked hard on this legislation. Among those who were so helpful to me and my staff are Susan Nelson, of the Friends of Santa Monica Mountains, Margot Feuer and Jill Swift, of the Santa Monica Mountains task force, Mary Ann Erickson, of the Sierra Club, Joseph Edmiston, of the Santa Monica Mountains Comprehensive Planning Commission, and Gail Osherinko, of Congressman BEILENSON'S staff.

Mr. President, we have a remarkable opportunity to set aside the last remaining major undeveloped recreational resource in the Los Angeles metropolitan area. I hope my colleagues here in the Senate will join me in supporting this bill.

Mr. President, I would like to add a few words about another very important provision of this bill, the addition of Mineral King to Sequoia National Park.

Mineral King is a 16,200-acre area contiguous to Sequoia National Park. The area is currently designated as a national game refuge and administered by the Forest Service as part of the Sequoia National Forest. Topographically and ecologically, Mineral King Valley belongs to the park which surrounds it on three sides. It was not included in the national park when the park was established in 1890 only because of the mining activity which occurred there in the 1870's and

1880's and the potential for mineral development in the future. Since mining ended over 80 years ago, this is no longer a valid reason for the area's exclusion from the park. Moreover, it does not make sense from a land management point of view to continue to have the Forest Service administer Mineral King. The only vehicular access to the valley is through the national park.

Because of the area's central location within the State of California and its superb scenic and natural resources, Mineral King is an ideal site for recreational development. I also recognize that Mineral King has high potential for downhill skiing.

As the sponsor of legislation to add Mineral King to Sequoia National Park, it was not my intention to preclude downhill skiing or the development of ski facilities in Mineral King Valley. In fact, I personally favor downhill skiing there.

There is a real need for additional ski areas close to southern California—both for people who cannot afford the time and expense to travel out of State, and for those presently forced to drive hundreds of miles to ski—and Mineral King can help fill this need.

I recognize that current national park policy is not to permit new downhill skiing facilities and associated structures in any unit of the national park system. However, ski developments do exist now in some national parks, including Yosemite National Park and Lassen National Park in my own State of California. Moreover, because of Mineral King's uniqueness, the Interior Department has agreed to treat Mineral King as an exception to its general policy and to give full and impartial consideration to skiing as a management option if the area is transferred to the Sequoia National Park.

Mr. President, I ask unanimous consent that a copy of the letter from Assistant Secretary of Interior Robert Herbst to Congressman JOHN KREBS outlining the Department's position and commitment to consider skiing be printed in the RECORD immediately following my remarks. I applaud the excellent work of Congressman KREBS on the Mineral King provisions in the measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. CRANSTON. Mr. President, under the bill I introduced the Secretary of Interior is directed to develop within 2 years a management plan for Mineral King that protects the wildlife and scenic and natural values of the area, and at the same time provides for additional outdoor recreational opportunities. This would be done with full public participation.

I do not believe we should predetermine the management plan either by mandating skiing, or by prohibiting skiing. I hope the Interior Department will consider and evaluate all management alternatives for Mineral King, including skiing which I favor.

I understand the committee block amendment offered to the bill this evening would preclude the development of permanent downhill ski facilities at Mineral King. I think this is extremely unfortunate.

If it were possible to offer an amendment on the Senate floor to delete this provision in the committee amendment without endangering passage of the omnibus parks bill which contains the creation of the Santa Monica Mountains National Recreation Area, I would offer such an amendment. But unfortunately any amendment could prevent enactment of the entire omnibus parks bill this year.

Finally, regarding this entire measure, I wish to express my deep appreciation for and admiration of the work of Congressman PHIL BURTON. This bill is a monument to his ability and perseverance.

EXHIBIT 2

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., February 27, 1978.

Hon. JOHN KREBS,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. KREBS: I enjoyed discussing Mineral King further with you, your staff and Senator Cranston's representative on January 31, 1978. As requested I would like to briefly describe the planning process that the National Park Service would use and the kinds of development that would be considered in the planning process upon enactment of your bill (H.R. 1771).

PLANNING PROCESS

Basic data about the area would be assembled from USDA Forest Service, State, National Park Service and other sources.

Public involvement would begin very early to obtain public views about visitor use and management and to get basic data.

Preliminary management objectives would be prepared and an assessment of alternative approaches to reach these objectives would be developed and reviewed by the public, State and Federal Agencies.

A draft plan and environmental documentation would be prepared and reviewed by the public and government agencies.

Then a final plan would be written and implemented.

DEVELOPMENT ALTERNATIVES

The alternatives prepared would reflect the input of the public, the feasible potential uses of the resource, and reasonableness. At this stage, I can state that the following kinds of development alternatives will be evaluated.

(1) Wilderness:

Under this approach, Mineral King would be managed as wilderness. All non-Federal property would be acquired and all man-made structures would be removed. Public access would be via the existing road at present standards with parking at Silver City or possibly further from Mineral King Valley within present park boundaries or even outside the park to the west.

(2) Present Use and Development Level:

Under this alternative, Mineral King would be managed for the kinds and levels of visitor use as exist at present. Improved maintenance, appropriate changes in resource management practices to ensure resource preservation, acquisition of present private holdings, and termination of incompatible leases would occur. Some development would occur to better facilitate public use levels and to mitigate adverse environmental impacts. Additional uses that are of the same general nature as those at present would be

accommodated. Such possible additional uses include increase in winter primitive snow touring and guided interpretive tours.

(3) Development to enable year-round use—moderate:

This alternative includes acquisition of private inholdings; upgrading the access road to a 25 mph standard; development of a 100 site campground to replace the present primitive camping facilities; development of 100 pillow overnight facility and parking to accommodate this increase in use. An administrative/maintenance/residential/utilities complex would be built. Other development such as stabilized or paved trails would be provided to absorb increased day use and mitigate its effects. As much new development as possible would occur on land presently disturbed by present man-made development. Winter use would be accommodated and would include cross-country skiing, snow touring and snow play.

An increase in present use by 40 to 60 percent would be anticipated under this alternative.

(4) Development to enable year-round use—downhill skiing:

This alternative is the same as Alternative 3 except that mechanized downhill skiing and increased overnight accommodations would be provided. During development of this alternative, various methods to provide skiing, including all private and all public ownership and operation, would be explored.

Only those mechanized skiing facilities that are compatible with the esthetic character of the valley would be considered. Extreme effort would be made to enable removal of the obviousness of the skiing facilities during nonwinter periods. Some sort of public conveyance would probably be required to accommodate increased public use. Provision for it would be included in this alternative. Under this alternative visitor use may increase 100–200 percent above present levels.

(5) Forest Service Plan B:

An assessment of this alternative, the most recent developed by the Forest Service, would be included in NPS planning documents.

Upon completion of the alternatives assessment and after discussion with the public and other government agencies, a draft proposal would be developed. This proposal may involve choosing various elements from the alternatives studied. When we do our planning, we will take a fresh look at public needs and at resource potential.

I can assure you that we will fairly look at reasonable alternatives for the valley and that we would be limited by the ability of the valley to absorb impacts of use while preserving its innate natural character.

Thank you for providing me the opportunity to discuss these planning matters with you.

Sincerely yours,

ROBERT L. HERBST,
Assistant Secretary for Fish and Wildlife and Parks.

Mr. METZENBAUM. Mr. President, I would like to commend the chairman of the Energy and Natural Resources Committee, Senator JACKSON, the chairman of the Committee's Parks Subcommittee, Senator ABOUREZK, and the ranking minority member, Senator HANSEN, for including the Urban Parks and Recreation Recovery Act of 1978 as an integral part of this omnibus park bill. Title 10 of S. 791 is identical in all respects, except for a cut in funding, to the bill I introduced on September 30, with the following 18 cosponsors, Senators ABOUREZK, HATFIELD, WEICKER, CRANSTON, WILLIAMS, JAVITS, CASE, RIBICOFF, KENNEDY, CHAFEE, CULVER, RIEGLE, HEINZ, MOYNIHAN, STONE, MATHIAS, SARBANES, and BAYH.

Since the introduction of our bill, Senator DECONCINI indicated to me his concern that some language in the bill appeared to discriminate against his section of the country. As the Senator knows, we have made every effort to make sure that this bill has equal applicability to every region of the country. In this spirit, I have agreed to certain modifications of the bill, which are reflected in the committee substitute. In addition, my good friend, Senator HANSEN expressed his concern that this bill not permit any land and water conservation funds to be used by the applicant for its share of the match. I totally share Senator HANSEN's concerns in this regard. The land and water conservation fund is already overtaxed, and this separate program cannot be permitted to add to its burden. In my opinion, the bill was rather clear on this matter, but nonetheless, in order to assure my good friend, Senator HANSEN, I have agreed to language which specifically prohibits the use of land and water conservation funds from being used in this program.

Mr. President, this measure has been more than 15 years in the making. In the early 1960's, the report of the Outdoor Recreation Resources Review Commission pointed out that Federal recreation policy had ignored the special needs of our urban areas. Over a decade later, the Congress, led by Senator JACKSON, recognized that this vacuum in Federal recreation policy still existed, and instructed the Department of Interior to undertake a major study of "the needs, problems, and opportunities associated with urban recreation in highly populated regions." Interior submitted that study to the Congress earlier this year.

The national urban recreation study reaffirmed that while the preservation of pristine natural areas is a proper national goal, it is equally important that we focus directly on the needs of 70 percent of our people who live day-in and day-out in a maze of concrete corridors. Survey after survey has demonstrated conclusively that urban residents desire and value the benefits of a fully functioning recreation system that provides close-to-home indoor and outdoor facilites and programs. The study emphasized that existing Federal programs simply have not, and cannot, adequately address these specialized needs. Federal assistance according to the study, "could be made much more positive by a unified approach which encourages Federal, State, and local cooperation in addressing critical urban recreation problems."

The study concluded that one of the most pressing problems confronting urban recreation is the rapidly deteriorating State of existing facilities. Financially strapped local governments have been forced to neglect badly needed short-term investments in recreation facilities, and as a result, these facilities are underused or unused.

This finding formed the basis of the administration's legislative proposal to direct funds to physically and economically distressed urban areas for the rehabilitation of recreation facilities. I commend the President for including this initiative within the administration's overall urban policy. I should point out that this measure, if enacted, will be the only new urban policy initiative of major significance to be passed by the Congress this session. During a time when the President is fighting hard to hold down overall expenditures, the administration's commitment to this bill certainly underscores its urgency.

The Subcommittee on Parks and Recreation of the Energy and Natural Resources Committee held 2 days of hearings on the President's proposal in June. Since that time, we have worked with the Department of Interior, a cross-section of the public interest community, and the majority and minority committee staff, in order to perfect this proposal. We believe we have succeeded in that goal.

Mr. President, 34 major organizations strongly support this effort. I would like to share with my colleagues the names of these organizations which support title 10 of S. 791:

National Governors' Conference.
League of Cities.
Conference of Mayors.
National Association of Counties.
National Urban League.
National Urban Coalition.
National Parks and Recreation Association.
National Parks and Conservation Association.
UAW.
AFSCME.
Steelworkers of America.
Sierra Club.
Environmental Policy Center.
Friends of the Earth.
Izzak Walton League.
Conservation Foundation.
National Wildlife Federation.
Wilderness Society.
Environmental Defense Fund.
Environmentalists for Full Employment.
League of Women Voters.
Consumer Federation of America.
National Board of Y.M.C.A.'s.
Girl Scouts of U.S.A.
Boys' Club of America.
Children's Foundation.
Center for Community Change.
Council on Economic Priorities.
Trust for Public Lands.
Lawyers' Committee for Civil Rights Under Law.
Clean Water Action Project.
Joint Center for Political Studies.
National Federation of Settlements and Neighborhood Centers.
National Association of State Outdoor Recreation Liaison.

Mr. President, at this point I ask unanimous consent that a summary of title 10, the Urban Parks and Recreation Recovery Act of 1978, be included in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE BILL

FUNDING

$170 million per year for FY 1979 thru FY 1983.

PROJECTS

Ninety percent of the funds are to be spent on rehabilitating existing indoor and outdoor recreation facilities. Up to ten percent of the

funds may be spent on "innovative" recreation projects which have national implications.

MATCHING REQUIREMENTS

The bill provides for a 70–30 Federal-Local match. However, every dollar the state contributes to the local share will be matched by the federal government. In no event can the federal share exceed 85%.

ELIGIBILITY

The Secretary of Interior is given total discretion in determining those criteria that are most appropriate for eligibility. The bill states that "such criteria shall be based upon factors which the Secretary determines are related to the existence of deteriorated recreational facilities or systems, and physical and economic distress." In addition, a discretionary fund of up to 15% is established for those urban areas that the Secretary determines are deserving of assistance but were not able to qualify under the criteria established by the Secretary.

PASSTHROUGHS

At the discretion of the local government, grants may be transferred to independent special purpose local governments, private non-profit organizations, and county or regional park authorities.

LOCAL COMMITMENTS TO SYSTEM RECOVERY

As a requirement for project approval, local governments must submit to the Secretary a recovery action program which demonstrates their commitment to overall improvements in their recreation system. The Secretary is authorized to provide up to 50% matching grants for the preparation of the recovery action program.

STATE ROLE

The bill directs the Secretary to encourage the States to become active, positive partners in this program. It is anticipated that States will play a major role in financing, administering, and coordinating the program.

COORDINATION

The Secretary is required to coordinate this program with other federal agencies involved with the total urban recovery effort. At the state level, the Secretary shall encourage coordination between state agencies and local applicants, and at the local level, the Secretary is required to assure community and neighborhoods participation in the program.

Mr. METZENBAUM. Mr. President, I think it should be very evident by now just how much support this measure has. The majority and minority members of the Energy and Natural Resources Committee, to whom I owe a great debt of gratitude, have agreed on this provision; 18 Members of the Senate have joined with me as cosponsors. The administration supports it. The House passed it, and 34 organizations support it. The full Senate now has the opportunity to endorse this measure, and thus complete the process of fully recognizing the specialized needs of urban recreation.

● Mr. KENNEDY. Mr. President, I want to begin by commending the distinguished Senator from South Dakota for all of his efforts as chairman of the Subcommittee on Parks and Recreation, and particularly on this bill which has required an unusual amount of time and patience. It is a vitally important piece of parks legislation, and I am pleased that we now have a chance to consider it before the end of this session.

One of the most far-reaching sections of this bill creates a comprehensive program for improving recreational opportunities in our urban areas. The program has been on the drawing board for more than 15 years, and we owe a great debt of gratitude to Senator METZENBAUM for his efforts to have this legislation included in the omnibus parks bill. The pressing need for a Federal urban recreational policy has long been recognized, and those of us who cosponsored the Urban Park and Recreation Recovery Act of 1978 were pleased to see this initiative included in the President's urban policy. Senator ABOUREZK's committee held hearings on the administration's proposal last spring, and since then have worked to perfect a bill which provides a unified approach to urban recreation by encouraging local, State and Federal cooperation. The bill provides the Federal funds needed to encourage States and localities to rehabilitate existing recreational facilities, and to develop new, innovative approaches to address critical urban recreation problems in our cities. Furthermore, the bill directs that these funds be targeted to distressed urban areas. Although the eligibility provisions of the bill are not as strict as I might have liked, the administration has given us assurances that Federal funds will go to those who are in greatest need.

Our past efforts to preserve and enhance this Nation's natural areas represent a strong commitment to providing adequate recreational opportunities for all Americans. We can do no less for the 70 percent of our people who live and work in America's cities. Our urban residents expect and deserve readily accessible recreational facilities, and this legislation is designed to meet that need.

The bill also includes projects of great importance to my own State of Massachusetts. It will correct a boundary problem which has plagued the Cape Cod National Seashore and authorizes increased funding for land acquisition. The bill authorizes funds for the acquisition of two tracts of land for inclusion in the Salem Maritime National Historic Site, and also authorizes inclusion of Dorchester Heights in the Boston Historic Park. This was the site of the first American victory of the Revolutionary War. In the early months of 1776, revolutionaries began to fortify the Heights, overlooking Boston Harbor, under the supervision of General George Washington. A few months later, the British were forced to evacuate Boston under the threat of cannons at the site, never to return to Massachusetts during the Revolution. Finally, I am extremely pleased that the committee included authorization for park service acquisition of the birthplaces of both John Adams and John Quincy Adams in Quincy, Mass. The local community has strongly endorsed the preservation of these two important homes.

I strongly urge my colleagues to support this legislation.●

Mr. GRAVEL. Mr. President, I would like to thank the Senator from Idaho and the other members of the committee for inclusion of the Iditarod Trail as a national historic trail in this legislation. In commemoration of the historic trail and to the vital role of dog mushing in Alaska's history, a 1,000-mile dogsled race has been held annually since 1973 between Anchorage and Nome. This race remains the supreme test of man and dog with travel conditions and stamina requirements varying little from those experienced by mushers 80 years ago. Designation of this trail will aid in the protection of the rich history of the Alaskan Gold Rush era and insure the continuation of the unique dog sled classic along the historic route.

Mr. ABOUREZK. Mr. President, are there any further amendments to be offered?

Mr. GRAVEL. I have another amendment.

The PRESIDING OFFICER. The Senator from Alaska.

UP AMENDMENT NO. 2083

Mr. GRAVEL. Mr. President, I have an amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes an unprinted amendment numbered 2083:

Strike sections 316 and 705 and renumber subsequent sections accordingly.

Mr. GRAVEL. Mr. President, this project, and I am speaking of Tockes Island dam, was authorized under the Flood Control Act of 1962 (Public Law 87–874) for flood control, water supply and hydroelectric power development for the Delaware River Basin which includes portions of Delaware, Pennsylvania, New Jersey and New York. Public recreation was added as a project objective in 1965.

The first preconstruction and planning money was appropriated in fiscal 1964 and the first land acquisition money was voted in fiscal 1968.

The plan has been bogged down in controversy almost since its inception, primarily because of environmental objections but also involving questions of cost, need and practicality.

For those reasons no construction has ever been started despite a total outlay of more than $65 million in project costs through fiscal 1978.

Pressure for deauthorization has mounted in recent years. Three of the four Governors serving on the Delaware River Basin Commission, which was the project sponsoring agency, withdrew their support in mid-1965. Only the Governor of Pennsylvania continued his support of project construction.

That withdrawal, coupled with the results of a project review ordered by Congress at a cost of about $1.5 million, prompted the Corps of Engineers to formally recommend deauthorization in a report to Congress in September, 1975.

The recommendation called for abandonment of any construction plans, for transfer of lands already acquired to the Department of Interior for incorporation into the Delaware Gap Recreation Area, and for phase-out of the Corps involvement in the proposal over a 3-year period.

The proposal went from the Chief of Engineers to the Secretary of the Army June 7, 1976 and was transmitted to the Office of Management and Budget on July 2, 1976. No action has yet been taken on it there which is the point I want to stress.

Meanwhile, deauthorization legislation

was introduced in the Senate (S. 3106) and hearings were held on it July 23 and 26, 1976 by the Public Works Subcommittee on Water Resources. A decision was deferred at that time because of the wide variance of views on the project and the measure died with congressional adjournment that year. We had extensive hearings on this. The Public Works Subcommittee has not made a decision.

A new deauthorization bill (S. 868) was introduced by Senator Case of New Jersey and others on March 3, 1977, but no action has been taken on it.

Mr. President, this is quite a controversial issue in the States of Pennsylvania and New Jersey, I hope that the Senate will not make a decision, which they do in this legislation the wild and scenic rivers legislation, which actually preempts a decision that will obviously irritate a great many constituents in that area. I would hope the managers of the bill would accept my amendment which is to strike from the bill the creating of the wild and scenic rivers area.

Funds voted in fiscal 1977 and 1978 have been for purchase of land for which commitments had previously been made, and for relocation of Highway 209 as would be required by the transfer of the recreational land. In all, 16,800 acres have been acquired of the 25,000 intended for the project as originally conceived.

Mr. ABOUREZK. Mr. President, with great respect to the Senator from Alaska and the distinguished senior Senator from West Virginia (Mr. RANDOLPH), who has great concern about this particular section of the bill, the committee must vehemently oppose and resist this amendment for the reason that the designation does fall under the jurisdiction of the Energy Committee and the Parks and Recreation Subcommittee.

In addition to that there are four States involved in this particular designation, Pennsylvania, New York, New Jersey, and Delaware, and I will state that there is bipartisan support on the part of Senators from those States for this particular designation.

I will not ask for a rollcall vote, but I would urge the Senate to defeat the amendment.

I yield back the remainder of my time.

Mr. RANDOLPH addressed the Chair.

Mr. ABOUREZK. I yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, this matter cannot be disposed of so lightly. In our committee this was, as the able chairman of the Subcommittee on Water Resources indicates, a controversial project, but that does not lessen its value. It was a project which was brought into being after very, very careful hearings.

We held hearings in the subcommittee in 1976 on this project, and the committee did not deauthorize this project. I ask the Senator from Alaska if this is correct?

Mr. GRAVEL. That is totally correct, and I have the hearings right in my hand, and they are extensive hearings.

Mr. RANDOLPH. I say further that at that hearing in 1976—and I would like attention, please, on this matter——

Mr. GRAVEL. Mr. President, could we have order, please?

The PRESIDING OFFICER. The Senate will be in order.

The Senator may proceed.

Mr. RANDOLPH. I want to say the record will show, and he would say if he were here, my friend, the chairman of the Human Resources Committee, Senator WILLIAMS, sent a letter against deauthorization, a letter from the Senator from New Jersey; is that not a fact?

Mr. GRAVEL. Yes, it is.

Mr. RANDOLPH. Yes, it is a fact. It is a fact and it is in the hearing record. Let us realize that this is an important water project. I know of no person within the labor movement of the States involved who has not endorsed this project. That does not mean it goes forward, but this is not the time to deauthorize the project or take an action that has the effect of deauthorization. The committee seemingly, lightly, wants to drop what we have done after careful hearings, and that was to authorize the project. We did not deauthorize the project; is that right?

Mr. GRAVEL. That is correct.

Mr. RANDOLPH. All right. The Governor of Pennsylvania has been an ardent advocate of this project; is that true?

Mr. GRAVEL. Yes, he has.

Mr. RANDOLPH. Is it not also true that the Governor of New Jersey has not indicated his opposition to this project?

Mr. GRAVEL. That is correct according to the testimony.

Mr. RANDOLPH. I think it is very important when a committee of the Senate works as diligently as we have worked in this matter that we not just discuss it as if it were something we could pass over. The committee will continue, of course, to look at the project. But this is not the time or the bill to act in a manner that would block the project that has been authorized by the Committee on Environment and Public Works, after complete hearings.

I am very earnest about this. It is not a matter that deserves, frankly, the very adamant opposition to the amendment that has been expressed here by my friend from South Dakota (Mr. ABOUREZK).

That is not the way to handle this project. There is no reason to cripple a project of this kind, which has had the support of the Environment and Public Works Committee after voluminous hearings.

I rise, not because of the jurisdictional matter; that does not disturb me too much. But I think there is something right and something wrong on a project of this kind. I have expressed to my colleagues the reasons why I hope they will support the amendment of the Senator from Alaska.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. HEINZ. Mr. President, I ask unanimous consent to proceed briefly on the bill.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I understood we had an amendment to delete the designation "wild and scenic river" from the Middle Delaware; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HEINZ. The question is whether removing that deauthorization is going to prevent the designation as park land.

I would raise this question: I would ask whether or not leaving the designation in place—and I personally, as a matter of privilege, favor it—in fact deauthorizes the Tocks Island Dam.

The Senator is correct: this issue has been around and around the good Senator from West Virginia's committee and elsewhere. I have here a letter dated May 19, from the Secretary of the Interior.

The Secretary of the Interior was asked, question 4, page 2:

> Does designation of the Middle Delaware as a component of the Wild and Scenic River System preclude the construction of the dam at some time in the future?

The answer:

> Our proposed designation and transfer of land and acquisition authority from the Corps to the Secretary of the Interior is solely for the purposes of (1) preserving the natural resources of the area, (2) giving the Secretary sole, rather than divided responsibility for the area's administration, and (3) facilitating the acquisition of land at present, rather than future prices, to be managed as part of the NRA, but which would be available for use in the Tocks Island project, should it ultimately be built. It does not preclude the Congress from transferring land needed for the project back to the Corps should a subsequent reevaluation of the water resource needs of the country demonstrate the need for the dam. In this regard, the current studies being done by the Delaware River Basin Commission concerning water and flood control in the area, should be instructive as to the ultimate future of the project.

That is what the Secretary of the Interior said, in this letter of May 19.

I happen to be opposed to the building of the Tocks Island Dam. I happen to be in favor of deauthorizing. But I agree totally with the Senator from West Virginia that it should be deauthorized through his committee.

I do believe that by leaving this designation in here, we do not deauthorize Tocks Island. We do preserve the Middle Delaware as a wild, scenic, and valuable designation area. Therefore, I find myself in favor of leaving this in the bill, but making it very clear on the record that this does not deauthorize the Tocks Island project.

I would add only one further word: Mention has been made of the Governor of Pennsylvania. Governor Shapp is in the process of serving his last few months, and the gubernatorial candidates of both the Republican and Democratic parties have taken a position on deauthorization. I have their letters here. They both favor deauthorization.

But this is another issue that I think must be disposed of by the Public Works Committee; and I would like it clear for the record that regardless of what hap-

pens on this vote, and for my purposes I hope the wild and scenic designation does apply to the Middle Delaware, I want it understood that this does not deauthorize Tocks Island, although I would like to have it deauthorized.

Mr. GRAVEL. Mr. President, I think that question is something that will have to be litigated, if someone chooses to make that attempt. It may well be, if we fail here, that it will be litigated. But I think that is a matter for future consideration.

Mr. ABOUREZK. Mr. President, I yield 2 minutes on the bill to the Senator from New York.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. JAVITS. Mr. President, like Senator HEINZ, I oppose this amendment, and call the attention of the Senate to the fact that on September 13, four Senators, myself, the Senator from New Jersey (Mr. CASE), the Senator from Delaware (Mr. BIDEN), and the Senator from Pennsylvania (Mr. HEINZ) sent a letter to the chairman of the Parks and Recreation Subcommittee, saying:

We are in unanimous agreement that the Upper Delaware from Hancock, New York to Sparrow Bush, New York should be designated as a component of the Wild and Scenic River system. In this connection, we support the proposal Senator Moynihan introduced and many of us joined in sponsoring. We also are in unanimous agreement that the Middle Delaware, from a point just south of Port Jervis, New York to the southern tip of the Delaware Water Gap Recreation Area meets all the criteria for Wild and Scenic Rivers designation.

Mr. President, the process for deauthorization of the Tocks Island Dam I consider to be a sound one. This kind of area in our part of the country is scarce enough, and for those reasons I support Senator HEINZ. I hope the committee will oppose this amendment, and for myself, if there should be any question about it, I will ask for a rollcall vote.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. ABOUREZK. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. All time on the amendment has expired.

Mr. ABOUREZK. I yield myself 1 minute on the bill.

I would just like to say to the Members of the Senate that I think a lot of you realize how difficult it was to put this whole omnibus parks bill together. We had to negotiate with the House; we have done so for several months, and I would have to say if this amendment, which is not in fact the amendment of the Senator from Alaska, were passed tonight, it would upset the negotiations we have had for a number of months with the House, and would put this bill in jeopardy. I do not want to do that, and I hope no one else wants to do that.

I will not ask for a rollcall; I think we can voice vote it down, but I would urge that we soundly defeat this amendment.

Mr. RANDOLPH. Mr. President, I think the Senator was wrong; it will not have to be litigated.

I ask unanimous consent to proceed for 5 minutes.

Mr. ABOUREZK. I yield 5 minutes of my time.

Mr. RANDOLPH. We have five names of Senators, and they are good Senators. But I know the gentleman from New Jersey (Mr. THOMPSON) here will not be embarrassed; he is a Member of Congress and he does not want this project deauthorized.

I am sure that the Senator from New Jersey, the chairman of the Committee on Human Resources (Mr. WILLIAMS), does not want this project deauthorized. I am sure that the other Senator from Pennsylvania does not want this deauthorized. I cannot speak for him, but at least he has been in this corner.

Mr. ABOUREZK. Mr. President, will the Senator yield on that point?

Mr. RANDOLPH. Yes.

Mr. ABOUREZK. I remind my distinguished colleague and friend from West Virginia that Representative THOMPSON offered a similar amendment in the House. He was defeated by a 3-to-1 margin in the House on that particular amendment.

Mr. RANDOLPH. I am sorry the House used that bad judgment. I do not think the Senate will do that.

We are not asking for anything except to continue this subject matter within the Committee on Environment and Public Works. That is exactly what we are asking—nothing more and nothing less. I do not think this Senate wants to go around. That is what we are doing here. The effect of it is to go around, I say to my friend from New York, the work that has been done in the Senate Committee on Environment and Public Works, the long and voluminous hearings which have been held.

There is a way of doing business, and this is the wrong way.

Mr. HEINZ. Will the Senator yield briefly for an observation?

Mr. RANDOLPH. Very briefly.

Mr. HEINZ. It is my understanding there have been two past precedents where wild and scenic rivers have been designated, one being the New River, and I do not recall the other, but I think it was on the Snake River in Idaho, where it was expressly necessary for Congress to deauthorize the dams before the wild and scenic designation was able to proceed.

That, I understand, is the precedent. I think that supports the Senator's point of view, if I am correct.

Mr. RANDOLPH. Yes.

Mr. HEINZ. I thank the Senator for yielding.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment (putting the question).

The noes appear to have it.

Mr. RANDOLPH. Mr. President, I would like to have my colleagues stand on this matter, for and against.

The PRESIDING OFFICER. The Senator has a right to request a division.

A division is requested. Senators in favor of the amendment will rise and stand until counted. (After a pause.) Those opposed will rise and stand until counted.

On a division, the amendment is rejected.

Mr. RANDOLPH. I thank my able friend. This is a position in which we never should have been. I regret that the Senate has acted as it has, but I respect always the conviction of my colleagues in these matters.

UP AMENDMENT NO. 2084

Mr. HAYAKAWA. Mr. President, I move to amend the amendment of the Senator from South Dakota by adding the following:

In lieu of the matter designated as section 314 relating to Mineral King Valley, California, in the House engrossed amendment, insert the following:

The PRESIDING OFFICER. Will the Senator please send his amendment to the desk?

The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an unprinted amendment numbered 2084.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

In lieu of the matter designated as section 314 relating to Mineral King Valley, California, in the House engrossed amendment, insert the following:

Section 314(a). The Secretary of the Interior and the Secretary of Agriculture shall, jointly, conduct a study of the area comprising the Mineral King Valley (and previously designated as the Sequoia National Game Refuge) with a view to determining the manner in which such area could best be used for the benefit of the public, including the potential of such area for purposes of skiing.

(b) Such report shall be submitted to the Congress within the twelve month period following the date of the enactment of this Act and shall contain the recommendations of the Secretary of the Interior and the Secretary of Agriculture with respect to the matter set forth in subsection (a).

(c) There is authorized to be appropriated such sum as may be necessary to carry out the provisions of this section.

Mr. HAYAKAWA. Mr. President, my amendment would simply delay any decision about the future designation or use of the Mineral King Valley for a year.

As many of my colleagues already know, the Forest Service has been working on a downhill ski proposal for the Mineral King Valley since 1965. At that time the Forest Service solicited proposals from private industry for development of a ski resort to be managed on the basis of a Federal permit.

The idea of developing the Mineral King Valley originated years before that. In 1964 the Sierra Club pushed for a wilderness area designation for the San Gorgonio area, which they wanted to preserve in its natural beauty. At that time they suggested Mineral King as

one of the alternative areas to be developed as a ski resort.

Mr. President, I remain convinced that if the Mineral King area is transferred into the jurisdiction of the National Park Service, the skiers of southern California will never see any downhill ski facilities in that location. For this reason I am proposing to substitute the language in the bill for an amendment that calls for a 1-year study of the Mineral King Valley. This study is to be conducted jointly by the Secretary of the Interior and the Secretary of Agriculture. At the end of a year's study, the two Secretaries shall report back to Congress their findings and their recommendations. I might add that this study is to pay special attention to studying the Mineral King Valley with respect to the feasibility of putting downhill ski facilities in the valley.

The issue of an access road has been a matter for some lengthy discussion during the negotiations concerning future uses of Mineral King. I would like to state for the record that at one time this issue was resolved, and that the funding questions were resolved. I have heard the argument that even if ski facilities were approved for the Mineral King Valley, that the development would never take place because of funding problems for the access road. I believe that if we resolve the issue of whether or not to develop Mineral King, that other problems will take care of themselves. I think that if the decision is made to go ahead and put downhill ski facilities in Mineral King, that the funding problems will once again be resolved.

Mr. President, there are thousands of skiers in the southern California area who would like to see downhill skiing in Mineral King. They have been led to believe that such development would take place for the past 13 years. I would hate to see all those efforts go down the drain in the last few hours of the 95th Congress.

Mr. President, a 1-year delay of any final decision on the Mineral King issue will certainly hurt no one. This issue has been controversial for many years, and I would like to see the resolution treat all sides in a fair manner.

For these reasons, Mr. President, I ask for the support of my colleagues on this amendment. I think that a 1-year delay would be acceptable to all parties, and it will give us the time to reevaluate the controversy.

Mr. HANSEN. Mr. President, I yield myself time from the bill.

Mr. President, I rise in support of the junior Senator from California.

It was my amendment, my idea, at least, and I am certain it may have been shared by others, that there really is no place for new skiing facilities within a national park. I think it flies in the face of a long, historical precedent. The basic legislation that created the Park Service spelled out certain objectives that were to be secured for the public for future generations, and included in that was that the pristine character and naturalness of areas should be protected.

I think there is great merit in what the junior Senator from California proposes.

If the area is to become part of a national park, I certainly agree with him, and I would hope that my colleagues might be persuaded, as to the good reason not have skiing in a national park. If it remains in the Forest Service for a year pending the outcome of the study, a course which I think makes good sense, I would hope that Senators would join in supporting the junior Senator from California and saying, "Let us take a look at this problem. It is a complicated one."

One of the interests out there has purchased a rather considerable amount of property. They have made a very significant investment in preparing plans and working up all of the necessary background information that would be prerequisite to a skiing area.

I think if we were to follow the course recommended by the junior Senator from California and put the thing in a study posture, we could certainly arrive at a more balanced, reasoned judgment than would result from the action that otherwise, absent his proposal, would result from our actions this evening. I support the junior Senator from California and I urge my colleagues to join with him in the amendment that he has before the body.

Mr. ABOUREZK. Mr. President, as manager of this bill, I strongly oppose the amendment of the junior Senator from California. Although I have never been to the area called Mineral King, I have seen it in photographs and I have had people describe it to me. It is one of the most pristine areas in the United States, to say nothing of California which has many such beautiful areas. It is an area which, under the Forest Service jurisdiction, had a permit extended to Walt Disney Corp. to develop plans for a ski area.

The National Park Service, the administration, and the environmental groups all around the country have fought for some years to try to prevent the use of the Mineral King area as a ski area. I know of no other national park where skiing is allowed except where existing ski areas are grandfathered in. If we did this, we would have development in Mineral King; we would have tremendous pressure for additional developments, and automobile traffic, the likes you have never seen before, even in the heart of Los Angeles. It would ruin the beauty of Mineral King which we are trying to protect. It is totally contradictory to the bill, to this legislation, to add Mineral King to the Sequoia National Park, an extremely beautiful area.

Mr. President, I urge the Senate to reject it. This amendment calls for a joint study between the Department of the Interior and the Department of Agriculture, a 1-year study to determine whether or not the area could be used for skiing or other purposes. This proposal is supported by the ski industry—and believe me, that is a big, powerful, well-financed industry.

They came in and testified during the hearings with their trade associations and their many supporters. They came in and tried to convince us that we ought to open it up for skiing. I just cannot say strongly enough that the Senate ought to reject this amendment and, if necessary, we shall have a rollcall vote. I would just as soon do it on a voice vote, but if necessary, we will do it that way.

I urge the Senate to reject the amendment.

Mr. HAYAKAWA. Mr. President, I ask the distinguished Senator from South Dakota: Does he wish to forbid absolutely downhill skiing in the Mineral King Valley area or does he wish it to be continued?

Mr. ABOUREZK. My desire, as well as that of many people is to prevent and forbid skiing in the Mineral King area once it is added to Sequoia National Park.

Mr. HAWAKAWA. Is the Senator acquainted with the wishes of the distinguished senior Senator from California in this respect, who has declared quite clearly that he wishes an exception made, despite its conversion to the Park Service, for continued skiing in the Mineral King Valley area?

Mr. ABOUREZK. I am.

Mr. HAYAKAWA. The Senator is aware of that?

Mr. ABOUREZK. Yes.

Mr. HAYAKAWA. I am curious as to the reasons, then, for the insistence on the transfer of lands to Mineral King Valley, previously designated the Sequoia National Game Refuge, at this time. Is the Senator aware that 20,000 skiers in the southern California area have asked for a year's delay in deciding this issue? I believe they made their plea in hearings on Mineral King held by the Committee on Energy and Natural Resources.

Mr. ABOUREZK. Yes, I am aware of the interest of a number of skiers. I do not know if it is 20,000. I know there were a number in the hearing who came and testified in favor of skiing.

Let me say to the Senator from California that each and every time we create or expand a national park, there is always some kind of local interest that is either for expanding the park or against expanding the park or for doing something like skiing or something else that happens to be a local economic interest. We always expect that. We have to deal with it, we have to cope with it, but we do not have to accept it unless the national interest might require it. I would say that the nationnal interest is totally opposed to allowing the skiiers in southern California to have this very beautiful area as their own for a skiing area.

I repeat that it would create problems of pollution that I think even the distinguished Senator from California would be vehemently opposed to if he would just try to foresee the problems that would be involved.

Mr. HAYAKAWA. Mr. President, I should like to tell the distinguished Senator from South Dakota that unlike him, I have seen the area that we are talking about. I am also aware that in the absence of adequate skiing facilities in designated areas, recreational facili-

ties are sought in undesignated areas in a way that tears up the landscape in unsystematic and terribly undesirable ways.

It all should be controlled.

The PRESIDING OFFICER. All time has expired.

Mr. HANSEN. I yield time on the bill to the Senator from California.

Mr. HAYAKAWA. May I suggest the absence of a quorum? The senior Senator from California is not present. I know he has a great interest in this matter and I should like to have him located.

Mr. ABOUREZK. Mr. President, time has expired on the debate.

The PRESIDING OFFICER. The Senator from Wyoming just yielded time to the Senator from California. If the Senator from California wishes to call a quorum, he may do so.

Mr. ROBERT C. BYRD. Mr. President, I hope the Senator will not call a quorum. We shall have the cloakroom try to locate the Senator. I believe he is on the telephone back here.

The PRESIDING OFFICER. Who yields time?

CONSIDERATION OF CERTAIN MEASURE ON THE CALENDAR—H.R. 7101

Mr. ROBERT C. BYRD. Mr. President, while the Senator from California is coming to the floor, I ask unanimous consent to proceed for 30 seconds on another matter.

THE PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there is a bill on the calendar which has been cleared for action by unanimous consent. The distinguished minority leader is on the floor. It is Calendar Order No. 1204. My calendar shows it is cleared for unanimous consent.

Mr. BAKER. If the distinguished Senator will yield, that item is also cleared on our side.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate proceed for not to exceed 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

The assistant legislative clerk read as follows:

A bill (H.R. 7101) to amend certain provisions of law relating to land claims by the United States in Riverside County, Calif., based upon the accretion or avulsion, and for other purposes.

The PRESIDING OFFICER. The Chair, in his capacity as the Senator from Arkansas, objects to bringing up this bill.

Mr. ROBERT C. BYRD. Mr. President, I thank the Chair.

CERTAIN LAND CONVEYANCES

Mr. ROBERT C. BYRD. While the Senator from California is coming to the floor, I ask unanimous consent that the Senate proceed for not to exceed 10 minutes on Calendar Order No. 1205. I assure the Senate that this will be the best use of the Senate's time.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, that item is also cleared on our side.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 7971) to validate the conveyance of certain land in the State of California by the Southern Pacific Transportation Company.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

There is a 10-minute time limitation.

The Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources with amendments as follows:

On page 1, beginning with line 3, insert the following:

TITLE I—TO VALIDATE THE CONVEYANCE OF CERTAIN LAND IN THE STATE OF CALIFORNIA BY THE SOUTHERN PACIFIC TRANSPORTATION COMPANY

On page 1, line 7, strike "That, subject to section 3," and insert "Sec. 101. Subject to section 103,";

On page 2, line 15, strike "2" and insert "102";

On page 12, line 15, strike "3" and insert "103";

On page 13, beginning with line 9, insert the following:

TITLE II—TO CONFIRM A CONVEYANCE OF CERTAIN REAL PROPERTY BY THE SOUTHERN PACIFIC RAILROAD COMPANY TO M. L. WICKS

SEC. 201. The conveyance described in section 202(a) of this Act involving certain real property in Los Angeles County, California, is hereby confirmed in the successors in interest to M. L. Wicks, the grantee in such conveyance, with respect to all interests of the United States in the rights to the real property described in section 202(b) of this Act. Portions of the real property described in such section 202(b) formed part of the right-of-way granted to the Southern Pacific Railroad Company, a corporation, by the United States by the Act entitled "An Act to incorporate the Texas Pacific Railroad Company, and to and in the Construction of its Road, and for other purposes", approved March 3, 1871 (16 Stat. 573).

SEC. 202. (a) The conveyance confirmed by this Act was made by a deed dated May 4, 1887, by the Southern Pacific Railroad Company, a corporation, and D. O. Mills and Gerrity L. Lansing, trustees, to M. L. Wicks and recorded on May 9, 1887, in the office of the county recorder of Los Angeles County, in the Book of Official Records, Book 222 at page 172.

(b) The real property referred to in the first section of this Act is certain real property in the northwest quarter of the northeast quarter of section 15, township 7 north, range 12 west, San Bernardino Meridian, in Los Angeles County, California, more particularly described as follows:

Beginning at the intersection of the easterly line of Sierra Highway (formerly Antelope Avenue) 90 feet wide as shown on county surveyor's map numbered 8200 on file in the office of the surveyor of said county with the easterly prolongation of the northerly line of Jackman Street (formerly 8th Street); thence easterly along said prolongation to the westerly line of the right-of-way, 100 feet wide, as reserved in that certain deed dated May 4, 1887, from Southern Pacific Railroad Company, a corporation, and D. O. Mills and Gerrity L. Lansing, trustees to M. L. Wicks, recorded May 9, 1887, in Book 222 at page 172, official records of said county; thence northerly along said westerly right-of-way line 624.34 feet more or less to the southerly line of Avenue I (formerly Sierra Madre Road); thence westerly along said southerly line of Avenue I to the easterly line of said Sierra Highway; thence southerly along said easterly line of Sierra Highway to the point of beginning.

SEC. 203. (a) Nothing in this Act shall—

(1) diminish the right-of-way referred to in the first section of this Act to a width of less than 50 feet on each side of the center of the main tract or tracts established and maintained by the Southern Pacific Company on the date of enactment of this Act; or

(2) validate or confirm any right or title to, or interest in, the land referred to in the first section of this Act arising out of adverse possession, prescription, or abandonment, and not confirmed by conveyance made by the Southern Pacific Company before the date of the enactment of this Act.

(b) There is reserved to the United States all oil, coal, or other minerals in the land referred to in the first section of this Act, together with the right to prospect for, mine, and remove such oil, coal, or other minerals under such rules and regulations as the Secretary of the Interior may prescribe.

TITLE III—TO PROVIDE FOR THE CONVEYANCE OF CERTAIN PUBLIC LANDS IN MONTANA TO THE OCCUPANTS OF THE LAND

SEC. 301. The Secretary of the Interior is hereby authorized to convey to Francis T. Oleson and Zona I. Oleson, husband and wife; Dan Raymond and Elizabeth Louise Raymond, husband and wife; and Edward J. Bonderenko or their successors in interest, all right, title, and interest of the United States, except right, title, and interest in deposits of all minerals, in lands identified as tracts numbered 1, 2, and 3 in that part of the west half, southwest quarter of the northwest quarter, section 2, township 10 north, range 1 west, Montana principal meridian Lewis and Clark County, Montana, lying east of the "Erroneous Survey Line", lying north of the county road right-of-way as shown on Bureau of Reclamation drawing numbered 296-604-170, dated September 24, 1971, and as determined available for sale by the Secretary of the Interior. Such conveyance shall be made only upon applications by such aforementioned individuals therefor within six months after the date of this Act, and upon payment of the appraised fair market value of the last as of the date of sale plus the administrative costs, including costs of a land survey, of making the conveyance, as determined by the Secretary of the Interior within one year after notification by the Secretary of the Interior of the amount due. In determining the fair market value of the land, the Secretary of the Interior shall not include any values added to the land by Francis T. Oleson and Zona I. Oleson, husband and wife; Dan Raymond and Elizabeth Louise Raymond, husband and wife; and Edward J. Bonderenko or their successors in interest, or their heirs. Any conveyance made pursuant to this Act shall reserve to the United States all deposits of all minerals in the lands together with the right to mine and remove the same, under applicable laws and regulations established by the Secretary of the Interior.

SEC. 302. Acceptance of Francis T. Oleson and Zona I. Oleson, husband and wife; Dan Raymond and Elizabeth Louise Raymond, husband and wife; and Edward J. Bonderenko or their successors in interest of any conveyance made hereunder shall constitute a waiver and release by them of any and all claims against the United States arising out of the operation, maintenance, or construction of the Canyon Ferry Unit, Pick-Sloan Missouri Basin program, as now or hereafter authorized.

TITLE IV—TO AUTHORIZE THE SECRETARY OF THE INTERIOR TO CONVEY ALL RIGHT, TITLE, AND INTEREST OF THE UNITED STATES IN AND TO A TRACT OF LAND LOCATED IN THE FAIRBANKS RECORDING DISTRICT, STATE OF ALASKA, TO THE FAIRBANKS NORTH STAR BOROUGH

SEC. 401. The Secretary of the Interior is authorized to convey all right, title, and interest of the United States in and to the following described real property, located in the Fairbanks Recording District, to the Fairbanks North Star Borough without payment of consideration:

THE WEST PORTION OF BLOCK 209

A tract of land situated in the northwest quarter section 15, township 1 south, range 1 west, F.B. and M., also known as United States Survey 849 of the Homestead Claim of Stacia Ricket described as follows:

Commencing at corner number 3, United States Survey Numbered 849, thence south 89 degrees 57 minutes 14 seconds east, a distance of 2,300 feet, more or less; along a southerly line of said survey numbered 849 which lies between corners numbered 2 and 3; thence south 89 degrees 57 minutes 09 seconds east, a distance of 30 feet, more or less; thence north 0 degree 56 minutes 34 seconds west, a distance of 10 feet, more or less; to the true point of beginning; thence north 0 degree 56 minutes 34 seconds west, a distance of 337 feet, more or less; thence south 89 degrees 52 minutes 43 seconds east, a distance of 518 feet, more or less; thence south 0 degree 07 minutes 17 seconds west, a distance of 337 feet, more or less; thence north 89 degrees 57 minutes 09 seconds west, a distance of 510 feet, more or less, to the true point of beginning, and containing 173,218 square feet, more or less.

TITLE V—PROVIDING FOR REINSTATEMENT AND VALIDATION OF UNITED STATES OIL AND GAS LEASES NUMBERED U–12871, U–12872, U–12874, U–12875, U–12876, U–12877, U–12878, U–12881, AND U–13666

SEC. 501. Notwithstanding any decision to the contrary heretofore made by the Secretary of the Interior of the United States or his authorized agents or representatives, subject to the requirements of section 502 of this Act:

(a) United States oil and gas leases numbered U–12871, U–12872, U–12874, U–12875, U–12876, U–12877, U–12878, and U–12881 shall be held not to have terminated by operation of law or otherwise on December 1, 1975, but shall be deemed to be in full force and effect for the term of said leases provided that rentals for subsequent years are paid or tendered within the time required by law and the terms of such leases.

(b) United States oil and gas lease numbered U–13666 shall be held not to have terminated by operation of law, or otherwise on April 1, 1976, and the term of said lease is hereby extended to a date twenty-four months after the effective date of this Act and so long thereafter as oil or gas is produced in paying quantities, provided that rentals for subsequent years are paid or tendered within the time required by law and the terms of such lease.

SEC. 502. Within thirty days after the effective date of this Act, the Secretary shall give notice to the last record holder of the oil and gas leases listed in the first section of this Act of the amount of unpaid rental then accrued under said leases or that would have accrued had the leases not terminated. Within thirty days after receipt of such written notice, the last record holder of such leases, their successors or assigns, shall tender payment of the amount of rental to the Secretary. If payment is not made within the required time, the provisions of this Act shall terminate and be of no force and effect with respect to those leases for which payment was not made.

TITLE VI—FOR THE RELIEF OF MARIAN LAW SHALE HOLLOWAY, ADELINE MARY GILL CHARLES, AND ELIZA SHALE CARSTENS

SEC. 601. (a) Notwithstanding any other provision of law, the Secretary of the Interior is authorized and directed to pay, out of any money appropriated to the Department of the Interior, to Marian Law Shale Holloway, Adeline Mary Gill Charles, and Eliza Shale Carstens (or to their estates) such sums as he determines each is legally and equitably entitled to as compensation for losses (including reasonable attorney fees) resulting from his erroneous approval of purported conveyances of parts or all of lot 6, section 35, township 24 north, range 13 west, Willamette meridian, containing eighteen and seventy-five hundredths acres, more or less, according to the Government survey thereof, such property being a portion of the allotment of Hattie Smith, deceased, Quinault allottee numbered 420, and which is not subject to homestead entry. Such property is situated in Jefferson County, State of Washington on the Quinault Indian Reservation.

(b) The payment and acceptance of such compensation pursuant to this Act shall be in full satisfaction of all claims (1) of the said Marian Law Shale Holloway, Adeline Mary Gill Charles, and Eliza Shale Carstens, against the United States or any officer or employee thereof arising out of or in connection with the purported conveyances of such property or portions thereof approved by or on behalf of the Secretary of the Interior on February 19, 1951, September 3, 1953, and April 19, 1955, and (2) by Adeline Mary Gill Charles and Eliza Shale Carstens against Marian Law Shale Holloway arising out of or in connection with the purported conveyances of portions of such property approved by or on behalf of the Secretary of the Interior on September 3, 1953, and April 19, 1955.

(c) As a condition precedent to receiving payment of such compensation pursuant to this Act, the said Marian Law Shale Holloway, Adeline Mary Gill Charles, and Eliza Shale Carstens (or the executors of their estates) shall execute such releases and other documents as the Secretary of the Interior determines are necessary to fulfill the purposes of this Act and remove any cloud on the title of such property.

SEC. 602. No part of the amount appropriated by this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Violation of the provisions of this section is a misdemeanor punishable by a fine not to exceed $1,000.

TITLE VII—GOSPEL-HUMP AREA BOUNDARY CHANGES

SEC. 701. Section 4(a)(1) of the Act of February 24, 1978 (16 U.S.C. 1132, Public Law 95–237) is amended by striking the words "January 1978" and inserting in lieu thereof "September 1978".

TITLE VIII—KALMIOPSIS WILDERNESS MAP DESIGNATION

SEC. 801. Section 3 of the Endangered American Wilderness Act of 1978, Public Law 95–237 (92 Stat. 43) is amended by adding a new subsection (f) as follows:

"(f) The map referenced in paragraph (a) of this section, depicting the boundaries of the Kalmiopsis Wilderness Additions is superseded by a map entitled 'Kalmiopsis Wilderness Additions—Proposed' and dated October 1978, which is on file and available for public inspection in the office of the Chief of the Forest Service.".

TITLE IX—FRYINGPAN-ARKANSAS RECLAMATION PROJECT

SEC. 901. Subsection (a) of section 1 of the Act of August 16, 1962 (76 Stat. 389; 43 U.S.C. 616 et seq.), is amended by inserting after the words "Ruedi Dam and Reservoir, Colorado," the words "and as further modified and described in the description of the proposal contained in the final environmental statement for said project, dated April 16, 1975.".

SEC. 902. Subsection (e) of section 5 of such Act is amended by inserting after the word "therein" a comma and the words "including those laws of the State of Colorado relating to the establishment of minimum streamflows for the reasonable protection of the natural environment, to the extent that such laws are not inconsistent with the operating principles identified in subsection 3(a) of this Act".

SEC. 903. Subsection (a) of section 3 of such Act is amended by inserting after the word "Congress" a semicolon and the words "and shall be further operated pursuant to diversion rates established under the laws of the State of Colorado: *Provided*, That the rate of project diversions from the Hunter Creek watershed shall not exceed an aggregate of 270 cubic feet of water per second of time. Waters so diverted may be utilized for all authorized project purposes as set forth in section 1(a) of this Act. Such waters, exclusive of the amount diverted for Roaring Fork exchanges provided for in subparagraph 9(1)(c) and paragraph 11 of the above referenced operating principles shall become part of the project water supply as limited by subparagraph 9(1)(a) of the above referenced operating principles. No diversions shall be made from the Hunter Creek watershed which will reduce the remaining streamflows at the points of diversion to less than 4 cubic feet per second on No Name Creek, 5 cubic feet per second on Midway Creek, and 12 cubic feet per second on Hunter Creek".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to en bloc.

UP AMENDMENT 2085

Mr. CHURCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk proceeded to read as follows:

The Senator from Idaho (Mr. CHURCH) proposes unprinted amendment numbered 2085.

H.R. 7971

At the end of the bill add a new Title X as follows:

TITLE X—TO CONVEY CERTAIN GEOTHERMAL RESOURCES TO THE CITY OF BOISE, IDAHO

SEC. 1001(a). The Congress hereby authorizes and directs that the rights to the geothermal resources, including minerals present in the geothermal fluid, presently vested in the United States of America in real property designated as Tract 37 (contained in secs. 2 and 11) consisting of 4.13 acres, more or less; Tract 38 (contained in secs. 1, 2, 11 and 12) consisting of 449.16 acres more or

less; Tract 39 (contained in sec. 2) consisting of 14.64 acres, more or less; and Tract 40 (contained in sec. 11) consisting of 4.95 acres, more or less; all in T. 3N, R. 2E, B.M.; together with a parcel described as follows:

Commencing at the southwest corner of the Old Fort Boise Military Reservation, thence north seventy degrees zero minutes east one thousand four hundred forty-eight and two-tenths feet; thence north four degrees thirty-two minutes east six hundred and twenty-seven feet to the true point of beginning; thence the following courses and distances: South eighty-seven degrees eight minutes west six hundred ninety-six and five-tenths feet; thence north twenty-one degrees two minutes west five hundred and thirty-two feet; thence south sixty-nine degrees four minutes west twenty-one and nine-tenths feet; thence north twenty-two degrees forty minutes west eighty-six and three-tenths feet; thence north eighty-four degrees fifty minutes east nine hundred ninety-three and six-tenths feet; thence south four degrees thirty-two minutes west six hundred twenty-four and ninety-five one-hundredths feet to the point of beginning; consisting of 11.53 acres, more or less (contained in sec. 11, T. #N., R. 2E., B.M.); be transferred by the Secretary of the Interior in fee to the City of Boise upon payment by the City of Boise of the fair market value, as determined by the Secretary, of the rights conveyed.

SEC. 1001(b). Development of geothermal resources pursuant to this Act shall not be grounds for the Secretary of the Interior to assert the reversionary interest of the United States in the subject lands.

SEC. 1002. Development of the geothermal resources conveyed by this Act shall not unreasonably interfere with development of other mineral interests retained by the United States. The City of Boise shall permit the United States, its lessees and agents access for exploration of mineral resources not conveyed to the City.

Mr. CHURCH. Mr. President, this amendment transfers the geothermal resource rights on 485 acres of land from the United States to the city of Boise, Idaho. The city will use the geothermal resources for space heating residences and commercial buildings in the business district. The transfer would occur when the city pays the Federal Government the fair market value for the rights.

The amendment transfers only the geothermal resource rights. It does not transfer mineral rights or other rights to the city. The amendment has the full support and endorsement of the Department of the Interior and Energy, the State of Idaho, and the city of Boise. I ask unanimous consent that letters of support for the transfer be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., September 27, 1978.
Hon. FRANK CHURCH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHURCH: We have reviewed your draft bill, "To transfer rights to certain geothermal resources and related minerals to the City of Boise." We have no objection to the draft bill if it is amended to provide that the City of Boise is to pay the fair market value of the resources conveyed.

The proposed bill would direct the Secretary of the Interior to transfer in fee to the City of Boise rights to geothermal resources, including minerals present in the geothermal fluid, presently vested in the United States.

A review of information available to the U.S. Geological Survey reveals that the resources involved in the bill are of relatively low value and of limited extent. Although we have not determined the amount of royalty that would be paid to the Federal Government if the resources were leased pursuant to the Geothermal Steam Act, we believe that the amount would be nominal. We estimate that if the resources were offered for competitive bids, the bonus bids would be $5 per acre or less; there is a possibility that we would receive no bids at all. (A recent geothermal lease sale in Klamath Falls, Oregon, involving a similar resource, yielded no competitive bids.)

The Geothermal Steam Act, unlike the Federal Coal Leasing Amendments Act, contains no provision authorizing exemption from the competitive bidding requirement of the Act when a public entity seeks to develop a mineral resource. A Task Force within the Department is considering recommending amendment of the Geothermal Steam Act to include such a provision.

In view of the small royalty which would probably be received if the resources involved in the draft bill were offered for competitive bids and the apparent benefits to the public from the demonstration project which the Department of Energy proposes to establish with the City of Boise, we do not object to legislation to permit the Secretary of the Interior to convey to the City of Boise without competitive bidding rights to the geothermal resources in question.

As noted above, we believe that the City of Boise should be required to pay the fair market value of the interests conveyed by the United States. Such a provision is consistent with the requirement in the Federal Land Policy and Management Act of 1976 that the United States receive a fair return when public resources are leased or sold. We, therefore, recommend that the following phrase be added after "to the City of Boise" in section 3, "upon payment by the City of the fair market value, as determined by the Secretary, of the rights conveyed."

We have several additional comments on the draft bill. Some of the surface overlaying the geothermal resource has been patented under the Recreation and Public Purposes Act (43 U.S.C. 869 *et seq.*), with reversionary interests in the United States should the purposes for which the surface was conveyed be abandoned. We believe that it is advisable to state in the bill that the City of Boise is authorized, notwithstanding restrictions in the deeds, to develop the geothermal resources conveyed in the bill. We, therefore, recommend that section 3 of the bill be amended by adding a second sentence, to read as follows:

"Development of geothermal resources pursuant to this Act shall not be grounds for the Secretary of the Interior to assert the reversionary interest of the United States in the subject lands."

In addition, since only the geothermal and not the other mineral interests are being conveyed by the bill, we recommend that a section 4 be added to the bill, to read as follows:

"Development of the geothermal resources conveyed by this Act shall not unreasonably interfere with development of other mineral interests retained by the United States. The City of Boise shall permit the United States, its lessees and agents access for exploration of mineral resources not conveyed to the City."

The Office of Management and Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

GARY R. CATRON,
Assistant to the Secretary and Director of Congressional and Legislative Affairs.

DEPARTMENT OF ENERGY
Washington, D.C., October 10, 1978.
Senator FRANK CHURCH,
Chairman, Subcommittee on Energy Research and Development, U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: In behalf of the Department of Energy (DOE), I am very pleased to have an opportunity to comment on the draft bill which you intend to introduce in the Senate, transferring the rights to certain geothermal resources and related minerals to the City of Boise.

For the past two years DOE and a predecessor agency, ERDA, have enthusiastically supported planning efforts of the City of Boise to develop and demonstrate the country's first modern, urban geothermal heating district. We therefore view the project as particularly important for demonstrating direct thermal application. We understand that Boise's commitments to its projected first-stage geothermal heating system now amount to 2 million square feet of space, and that the City is working to finance construction of the system from among a range of available funding sources. Savings which the project planners anticipate appear to be in the order of 25 percent of next year's fuel costs in Boise and the equivalent of 20,000 barrels of oil annually, even without taking newly proposed Federal incentives into account.

For these reasons we strongly support the draft bill which you intend to introduce. However, we defer to the views of the Department of the Interior with respect to technical and land management matters associated with the transfer, including the question of whether the City should pay the fair market value for the rights involved.

We also wish to offer for your consideration a number of minor changes in the bill's description of the property and resources involved. These changes are indicated in the enclosure.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

LYNN R. COLEMAN,
General Counsel.

Mr. CHURCH. Mr. President, favorable action on this amendment will allow the city of Boise to commence work on a nationally significant geothermal demonstration project, and will give us additional knowledge and confidence to develop direct geothermal heating for many of our cities.

Mr. President, having explained the amendment and it having been cleared on both sides of the aisle with the Budget Committee, I move its adoption.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. CHURCH. I yield back my time. I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 2086

(Purpose: To make minor additions to the Targhee National Forest, Idaho)

Mr. CHURCH. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) proposes unprinted amendment numbered 2086:

At the end thereof, add the following new Title:

TITLE XI—TO ADD CERTAIN LANDS TO THE TARGHEE NATIONAL FOREST, IDAHO

SEC. 1101. The boundaries of the Targhee National Forest in Idaho are hereby modified to include within said national forest the following described lands: S½SW¼; W½ SE¼; and SE¼NE¼, all in Section 26, Township 13 North, Range 42 East, Boise Meridian, in Fremont County, Idaho.

Mr. CHURCH. Mr. President, this amendment would alter the boundaries of the Targhee National Forest by placing some 200 acres of private property—the so-called Welling property—inside the national forest. The amendment is necessary to enable the U.S. Forest Service to exchange the Welling property for other Targhee National Forest lands. Such an exchange is agreeable to all parties, and will allow the Forest Service to keep summer home developments in this region limited to already developed areas. A detailed explanation for the need for this amendment is as follows:

On September 26, 1975 David and Jean Welling purchased the following described property located in Fremont County, Idaho: S½SW¼; W½SE¼; and SE¼NE¼, all in section 26, township 13 north, range 42 east, Boise Meridian, subject to an easement granted to the United States of America, for water storage (Island Park Reservoir).

The Wellings later assigned portions of this property to 18 other people for the purpose of constructing cabins on the property.

The Harriman family conveyed to the State of Idaho certain properties in this region known as the Railroad Ranch consisting of a substantial acreage of land lying generally south of the Welling property, but separated by some U.S. forest land and some State of Idaho land.

The Railroad Ranch was conveyed to the State of Idaho to be maintained as a State park, with the State to use its best efforts to extend the boundaries of the park to include basically, the land between the Railroad Ranch and the Welling property.

The Welling Associates have platted and subdivided the Welling property, not inundated by reservoir water into 44 cabin sites, plus "commons" area, and submitted the proposed plat to the Planning Board and Board of Commissioners of Fremont County, Idaho, for approval.

Access to the Welling property, except via water on the Island Park Reservoir, is along a forest road leading from the Island Park Dam, along Thurber Ridge located on National forest land, and along a jeep road from Thurber Ridge down to the Welling property.

Both Fremont County and the Forest Service indicate that it is their policy not to deny access to private property and the Forest Service has agreed to give Fremont County an easement or use permit to maintain a road along the course set out above to give access to the Welling property. However, the Fremont County Planning Board and the Idaho Parks Department are opposed to opening a public roadway over Thurber Ridge.

The Forest Service has available about the same amount of land, in value, as the Welling property, located in the northeast corner of Bills Island, 1½ miles upstream from the Welling land in approximately the northwest corner of section 30, the southwest corner of section 19, township 13 north, range 42 east, Boise Meridian in Fremont County. The Forest Service and everyone else involved, feels that it would be in the best public interest to trade the national forest lands on Bills Islands for the Welling property. This would avoid the necessity for a road along Thurber Ridge and in fact, any development in an otherwise all publicly owned land area.

Upon investigation it was discovered that the Welling property was not within the Targhee National Forest boundary, although it abuts Targhee forest land in some parts, and could not be traded because it was not within the boundaries.

Therefore, legislation is necessary to put the Welling property with the Targhee National Forest boundary in order that a trade could be affected.

This legislation has the support of the local property owners, the Forest Service, the Fremont County Commissioners, the Fremont County Planning Board, the Idaho State Parks Department, and other agencies of the State of Idaho.

Mr. President, this amendment has been cleared on both sides of the aisle and with the Budget Committee. I move its adoption.

The PRESIDING OFFICER. Is all time yielded back?

Mr. CHURCH. I yield back the remainder of my time on this amendment.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

GOSPEL-HUMP BOUNDARY ADJUSTMENTS

Mr. CHURCH. Mr. President, title VII of H.R. 7971 as amended would amend that portion of the Endangered American Wilderness Act of 1978 dealing with the allocation of the Gospel-Hump area in Idaho. The title changes the map reference for the Gospel-Hump area from "January 1978" to "September 1978." The effect of the change would be to reference a new map which has been drawn to clarify the placement of some of the boundaries of the Gospel-Hump Wilderness Area and the "management" and "development" areas which are contiguous to the wilderness. The change is necessary in order to follow more precisely the intent of the agreement reached in 1977 by local Idaho residents over the future allocation of the lands lying within the Gospel-Hump roadless area on the Nezperce National Forest, which was the basis for the Gospel-Hump legislation. Under that agreement, all planned and engineered timber sales along the western boundary of the wilderness area (including the Halls Gulch, Florence Basin, and Milner sales); the Bullion Mine, mine shaft and surrounding lands needed for normal activity around the mine; and all private lands and patented mining claims in the Buffalo Hump mining region were to be excluded from the Gospel-Hump Wilderness Area. In addition, the proposed Rainy Day timber sale and access road system and all of the proposed Honker timber sale were to be located in "development" areas so that the timber in these two sales might be made immediately available for sale. The preliminary maps used by Congress during the debate of the Endangered American Wilderness Act did not accurately reflect those intentions, and hence the need for a new map to define the proper boundaries. According to the Forest Service, which assisted in the preparation and development of this new map, the boundaries now accurately reflect the original intent of the Gospel-Hump negotiators.

Mr. President, I ask unanimous consent that the original compromise agreement reached by the local citizens, and an exchange of letters with the Forest Service which further details the reasons for this map change be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPROMISE AGREEMENT

This compromise agreement, made and entered into on this 5th day of August, 1977, by and between the respective members of the Grangeville Chamber of Commerce, hereinafter called the Chamber, and the "Conservationists", individually,

Witnesseth:

Whereas, the Conservationists and the Chamber are vitally interested in the preservation, use, access, and classification of the so-called Gospel Hump Area of Idaho County, Idaho and;

Whereas, the Parties have previously met on four (4) additional occasions for purposes of attempting to informally identify and classify different portions of the Gospel Hump Area in terms of wilderness, and multipurpose developments, and;

Whereas, the Parties essentially compromised their differences for the betterment of the goals of both groups and to that end have produced certain exhibits which show and described the boundaries of the proposed wilderness and multipurpose resource classifications development within the Gospel Hump Area and the Parties now desire to reduce their agreements to writing, and to thereafter take such agreements to their various constituents and upon approval thereof, submit the same to their various legislators, including the Honorable Frank Church.

Now, therefore, it is hereby agreed as follows:

That the Parties unanimously agree, that the attached exhibit, which constitutes a map and boundary lines, indicates the exact boundaries of the various classifications proposed as a compromise for the Gospel Hump Area, which classifications shall include: Instant Wilderness and Multipurpose Resource Development. That the areas will be clearly marked upon the exhibit and each group will have sufficient copies of the same in order to circulate among their own constituents after the signing of this agreement.

That the Parties agree that, if, after they take the agreement to their constituents and approval thereof is granted by the constituents of each interest group, thereafter the Parties agree to stand in a united front to

urge Congress, by and through the Honorable Frank Church, to expedite the said classifications set forth on the map through the legislative process with all dispatch.

Further, the Parties agree that proposed studies of the fish and game resources in the Gospel Hump Area should be implemented and that both groups and their constituents will urge Congress to appropriate sufficient funds to carry out and fully complete such studies as are deemed necessary with all possible dispatch.

It is understood and agreed, that the classifications relating to, first Wilderness, and second Multipurpose Resource Development, are further described and defined in Exhibit A. attached hereto and hereby incorporated into this reference and entitled Gospel Hump Area.

Additional provisions.—

Regarding two (2) specific areas in the Gospel Hump Area, the following specialized accords shall be effective:

1. Buffalo Hump Area. "Deeded Lands Regarding Management Boundaries". It is agreed that the management boundaries as shown on the maps which are made a part hereof, and which are drawn around the deeded and patented mining claims are intended to be guidelines only and that the United States Forest Service should be directed to draw proper lines to insure proper management and accurate boundaries.

2. "West Boundary Line—Florence Area". It is understood and agreed that the lines shown on the maps attached and incorporated, which lines were drawn on 7/13/77, shall be subject to change if there exists certain timber sales which were not included and if there were active timber sales in that area which have been overlooked because of a lack of information by the signatories hereto.

In witness whereof, the Parties in their individual capacities have attached their signatures hereto and hereby agree to be bound by this political position.

COMMITTEE ON
ENERGY AND NATURAL RESOURCES,
Washington, D.C., August 8, 1978.

JOHN R. MCGUIRE,
Chief, U.S. Forest Service, Department of Agriculture, Washington, D.C.

DEAR CHIEF MCGUIRE: It has come to the attention of the Energy and Natural Resources Committee that there is presently some controversy concerning the boundaries of the Gospel-Hump Wilderness Area in Idaho and attendant multiple-use areas.

As you are aware, the Gospel-Hump area was added to the Endangered American Wilderness Act by Senators Church and McClure after that bill had been passed by the House of Representatives. Consequently, the record developed by this committee and the committee on conference on H.R. 3454 form all of the legislative history on the Gospel-Hump proposal.

The committee has been told that the preliminary maps transferred by your office to the Regional Forester's office in Missoula would include a portion of the proposed "Milner" timber sale within the Gospel-Hump Wilderness. We are also told that a part of the "Honker" timber sale, according to the preliminary maps, would be included in the multiple-use "management" area.

The intent of this committee with regard to the disposition of both the Honker and Milner sales has always been very clear. All of the Milner sale is to be excluded from the Gospel-Hump Wilderness area. In addition, all of the Honker sale is to be included in the area designated for immediate development and not in the management area. In order to clarify the intent of Congress with regard to both these sales, we are enclosing two maps which show where the correct boundary lines should be in the areas in question.

We hope these maps will clarify this matter.

Sincerely,

HENRY M. JACKSON,
Chairman.
FRANK CHURCH.

COMMITTEE ON ENERGY AND
NATURAL RESOURCES,
Washington, D.C., September 7, 1978.

JOHN MCGUIRE,
Chief, U.S. Forest Service, Department of Agriculture, Washington, D.C.

DEAR CHIEF MCGUIRE: I am considering introducing an amendment to P.L. 95–237 which would more specifically define the boundaries to the Gospel-Hump Wilderness, the Multiple Purpose Resource Areas and the Immediate Release areas identified in Section 4 of the Act.

It would be extremely helpful in drafting this amendment to have the U.S. Forest Service's immediate assistance in order to identify and clarify resource questions on the periphery of these three management areas as now defined.

Specifically, it is my intent to follow the original desires of the Gospel-Hump compromise negotiators which was to exclude all planned and engineered cutting units in the Florence Basin and Hall's Gulch Timber sales from the wilderness. In order to accomplish these changes site-specific information on these units is required so that no question will be raised about the exclusion of these areas. Additionally, I have learned that the Bullion Mine, which is presently active, lies within the designated Wilderness area. This boundary change also needs to be identified in the amendment so that the mine shaft itself is excluded together with normal activity surrounding that mine.

It is my understanding that a question also remains regarding the timber access road to the Rainy Day Sale. My intent here, would be to follow the lead of the compromise negotiators which was to place the land area which contains this road system in the immediate release area rather than in the multiple resource area. Your assistance in identifying an appropriate boundary would be appreciated in this instance as well.

Also, I would appreciate having the Forest Service's comments and recommendations on the boundary line which excludes the Buffalo Hump mining region from the Wilderness area. The intent of the lines as now drawn is to exclude all private lands and patented mining claims from the Wilderness. The present line accomplishes this, but alterations may be needed for better management of that area by the Forest Service.

A guide in your consideration of developing a proposal on which I can base my amendment is as follows:

1. A buffer area from cutting units, and/or their access roads should be established which is at least 100 yards from any designated Wilderness.

2. The lines as now drawn in the preliminary maps should be followed whenever possible in order that changes are kept to an absolute minimum.

3. The Forest Service should review the entire boundaries of the Gospel-Hump area and advise me of any conflicts recognized in the preliminary map.

Knowing that the detailed resource information related to this question is in the field I would appreciate your notifying your field staff of this request at the earliest possible time so that my field staff can coordinate this effort as soon as possible.

In the meantime, I have asked my staff to begin discussions on these matters with your field staff because of the limited time available for Congress to consider this amendment during this Session.

With best wishes,

Sincerely,

FRANK CHURCH.

FOREST SERVICE,
Washington, D.C., September 28, 1978.

Hon. FRANK CHURCH,
Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR SENATOR CHURCH: The August 8, 1978, letter signed by you and Chairman Henry M. Jackson confirmed the intent of the Committee on Energy and Natural Resources and of the Congress to exclude the proposed Milner timber sale from the Gospel-Hump Wilderness Development Area.

Your letter of September 7, 1978, requested drafting service for preparation of a map and an amendment to P.L. 95–237, the Endangered American Wilderness Act of 1978, which, together, would define more specifically the boundaries of the Gospel-Hump Wilderness Management Areas, and Development Areas designated by section 4(a) of the Act. Your letter also contained specific guidelines for preparation of the map and the draft amendment.

An enclosed map entitled "Gospel-Hump Planning Unit" and dated, "September 1978", has been prepared through the combined efforts of Larry LaRocca of your Moscow, Idaho, office and the staff of our Regional Office in Missoula. The map reflects the specific boundary specifications described in both the August 8 and September 7 letters. The boundaries on the map exclude from the Wilderness: (1) all planned timber harvest units in the proposed Milner, Florence Basin and Halls Gulch timber sales; (2) all private lands and patented mining c'aims in the Buffalo Hump mining region; and (3) the Bullion Mine, mine shaft and surrounding lands needed for normal activity around the mine. The proposed Rainy Day timber sale and access road system and the proposed Honker timber sale are within the Development Area. The Wilderness boundary is located so that a buffer zone of at least 100 yards exists between it and existing timber harvest units and access roads. The rest of the boundary, not affected by the above specifications, is the same as that shown on a "preliminary" set of quadrangle maps of the Gospel-Hump Planning Unit given to us by Fred Hutchison of your staff and Tom Williams of the Committee staff. Finally, the northern boundary of the planning units is extended to coincide with the south bank of the Clearwater River; the southern boundary of the planning units is intended to coincide with the north bank of the Salmon River. This is based on paragraph 2, page 27 of Senate Report 95–490 and on discussion with Messrs. Hutchison and Williams.

Also enclosed is a draft amendment to P.L. 95–235 which describes the boundary changes and guidelines stipulated in your letter of September 7 and that of August 8. We included in the draft language, as you had directed, specific description of the boundary changes. Alternatively, such language could be put in the Committee report rather than in the draft bill.

We appreciate the opportunity to participate with you and the Committee staff and trust that our combined efforts will resolve any confusion that may exist concerning the boundaries of the Gospel-Hump units designated by P.L. 85–237.

The enclosed map and draft legislative language have been prepared as a drafting service only, and should not be construed as an indication of the position of the Department of Agriculture on the draft legislation.

Sincerely,

JOHN R. MCGUIRE,
Chief.

[Enclosures not included.]

Mr. CHURCH. Mr. President, it had been my intention to offer one further amendment to H.R. 7971, which would

change the so-called "Omitted-lands" Act which Congress passed back in 1962. That law was enacted to give the Secretary of the Interior the authority to sell certain lands in the vicinity of the Snake River which were found to be "omitted" public lands, which had been left off various land surveys.

Since the passage of the 1962 act, the Secretary has sold a number of the parcels of land covered under the legislation, but numerous cases are still pending. Senator McCLURE and I had intended to offer an amendment to this bill to bring a fair and equitable end to this longstanding land controversy. However, after discussing this matter with Senator JACKSON, the chairman of the Energy and Natural Resources Committee, who opposed our proposed amendment, we have decided not to offer it.

Mr. JACKSON. Will the Senator yield.

Mr. CHURCH. I would be happy to yield to the distinguished chairman of the committee.

Mr. JACKSON. I appreciate the Senator withholding his amendment. The proposal which he was considering has not been the subject of committee hearings. In addition, the official views of the administration are not known. They might very well support the Senators' proposal, but I do not know that for certain. I think they should be heard through the normal hearing process, as should the Idahoans who are affected by this matter.

Mr. CHURCH. The Senator is correct, our proposal has not been the subject of hearings by the Senate Energy and Natural Resources Committee. Even though I think our proposal has much merit to it, I would not want to jeopardize this bill by adding it, only to have the bill and the amendment rejected by the House of Representatives or the legislation vetoed by the President.

Mr. JACKSON. If the Senator would yield further, I would suggest that the best way to handle this matter would be to hold a hearing on the whole subject after the 96th Congress convenes in January. In that regard, I would be happy to assist the senior Senator from Idaho in obtaining such a hearing.

Mr. CHURCH. With the assurances just made by the committee chairman, I will not pursue this matter further at this time, but will instead go the normal route and seek a hearing.

Mr. JACKSON. I thank the Senator.

Mr. CHURCH. Mr. President, I yield such time as the Senator from Arizona may require, within the limitation available.

UP AMENDMENT NO. 2087

(Purpose: To authorize the Secretary of the Interior to receive and distribute water within Tusayan, Arizona)

Mr. DECONCINI. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), for himself and Mr. GOLDWATER, proposes an unprinted amendment numbered 2087.

Mr. DECONCINI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

"The Act of February 26, 1916, 40 Stat. 1177 (16 U.S.C. 222) is amended by adding the following sentence:

'Under such terms and conditions as he deems advisable and consistent with the requirements of Section 483a of Title 31 hereof, the Secretary is authorized, without derogation of any of the water rights of the United States and notwithstanding any provision of law to the contrary, to sell by contract water located within Grand Canyon National Park for the use of customers within Tusayan, Arizona to a nonprofit entity authorized to receive and distribute water within Tusayan, Arizona by the laws of the State of Arizona, upon his determination that such sale is not detrimental to the protection of the resources of Grand Canyon National Park or its visitors and that appropriate measures to provide for such protection, including a right of immediate termination, are included in the transaction.'"

Mr. DECONCINI. Mr. President, the Secretary of Interior has determined that he lacks authority under the law to divert national park resources to uses outside the parks, except on an emergency basis.

This amendment would grant the Secretary that discretion in a single, narrow instance that could, in effect, avert an emergency and would provide the water that is crucially needed by an isolated community.

Tusayan, Ariz., is a small community adjacent to the Grand Canyon National Park. Service to park visitors is essentially its whole reason for being.

The geologic structure of the Canyon's south rim is such that there is practically no available underground or surface water supply. Water for utility services within the park is brought up from the Canyon itself. The main supply of water comes all the way across the Canyon from Roaring Spring, near the north rim.

The present water supply and facilities are adequate for both park needs and for the provision of surplus water to Tusayan. Providing that surplus to Tusayan, under suitable controls, will benefit both the community and the park. Again, Mr. President, this amendment does not mandate service to the community, it simply extends and clarifies the authority of the Secretary in this singular circumstance. It grants the Department full discretion in the provision of that service. The Department must, in any contract, fully recover the cost of such service. The contract may and should provide for conservation and reuse systems within Tusayan. Further, the Secretary is directed to limit the expansion of water demand in order to prevent deterioration or invasion of park resources, and secure the best possible relationship between planned activities within the park and land uses in Tusayan.

This amendment would in no way alter the primary duty of the Secretary and the Park Service to protect park resources and provide for the convenience of park visitors.

Mr. President, I yield back the remainder of my time and I move the adoption of the amendment.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Arizona.

The amendment (UP No. 2087) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHURCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. HART. Mr. President, the Committee on Energy and Natural Resources added to this bill an amendment to resolve the concern of the solicitor of the Interior Department that the original congressional authorization of the Fryingpan-Arkansas water project in Colorado is ambiguous. The committee amendment is identical to the bill, S. 3501, which Senator HASKELL and I introduced on September 20, 1978. Since we both made statements explaining the legislation to the Senate then, I do not want to take the Senate's time to repeat those explanations. On behalf of Senator HASKELL and myself, however, I do want to take a few minutes to explain a recent development that provides a context in which the Fryingpan-Arkansas language should be understood.

The portion of the project which is covered by the solicitor's opinion has been the subject of controversy among the different Colorado parties whose interests are affected by the diversion. Over this past weekend, those parties have reached agreement on the settlement of all the points in dispute among them. Senator HASKELL, Congressman EVANS, the other members of the State's delegation, and I have been in close touch with the different groups as they have negotiated the agreement, and we applaud their success in resolving their disagreements.

This agreement was still being negotiated when Senator HASKELL and I introduced our bill, and when Congressman EVANS introduced an identical bill in the House. The bills were very carefully drafted, however, to be consistent with the proposal which the parties were discussing. After reaching their final agreement this past weekend, all parties support the Energy Committee amendment as legislation that is entirely consistent with their settlement. As sponsors of the bill from which the amendment now before the Senate was taken, Senator HASKELL and I also believe that the amendment is entirely consistent with the settlement, and should be so administered and construed.

While one party has not yet been able to officially sign the copy of the agreement which I have in my possession, I

point out to my colleagues that the attorney for that party has signed the agreement, indicating his approval as to form.

Mr. President, I ask that the agreement be printed in the RECORD.

The agreement follows:

AGREEMENT

This agreement, made and entered into this day of , 1978, by and between the State of Colorado, by and through the Department of Natural Resources and the Colorado Water Conservation Board; the Southeastern Colorado Water Conservancy District; the City of Aspen; and the Board of County Commissioners of the County of Pitkin.

Witnesseth:

Whereas, certain legal and administrative disputes have arisen between one or more parties hereto relating to the operation of the Fryingpan-Arkansas Project (hereinafter called the Project); and

Whereas, all parties hereto desire finally to resolve all basin and region wide problems resulting from the operation of the Fryingpan-Arkansas Project.

Now, therefore, for and in consideration of the mutual promises and covenants contained herein, the parties agree as follows:

I. Parties to settlement:

A. State of Colorado (hereinafter State), by and through the Department of Natural Resources hereinafter Department), and the Colorado Water Conservation Board (hereinafter Board);

B. Southeastern Colorado Water Conservancy District (hereinafter southeast);

C. City of Aspen (hereinafter Aspen);

D. Board of County Commissioners of the County of Pitkin (hereinafter Pitkin County).

II. Covenants relating to the Hunter Creek Drainage Basin:

A. The Board agrees to file for supplemental minimum stream flow decrees pursuant to 37-92-102(3), CRS 1973, to bring its Hunter Creek drainage decrees up to the following total amounts:

1. Midway Creek from Fry-Ark point of diversion to confluence with Hunter Creek: 5 cfs.

2. No Name Creek from Fry-Ark point of diversion to confluence with Hunter Creek: 4 cfs.

3. Hunter Creek from Fry-Ark point of diversion to confluence with Midway Creek: 12 cfs.

4. Hunter Creek from confluence with Midway to confluence with No Name Creek: 17 cfs.

5. Hunter Creek from confluence with No Name Creek to confluence with Roaring Fork River: 30 cfs.

B. Pursuant to the provisions of paragraph 19 of the Operating Principles for the Fryingpan-Arkansas Project (House Document No. 130, March 15, 1961), hereinafter referred to as the Project, the STATE agrees to convene the Fryingpan-Arkansas Project Commission for the purpose of recommending to the Commission that the Commission forward recommendations to the Secretary of the Interior of the United States requesting that:

1. The Hunter Creek collection system of the Project be operated to the end that the Project will not deplete the streams at the following Project points of diversion below the following flows (or the natural flow, whichever is less):

a. Hunter Creek diversion structure: 12 cfs.

b. Midway Creek diversion structures: 5 cfs.

c. No Name Creek diversion structures: 4 cfs; and

2. At such times as diversions lawfully made under the Colorado priority system by decrees senior to the Project reduce the flow of Hunter Creek at its confluence with the Roaring Fork below 21 cfs, the Project will forego diversions from the Hunter Creek drainage to the extent necessary to maintain a flow of 21 cfs at such confluence; provided, however, that the Project shall not be required to forego Project diversions whenever 51 cfs is available at the stream gauging station as now located upstream from the headgate of the Red Mountain Ditch to satisfy such senior diversions.

C. Southeast will consent and stipulate to, and no party hereto will object to, the inclusion in the decree and judgment in Case No. W-829-76 (In the District Court in and for Water Division No. 5, State of Colorado) of the following bypass requirements in the Hunter Creek drainage (or the natural flow, whichever is less) at the following Project diversion points:

1. Hunter Creek diversion structure: 12 cfs.

2. Midway Creek diversion structures: 5 cfs.

3. No Name Creek diversion structures: 4 cfs.

D. The Department, to the extent as may be approved by the Colorado Wildlife Commission and the Board, will utilize such funds as may become available to purchase existing senior water rights, in cooperation with Pitkin County and Aspen, for conversion to minimum stream flows in an amount sufficient to fulfill the purposes of subsections A5 and B2 of this paragraph II. It is understood by the parties hereto that the State budget for fiscal year 1979 contains an appropriation of $250,000 for acquiring minimum flows for the Project. Said moneys were appropriated for the purpose of resolving conflicts relative to Hunter Creek minimum flows. In no event shall the stream flows set forth in subsection A5 of this paragraph II be a Project obligation, except to the extent set forth in section B2 of this paragraph II.

E. For the purpose of maintaining the instream flow decrees and water rights heretofore obtained, or obtained pursuant to section D of this paragraph II, to meet the requirement of subsection A5 and B2 of this paragraph II, the following principles, which in no way shall be interpreted to be a Project or Southeast obligation, will apply:

1. Recognizing that certain owners of senior water rights on Hunter Creek not party hereto may desire to lease or to sell those rights, the first priority for maintaining instream flows on lower Hunter Creek shall be the lease or purchase of said rights, to the extent of available funds, for conversion to minimum stream flows, provided that the exercise of such acquired rights shall be limited to the quantity of water diverted by such rights as established by the Board and as thereafter may be determined by the Courts.

2. The parties will work with the United States Forest Service for the purpose of utilizing, by lease or otherwise, appropriative water rights acquired by the Forest Service, for instream flow maintenance to the extent of the quantity of water diverted by such rights as established by the Board and as thereafter may be determined by the Courts.

3. The Board will join as co-applicant with Aspen in an application for change of water rights for the purpose of enabling the Board to utilize Aspen's Hunter Creek Flume and Pipeline water right (Structure No. 203, decreed in Civil Action No. 3082 in the District Court in and for Garfield County on August 25, 1936, and confirmed in Civil Action No. 3723 in the District Court in and for Garfield County on August 25, 1949, for 15.0 cfs from Hunter Creek with a priority date of June 10, 1886) for minimum stream flow maintenance pursuant to 37-92-102(3), CRS 1973, provided, however, that Aspen shall retain title to said water right, and the use by the Board of said right shall be by permissive license only; and provided further that Aspen reserves the absolute right to utilize any or all of said water right at any time for municipal purposes or other purpose which Aspen, in its sole discretion, determines to be necessary and advisable. All parties hereto consent, and will not object in any manner whatsoever, to the transfer by the Board and Aspen, pursuant to 37-92-102 (3), CRS 1973, of the 15 cfs of the Hunter Creek Flume and Pipeline water right to minimum stream flows from the headgate of said Hunter Creek Flume and Pipeline.

4. Recognizing that Aspen has constructed a water treatment plant on Red Mountain which has Hunter Creek as its source of supply and recognizing that Aspen needs to augment its diversions from Hunter Creek during the irrigation season, the parties agree that Aspen shall have the first right to purchase up to 1.77 cfs of any water rights on Hunter Creek now or hereafter made available for purchase, provided, however, that Aspen agrees to grant a permissive license to the Board to use any such water rights for minimum stream flow maintenance on the same terms and conditions set for in subsection E 3 of this paragraph II.

5. Recognizing that the Divison may desire to sell or exchange the water purchased by the Division pursuant to this agreement for use as minimum stream flows after said use for minimum flow in Hunter Creek has been made, and recognizing the Pitkin County had adopted growth management policies for Pitkin County, the parties agree that any such sale shall not be made to any person or entity for use within Pitkin County for new domestic or municipal purposes which would be inconsistent with the growth management policies of Pitkin County without the prior consent of Pitkin County. The Board shall file on the water rights purchased for minimum stream flow to insure the protection that the water rights will remain in the stream through the entire stream segment.

6. The United States Bureau of Reclamation shall be requested to install and maintain a continuous flow gauging station at the intake portal of the Hunter Creek to Chapman Gulch Tunnel and shall be requested to, at least monthly, provide a copy of daily gauging records from this station to all parties to this Agreement as requested by the parties.

F. The parties to this Agreement, as among themselves, shall honor the priority and quantity of any water rights converted to minimum stream flow use by the Board as a call at the decreed point or points of diversion on Hunter Creek.

G. Project diversion in the Hunter Creek drainage shall be operated in accordance with and pursuant to the following terms and conditions:

1. At the points of diversion, Project diversions from No Name, Midway and Hunter Creeks shall be subject to the minimum flow requirements set forth in section B of this paragraph II.

2. There shall be no additional physical features constructed in the Hunter Creek drainage basin other than the completion of the presently planned diversion structures and appurtenant facilities on Hunter, Midway and No Name Creeks and the Hunter Creek Tunnel; provided that this provision shall not be construed to apply to either maintenance, repair or necessary modification to said presently planned diversion structures to accomplish the purpose for which such features were designed.

3. Any water rights purchased by the Board for minimum stream flows pursuant to section D of this paragraph II and to be used for the purposes set forth in para-

graphs A 5 and B 2 shall be transferred to minimum stream flows in a quantity established by the Board, without objection by any party hereto, and as thereafter may be determined by the Courts.

H. Recognizing that paragraph 11 of the Operating Principles for the Fryingpan-Arkansas Project contemplates a 3,000 acre-foot exchange with the Twin Lakes Reservoir and Canal Company for the purpose of stream flow maintenance in the Roaring Fork River; recognizing further that the 3,000 acre-foot exchange, if effected, is a Project obligation to be provided by the first Project diversions from No Name and Midway Creeks, and recognizing further that the implementation of the exchange will provide for stream flow maintenance in the Roaring Fork River from the Twin Lakes Reservoir and Canal Company points of diversion to the extent permissible under the laws of the State of Colorado to the confluence of the Roaring Fork River and the Fryingpan River, it is agreed that the parties shall make every reasonable good faith effort to implement the exchange contemplated in the Operating Principles; provided, however, that until said exchange is implemented, the Project shall annually divert 3,000 acre-feet less than would otherwise have been diverted from the Hunter Creek drainage basin, which bypasses shall be in addition to water bypassed to meet downstream senior calls, Project minimum flow bypasses set forth in paragraph II B or water spilled due to limitations on physical capacity of Project diversion facilities.

Upon yearly implementation of the 3,000 acre-foot exchange, the Project shall not be required to cause the release of said 3,000 acre-feet by Twin Lakes until sufficient waters are in storage to accomplish the exchange, or prospective operation of the Project diversions and storage indicate that the water will be contemporaneously available with the Twin Lakes foregone diversions in the year of the diversion. Once in storage, bypasses by Twin Lakes shall be when in priority from water otherwise divertible released in a manner to comply with the Project Operating Principles. The operating agreement with the Twin Lakes Reservoir and Canal Company shall contain provisions which will prohibit the Twin Lakes Reservoir and Canal Company from seeking to exercise dominion and control over any of the 3,000 acre-feet which may be released in any year. Unless operation of the 3,000 acre-foot exchange to maintain stream flows at levels set forth in the Operating Principles requires, no credit against the 3,000 acre-foot exchange shall be permitted for water spilled past Twin Lakes Reservoir and Canal Company collection points due to limitations in physical capacity, calls for water by any of its West Slope shareholders or by senior water rights. The BOARD agrees to take all steps necessary to ensure that water released pursuant to the exchange is utilized for stream flow maintenance in the Roaring Fork River to the extent permitted by law, including filing on the water so released as transbasin water not subject to diversion by inbasin users from the point of bypass at the Twin Lakes system to the confluence of the Roaring Fork with the Fryingpan River.

III. Covenants relating to the Fryingpan River Drainage Basin:

A. The Operating Principles for the Fryingpan-Arkansas Project approved by Congress in the authorizing legislation (P.L. 87-950 (1961)) require that the Project be operated with bypass requirements in the Fryingpan drainage as set forth in paragraph 9 of the Operating Principles and individual stream bypass requirements were established in the Final Environmental Impact Statement as set forth below:

Structure:	Summer bypass (in cfs)
Chapman	3.0
South Fork	5.6
Fryingpan	10.4
Sawyer	1.0
Lily Pad	.6
Granite	1.6
Carter	1.6
North Fork	.9
Mormon	1.6
North Cunningham	.9
Middle Cunningham	.9
South Cunningham	.5
Ivanhoe	1.4
Total	30.0

Recognizing that the Fryingpan-Arkansas Project was authorized to be constructed, operated and maintained for the primary purposes of supplying irrigation, municipal, domestic, and industrial water, and the incidental purposes of the conservation and development of fish and wildlife and recreation, and further recognizing that said purposes should be mutually promoted to the maximum extent possible consistent with the Operating Principles, the parties agree that:

1. The Department and the Board shall request the Colorado Division of Wildlife to continue to perform such additional studies using the latest methodology as are necessary to determine the flow requirements for maintenance and preservation of aquatic habitat, related rate of fish production and recreational fishing needs. Said additional studies shall be performed as soon as reasonably possible on all streams and tributaries within the Fryingpan River drainage on which Project diversions will be located and may be undertaken jointly with the United States Forest Service and the United States Fish and Wildlife Service.

2. To the extent that the available waters may be surplus to the allocation set forth in subsection (1)(a) of paragraph 9 of the Operating Principles, as shall be determined by the Fryingpan-Arkansas Project Commission, such surplus shall be released through the Project collection system at the points and in the quantities recommended by the Colorado Division of Wildlife as a result of the studies described in the foregoing subsection A 1 of the paragraph III.

3. To the extent that engineering studies conducted by the Board, Pitkin County or Southeast, and operational experience by the Bureau of Reclamation indicate that the method of operation of Project diversions can be modified to promote or achieve minimum stream flow requirements without diminishing the authorized Project water diversions, the Fryingpan-Arkansas Project Commission, in accordance with its lawful authority, shall recommend appropriate changes in the Operating Principles. The parties hereto will support any change in the decrees for the Project as necessary to reflect the operational procedure as established by the Commission from time to time.

4. For the purpose of implementing this paragraph III A, the State shall convene the Fryingpan-Arkansas Commission from time to time as necessary, for the purpose of considering recommended changes in the Operating Principles consistent with the intent of the parties as expressed in this paragraph III A.

IV. Procedural matters relating to settlement:

A. The parties agree and stipulate to the inclusion of the terms of this Agreement in the decree in Case No. W-829-76 (In the District Court in and for Water Division No. 5, State of Colorado) and the additional proviso:

"Any provision of this decree to the contrary notwithstanding, the Southeastern Colorado Water Conservancy District or its successor in interest will not exercise the water rights for the Fryingpan-Arkansas Project set forth in this decree except to the extent and in a manner consistent with the Agreement set forth herein."

B. Recognizing that the United States Bureau of Reclamation has made after-the-fact permit applications to the Army Corps of Engineers pursuant to Section 404 of the Federal Water Pollution Control Act Amendments of 1972 to construct diversion dams on the Fryingpan River, Hunter Creek and various tributaries of these streams as set forth in applications CO-OYT-0071, CO-OYT-0072, and CO-OYT-0073; recognizing further that all parties to this Agreement have the right to comment on said applications, to request a public hearing, and to pursue all available legal rights relative to the 404 permit process; and recognizing further that the implementation of this Agreement will take time and is a continuing obligation but will preclude the need for comment, public hearing, or other legal recourse relative to the applications, the parties agree, upon the execution of this Agreement to indicate to the Corps of Engineers their approval of the issuance of the permits described in this paragraph.

C. In order to amicably resolve other matters at issue between and among the parties hereto, the parties hereto further agree that:

1. The parties to that certain legal action entitled "The Board of Couny Commissioners of the County of Pitkin, Colorado, v. Andrus, et al.," Case No. 77-1408, in the United States Court of Appeals for the Tenth Circuit, shall jointly petition the Court to enter an Order dismissing the appeal and remanding the cause to the District Court for the District of Colorado with directions to vacate its Judgment in Civil Action No. 75-M-1268, dated April 19, 1977, and to dismiss with prejudice Plaintiff's Amended Complaint by Stipulation pursuant to Fed. R. Civ. P. 41(a)(1).

2. Aspen and Pitkin County shall move to dismiss with prejudice their Protests in Case No. W-829-76 (In the District Court in and for Water Division No. 5, State of Colorado).

3. All parties hereto will join in requesting dismissal by the United States Forest Service of its Protest in Case No. W-829-76 (In the District Court in and for Water Division No. 5, State of Colorado).

4. Aspen and Pitkin County shall withdraw their Comments, if any, made and submitted to the Army Corps of Engineers on Permit Application numbers CO-OYT-0071, CO-OYT-0072, and CO-OYT-0073, and will dismiss with prejudice Civil Action No. 78-K-995 in the United States District Court for the District of Colorado; provided, however, that the parties hereto shall jointly submit a comment requesting the inclusion of the terms of this Agreement into all 404 permit application approvals for the Project. No new litigation will be initiated by Aspen or Pitkin County in connection with federal permits of any kind in connection with the Project as currently planned so long as such permits are consistent with the terms of this Agreement.

5. All parties hereto agree to support such changes in the Project authorizing legislation as may be required to carry out the intent of this Agreement.

6. The parties hereto shall permit the various described operations, changes, transfers, exchanges, and augmentation, consistent with the terms of this Agreement, to occur without objection.

This Agreement shall be in effect and binding upon execution by all parties, subject to ratification by the membership of the Colo-

rado Water Conservation Board, and shall constitute a contract between the signatory parties, and shall inure to the benefit of, and be binding upon, their successors and assigns, and shall be implemented as promptly as possible after such execution and ratification.

In witness whereof, the parties hereto have executed this Agreement at Denver, Colorado, the day and year first above written.●

Mr. CHURCH. Mr. President, I move the adoption of the bill.

Mr. ROBERT C. BYRD. Third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 7971) was passed.

The title was amended so as to read:

An act to validate certain land conveyances, and for other purposes.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ABOUREZK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL PARKS AND RECREATION ACT OF 1978

The Senate continued with the consideration of S. 791.

Mr. RANDOLPH addressed the Chair.

Mr. ROBERT C. BYRD. My senior colleague seeks recognition.

Mr. JACKSON. I would like to yield 3 minutes to the distinguished Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH addressed the Chair.

Mr. ABOUREZK. Are we back on S. 791?

The PRESIDING OFFICER. We are back on the omnibus parks bill.

The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, may I say that the distinguished senior Senator from California I indicated was one of the members I appointed to the ad hoc committee on the Humphrey-Hawkins bill. He is engaged in consultation with other Senators on that bill. He cannot come to the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia was recognized.

Mr. JACKSON. Well, Mr. President, I just talked to the Senator. He wants to defer his 3 minutes until after we act on this amendment.

The PRESIDING OFFICER. The Senator from California.

UP AMENDMENT NO. 2084

Mr. HAYAKAWA. Mr. President, since the senior Senator from California is not present and since the whole matter would not be in this act were it not for his insistence, and since I also understand that he wishes to see the continuance of ski development in that valley in California, and since I do not see any logical consistency in this position, I shall cease to object to the position being held here.

So, if any of my colleagues want to proceed with action on this amendment, I am happy to yield.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The Senator from Pennsylvania.

Who yields time?

The time on the amendment has expired.

Mr. HANSEN. Does the Senator from Pennsylvania wish to speak on——

Mr. HEINZ. I do not wish to speak on this amendment. At some point——

Mr. ABOUREZK. Can we act on this amendment?

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from California, unless somebody yields time to somebody.

Mr. BAKER. Mr. President, who has control of the time on the bill?

The PRESIDING OFFICER. The Senator from Wyoming has control of the time on the minority side, and the Senator from South Dakota has control of the time on the majority side.

Mr. HANSEN. And who wishes to speak?

The PRESIDING OFFICER. The Senator from Pennsylvania has sought to speak, but he does not wish to speak on the pending amendment, nor has time been yielded to him to speak on any subject.

Several Senators addressed the Chair.

Mr. HANSEN. Mr. President, how much time does the Senator from Pennsylvania——

Mr. HEINZ. The Senator from Pennsylvania wants 2 minutes.

Mr. HANSEN. I yield 2 minutes.

Mr. ABOUREZK. Mr. President, just a minutes, can we just act on the amendment and then give the Senator the time?

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. ABOUREZK. I move to reconsider the vote by which the amendment was rejected.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I thank all Senators.

If I could have the attention of the Senator from South Dakota for 1 minute, it is my understanding that in the bill before us, S. 791, there is a provision that designates a portion of the Allegheny River from Kinzua Dam downstream to East Brady for study for inclusion in the National Wild and Scenic Rivers System, is that correct?

Mr. ABOUREZK. That is correct.

Mr. HEINZ. I thank all members of the committee for their work on this issue.

This is a project which I have been deeply interested in while a Member of the House of Representatives and now in the Senate.

In February of last year, I introduced a bill to have this designation undertaken.

I believe that the Allegheny River, from Kinzua Dam down to East Brady River, much of which runs through the Allegheny National Forest, meets the criteria for Wild and Scenic River, and therefore, I thank the committee for designating this section of the Allegheny River for formal Wild and Scenic River study.

Mr. ABOUREZK. I yield 2 minutes of my time to the majority leader.

THE CALENDAR

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. President, I earlier asked unanimous consent to proceed to the consideration of Calendar Order 1204, which at that time had been cleared on both sides of the aisle, I thought.

The distinguished Senator who now presides over the Senate at that point in his capacity as a Senator objected to the consideration of the measure. That objection has now been removed.

I ask unanimous consent that the Senate proceed to the consideration, for not to exceed 1 minute, of Calendar Order No. 1204.

The PRESIDING OFFICER. Without objection, it is so ordered.

U.S. LAND CLAIMS IN RIVERSIDE COUNTY, CALIF.

The bill (H.R. 7101) to amend certain provisions of law relating to land claims by the United States in Riverside County, Calif., based upon the accretion or avulsion, and for other purposes was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JACKSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL PARKS AND RECREATION ACT OF 1978

The Senate continued with the consideration of S. 791.

Mr. ABOUREZK. Third reading.

The PRESIDING OFFICER. Are there further amendments?

The question is, Does the Senate concur in the amendment of the House——

Mr. ABOUREZK. Mr. President, before we get to the final passage, I yield 3 minutes to the senior Senator from West Virginia.

Mr. RANDOLPH. Mr. President, we are grateful, and I use the word "we" to include the majority leader (Mr. ROBERT C. BYRD), Representatives HARLEY O. STAGGERS and NICK JOE RAHALL. We have had a very special continuing interest, as the able manager of this bill knows.

The pending measure, S. 791, addresses the protection of one of the most scenic and historically significant areas of our

Nation. It includes a provision to designate the New River Gorge area of West Virginia as a National River.

The protection of the New River and the Gorge is an endeavor that has been underway for over 6 years. There have been numerous proposals and recommendations, as well as extensive public discussions.

This year, as a result of these efforts, a proposal acceptable in large degree to many concerned citizens was developed. Senator BYRD and I introduced S. 2866, a bill to establish the New River Gorge National River. An identical measure was introduced in the House by Representatives RAHALL and STAGGERS. The House has incorporated this proposal into S. 791.

In our efforts to provide vitally needed protection for this area of our State, the national river was seen as the most viable solution. This designation not only prevents encroachment upon the river and the gorge but also provides an acceptable means of utilizing the river's valuable recreation sources. It is well-known that the new river offers some of the best fishing in the East along with the excitement of running the rapids with experienced rafting outfitters. These are sports enjoyed by West Virginians as well as visitors from throughout the Nation.

Another of our concerns was the coal already determined to exist in the New River area. As a result, several studies were undertaken to preserve not only the beauty of the area but also to provide an acceptable means of reaching one of the lifelines of West Virginia, its coal.

A report issued by the Department of Interior states that in a 58,000-acre area of the Gorge, there is at least 2.6 million tons of accessible low-sulfur, low-ash coking coal. With this in mind, boundaries were drawn that will allow for the underground mining of this coal from entries outside the proposed area without obstructing or damaging the Gorge and the New River.

The New River also boasts the longest arched suspension span in the world. This bridge crossing the second oldest known river has added to the attraction of the New River and has drawn tourists from all over the Nation.

The pending legislation also includes provisions for study and possible inclusion in the wild and scenic rivers system or national river, the Bluestone River, the Gauley River and its tributaries. The Greenbrier River and the segment of the New River from Fayetteville to Gauley Bridge will also be included for study.

Mr. President, West Virginians are happy to have such a river within our borders. It is a matter of intense interest to the people of our State, and we thank those who have brought the omnibus bill into being for giving us the opportunity to include this project in the measure now pending.

I commend the Senator from South Dakota, Mr. ABOUREZK, on his handling of the legislation. Through his cooperative spirit, his perseverance and his expertise, he has brought to passage a vital parks and recreation measure. We are particularly grateful for his assistance in moving forward with the New River Gorge National River. The able chairman of the Subcommittee on Parks and Recreation has resided and worked in West Virginia. We invite him to visit with us often and to enjoy the benefits of his work for the New River Gorge. The citizens of our Mountain State will welcome him enthusiastically.

Mr. DOLE. Mr. President, I should like to ask one question: Is there any State other than Kansas that did not end up with a park? [Laughter.]

The PRESIDING OFFICER. The Chair advises the Senator from Kansas that Arkansas did not make it, either.

Mr. ABOUREZK. Did we leave you out, BOB? [Laughter.]

Mr. DOLE. I have 2 more years. [Laughter.]

Mr. HANSEN. Mr. President, I believe the inquiry by the distinguished Senator from Kansas is sincere. It is my understanding that six States—five others—did not make it.

Mr. DOLE. I appreciate that. We would have a meeting later. [Laughter.]

The PRESIDING OFFICER. Does the Senator from Maryland wish to offer an amendment?

Mr. MATHIAS. I wish to offer two amendments.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

UP AMENDMENT NO. 2088

(Purpose: To expand the boundaries of the Hampton National Historic Site in the State of Maryland.)

Mr. MATHIAS. I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maryland (Mr. MATHIAS) proposes an unprinted amendment numbered 2088:

At the end of the bill add the following new section:

SEC. 311. (a) In order to preserve, as part of the Hampton National Historic Site, lands and buildings historically associated with Hampton Mansion, the exterior boundaries of such historic site are hereby revised to include the following described lands:

All that certain tract or parcel of land lying and being situated in Baltimore County, Maryland, and being more particularly described as follows:

Beginning at a point on the Northwest side of Hampton Lane (50 feet-wide), said corner being common to the lands now or formerly of Hampton Village, Inc. and the lands of Gertrude C. Ridgely, et al; thence, with the Northern right-of-way line of said Hampton Lane, the two following courses and distances:

North 69°19'40" East, 188.75 feet; and

Easterly by a line curving toward the right having a radius of 408.59 feet for a distance of 196 feet (the chord bearing of North 83°04'-12" East, 194.12 feet); thence, leaving said Hampton Road, North 14°20'20" East, 1,095.18 feet to the westernmost corner of Lot No. 1 as shown on Plat "D" of Hampton and filed for record in Plat Book G.L.B. No. 20, Folio 32; thence, running along the southerly line of the lots fronting on St. Francis Road (as shown on said Plat) on a line parallel to and 200 feet from said street, south 68°-25'30" West, 777.75 feet to a point on the easterly side of a 40 feet wide road; thence, with said road, North 21°34'30" West, 200.00 feet to a point on the southerly right-of-way line of St. Francis Road; thence, leaving said 40 feet wide road and with said St. Francis Road, South 68°25'30" West, 40.00 feet to a point on the westerly side of said 40 feet wide road; thence, leaving said St. Francis Road and with said 40 feet wide road, South 21°-34'30" East, 200.00 feet to a pipe; thence, leaving said 40 feet wide road, South 68°-25'30" West, 200.00 feet to a corner common to said Hampton Village, Inc. and the lands of subject owner; thence, with said Hampton Village, Inc., South 21°29'33" East, 835.03 feet to the point of beginning.

Containing 14.02 acres, more or less.

(b) The Secretary of the Interior (hereinafter referred to as the "Secretary") in furtherance of the purposes of this section, is authorized to acquire by donation, purchase, or exchange lands and interests in lands described in subsection (a) of this section.

(c) The Secretary shall administer lands acquired under the authority of this section as part of the Hampton National Historic Site in accordance with the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented and the Act of August 21, 1935 (49 Stat. 666).

(d) There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

Mr. MATHIAS. Mr. President, the amendment I am offering today, along with Senators SARBANES, HUMPHREY, and CASE, would expand the boundaries of the national historic site of one of the largest and finest Georgian homes in America. The Hampton National Historic Site would be enlarged by approximately 14 acres to include the original farmhouse and six outbuildings.

Currently, this historic site consists of Hampton Mansion and several outbuildings located on a 45-acre tract just north of the Baltimore Beltway in Towson, Md. North of the mansion grounds is Hampton Lane, where the 14-acre farm parcel is located. This land area, virtually hidden from view by the dense vegetation is set back, somewhat, from Hampton Lane. In fact, the average visitor is probably not even aware of the existence of the farm, let alone capable of associating it with the mansion. Most would not even understand its true significance, which, I think, needs some explaining.

The significance of the farm is, simply, that Hampton originally was not just the mansion and its immediate grounds; rather, it was a sprawling plantation, a large venture, encompassing both agriculture and industry and the farm was an integral part of the enterprise.

It is important to note that many of the outbuildings on the Hampton Farm share common features with the outbuildings of the mansion. Several of the structures exhibit the same cornice with cresent-shaped cutouts, and the stonework of the masonry buildings is of similar appearance. This apparent relationship is important when relating the history of the Hampton estate as a single entity. In addition, it seems likely that the nails, spikes, hinges, and other remaining hardware still visible in the outbuildings on both tracts of land were fabricated at the former carpenter/blacksmith shop from iron produced at the Northampton furnace and should be noted as an example of how self-sufficient Hampton was.

Henry and Ottalie Williams in their

book, "Great Houses of America" describe Hampton as "one of America's most imposing late-18th century mansions." So it is—and more.

Built by Charles Ridgely between 1783 and 1790, it stands today as one of the largest and finest Georgian houses in America. The mansion is furnished in the 1790–1830 period and contains many original Ridgely family pieces. The formal gardens, composed of six rectangular parterres in three terraces, are renowned for their sheer beauty.

Since 1948 Hampton has been the property of the American people as a national historic site. It is administered by the Society for the Preservation of Maryland Antiquities for the National Park Service. This arrangement has been eminently successful. Over the years it has provided the citizens of the Nation with a truly magnificent view of a late 18th century manor house.

And now—an exciting new development has taken place. The Hampton Farm is being offered for sale. We now have the opportunity to rejoin these two properties in one contiguous and grand Hampton National Historic Site. The acquisition of the Hampton farm and its rehabilitation would have a dynamic effect upon the mansion as it is currently interpreted. The operation of a revitalized farm complex would dramatically help to transform Hampton from a site of primarily geneological and architectural interest to what it really was—the centerpiece of a once vast estate, of which the farm was a major component.

The farm house, built in 1690, was originally known as Huntsman's Lodge and served as the home of Charles Ridgely while he built the mansion. The farm house has never been out of Ridgely hands.

I would like to describe for my colleagues the outbuildings which would be acquired pursuant to this amendment.

The overseer's house was the main building of the farm complex. It was built in stages, and its earliest section is believed to date from the early 18th century, or perhaps even the 1690's. The house is wood, with a stone foundation and wood shingle roof. The most recent addition dates from the 1940's, when the Ridgely family moved their place of residence from the mansion.

The shed/garage is situated very near to the overseer's house, and is a small wooden structure. As explained by Mr. John Ridgely III, the garage was built in two sections with the newer portion constructed from scrap lumber during his youth.

There are three slave quarters located on the property. All of them are two stories high, built on stone foundations with wood shingle roofs and brick chimneys. Two of the buildings have wooden cornices with crescent designs. Slave quarters I dates from about 1850 and was used as a tenant house. Slave quarters III has an improved interior with a bathroom and was also used as a tenant house.

The bake oven is structurally sound stone located between slave quarters I and II, and has excellent interpretive potential.

The stuccoed stone dairy, believed to have been built before 1843, is partially below ground and includes a stream. There is an outdoor fireplace on the site and a brick chimney.

The rectangular-shaped two-story long barn/grainery was built after 1843.

The corncrib is built on a stone foundation and has horizontal ventilated siding. One interesting feature of the structure is the doorway. The door itself has long iron hinges running almost the width of the door. It is believed that those hinges are the original ones and were produced at the Northampton furnace and the farm blacksmith shop. Above the main door is a transom door. Carved vertically at the door frame are Roman numerals (either VIII or VIIII). It should be noted that this feature was common in country buildings, and represented the builder's instruction mark. Such numbers provided guidance as to the proper construction of the structure's timbers and beams. They were usually found in the attic. Such a feature, a mark of rural artisanship, must be protected against any damage or deterioration. The corncrib, surrounded by dense vegetation, was built after 1843.

The mule barn is a two-story structure built prior to 1843. There are wooden planks over the dirt floor. The remnants of the stalls and troughs are still in place, including areas worn down by the animals stabled there. There is a crescent-shaped cornice on the barn, which is also present on the Hampton mansion greenhouse.

Hampton was originally purchased in 1745 by the Ridgely family. When iron ore deposits were found on the property, they expanded their holdings and established Northeast Ironworks. This foundry provided cannon and shot to the American forces during the Revolution.

From the profits of his successful ironworks, Charles Carnan Ridgely II built the Hampton mansion. The iron industry was well suited to a plantation economy. Wood for the furnace came from nearby woodlands. A farm needed to be operated in order to supply food and other necessities for the labor force. In all, 100 to 120 slaves worked in the ironworks business and housing had to be provided for them. There were carpenters, blacksmiths, wheelwrights, cartwrights, millers, and sawyers also involved in the ironworks. In essence, the iron plantation was one of the most self-sufficient economic units in the Nation in colonial times.

Hampton could be viewed as a prototype for iron and steel mills which developed later in the 19th and 20th centuries. Its farm was an important element in the early efforts toward industrialization.

As I have mentioned, the farm produced the food and other necessities for the slaves as well as the residents of the Mansion. In addition, the farm was profitable in itself. The estate produced prize-winning racehorses, cattle, sheep, and swine.

The farming activities predominated as the profitability of the ironworks began to decrease, and by the mid-19th century it was the profits generated by the agricultural activities which supported the elegant life at the mansion.

As my colleagues can see, the farm buildings were very important to the estate. And since those structures are still standing, we should do all we can to protect them.

The builder of the Hampton mansion, Charles Ridgely II was a public servant, in addition to being a businessman. He served the State of Maryland in a number of capacities, beginning as a representative to the General Assembly from 1790–95; as a Maryland State Senator from 1796–1800; and finally as Governor of the "Old Line State" from 1815 to 1818.

The Hampton mansion and grounds remained in the hands of the Ridgely family until 1948, when it was designated a national historic site.

Mr. President, on March 9, I wrote to the Director of the National Park Service requesting his views on the proposed Hampton expansion. On March 24, I received a reply from the Director of the Mid-Atlantic Region, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

PHILADELPHIA, PA.
March 24, 1978.

Hon. CHARLES MCC. MATHIAS, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MATHIAS: Your letter of March 9 to Director Whalen, concerning acquisition of 17 acres of land adjacent to Hampton National Historic Site was referred to me for a reply.

I have discussed this matter with Mr. Harrison, and feel the proposal has merit. However, its inclusion in the National Historic Site would, of course, require the support of the National Park Service and the Department of the Interior with accompanying specific legislative authorization.

This office has begun to prepare the necessary legislative support data so as to be ready should such data be requested by the Director, National Park Service.

Sincerely yours,
RICHARD L. STANTON,
Regional Director, Mid-Atlantic Region.

Mr. MATHIAS. Mr. President, we will not have this opportunity again. The Ridgely family farm, in all likelihood, will be divided among the heirs of Mr. D. Stewart Ridgely, a banker, sportsman, and last member of his family born at Hampton, who was killed in a traffic accident this past summer. I therefore urge the Energy and Natural Resources Committee to act now to accept this amendment.

Mr. ABOUREZK. Mr. President, we will accept the amendment.

Mr. SARBANES. Mr. President, I commend the manager of the bill and my colleague from Maryland for this amendment. It is a very important amendment. We thank the manager for his good judgment.

Mr. ROBERT C. BYRD. I commend both Senators and the manager. [Laughter.]

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SARBANES. Mr. President, I move

to reconsider the vote by which the amendment was agreed to.

Mr. ABOUREZK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATHIAS. Mr. President, on behalf of Senators SARBANES, HUMPHREY, and CASE, I am pleased to see that the subcommittee has included in this bill the Thomas Stone House, known as Habre de Venture, as a national historic site and has authorized its acquisition by the National Park Service.

The Thomas Stone House is now a registered historic landmark, one of the original homes of a signer of the Declaration of Independence. It is located in Charles County, Md.

In 1771, Thomas Stone built this plantation house near the busy riverport town of Port Tobacco, Md. He lived in it during his most politically active years, and on his death in 1787 was buried in the adjacent family graveyard.

A Georgian structure of brick and frame, Habre de Venture consists of five parts: A central house connected to two wings by two covered passageways, or "hyphens." The hyphens and wings extend southward to form a semicircle. laid in flemish bond with glazed headers. The main building is a 1½-story structure over an elevated basement. It has a dormered gambrel roof flanked by external end chimneys. The brick walls are laid in flemish bond with glazed headers. Center doors and full-length, one-story porches are located at the front and rear of the house.

A center hall, with stairs set against its west wall, divides the central unit into dining and living rooms. In 1928 the Baltimore Museum of Art removed the elaborate hand-carved paneling in the living room; it was subsequently replaced with a reproduction. The fireplace wall in the dining room protrudes into the room, and the flue curves back to the wall and up to the ceiling.

To the west of the central house is the kitchen wing, a low, two-story, gable-roofed structure with brick ends and frame sides. Its second story, added about 1820, contains two bedrooms. The connecting hyphen, originally gabled roofed, one story in height, and containing a breakfast room, was increased to 1½ stories by the addition of a gambrel roof with dormers to provide bathrooms for the second floor of the main house. The east wing, a gambrel-roofed, low, 1½-story frame structure that has one room on each floor, served as Stone's law office. A one-story gabled-roofed brick hyphen connects it to the main house.

Habre de Venture is one of the estimated 24 remaining homes of the 55 signers of the Declaration of Independence which is still standing.

Unfortunately, this beautiful Georgian mansion was severely damaged by fire on New Year's night 1977. Much of the central house was destroyed. Fortunately, however, the connecting hyphen of the house and both the kitchen wing and Stone's law office were spared.

This provision of the omnibus parks bill will permit the acquisition, restoration, refurbishing, and opening to the public of this grand Georgian mansion.

I particularly want to recognize the dedication and long hours of work which several preservation groups have put into this property since the fire damage.

On October 31, 1977, I convened a meeting in my office in an effort to secure the opening of Habre de Venture and its magnificent furnishings to the public. Representatives of the Maryland Historic Trust and the National Trust for Historic Preservation, as well as of Congressman ROBERT BAUMAN and the Maryland State Historic Preservation Office attended. As a result of that meeting, negotiations began between the Maryland Historical Trust and representatives of the owner of the property.

The inclusion of the Thomas Stone House in this parks bill represents the fruition of those talks.

I have been assured that those committed preservation organizations which met in my office will continue their efforts to preserve and restore this historic home and refurnish it.

The property has the potential of becoming a unique cooperative effort between private historic preservation groups and the National Park Service, perhaps ultimately as a working colonial farm.

Mr. President, I ask unanimous consent that a newspaper account from the La Plata, Md., Times-Crescent tracing the early history of this national landmark be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HABRE DE VENTURE: IT ALL BEGAN IN 1682

As early as 1682, the name "Habberdeventure" appears in the land records of Charles County.

In 1724, Robert Hanson purchased from John Lambeth "Haber de Adventure," which he left to his unmarried daughter, Mary, as "Habber Adventure."

A Mary Jenifer waived dower right to the property in 1768, and on December 13, 1770, "Daniel Jenifer, of Charles County, Gent., conveyed to Thomas Stone of the same county, Gent . . . all that tract . . . called Haber adventure and Hanson's Plains Enlarged . . . with all waters, water Courses, woods, underwoods, Houses, Buildings, rails, Hereditaments, Benifts (sic) advantages, Conveniences and Appurtenances . . . standing on the west side of the main road that leads from Port Tobacco to Piscataway."

Stone was newly wed to Margaret Brown youngest daughter of the elder Dr. Gustavus Brown, and used his bride's dowry to buy the place, which cost him 400 pounds.

The house, built there by Thomas Stone, remained in the family until 1936, when it was sold by Mrs. Michael Stone to Charles Steven Smith, from whom Mr. and Mrs. Peter Vischer acquired the property in 1945.

For decades, architects have visited Habre de Venture to view the three types of Maryland architecture exemplified: the Georgian brick house in the center, flanked on one wing by a clapboard-on-brick structure, once Thomas Stone's law office, and on the other by Flemish bond brick, with an end of clapboard-faced brick.

From the Great Room in the central portion, paneling and corner cupboards were removed in 1928 and sent to the Baltimore Museum of Art for a Colonial Room display, along with portraits of Thomas Stone, his wife, Margaret Jenifer Brown, and his father-in-law, Dr. Gustavus Brown.

The paneling was replaced with "a fairly exact" copy, lacking only the roses which had decorated the original cupboards, believed to represent the red of Lancaster and white of York.

The dining room of Habre de Venture was of particular interest, as it was of a lower level than the main portion, a low one-store structure, where according to a description published about forty years ago, "are to be found architectural distinctions which weave their way back to the medieval houses of England and recall the nostalgic efforts of the self-appointed exiles to reproduce their old homes in the heart of an American wilderness.

"Here is one of the very old brick structures of the State," continues the author of "Homes of the Cavaliers," with "the low arched ceiling and an extraordinary chimney treatment beginning at the floor with a large boxlike structure of brick, overlaid with plaster . . the flue curling back to the wall and up to the ceiling." The remarkable fireplace was dubbed "George Washington's nose".

Historical notes of the house do not speculate whether Stone may have merely enlarged an already existing structure.

Thomas Stone, youngest of the Maryland signers of the Declaration of Independence was appointed to the Continental Congress in 1774 and re-elected the next year.

When his wife visited him in Philadelphia, she was inoculated against the smallpox prevalent in the city, and from that point, historians say, her health declined. She died in June 1787.

Stone declined appointment to the Constitutional Convention and retired to Habre de Venture. He died in October, 1787, at Alexandria, Va., while waiting to set sail for England, a voyage prescribed by his physicians.

Thomas Stone is buried at Habre de Venture.

Mr. MATHIAS. Mr. President, I am advised by the manager of the bill that he will look favorably upon this provision in the House bill.

Mr. ABOUREZK. Yes. The Thomas Stone national historic site proposal is in this bill, and this bill will not go to conference. We are going to send it over and ask the House to accept our amendments, and that is it. It is in there; we accept it; we agree.

Mr. MATHIAS. I am gratified to have that assurance of the manager of the bill. It obviates the necessity for my second amendment.

● Mr. MARK O. HATFIELD. Mr. President, there are several Oregon items included in the legislation before the Senate, and I would like to draw attention to the one new addition to the park system in Oregon.

This bill encompasses the features of legislation I introduced in the 94th Congress and in this Congress to add the site of the salt cairn used by the Lewis and Clark Expedition to the Fort Clatsop National Memorial in Oregon.

This legislation is the result of many years of hard work and dedication of Dr. E. G. Chuinard, chairman of the Oregon Lewis and Clark Trail Heritage Foundation Committee. I know that each of us comes in contact with constituents from time to time who are selflessly dedicated to some cause for which they will gain nothing more than the satisfaction of having made a contribution to sound public policy. Dr. Chuinard is an outstanding example of this kind of person.

His efforts to move this bill and coordinate activities in support of it at the local level have been instrumental to getting it before this body. Dr. Chuinard knows of the importance of preserving a bit of history for the future and I am most grateful to him.●

Mr. ROBERT C. BYRD. Mr. President, I rise in support of S. 791 as amended by the House. Title XI of this bill contains a version of S. 2866 which I, and my colleague from West Virginia (Mr. RANDOLPH), have sponsored to create the New River Gorge National River.

Title XI will provide protection to one of the Nation's greatest scenic areas. This New River Gorge area has been under study by the Department of the Interior for several years. I am pleased to have obtained funds for these studies through the Senate Appropriations Subcommittee on the Interior which I have the honor to chair.

In fiscal year 1975, I was able to obtain funds for the Bureau of Outdoor Recreation to perform the study which is known as the New River Gorge study. It was this study that initiated the concept of balanced protection and nondetrimental use. This study did identify a major problem; namely, that of coal deposits in the gorge area and their value.

In fiscal year 1976, I was able to obtain $400,000 and appropriations committee report language authorizing a 1-year mineral appraisal by the U.S. Bureau of Mines and U.S. Geological Survey. This study indicated that by mining coal from entries well outside the boundaries of the New River Gorge, the acquisition cost for coal would not be prohibitive.

In May 1977 and again in October 1977, I prompted and encouraged the administration to come forward with a legislative recommendation based upon these studies by various agencies within the Department of the Interior. After negotiations with the Department and with OMB, the administration submitted draft legislation that is now embodied in title XI of S. 791. Title XI includes several minor changes that improve the original bill, S. 2866.

These changes clarify the restrictions on the condemnation power of the Secretary of the Interior; the definition of compatible commercial and business properties; the area outside the boundaries to be studied for possible future inclusion; the tributary rivers to be studied for possible inclusion in the Wild and Scenic Rivers System; and the release of water from Bluestone Lake. All of these changes were recommended without opposition at the joint House-Senate hearings on S. 2866 and H.R. 12001 on October 3, 1978.

It is now time to provide protection for this scenic area, one of the areas of greatest natural beauty anywhere in our Nation. With the increasing urbanization particularly in the Eastern United States, we must act to preserve natural areas such as the New River Gorge for future generations to enjoy.

I am most pleased to have cosponsored the administration's proposal to create the New River Gorge National River. I believe that title XI of this bill is an excellent balance between providing protection for the area for future enjoyment and recognizing and allowing to continue the present uses and activities in the area that are not detrimental.

This bill contains three features that should be noted. Land acquisition within communities in the gorge would occur only if they have undergone, or are about to undergo, changes in use incompatible with the purposes of the national river. Fee acquisition will be allowed only for visitor-use facilities, river access, historic interpretation, and preservation of the natural beauty of the gorge. Easements only would be acquired over other lands.

The new national river would make West Virginia the home of a fine new national recreation area. Visitors from other States would be welcomed to share with us the excitement and pleasures of one of America's oldest natural wonders—the New River Gorge.

I urge adoption of S. 791.

Mr. WILLIAMS. Mr. President, I strongly support the omnibus parks bill, S. 791, and the committee amendment now before us. I am particularly pleased with the inclusion of a provision which will help to protect a unique area in my State, the New Jersey Pinelands.

I certainly commend my good friends, the chairman of the Committee on Energy and Natural Resources, Senator JACKSON, the chairman of the subcommittee on Parks and Recreation, Senator ABOUREZK, and the ranking minority member of both the committee and the subcommittee, Senator HANSEN, for including a strong Pinelands provision in this bill. They and their staffs have been extremely helpful and cooperative in insuring Senate consideration of a Pinelands measure in this Congress.

This provision, which Senator CASE and I have developed, is the result of many months of discussions and meetings with officials of the Department of Interior, members of the New Jersey House delegation, New Jersey State and local officials, and conservation organizations. We are pleased that it has broad support among those concerned with protecting the significant natural resources of this vast area. I believe that it deserves the support of the entire Senate.

The New Jersey Pinelands contain thousands of acres of unbroken pine and oak forests, free-flowing streams, and rare wildlife and plant species. The unique ecology of the area is maintained by an enormous aquifer which lies just beneath the porous, sandy soil. A number of small communities, and economic activities such as cranberry and blueberry growing, forestry, and recreation has not disturbed significantly the natural processes of life in the pines.

But this will not always be so. The sprawling residential and commercial development of the surrounding region has started to make inroads into the Pinelands. Unless steps are taken soon to plan and protect the area, its pure water, its thriving agriculture, its recreational value, and its serene way of life will be gone forever.

The State of New Jersey and some of the local governments are already involved in efforts to save the Pinelands. A year ago, the Governor appointed a Pinelands Review Committee to review State actions in the area and to recommend means of protecting it. The State Department of Environmental Protection has developed new water quality standards for the central Pinelands, which will help to control undesirable development there. At the local level, Burlington County has launched a program to buy conservation easements on farms and other open space lands.

The provision in the committee amendment to S. 791 is designed to build on these and other State and local efforts to plan and protect the Pinelands. A number of Federal studies have recognized that the Pinelands are of national significance. In fact, the unique ecology of the area would qualify it for inclusion in the national park system. However, acquisition and management as a national park would be inappropriate for the Pinelands. Not only would this be far too expensive, but it would also needlessly eliminate the towns, the farms and the other diverse private activities that are an integral part of the life there.

The committee's Pinelands provision would provide a means for protecting this area which combines the resources and capabilities of the local, State, and Federal Governments and the private sector, and which utilizes the full range of land and water conservation techniques. It would designate approximately 1 million acres in New Jersey as the "Pinelands National Reserve." It would authorize up to $3 million for the Federal share of developing a plan for the Pinelands, and $23 million for the acquisition of critical land that is threatened by adverse development. The Federal share of planning and acquisition would be 75 percent, with the State providing the other 25 percent.

The comprehensive plan for conserving the Pinelands would detail the application of various means of managing land and compensating landowners and local governments, such as fee acquisition, conservation, easements, zoning, air and water quality standards, and payments in lieu of taxes. The plan would be submitted to the Secretary of Interior within 18 months, and after his approval, would be reviewed by Congress for a period of 90 days prior to implementation.

The success of this Pinelands preservation effort will depend to a great degree on the nature of the body charged with developing the plan. Under our provision, the planning agency would have 15 members, one appointed by the Secretary of Interior, seven appointed by the Governor, and one appointed by each of the governing bodies of the seven counties in the Pinelands. We have sought to assure a balance of local, State, and Federal concerns, with economic activities, such as agriculture, as well as conservation interests represented. In keeping with the goal of the legislation, we feel it is incumbent upon the governing bodies of the counties and the Governor to select individuals to serve on the planning agency who have demonstrated concern

for the preservation of the resources of the Pinelands. Because of the time constraints in the legislation and because of the urgency of protecting this unique area, it is crucial that the planning agency work harmoniously and efficiently in completing its task.

Mr. President, I believe that this provision will provide the best protection for the land, water, and wildlife of the Pinelands, while assuring that the interests of local governments and private landowners are protected. It will demonstrate to the Nation a new means of protecting areas which, like the Pinelands, are too large and too complex to be protected by the traditional means of Federal acquisition and management.

I urge my colleagues to support this provision, as well as the bill, S. 791.

Mr. CASE. Mr. President, I commend the distinguished chairman of the Committee on Energy and Natural Resources, Senator JACKSON, and the ranking Republican member of the committee, the distinguished Senator from Wyoming, Senator HANSEN, as well as the distinguished chairman of the Parks and Recreation Subcommittee, Senator ABOUREZK, for their work on this bill.

I strongly support the bill and particularly the sections dealing with Wild and Scenic River status for the Delaware River and the provision for protection to a unique area of my State, the New Jersey Pinelands.

The provision relating to the Pinelands is the result of extremely helpful cooperation by a large number of persons on a proposal that Senator WILLIAMS and I developed.

We are pleased by the broad support that this provision has received and we believe it deserves the support of the entire Senate.

This is a vital and significant proposal.

It is needed immediately to provide protection for a unique and beautiful area of my State known as the New Jersey Pinelands, an area that has been described as "among the most outstanding natural areas in the country.

The Pinelands, the largest undeveloped stretch of land on the eastern seaboard, is threatened by encroaching development. In one 50 square mile area of the Pinelands, for example, there have been enough approvals given for construction of new dwellings to double the population of the area in a span of 5 years. This development is taking place whenever and wherever land becomes available, without regard to planning for public services or the protection of natural resources.

While that problem is not unique to the Pinelands, it is intensified by the fragile nature of the area and increasing pressures caused by such things as the introduction of casino gambling at Atlantic City, which borders on the Pinelands.

The Pinelands are located in the southern half of New Jersey between the famous seaside resorts and the New Jersey Turnpike. It is a subdued, restful area with low shrubs and dwarfed pines and oaks growing in a highly porous soil that absorbs 90 percent of the rain that falls in the area.

The porous soil has created an aquifer that stores some 17.7 trillion gallons of water, an amount equal to 10 years of rainfall or the equivalent of a lake 2,000 square miles in area and 37 feet deep. Because of the porous soil and the shallow depth of the aquifer, this giant under ground reservoir could easily be polluted if intensive development took place in the area.

The Pinelands meets the criteria for a national park or a national recreation area but it is too expansive and too complex to be administered in the traditional manner which requires direct public acquisition and exclusive Federal management.

What is needed, and what our proposal provides, is a new approach that combines the capabilities and resources of the local, State and Federal governments and the private sector for protection of this area. We want to make sure the interests of all these sectors are represented in the development of a management plan for the area.

As I said, we believe our proposal is needed immediately to provide protection for New Jersey's Pinelands. But we also believe it is an important proposal for other parts of the Nation.

There are numerous areas in the country that, like the Pinelands, meet the criteria to be classified as national parks or national recreation areas but for various reasons are not suited to be administered in the traditional manner. At present we have no accepted policy for dealing with these areas.

Through the development of a management plan for the Pinelands, under the provisions of our proposal, we are seeking to demonstrate how various levels of government can work together and with the private sector to protect outstanding natural and cultural areas throughout the country for which traditional methods of protection are inappropriate.

We are seeking to demonstrate a means by which Federal interests in an expansive area of unique ecological value can be protected without the need for direct Federal ownership of the whole area.

We are seeking to demonstrate a means by which State interests can be protected without preempting local and private interests or being preempted by Federal interests.

We are seeking to demonstrate a means by which various local units of government can cooperate with each other and with the Federal and State governments to provide protection to an area that extends beyond local boundaries.

And we are seeking to demonstrate a means by which private interests, such as agriculture and recreation, can be carried on in harmony with the preservation of ecological, cultural, scenic and historic values.

We believe development of a management plan for New Jersey's Pinelands can be of significant value to the future development of a national policy for protecting areas for which there is no appropriate system of protection at this time.

To accomplish these purposes, our proposal calls for Congress to designate approximately 1 million acres in New Jersey as the "Pinelands Reserve" and to authorize $26 million as the Federal share of developing a management plan and acquiring land in the Pinelands. Of that amount $23 million would be used for acquisition of critical land areas that are in immediate danger of being developed in a manner that would be significantly adverse to the protection of the Pinelands. These Federal funds would be matched, on a basis of 75-percent Federal and 25-percent State, by State funds, as would the funds for development of the management plan.

A joint Federal-State-local agency, which will include representatives of private interests, will be established by the Governor of New Jersey to draw up a comprehensive plan for the area.

It is our intent and expectation that all those who serve on the planning agency will be dedicated to the protection of the values of the Pinelands.

During development of the plan, the agency would provide for maximum public and local participation, through public hearings and consultation with local officials and a citizens' advisory body.

The comprehensive plan will include a resource assessment which determines the amount of development and other activity that the ecosystem can sustain. It also will include a map showing areas of critical ecological importance and areas of scenic, open space, cultural and recreational significance and a separate map showing land use capability.

The plan also will include a comprehensive statement of policies for land use management which details the application of a variety of land and water management techniques such as zoning, development and use standards, conservation easements and other interests in land, land use regulations, public access agreements, and fee acquisition.

It must recognize existing economic activities within the area and provide for their protection and enhancement. In addition, there must be a plan for coordination and consistency of local, State and Federal programs and policies, a financial plan, a program for maximum local government and public participation in the management of the area, and a program for State and local implementation of the plan, including potential penalties for failure to implement the plan.

New Jersey will submit the complete management plan to the Secretary within 18 months, with the provision for extensions if the plan is found to be unacceptable when first submitted. All Federal assistance will be terminated and reimbursement of Federal funds may be sought if an acceptable plan is not approved within 3 years.

Once the plan is approved by the Secretary, it will be submitted to Congress for review.

We hope that our proposal will become a model for handling of areas similar to the Pinelands in the future.

Mr. ABOUREZK. Mr. President, I move to concur in the amendment of the House with an amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. ABOUREZK. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HANSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATHIAS. Mr. President, on the omnibus parks bill, which has just passed, I should like the record to show that I did not vote on that measure, because I have an interest and withheld my vote.

The PRESIDING OFFICER. The record will so indicate.

PUBLIC ASSISTANCE AMENDMENTS OF 1977

Mr. ROBERT C. BYRD. Mr. President, in order that I may keep my promise to the Senator from Pennsylvania and the Senator from Louisiana, I ask unanimous consent that the Senate resume the consideration of Calendar No. 527, H.R. 7200.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7200) to amend the Social Security Act to make needed improvement in the programs of supplemental security income benefits, aid to families with dependent children, child welfare services, and for other purposes.

The Senate continued with the consideration of the bill.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania will be recognized as soon as the Senate is in order. The Senate is not in order. Will Senators retire to the cloakroom or take their seats?

SUGAR ACT

Mr. HEINZ. Mr. President, we are now returning to consideration of the Sugar Act. We are now returning to the consideration, also, of that part of H.R. 7200——

The PRESIDING OFFICER. Will the Senator suspend until the Senate is in order? The Senate is not in order. Will Senators please retire to the cloakroom or take their seats? We will not resume consideration of this measure until the Senate is in order.

Mr. HEINZ. Mr. President, does the Senator from Louisiana seek recognition?

Mr. LONG. Mr. President, is the Sugar Act before us?

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 2089

Mr. LONG. Mr. President, I am going to modify my amendment, in section 401 of the bill, to include this language.

Strike line 14 on page 29 and insert in lieu thereof "February 15, 1979." In other words, where "September 1" appears strike that on page 29.

The PRESIDING OFFICER (Mr. DECONCINI). Will the Senator please send the modification to the desk?

Mr. LONG. I will in a moment.

On page 29, line 14, where the figure "September 1" appears, strike "September 1" and insert in lieu thereof "February 15."

The modification is as follows:

On page 29, line 14, strike "September 1" and insert "February 15".

Mr. LONG. Mr. President, the reason I do this is to accommodate the Senator from Pennsylvania who has diligently guarded the floor today and made clear the fact that he is very much concerned about a provision that I really did not think was going to be very controversial when it was first agreed to in the committee. That was the provision that would extend the authority to waive countervailing duties until September 1, 1979.

In the spirit of compromise, the Senator was willing to agree that the date in the committee amendment be moved back from September 1 to February 15. If the matter can be resolved in this particular manner, Congress will be back in session next year and can consider the matter again in February.

I am sure the Senator from Pennsylvania will want to make clear his views about that matter. But I think that this will be a fair compromise. It will protect what he is very much concerned about. It will also let us continue the trade negotiations subject to a reasonable protection on both sides. It also will make it possible for us to move ahead with the Sugar Act.

Mr. President, let me say a word or two about the Sugar Act which is the principal thing that most of us seek to achieve with this bill.

In 1974 there were very high sugar prices, but thereafter a world sugar surplus developed very quickly and the stocks of sugar grew very rapidly. Foreign sugar fell to a very low price and large amounts of it have been imported.

Mr. President, as it stands today, it does not make any difference how efficient a sugar farmer is. Be he a beet farmer or be he a sugarcane farmer, he is losing money on every pound of sugarcane and sugar beet that he produces.

The domestic market price for sugar dropped to about 10 cents per pound in the latter half of 1977 and has remained low. According to the Department of Agriculture, the average cost of production in the United States for sugar is 15.2 cents per pound. Fourteen of the 90 or so sugar beet and sugarcane processors have been forced to close, because of these same pressures. If this situation is allowed to continue, the collapse of the U.S. sugar industry is inevitable, and it is not very far away.

The Sugar Stabilization Act which is now proposed and before the Senate would provide this country with a sugar policy designed to prevent the destruction of the U.S. sugar industry and to protect the interests of both consumers and producers of sugar. Our experience since the end of the sugar acts has demonstrated the need for such a program. The basics of the program are not difficult to understand.

Under the Sugar Stabilization Act, the President would be authorized to implement for the United States the International Sugar Agreement of 1977. While prices worldwide were declining rapidly in 1976 and 1977, the United States was taking a leading role in trying to negotiate an International Sugar Agreement for the benefit of all nations. That agreement is now before the Senate as a treaty for advice and consent. The International Sugar Agreement should bring some stability to the world sugar market trade. It will do this by regulating the quantity of sugar on the world market through export quotas and buffer stock requirements for exporting countries. The ISA, or International Sugar Agreement, aims to stabilize world market prices between 11 and 21 cents per pound with a free trade range; that is, without any quota or stocking requirements, between 15 and 19 cents per pound. The United States, as an importing country, would assist stabilization by limiting imports of sugar from countries which are not members of the International Sugar Agreement.

Mr. President, it was the view of the Finance Committee that the price of sugar should be about 17 cents a pound. I regret to say that in the State of Louisiana, which I have the honor to represent, even that price is low, because the average cost of production is about 17½ cents a pound in Louisiana. Notwithstanding that, we fear that there is no hope of persuading the President to sign a bill that would go to 17 cents a pound; hence the bill before us now provides for 16 cents a pound.

Mr. President, even at 15 cents per pound, 15 percent of the producers in Louisiana will be in dire distress, and that bothers me very much.

However, Mr. President, recognizing the realities of the situation, we would be better off with a 16-cent bill than with no bill at all. Knowing that we have had difficulty in persuading the President to see it our way, and confronted as of this moment with a strong feeling on behalf of the President's advisers that 16 cents is somewhat more than they should be willing to go along with, we feel that it would be better to have that than to have nothing.

At least, the great majority of sugar producers could survive at 16 cents.

It is only for that reason, Mr. President, that we do not recommend as high a figure as the committee really feels is justified under the circumstances.

I hope, Mr. President, that the Senate will see fit to at least endorse the 16 cents amendment proposed, as far as that would go.

The second title of the Sugar Stabilization Act provides for the maintenance of a sound U.S. sugar industry. A domestic market price objective for raw sugar of 17 cents per pound would be established for sugar sold between October 1978 and September 1979. Beginning in October 1979, this price objective would be adjusted each 6 months to take account of increased costs and inflation until the end of the program in September 1983. The price objective would be achieved by the addition of an import fee to the price of imported sugar. If the import fee does not maintain the domestic price at the price objective, then

quotas could be used to restrict imports and achieve the price objective. The act would also provide for fair wages and improved conditions for sugar fieldworkers.

The committee believes the price objective for the 1978 crop year, 17 cents per pound, is the minimum needed, with adjustments in future years, to maintain a domestic sugar producing industry at about its present level. The domestic industry will continue to decline at any lower price, jobs will be lost, Government welfare costs will increase, and the United States will become increasingly dependent on foreign imports to meet its sugar needs. Increased reliance on imports would lead to increasingly erratic prices to consumers due to the political instability and variable weather conditions which have always made world sugar prices more volatile than U.S. sugar prices. There would be periods of excessively high prices and a growing negative component to the U.S. trade balance, adding to inflation generally.

The benefits of stable and fair domestic sugar prices under the Sugar Stabilization Act would cost the consumer very little. The Consumer Price Index would increase annually at most by one-tenth of 1 percent under this act. This equates to maybe 5 cents per week for each person, or two-thirds of 1 cent per day. In return, consumers will be protected from 60 cents a pound sugar prices and sugar producers in 21 States will continue in business.

The 17-cent price level in the act is the median of the free trade price range under the ISA. Because it was decided upon internationally as an appropriate level for world prices, it seems only appropriate as a level for U.S. prices also. However, even the 17 cents per pound objective in the act is less than the cost of production of sugar in many areas. Some attrition will occur in the domestic industry at 17 cents. This price, expressed as a percent of parity for sugar, represents the lowest percentage set in any administration.

The adjustments to the initial price level provided in the bill are necessary to keep the U.S. market price at a level sufficient to cover the costs of production for U.S. producers. Between 1969 and 1977, the average rate of increase of the cost of production, excluding land costs, has been 8 percent. The adjustment factor in the act would permit prices to rise only in relation to increased costs of production and inflation. This adjustment is absolutely necessary if we are to avoid a continuing decline in the domestic industry.

Under the committee amendment, the Secretary of Agriculture would impose fees and, if necessary, quotas on imports to maintain the U.S. market price objective. The preferred method of achieving the U.S. price objective would be the import fee which, when added to the prices of imported sugar, would insure that the domestic price objective is reached. Quota authority is provided to the Secretary to serve as a backup means of achieving the U.S. price objective if the use of import fees alone cannot achieve this price. Fees were selected as the preferred mechanism for achieving the price objective because they are less disruptive to trade. The ability to use quotas as a backup adds a degree of certainty which is needed to insure that the domestic price objective is not undercut.

The farm labor provisions of the act provide for fair wages and improved conditions for sugar fieldworkers. Beginning with sugar supply year 1978, specified minimum wages must be paid to each person employed on a farm in the production, cultivation, and harvesting of sugar beets and sugarcane. The rates per hour are required to be not less than $3 for 1978, increased by an additional 20 cents each year thereafter. Remedies for workers are provided against employers who do not pay the wages provided for in the act. All producers of sugar beets and sugarcane would be prohibited from firing or in any other manner discriminating against any employee, because the employee has assisted or participated in any manner in an investigation, proceeding, or litigation under the labor provisions. Finally, producers of sugar beets and sugarcane could not charge workers more than the reasonable costs for goods or services they provide and must furnish workmen's compensation insurance to each worker employed while he is employed.

Mr. President, the domestic sugar program provided for in the committee amendment to H.R. 7108 which is now before the Senate is a responsible, reasoned program designed to benefit both consumers and producers of sugar. It should be enacted.

The committee amendment also provides for an extension of no more than 9 months of the Secretary of the Treasury's authority to waive the collection of certain countervailing duties. Under present law, the Secretary of the Treasury must collect countervailing duties in addition to regular duties on imports entering the United States if he finds that the imports are subsidized. The additional duty is equivalent to the amount of the subsidy.

In the Trade Act of 1974, Congress directed the President to seek new international rules on subsidy and countervailing duty practices in the multilateral trade negotiations. Our law does not require any finding that subsidized imports are injuring a domestic industry before a countervailing duty is imposed. The general agreement on tariffs and trade requires such an injury finding. Although we are exempt from that GATT requirement under a grandfather clause, our trading partners consider our law to be a violation of the "Spirit" of the GATT. To permit the President to avoid confrontations over the U.S. countervailing duty law while a subsidy code was being negotiated, Congress permitted countervailing duties to be waived; that is, not collected even though a subsidy exists, until January 3, 1979, under certain conditions.

On September 28 of this year, the President sent a message to the Congress asking that the countervailing duty waiver authority be extended until Congress completes its consideration of the results of the multilateral trade negotiations next summer. The President stated that prospects for reaching agreement by year's end on a subsidy/countervailing duty code which meets the basic U.S. objectives are good. He also stated that failure to extend the waiver authority until Congress can consider whether or not to implement that code will seriously jeopardize the ability of Bob Strauss, our special representative for trade negotiations, to negotiate such a code.

The Finance Committee has been overseeing the trade negotiations very closely since 1975. On the basis of this oversight, the committee agrees with the President's assessment of the problem. If the waiver authority is not extended for a limited period, the results of the negotiations, particularly for American agriculture, will be greatly reduced.

The committee has added a provision to its amendment to H.R. 7108 which would extend the authority of the Secretary of the Treasury to waive countervailing duties under certain conditions. Under the amendment, the waiver authority would be extended if, before January 3, 1979, the President determines and notifies Congress that negotiations have been concluded on a subsidies/countervailing duty code which adequately protects U.S. agricultural and industrial trading interests and provides for effective enforcement of substantive rules. The President must also report to Congress before January 3 that the MTN as a whole has been substantially concluded and that a failure to extend the waiver would seriously jeopardize the conclusion of the MTN. If these conditions are met, the waiver authority would be extended to the earliest of, first, September 1, 1979; second, the date on which either House of Congress defeats; or third, both Houses pass on a vote of final passage, the domestic implementing bill for the subsidy/countervailing duty code.

Under this provision of the act, existing waivers, which continue in effect, and any future waivers made during the period of the waiver authority extension would be subject to the existing conditions in the law for granting waivers. This means that before a new waiver could be granted the foreign governments supplying the subsidy in question would have to substantially reduce the effect of the subsidy practice on U.S. interests. In addition, all existing waivers and any future waivers would be subject to the existing congressional disapproval provisions under which either House of Congress may by majority vote disapprove a specific waiver. If a disapproval resolution is adopted, imports covered by that resolution become subject to countervailing duties immediately.

Mr. President, the provision of the committee amendment on extending the countervailing duty waiver authority will permit the special representative for trade negotiations a chance to secure the best possible agreement for the United States on international subsidy practices affecting U.S. industries. At the same time, the provision is drafted so that the Congress would maintain control to make sure that this extended au-

thority is not abused. If at any time Congress becomes convinced that a waiver which was granted under this authority was granted on inappropriate grounds, then Congress can disapprove that waiver.

The bill before the Senate now is an exceptionally important bill. It would provide a long needed domestic sugar program to the benefit of domestic sugar producers and consumers. It would permit the continuation and conclusion of international negotiations which offer the hope of bringing under control international subsidy practices injuring U.S. interests. It is a reasonable bill. It is a responsible bill. It is a bill worthy of Senate approval.

The committee amendment also provides for the extension for no more than 9 months of the Secretary of the Treasury's authority to waive the collection of certain countervailing duties, which has been previously discussed, I think, in considerable detail.

Mr. President, the amendment at the desk is my amendment. I have the right to modify it, and I do so modify it.

The PRESIDING OFFICER. It takes unanimous consent to modify the amendment.

Mr. LONG. Why does it take unanimous consent to modify it?

The PRESIDING OFFICER. Because by unanimous consent the Senator has agreed to it being considered as original text.

Mr. LONG. I ask unanimous consent to modify the date relating to the period for the countervailing duty waiver of the amendment.

Mr. HEINZ. Mr. President, reserving the right to object——

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard.

The Senator does have the right to offer it as an amendment.

UP AMENDMENT NO. 2089

Mr. LONG. I offer it as an amendment, Mr. President.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 2089:

On page 29, line 14, strike "September 1" and insert "February 15".

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I do not know of any objection and I suggest we vote on it.

Mr. HEINZ. Mr. President, I would like to be heard briefly on the amendment.

Mr. LONG. All right.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I first want to thank the Senator from Louisiana, the chairman of the Committee on Finance. This represents a great deal of deliberation and agonizing on his part and on my part because, as I think my colleagues know, when we started out today on H.R. 7200 at about 11:30 this morning, I felt very strongly that we should not agree to the language of September 1, 1979. Had it been agreed to, that would give the administration some 35 weeks during which period subsidized imports would have flowed into this country as too often they have been allowed to do through the exercise of this waiver authority, displacing American workers in textiles, in steel, in garments, in industry after industry.

When we were discussing the amendment later in the day, I indicated that the French, the Dutch, the Germans, the British, the Danes, and many, many others were subsidizing their agricultural and industrial products and, frankly, Mr. President, I think that no matter whether you are for free trade or not—and I am for free trade—we must stand for fair trade.

One of the things that makes it very difficult for our people to understand is how, when we waive—as the President has done in virtually every instance except one I can think of—the countervailing duties which are supposed to offset the subsidies paid by foreign governments to their manufacturers so they can export at a low price to this country, I often wonder how we can explain that to our people who are trying to hold their jobs, stay off welfare, put their kids through college, have a decent home, try to give their families what every American family has a right to expect.

So often, as I know the Senator from Louisiana knows, it is the people who are trying to get into the work force or who are at the so-called entry level jobs, the least skilled jobs, who are hurt the most, and these are the people we want to bring into our society. We do not want them excluded. We do not want them to have to turn to AFDC or welfare. We do not want to have them to be forced to get on medicaid. They want health coverage, through the health insurance that the Senator may want to provide, and others, but we want these people to be full citizens. We do not want them to be knocked out of their jobs by these imports.

The Senator has offered to the Senate language to extend beyond the January 3 date the President's waiver authority for an additional 6 weeks to February 15.

I know the Senator and I have had our discussions and our differences today. But just speaking for this Senator, I have discussed this with other Senators, and we are prepared not only to accept but to support in the spirit of compromise the Senator's amendment.

Mr. LONG. Mr. President, the Senator from Pennsylvania is speaking for thousands of workers in his State, and I fully appreciate his problems.

Mr. President, may I say that I have discussed this matter with Ambassador Strauss, and I have explained to him the strong concern of the Senator from Pennsylvania and other Senators who are concerned about the problem, and he understands that this is the best we can do for him with his trade problem.

If this is not adequate, we can look at it next year, and we will have a full month in which we can consider whether a further extension might be necessary. Perhaps longer than that, when we come back in next year.

But, Mr. President, as a practical matter, in view of the strong feeling of the Senator—and I am sure there are others who feel the same way—and particularly a considerable number in the House of Representatives, if this Sugar Act is to become law, and even if this extension of the right to waive the countervailing is to become law, this amendment will be necessary. Otherwise, Mr. President, neither one of them is going to pass.

This matter has been discussed all day, and I am happy that the Senator is willing to join in what I think is a fair compromise and what he believes to be a fair compromise of the issue. If this is not adequate we can look into it again next year.

Mr. MATSUNAGA. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. I yield.

Mr. MATSUNAGA. As I understand the amendment proposed by the Senator from Louisiana to H.R. 7200 it includes the entire text of H.R. 7108 as it was reported out by the Finance Committee on October 5; am I correct?

Mr. LONG. With one exception. It provides for a 16-cent market price for sugar rather than 17 cents. I would like to have 17, as I have explained, but I do not think it can be achieved.

Mr. MATSUNAGA. And it does include title III of the farm labor provisions?

Mr. LONG. Yes; and it also includes the countervailing duty provision, except that the date on that provision would be February 15, 1979.

Mr. MATSUNAGA. I thank the Senator for yielding.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I urge the Senate to approve the pending bill.

This bill is designed to protect American consumers from the wild gyrations of the world sugar market and to provide an opportunity for our domestic sweetener industry to survive. Additionally, passage of this important legislation will open the way for the Senate to consider the International Sugar Agreement, now pending before the Senate Foreign Relations Committee.

While the ISA represents an attempt by more than 70 sugar-producing and consuming countries to improve and eventually stabilize world sugar prices at acceptable levels, we must recognize that such commodity agreements have a very poor track record. A reliable domestic program is imperative as a backup to the ISA. We cannot reasonably require our own sugar growers to depend on so weak a reed as the ISA. We do not ask American farmers who grow other crops to risk their all on international agreements. Why should sugar be treated any differently?

Last fall, I pointed out these problems to administration officials and suggested that they propose a domestic program

to provide an adequate safety net, in case the ISA should fail. During hearings I held in February on the proposed ISA in Burley, Idaho, the heart of our sugar beet country, it became abundantly clear that the cane, beet, and corn farmers composing our domestic sweetener industry could endorse the ISA only if an acceptable domestic program were first enacted to replace the expiring de la Garza amendment, adopted last year.

The passage of time and lack of administration response made it apparent that Congress would have to act on its own initiative. In May, I introduced the Sugar Stabilization Act of 1978, and hearings were held in the Senate by the Finance Committee. Thirty-three other Senators joined in cosponsorship.

Mr. President, in the weeks that followed, we witnessed the organization of a determined defamation campaign against the bill. Those who would make the United States dependent on foreign sugar have attacked this bill as inflationary and labelled it a scheme to reward inefficiency. Large and profitable multinational corporations, which purchase about 75 percent of the sugar used in this country and turn it into soft drinks, cookies and candy bars, have fought tooth and nail against this legislation. The administration has taken up with them, refusing to go further than endorse a price level below everyone's estimate of the cost of production in this country, thus insuring the strangulation of our own sugar industry. Let us look at the facts.

This bill, as it now stands, sets a price objective of 16 cents per pound and would achieve this price in our marketplace by imposing fees on imported sugar and setting import quotas, if necessary. By contrast, the administration has never endorsed a price above 15 cents, and has insisted that any support level for the sugar growers be at least partially achieved in the form of payments to the growers or the processors. The administration's position not only entails an unnecessary subsidy, but also a support level so far below cost the domestic sugar production will be drastically curtailed. As a result, the Government's expenditure, in higher unemployment compensation, lost taxes, and increased Trade Act adjustment assistance, plus the subsidy, would far exceed the net cost of this bill. That is so because this bill contains no hidden subsidies to anyone. Instead, duty collection on imported sugar would increase by about $200 million in 1979. This means the taxpayer wins because funds will flow into the Treasury instead of payments flowing out.

Administration spokesmen are sticking to a sugar price of 15 cents per pound. Yet, in testimony before the International Trade Commission, these spokesmen said that this bill's original objective of 17 cents would cover the cost of production for only 70 percent of domestic growers. How then can a program of 16 cents be one which would reward inefficient producers, as the administration has charged? The truth is that U.S. sugar growers are being asked to go out of business so that the big industrial users can continue to purchase excess foreign sugar "dumped" on the world market at prices far below the cost of production.

Will this bill cause inflation? That, too, has been charged. If the full cost of 16 cents sugar were passed through by the industrial users, the result would be a maximum increase of less than one-fifth of 1 percent in the family food basket. And the food basket purchaser, it should be remembered, would not have to pay taxes to provide subsidy payments to sugar growers, unemployment compensation, et cetera, to alleviate the problems caused by forcing our own sugar growers to go broke. During 1974, sugar prices approached 70 cents per pound on the world market. This year, they have dropped to below 7 cents per pound. When sugar prices rose, candy bars shriveled and prices soared. Today, with "dump" sugar dirt cheap, the price of bottled soft drinks and confections have come down precious little, but profits have grown fat. Meanwhile, 7 of our beet-processing plants and 21 cane mills have closed their doors in the last 4 years. Unless we pass an adequate bill, now, the remainder of our domestic industry will die. Once the United States must depend on foreign sugar, how long will it be before we start paying through the nose, as we do today for foreign coffee and foreign oil? In fact, the current excess of world sugar supply is estimated by the USDA to disappear by 1980. Are American consumers ready for the return of sugar shortages in the early 1980's and the spiraling prices that may then occur, without any domestic industry left to protect them?

If the administration is looking for someone to blame for the high price of candy bars and Coca-Cola, it will not find the culprit in the beet fields of Idaho nor the cane fields of Florida.

Some have suggested that the proposed ISA is better for U.S. consumers than this domestic legislation. What this notion fails to recognize is that the 16-cent price objective of the bill is below the midpoint of the free trade range of the ISA. The ISA, it is hoped, will push world sugar prices into a range of between 15 cents and 19 cents per pound. The 16-cent price contained in this bill is below the median price sought by the ISA. How can 16 cents be inflationary, if produced by this bill, but acceptable if brought about by the ISA? Obviously, the administration cannot have it both ways.

Finally, Mr. President, it has been said that the so-called escalator clause in this bill will drive sugar prices out of sight in 5 years' time. The fact is that the price adjustment clause does not begin to operate until October 1979, and only applies to the last 4 years of the program. This provision would adjust the 1979 price only to the extent inflation makes such an adjustment necessary. It is preposterous to expect American sugar farmers to survive if their price is frozen for the next 5 years, while prices for tractors, fertilizer, fuel, and seed keep on going up yearly. We are not telling the bakers, the candymakers, or the soft drink manufacturers to freeze their prices for the next 5 years. This provision in the bill means the grower will follow, not lead, whatever inflation does occur.

Time is short in this session. The House of Representatives has passed a 15-cent bill with very stringent price adjustment provisions, below even USDA's cost of production figures. The Senate should act now to approve this bill so the best compromise obtainable in conference with the House can be sent to the President. I urge the Senate to protect American consumers from the recurrent sugar boom-and-bust cycle and to give our industry, which employs 100,000 of our people a chance to survive.

Mr. INOUYE. Mr. President, I rise in support of the pending measure.

Mr. President, in recent weeks two articles dealing with the pending sugar legislation have appeared in the Washington Post. I find it disappointing that neither of them touch upon some of the more critical issues surrounding the sugar industry in the United States.

We can argue the issue of comparative advantage and free trade all we want, but it does not solve the problem on the more human scale. For example 29,400 people in Hawaii depend on the sugar industry for their jobs. Earnings from sugar and acreage in sugar exceeds by far that of any other agricultural crop in my State. Yet both earnings and acreage have been declining in recent years with the 1977 crop bringing in revenues of $144 million from 225,000 acres compared to $62.5 million in receipts from pineapple grown on 47,000 acres. Unfortunately, we cannot grow pineapple on sugar land. Neither can we look to vegetables, papaya, or other fruit crops as an alternative to sugar.

Alternative forms of employment for these people are very limited. Extensive studies have been conducted into alternative uses of land that is now in sugar. Hawaiian agriculture is hampered by shipping and marketing problems due to our isolated location. in addition to natural problems ranging from bugs and birds to winds and heavy rains, the cost of importing machinery and fertilizer and the high cost of labor. Alternative agricultural production for our own island needs is limited because Hawaii is a pocket market and local farmers cannot economically compete with large-scale mainland growers for other markets. Moreover, it would require less than 3,500 additional acres of land to grow all the vegetables and fruits that are consumed in Hawaii.

We know how hard it is to find alternatives to sugar. For example, after the Kohala Sugar Co. went out of business in 1975, the State of Hawaii organized the Kohala Task Force to find substitute economic activities for the Kohala area. The State invested more than $6 million into new enterprises. The largest of these, a feed grain and feedlot operation, has gone bankrupt. A plastics firm had also failed; a hay-growing enterprise is running into great difficulties. Little has been achieved in providing employment for the Kohala area.

It is a misconception to think that only large corporations grow sugar in Hawaii. They grow the lions share of our

225,000 acres in sugar but 500 small, independent growers are also involved. These growers are extremely hard working and a vital part of Hawaii's agricultural community. Most finance their crops on borrowed capital, expecting to repay their loans from returns when their crop is harvested two or more years after planting. Most will not be able to repay their loans for their 1978 crop and face the prospect of financing another crop without any assurance of being able to repay either loan when their next crop is harvested. They will not be around for another crop year without a Sugar Act which establishes the minmum price of sugar at a level above their average cost of production.

Extremely high expenditures for unemployment compensation, welfare, and food stamps seem to be the only short-term alternatives. Hawaii's welfare costs have risen 91 percent in the last 4 years, and are now running at $128 million a year. If even half of those supported by the sugar industry were forced to go on welfare, the State's cost would increase at least 50 percent, to nearly $200 million. This would represent almost one-fourth of the total State general fund budget. Some of this additional cost would be on the American taxpayer. Would this not be a greater burden than the consumer bears in supporting the price of sugar?

While the price of sugar at the present time is supported at 14.65 cents per pound, an increased price to 15 cents per pound as the administration has promised still would not reflect the average cost of sugar produced in Hawaii. For example, the Agriculture Department's figures do not reflect the high transportation differential of 0.46 cents per pound by which the Department is currently reducing the loan price to the Hawaii industry. Neither does it reflect the fact that the Western States market with its surplus of domestic source sugar is below the support price.

To compound problems, Hawaii's sugarcane growers are paying the highest agricultural labor rates in the world, must meet United States and Hawaii standards for working conditions and benefits, must comply with U.S. environmental requirements, and ship incoming supplies and outgoing sugar in American ships. Hawaii's sugar producers have been able to stay in business because they are efficient. In fact, our sugar producers achieve the highest yields per acre of any place in the world. It is this high level of productivity and extremely efficient farming system that makes the Hawaiian sugar grower among the most cost effective producers in the United States. Is this then an industry that the American Government should encourage to go out of business? I think not.

Hawaii produces about 1 million tons of raw sugar per year, nearly one-fifth of all sugar produced in the United States. The United States consumes about 11 million tons of sugar a year of which, on the average, 50 percent is imported. The demise of Hawaii's sugar industry, or that of the Nation at large, would have a strong negative economic impact. The financial responsibility of Government to soften the negative social and economic impact resulting from the collapse of America's sugar industry would be enormous. The equally important issue of America's continuing balance of trade deficit must also be addressed. We are already the world's largest importer of sugar.

The consumer will bear additional costs, both direct and indirect, monetary and nonmonetary, if the domestic sugar industry folds—as it will without a Government program. The U.S. Government would then have little if any influence over the price of sugar.

There is nothing unique about Government regulation and support of a domestic sugar industry. In fact, Government regulation over production, trade and prices has been the most universal and continuous feature of the economic development of the sugar industry in the past three centuries.

Market inflexibilities, both on the production and demand side, have required Government interference in the sugar industry. Both the sugar beet and cane industries are dependent upon large, capital-intensive processing plants. Thus, the expansion of the world sugar production in response to price increases is severely constrained in the short run by the high costs associated with establishing and maintaining excess or standby cane or beet processing capacity and/or long leadtime required to plan, finance and construct processing facilities. As a result of this high ratio of fixed costs to total costs in sugar production, it is economically rational to continue to produce in the short run when price is below total cost, as long as variable costs are covered. It is this inelasticity in supply and demand that has caused governments to become involved in the market mechanisms of the sugar industry.

The narrowness of the international market—the so-called free world market—in which sugar is traded, has also made it almost mandatory for governments to step in to protect their domestic sugar industries from extreme price cyclicality. Slightly more than 28 percent of world sugar production is traded internationally. However, only 40 percent of this amount is traded on the free market, the rest being traded under preferential agreements. The United States alone imports approximately 50 percent of the sugar traded on the free market. The limited amount of sugar available on the residual free market reduces the effectiveness of market mechanisms in bringing about necessary adjustments of production in response to changes in demand, and subjects the American consumer to extreme fluctuations in the price of sugar. For that reason, the American Government must step in with an adjusting mechanism to protect producer and consumer from excessive competitive market behavior.

One should also recognize that the sugar industry does not operate in a competitive international market system. Most producing countries have government subsidized sugar industries. For example, the sugar industry in the Philippines, facing cost of production higher than world market prices, is supported by the Philippine Government with a domestic price much higher than that achieved on long-term contracts on the world market. This difference provides the additional income needed to maintain a viable sugar industry in the Philippines. Interestingly, the United States is the largest importer of this subsidized sugar from the Philippines.

The world's largest grower of sugar, Brazil, also has a strongly subsidized sugar industry. The Brazilian Government recognizes the need to export large quantities of sugar to the United States at internationally competitive prices in order to obtain dollars desperately needed to continue Brazil's rate of economic development. They, therefore, continue to subsidize their domestic sugar industry. Those who oppose the sugar bill seek to force our sugar producers to compete against subsidized producers in a noncompetitive system. This is completely unrealistic and sets the stage for economic suicide for the American sugar producers.

The sugar industry is not the only agricultural producer that receives "unique treatment" from the American Government. Virtually every agricultural commodity in the United States receives some form of price support, tariff or quota protection. Unlike most other agricultural products, sugar is imported in very large quantities and is, therefore, at the mercy of international prices. This fact alone is a strong argument in support of insulating the domestic sugar industry from the international market. The argument that the sugar industry is requesting special or preferential treatment is completely invalid, however, as many products including beef, dairy products and even peanuts are subject to import quotas.

For example, the Department of Agriculture has proposed to set the support price for milk at 80 percent of parity as of October 1, 1978. As a result of the increase to the $9.87 per hundred weight support price, the Commodity Credit Corporation purchase prices were raised 5.25 cents per pound for butter, 2.75 cents per pound for cheese and 2.75 cents per pound for nonfat dry milk. In the marketing chain, the increase in the support price is equal to about 3.8 cents per gallon of fluid milk. Based on data provided by the Department of Agriculture, it appears that the retail value of dairy products sold commercially in marketing year 1978–79 will be $26.0 billion, $2.1 billion more than consumers spent this marketing year. About half of the projected increase in retail prices for milk and dairy products is due to the increase in support. Yet no one screams "consumer ripoff" on that.

The price of peanuts is supported by the Department of Agriculture through the use of a national poundage quota and a national acreage allotment. By limiting the national acreage allotment to the statutory minimum and thereby limiting production of additional peanuts for export, the Department of Agriculture is helping to stabilize export markets and world prices for American peanut farmers and also the price to the American consumer.

American beef producers are also pro-

tected from the international market through the use of tariffs and quotas. In fact, almost every agricultural commodity grown in the United States is supported through tariffs, quotas and parity prices.

Interestingly, the Department of Agriculture has gone out of its way to calculate the cost to the consumer of a 1-cent increase in the price of sugar but is unable to provide substantial information on the cost the consumer incurs from the Department's support of most other agricultural commodities. The argument against supporting sugar can be used with equal validity on the other crops.

In summary, it should be mentioned that while Hawaii is just a small State with a small population, it carries a responsibility equal to that of the other States of this great Nation. Hawaii's taxpayers support such projects as rescuing New York City from bankruptcy. We support the price of agricultural products not grown in Hawaii. Our people understand that this is part of the responsibility of being a citizen of the United States. Now the people of Hawaii ask support for their sugar industry—an industry that is essential to their livelihood.

If our approach is to be realistic and if a viable domestic sugar industry is in the national interest, which I unquestionably believe it is, then a Sugar Act must be adopted which will assure the producers and processors of domestic sugar a reasonable price for their product in the future. It is no less deserving than other farm products of such protection, and I assure you the need is no less acute.

Mr. CURTIS. Mr. President, I support passage of H.R. 7200 with the substance of H.R. 7108, as amended by the Committee on Finance.

This piece of legislation will be the first comprehensive response Congress has made to the plight of our sugar industry since the lapse of the Sugar Act of 1974. H.R. 7108 incorporates a two-pronged approach to the problems confronting our sugar industry and, indirectly, the world's sugar producers. First, it implements the International Sugar Agreement; second, it establishes a national sugar program. By passing this bill, we will be providing implementing legislation for the International Sugar Agreement which our negotiators concluded late last year. That agreement attempts to ease the massive fluctuations in sugar prices and supplies that have such a shattering impact on many less-developed economies in the world. H.R. 7108, as amended, also implements a national sugar program for our country that complements the ISA, by establishing a mechanism to assure that our national sugar prices are not so low that producers cannot even cover their costs of production. Under the ISA, export quotas and buffer stocks will be used to maintain the world market price of sugar between 15 and 19 cents per pound. H.R. 7108, in light of U.S. costs of production, will begin to work inside this price range by establishing a U.S. price objective of 16 cents per pound. In order to reach this objective, fees and backup quotas will be used. Moreover, to avoid a static price that would become unrealistic in a short amount of time, the bill provides for adjustment of the price objective based on an index of prices paid by farmers.

Mr. President, the logic of the need for this legislation is simple and persuasive. This country is one of the largest consumers of sugar in the world. It is obviously a product that our consumers want and forms a substantial part of our diet; it is a vital commodity in our economy. We supply about one-half of our demand for sugar from our own fields, the balance coming from other countries. If our growers cannot make a living producing sugar, they will stop, and our processors will have to obtain increasing amounts of their raw sugar from world supplies. The ramifications of such a development are obvious. The scenario is quite possible if we do not act to promote a national price objective that is both fair to consumers yet provides a reasonable return for producers. Over the last 3 years, and often despite feeble Government price support programs, the market price for sugar has been well below the cost of producing it. If we do not act now, that price—due to low-cost imports—will continue to remain too low to justify planting sugar beets or harvesting sugarcane. We are informed by the U.S. Department of Agriculture that the average cost of production is about 15.2 cents per pound. If we were to set that as our price objective, then the average sugar producer would cover his costs, nothing more. No one operates on that type of marginal basis for long. The thrust of this legislation is to keep our sugar industry viable, not near death. Therefore, in establishing our price objective, we must allow some leeway. The initial price objective of 16 cents takes this into account yet will have only a minimal impact on the consumer. Congressional Budget Office estimates have indicated that the effect of such a price objective on the Consumer Price Index will be well below an average of less than one-tenth of 1 percent over the life of this bill. The bill also provides for a realistic adjustment of the price objective based on an index which considers the prices paid by farmers for commodities and services necessary for the operation of their farms.

Mr. President, I have studied and wrestled with the problems of the sugar industry during my 40 years as a Congressman and Senator. I believe H.R. 7108, as amended by the Committee on Finance, is a realistic and workable approach to a problem that involves both producers and consumers. I urge my colleagues to join me in support of the bill.

Several Senators addressed the Chair.

UP AMENDMENT NO. 2090

(Purpose: Insert a new title II)

Mr. METZENBAUM. Mr. President, I call up an amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 2090.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all of pages 9 through 18 and insert a new title II, as follows:

TITLE II—IMPORT RESTRICTIONS ON SUGAR

SEC. 201. DEFINITIONS.

For purposes of this title—

(1) The phrase "average daily price for United States raw sugar imports" means the average of the daily market prices for sugar in pounds, raw value, in bulk, landed and delivered at Atlantic and Gulf ports, including the cost of insurance, freight, loading, unloading, and import duties.

(2) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and the term "entry" means the entry, or withdrawal from warehouse, for such consumption.

(3) The term "price objective" means the price set forth in section 202(a).

(4) The term "quota" means the total quantity of any sugar or sugar-containing product produced in all foreign countries, territories, or areas that may be entered, without regard to source, in any sugar supply year or supply year quarter.

(5) The term "raw value" has the same meaning as is given to such term in headnote 1 to subpart A of part 10 of schedule 1 of the TSUS.

(6) The term "sugar" means any sugar, sirup, and molasses provided for in items 155.20 and 155.30 of the TSUS.

(7) The term "sugar supply year" means the 12-month period beginning on October 1 of each calendar year with each such year being designated by the year in which the beginning date occurs.

(8) The term "supply year quarter" means any of the 3-month periods beginning on October 1, January 1, April 1, or July 1 of any sugar supply year.

SEC. 202. PRICE OBJECTIVE AND AVERAGE DAILY PRICES

(a) PRICE OBJECTIVE.—(1) The price objective for each sugar supply year beginning after September 30, 1978, is 15 cents per pound, raw value.

(b) AVERAGE DAILY PRICES.—(1) The Secretary shall determine on a continuing basis the average daily price for United States raw sugar imports and shall monitor the prices of sugar and sugar-containing products in the import trade of the United States.

(2) The Secretary shall publish the determinations made under paragraph (1) in the Federal Register on such periodic basis as he deems appropriate.

SEC. 203. SECRETARIAL RECOMMENDATIONS REGARDING SPECIAL IMPORT DUTIES AND BACK-UP QUOTAS.

(a) SPECIAL IMPORT DUTIES.—(1) Not later than 30 days before the beginning of each sugar supply year which commences after September 30, 1979, the Secretary shall—

(A) on the basis of best available information, estimate whether the average daily price for United States raw sugar imports during such sugar supply year will be below the price objective; and

(B) If the estimation under subparagraph (A) is in the affirmative, recommend to the President that he impose such special import duties on the entry of such sugar (including, but not limited to, refined sugar) and, if appropriate, such sugar-containing products as the Secretary determines to be necessary to assure that the average daily price for United States raw sugar imports will result

in the price objective for such sugar supply year being achieved.

(2) With respect to the 1978 sugar supply year, the Secretary shall make the estimation described in paragraph (1)(A) and, if applicable, the recommendations described in paragraph (1)(B) not later than 30 days after the date of the enactment of this Act.

(b) BACK-UP QUOTAS.—Whenever the Secretary has reason to believe that the special import duties imposed on the entry of any sugar or sugar-containing product on the basis of any recommendation made by him under subsection (a), and adjusted pursuant to subsection (c), are not resulting in the price objective for the sugar supply year being achieved, the Secretary shall recommend to the President, as a further adjustment under subsection (c), that he impose, in addition to such special import duties, such quotas, on a supply year quarter basis, on the articles concerned as the Secretary determines to be necessary to achieve such price objective. Any such quota in effect during the last supply year quarter of any sugar supply year may be recommended by the Secretary, at the time his recommendations for the next sugar supply year are made under subsection (a), for continuation during the first supply year quarter of such next year.

(c) REVIEW AND ADJUSTMENTS OF DUTIES AND QUOTAS.—The Secretary shall review, on a supply year quarter basis, the effect of all special import duties and quotas imposed as a result of recommendations made by him under subsections (a) and (b). On the basis of such review, the Secretary may recommend to the President such adjustments with respect to the amount of any such duty or quota, or with respect to sugar or sugar-containing products to which any such duty or quota should be extended or removed, as the Secretary determines to be necessary to achieve the price objective for the sugar supply year concerned. The Secretary shall submit a report to the President containing the results of each review conducted under this subsection, together with any adjustment recommendation the Secretary deems appropriate, not later than the 60th day after the beginning of the supply year quarter for which the review is made.

(d) PUBLICATION OF RECOMMENDATIONS AND REPORTS.—Each recommendation made by the Secretary to the President under subsection (a) or (b), and each report prepared under subsection (c), shall be promptly published by the Secretary in the Federal Register.

SEC. 204. IMPOSITION BY PRESIDENT OF SPECIAL IMPORT DUTIES AND BACK-UP QUOTAS.

(a) IN GENERAL.—Upon receiving any recommendation of the Secretary under section 203 (a), (b), or (c), the President shall promptly proclaim, under the authority of the headnotes to subpart A of part 10 of schedule 1 of the TSUS and subject to subsections (b) and (c), such special import duties or quotas, as the case may be, with respect to such sugar and sugar-containing products as the President deems necessary to achieve the price objective for the sugar supply year concerned.

(b) SPECIAL PROVISIONS RELATING TO PROCLAMATIONS.—(1) Any proclamation issued by the President on the basis of any recommendation made by the Secretary under section 203(a) regarding sugar with respect to the 1978 sugar supply year shall apply with respect to articles entered on or after the date of such proclamation.

(2) Except as provided in subsection (c)(3)—

(A) any special import duty imposed by the President on the basis of any recommendation made by the Secretary under section 203(a) with respect to any sugar supply year after September 30, 1979, shall be proclaimed by the President not less than 30 days before the beginning of the sugar supply year in which such special import duties apply; and

(B) any quota imposed by the President on the basis of any recommendation made by the Secretary under section 203(b), and any adjustment made by the President to any special import duty or quota on the basis of any recommendation made by the Secretary under section 203(c), shall be proclaimed by the President not less than 30 days before the beginning of the supply year quarter in which such quota or adjustment, as the case may be, first takes effect.

(c) SPECIAL RULES FOR SUGAR-CONTAINING PRODUCTS.—(1) If any recommendation is made by the Secretary under section 203 (a) or (c) with respect to the initial imposition of any special import duty on any sugar-containing product and the President has reason to believe that such product will adversely affect, or is adversely affecting, the achievement of the price objective during the sugar supply year concerned, the President may not impose any special import duty on the sugar content of such product before—

(A) requesting the United States International Trade Commission to undertake an investigation to determine whether, and to what extent, the entry of such product is adversely affecting the achievement of the price objective; and

(B) taking into consideration the results of such investigation.

The United States International Trade Commission shall submit to the President a report on any investigation requested by him under this subsection within 60 days after the date of such request.

(2) After the initial imposition of any special import duty on any sugar-containing product, no further investigation under paragraph (1) is required with respect to the adjustment of that duty pursuant to section 203(c), the imposition of a quota on the product concerned pursuant to section 203(b), or the adjustment of that quota pursuant to section 203(c).

(3) To the extent that the investigation requirements under paragraph (1) result in the President being unable to meet the applicable requirements under subsection (b)(2) regarding the proclamation of special import duties with respect to sugar-containing products for any sugar supply year or supply year quarter, as the case may be; the President may proclaim such duty within the applicable 30-day period referred to in subsection (b)(2) or on or after the beginning of the sugar supply year or supply year quarter concerned. Any such proclamation shall apply with respect to articles entered on or after the date of such proclamation.

(d) QUOTA AUCTION AUTHORITY.—If the President imposes any quota on any sugar or sugar-containing product as a result of any recommendation made by the Secretary under section 203 (b) or (c), the President may allocate articles entered under such quota by auction of the right of entry under such regulations as he shall prescribe. Any revenue received pursuant to any such auction shall be covered into the Treasury of the United States as miscellaneous receipts.

SEC. 205. PROHIBITED ACTS.

(a) CERTAIN IMPORTS AND EXPORTS.—No person may—

(1) bring or import into the Virgin Islands in any sugar supply year, for consumption of such Islands, any sugar in excess of one hundred pounds if such sugar was produced from sugarcane or sugar beets grown outside the United States; or

(2) export to any foreign country any sugar entered under any quota proclaimed under headnote 2 to subpart A of part 10 of schedule 1 of the TSUS.

(b) CIVIL PENALTY.—Any person who knowingly violates, knowingly attempts to violate, or knowingly participates or aids in the violation of subsection (a) shall forfeit to the United States the sum equal to three times the market value at the time of the commission of any such act, of that quantity of sugar involved in the violation, which forfeiture shall be recoverable in a civil suit brought in the name of the United States.

SEC. 206. EXEMPT ARTICLES OF SUGAR.

This title does not apply with respect to any sugar or sugar-containing product—

(1) of any aggregate value not exceeding $25 in any one shipment, if entered as samples for the taking of orders, for the personal use of the importer, or for research; or

(2) entered for the production of alcohol, including any polyhydric alcohol, other than any alcohol or resulting byproduct for human food consumption.

SEC. 207. CERTAIN EXPORTATIONS OF SUGAR.

Any sugar entered under an applicable bond, established pursuant to orders or regulations issued by the Secretary, for the express purpose of the subsequent exportation of an equivalent quantity of sugar as such, or in manufactured articles, shall not be charged against any quota proclaimed under headnote 2 to subpart A of part 10 of schedule 1 of the TSUS. Any exportation within the meaning of sections 309 and 313 of the Tariff Act of 1930 shall be treated as an exportation for the purposes of this section.

SEC. 208. SUSPENSION OF TITLE.

If the President finds that a national economic or other emergency exists with respect to sugar, the President may by proclamation suspend the operation of this title, and headnote 2(b) to subpart A of part 10 of schedule 1 of the TSUS to the extent that it applies with respect to this title, unil such time as the President finds and proclaims that such emergency no longer exists. The Secretary shall make such investigations, and prepare such reports as the President may require for purposes of carrying out this section.

SEC. 209. REGULATIONS.

The Secretary shall issue such rules and regulations as he determines to be necessary or appropriate to carry out his functions and duties under sections 201 through 208.

SEC. 210. AMENDMENTS TO TSUS.

The headnotes to subpart A of part 10 of schedule 1 of the TSUS are amended—

(1) by amending headnote 1 to read as follows:

"1. For the purposes of this subpart—

"(i) the term 'degree', as used in the 'Rates of Duty' columns of this subpart, means sugar degree as determined by polariscopic test;

"(ii) the term 'total sugars' means the sum of the sucrose and reducing or invert sugars contained in any grade or type of sugars, sirups, and molasses; and

"(iii) the term 'raw value' means the equivalent of such articles in terms of ordinary commercial raw sugar testing 95 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury. The principal grades and types of sugar shall be translated into terms of raw value in the following manner:

"(A) For sugar described in item 155.20, by multiplying the number of pounds thereof by the greater of 0.93, or 1.07 less 0.0175 for each degree of polarization under 100 degrees (and fractions of a degree in proportion).

"(B) For sugar described in item 155.30, by multiplying the number of pounds of the total sugars thereof by 1.07.

"(C) The Secretary of the Treasury shall establish methods for translating sugar into terms of raw value for any special grade or type of sugar for which he determines that the raw value cannot be measured adequately under the above provisions.";

(2) by amending headnote 2 by inserting

"(a)" immediately after "2.", and by adding at the end thereof the following:

"(b) In addition to the authority of the President under section 201 of the Trade Expansion Act of 1962 (19 U.S.C. 1821) to proclaim modifications of the rates of duty and quotas on imports of sugars, sirups, and molasses provided for in items 155.20 and 155.30, the President shall, subject to the conditions and requirements of (a)(i) and for purposes of carrying out, and subject to, title II of the International Sugar Stabilization Act of 1978, proclaim—

"(i) special import duties (not to exceed 15 cents per pound, raw value) on—

"(A) imports of any such sugars, sirups, and molasses, or

"(B) the content of any such sugars, sirups, and molasses in imported products containing such sugars, sirups, and molasses; and

"(ii) quotas on the sugar, sirup, and molasses content of imported products described in (i)(B). Any special import duty proclaimed under this subdivision on the entry of any article shall be in addition to any other duty imposed by law on such entry and may not be made the subject of any preferential concession under any law or international obligation of the United States."; and

(3) by amending headnote 3 by striking out "For purposes of this headnote," and all that follows thereafter.

Mr. METZENBAUM. Mr. President, we have heard discussion concerning this bill about the poor sugar beet and sugar cane growers in this country who need more money to stay in business. Everyone seems interested in those special interests. But who is looking out for the consumers of this country? They are the ones who will pay the astronomical cost that this bill legislates. The consumer is the one who will see the price of baked goods, sweets, soft drinks, and numerous other products that contain sugar rise because of this legislation.

The cost of this bill is simply too high. According to the Department of Agriculture, consumers will be forced to pay $5.2 billion for all sweeteners over the next 5 years because of this legislation. This bill would by itself raise the food Consumer Price Index by almost one full point, according to a study by the Congressional Budget Office. The finance bill will raise consumer food costs by $33 per family by 1983—just because the price of sugar has been artificially increased in this legislation.

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate is in order.

Mr. METZENBAUM. The amendment I have introduced is designed to correct that imbalance.

The motion I am offering would substitute title II of the bill originally reported by the House Ways and Means Committee to replace the pricing section of the bill reported by the Finance Committee. This amendment does not touch any other section of the Finance Committee bill, such as the labor provisions or the ratification of the international sugar agreement.

This amendment has a very direct purpose: To provide the sugar growers of this country with adequate protection against years of tremendous loss, while at the same time protecting the interests of the American consumer. It has a total cost of only $500 million over 5 years, compared to $5.2 billion under the Finance bill. Let me point out, Mr. President, that the American consumer is already paying almost twice the world market price of sugar, which is about 7 cents a pound, because of the import duties that the U.S. Government has put on imported sugar. How much more are we going to ask consumers to pay to protect the sugar growers?

There is a major difference between the Senate Finance bill and the House Ways and Means bill, which I am introducing as a substitute for title II. The Senate Finance bill will raise the price of all sugar sold in this country, both foreign and domestic. That means consumers are expected to pay 17 cents a pound for sugar that is selling in other countries for only 7 cents a pound.

This bill would raise the price of imported sugar to new, higher arbitrary levels through more important duties and quotas. By contrast, the Ways and Means bill would hold the price at 15 cents—with no inflationary escalator clause—and then would provide the necessary help to sugar growers through the direct payment program that is authorized under existing law. That system is a much more efficient way to protect the sugar growers from rising costs. It ties the price of sugar supports to the costs of production. It says that the Federal Government will pay farmers the difference between the price objective of 15 cents a pound and the cost of production set by the Department of Agriculture, which was 15.3 cents in May 1978, and which will be increased in the future.

But still the sugar interests want more, and they expect the consumers to pick up the difference.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. METZENBAUM. At the conclusion of my remarks.

Mr. President, who are these poor sugar growers? In many cases they are giant conglomerates, not the small sugar farmer. Ninety percent of the domestic sugar cane is grown by the 30 largest producers. These 30 corporations alone would benefit by $2.5 billion under the Senate Finance bill. In fact, this bill would directly benefit only 16,000 farmers in the United States who grow sugar cane and sugar beets, as well as those corn farmers who take about 5 percent of the total corn production in this country and process it for the corn-based fructose sweetener substitutes. No matter which numbers you use, this bill would aid a very small number of people. Yet it would cost consumers $5.2 billion. It is a selective group. But it is even more selective when you look at the producer-refiners that dominate the industry.

Are these the small farmers that we are talking about? Are these the beet growers from the States that some of the Senators represent? Such giants as the U.S. Sugar Corp., which produces a full one-third of all the sugar in Florida; the Great Western Sugar Corp., owned by the H. L. Hunt heirs; and the huge Hawaiian and Floridian grower-processors, such as the Dole Corp. I am told that 14 firms own all of the sugar fields in Hawaii. This heavy concentration in the sugar business is evidenced by the direct payments that the Department of Agriculture has made this year under the existing price support programs. So far this year, the Department has made payments to only 63 firms, but the average payment has been over $1 million. Some processors received more than $20 million.

Mr. DOLE. Mr. President, will the Senator yield at that point?

Mr. METZENBAUM. As the conclusion of my remarks.

Mr. DOLE. I just wanted to agree with the Senator, because I have an amendment to eliminate direct payments.

Mr. METZENBAUM. I appreciate the Senator's comment.

Mr. President, this is a bill that creates tremendous damage to consumer interests. Even such bastions of conservative opinion as the Wall Street Journal and the Journal of Commerce have recently written editorials objecting to the high price level that this Finance Committee bill will provide to the sugar industry. Let me quote from the Journal of Commerce editorial of October 4:

> When one considers how much of American agriculture is not only able to hold its own in the domestic market, but sell vast quantities of products against competition in foreign markets, one wonders why sugar producers need so much aid and comfort from the Government. . . . What makes them such a special case at home?

That was from the Journal of Commerce from last week. And what does the Wall Street Journal have to say? In its editorial of October 6, the Journal stated:

> A drive in Congress this week to sharply increase sugar price supports reminds us of that age-old complaint from the agriculture lobby about the "middlemen." We think we may have figured out who the "middlemen" are.

The editorial asks whether the real middlemen are the grocery chains, or the truckdrivers, or the processors, and concludes that it really is none of those in the sugar business. As the editorial states:

> If you want to complain about the middlemen, the place to find them is in the United States Congress.

Mr. JOHNSTON. Mr. President, will the Senator yield for a brief question?

Mr. METZENBAUM. At the conclusion of my remarks.

Just this morning there was another editorial about rising food costs in the Washington Post. It points out that food prices rose at the unacceptably high rate of 24 percent annually from January through August. And most of this increase was due directly to the higher prices to the producers.

Mr. President, the fact is that the Members of Congress can do something to help keep the food costs down for consumers, but time and time again we are willing to give in to the special interests who always have their hands out for more.

It is no wonder the consumers in this country are cynical about our Govern-

ment. They will be so pleased to know that at 20 minutes to 12, we passed a bill that will cost them over $5 billion in the next 5 years. They will know we are looking out for their interests. They hear political leaders talk about cutting the rate of inflation on the campaign trail, but when they vote here in Congress, day in and day out, those same leaders are voting day in and day out to raise prices and fuel the flames of inflation.

As I said before, this sugar bill alone will increase the food Consumer Price Index by a full point, according to the Congressional Budget Office. It will add $33 a year to the average family's food bill by 1983.

Mr. President, we often act around the Congress as if one piece of legislation has no relationship to any other. But we all know that is not true. There is one common denominator—all of these pieces of legislation have a direct, immediate—and usually negative—impact on the pocketbooks of consumers.

The PRESIDING OFFICER. The Senator will suspend.

The Senate will be in order. Senators will please take their seats. The Senator is entitled to be heard.

The Senator from Ohio.

Mr. METZENBAUM. I thank the Chair.

That is the context in which we should share this sugar legislation. It is not just another effort to help the poor domestic sugar industry.

Every time we hear about a bill of this kind we have tears in our eyes about the poor industry. But the fact is it is the giants of the industry who will really gain the most from this, and it is the consumers who will pay throughout the entire country.

It is really another raid on the pocketbooks of the American public. The bill passed by the Senate Finance Committee would immediately set the price of American sugar at 16 cents per pound, compared to the present artificial price of 14.6 cents per pound. Then, thanks to the escalator clause, the price of sugar would continue to rise as the Wholesale Price Index increases. As that escalator goes into effect, the price of sugar would increase to an estimated price of 20 cents by 1983—regardless of what the actual costs of sugar production are.

What does it cost to produce a pound of sugar in the United States, and how much is it worth to the consumer?

I know that my friends here in the Senate will tell me about how it costs 17 cents, 18 cents, whatever the numbers may be in order to produce a pound of sugar. That is really the heart of the matter here.

Mr. KENNEDY. Mr. President, can we have order in the Senate?

The PRESIDING OFFICER. The Senator from Massachusetts is correct. The Senate will be in order. Noise will cease. Senators wishing to converse will please retire to the cloakrooms.

The Senate is not in order. The Senator from Ohio will not continue until the Senate is in order. If Senators wish to carry on their conversations, please leave the floor.

The Senator from Ohio.

Mr. METZENBAUM. If you listen to the sugar interests, they argue that no price is high enough. If we gave them 17 cents they would say that was not enough. If we gave them 18 cents they would say that was not enough. They argue that even the 17 cent price set by the finance bill would not be high enough. But other groups that do not have such a direct stake in higher prices come up with much lower figures. In May 1978, the Department of Agriculture set the cost of production at 15.3 cents a pound, and even that is a liberal price objective. That price assumes that every acre used for sugar production was purchased during the past 3 years at present high interest rates, but we know that is not true. That is also an average price—at least half of the growers are able to produce sugar for less than those costs. In fact, the price set by USDA in 1977 was only 13.5 cents. According to a recent study of the sugar production costs done by the University of Florida, even that price objective would have more than covered actual costs. That study estimates that the cost of production is closer to 11.5 cents per pound.

I do not know what the actual figures are, but it is only the growers who come in and tell us how much it costs, whereas all of the objective studies come in with far lower figures. That University of Florida analysis, which is actually based on figures presented by Mr. George Wedgworth, president of the Sugar Cane Growers Cooperative before the House Agriculture Committee, concludes that the cost of 16.12 cents proposed by the sugar cane cooperative would actually guarantee that a grower has a return on his working capital, a return on his equipment at market value, and a return on his land value the equivalent of either the current market value of the land or the typical cash rent for the land.

There is not any reason in the free enterprise system why we should be providing that kind of guarantee with a governmental support.

Mr. President, this finance bill flies in the face of our past agricultural policies. It is not the responsibility of the Federal Government to guarantee that any farmer that wants to plant sugarcane or sugar beets will get a profit. Congress has consistently adopted the policy that favors a rational, market-oriented approach for farmers. This does not guarantee that sugar producers will make a profit, but it does prevent them from taking substantial losses, as do existing farm programs for other major commodities. But this bill passed by the Senate Finance Committee goes far beyond that approach. By setting a price objective of 16 cents a pound and moving it up to 20 cents a pound, it is rewarding the less efficient sugar producers in the country. Instead of directing payments to those producers that have production costs that exceed 15.3 cents as proposed by the Ways and Means Committee in the House, the finance bill raises the price of all sweeteners so that everybody in the business is guaranteed a profit—never mind that it will cost consumers in this country an astronomical $5.2 billion.

Mr. President, the amendment I have offered as a substitute to title II of the Senate finance bill is a reasonable substitute. It provides adequate protection to the sugarcane and sugar beet growers. It is consistent with our past policies of protecting our farmers against loss, without guaranteeing a profit. And more importantly, it does all of this without creating a huge and unnecessary drain on the consumer. Mr. President, it is time that we start looking out for the consumer, instead of always helping out the special interests. The consumer needs protection, and it should begin here in the Congress. I urge my colleagues to join me in supporting this substitute motion.

We talk about that consumer day in and day out on the campaign trails, and when we leave these halls Saturday night, we will be going back to our home States and tell them what we have done for the consumer. We will tell them how we stood up and protected the consumer. We will forget to tell them about the sugar bill that will cost them over $5 billion in the next 5 years.

Let us put into action tonight the speeches we put out on the campaign trail. Let us actually do something for the consumers of this country rather than just make speeches about it.

Let us adopt the amendment I have offered which conforms with the House Ways and Means Committee amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MELCHER. Will the Senator yield?

Mr. METZENBAUM. Yes.

Mr. MELCHER. The Senator mentioned large operators. He is surely aware that the sugar beet producers in this country are indeed small operators on irrigated lands in several States, including Nebraska, the Dakotas, Minnesota, Colorado, Idaho, my State of Montana, the State of Washington, and others. The Senator is certainly aware of that.

Mr. METZENBAUM. I am aware of the fact that there are 16,000 sugar farmers who will be benefited by this bill. But approximately half of the total dollars in this bill will go to the big corporations, and they are not in any need of financial assistance.

Mr. MELCHER. Is the Senator aware that the editorial he cited this morning in the Washington Post, which dealt with a projected figure for farm income this year, is merely a projected figure, enunciated by the Department of Agriculture this early in a campaign year and may have to be adjusted when the year is completed and the figures can actually be computed?

Mr. METZENBAUM. All I can say is that a figure that is used in October of 1978 is more than a projection. I believe that it has some basis in reality, and I would guess that the Washington Post figure is pretty darn close to what the actual facts are.

Mr. MELCHER. Is the Senator aware

that a recent Federal Trade Commission study which has been published illustrates that the farm income received for food in the United States during 1974 through 1977, inclusive, showed that farmers increased their income from $56 billion to $57 billion, $1 billion during that 4 year period, but at the same time that the difference between what the farmer was paid and what the consumer paid for food products, was a $33 billion increase during those years, 1974 to 1977?

Mr. METZENBAUM. My good friend from Montana has made a very strong argument on why to vote against this bill. If all farmers in the whole country, in all areas, only had a billion dollar increase in 1 year, a billion dollar increase, this one piece of legislation will provide a billion dollar——

Mr. MELCHER. Four years.

Mr. METZENBAUM. What 4 years?

Mr. MELCHER. 1974 to 1977.

Mr. METZENBAUM. OK, that makes my argument even stronger.

Mr. MELCHER. While, the prices farmers and ranchers received for their products increased $1 billion during 4 years, at the same time, the processors had an increase of $33 billion that the consumers had to pay for food. Does that not demonstrate that the farmers and ranchers victimized themselves by inflated production? Costs are not the reason for higher food costs but that the processors added $33 billion take is the reason.

Mr. METZENBAUM. I hold no brief for the processors. There is nothing in this bill that I offer that does anything for the processors in contradistinction to the consumers.

Mr. MELCHER. Does that not illustrate to my friend from Ohio where the real impact on consumers is? It is after it leaves the farm or ranch that the processing costs result in a $33 billion increase consumers paid from 1974 to 1977 for food due from the added costs generated by food processors. That is an exact ratio of 33 to 1 and the producers have the 1. Consumers need to know that.

Mr. METZENBAUM. I shall be very happy to sit down with the senior Senator from Montana at a very early point in January of next year and see if we cannot, together, develop some antitrust legislation in order to move in on some of these large food corporations that are taking so much advantage of the farmer. If the Senator will join with me, I shall meet with him on January 3.

Mr. MELCHER. I thank the Senator.

Mr. LONG. Mr. President, I am sure the Senator has given us the best information he has. Let me submit just a few brief facts to show the other side of it.

Here is the study of the Congressional Budget Office. Their study indicates that—I shall put it in the RECORD—the estimated consumer cost of the sugar industry in this bill, which is necessary if there is going to be any industry, is not 1 percent of the cost of living, but is only 0.03 percent, or three one-hundredths of 1 percent of the cost of living for the first year.

By 1980, it will be 0.06, or six one-hundredths of 1 percent.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE ESTIMATE OF PROJECTED IMPACT ON CONSUMERS

	Fiscal years—				
	1979	1980	1981	1982	1983
CPI, total (percent)	0.03	0.06	0.08	0.11	0.13
Food budget	$6.12	$14.43	$19.92	$25.22	$30.80

Mr. LONG. Mr. President, this involves the jobs of over 100,000 workers; for example, in the State that I have the honor to represent, 15,000 farmworkers. Now, at the price the Senator would suggest—that is, Mr. METZENBAUM's amendment would give us a price of 53 percent of parity—I know that Louisiana would lose 15,000 jobs. Those are not high-income jobs, but they at least give these people the dignity of working for a minimum wage, which they certainly would not have otherwise. They keep them off the welfare rolls and give them an opportunity to improve themselves. Mr. President, 80 percent of those jobs would be gone if the Senator had his way.

Furthermore, Mr. President, I know the farmers in my State. Out of 1,100 farms in Louisiana, there are 45 that are between 1,000 and 5,000 acres. Forty-five of them. We have one that is between 5,000 and 10,000, and 2 which are over 10,000 acres. That is out of 1,100 farms. One can see that over 95 percent of the farms are farms beneath 1,000 acres. Most of them are small farms, less than 200 acres.

Mr. President, I move that the amendment be laid on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

● Mr. McINTYRE. Mr. President, I rise in opposition to H.R. 7108. The domestic sugar policy enunciated in this bill is an inflationary monstrosity. Coming as it does at a time when the average family is already far too aware of the cruel in-roads that food price inflation is inflicting—there simply is no excuse for adding what has been estimated as a $5–$6 billion cost to the Nation's consumers. To subject consumers to this sort of extortionate demand to help less than 1 percent of the Nation's farmers, together with a small group of corporations, is simply unconscionable.

There are also regional aspects of this legislation which would have a profound impact on the New England and North Atlantic States. Virtually all the sugar consumed in the Northeast is imported as raw cane sugar. It is then refined in Boston, Brooklyn, Philadelphia, and Baltimore. If this bill becomes law, it would impose restrictive quotas so as to create an artificial shortage to drive the price up to the desired level. This would mean that imports of raw sugar to the Northeast would be cut back drastically. There is not available, from domestic sources, sufficient raw cane sugar to meet the needs of our area. As a result, our people would become reliant upon refined beet sugar which is mostly produced in the Midwest and the Far West. Transportation costs for refined sugar are far greater than for raw cane sugar. Raw sugar is simply put in the hold of a boat; refined sugar must be shipped in bags and carries a much higher freight rate and of course many additional holding charges as well.

In addition to the impact upon the consumer generally, the Northeast would be uniquely discriminated against by this measure. This is an old game and one that New England is getting sick and tired of. It has been done to us on heating oil for many years, driving up the cost of our imports to enlarge the income of Southwestern producers. Now the supporters of H.R. 7108 are proposing to place a new burden upon the people of my region to help their constituents.

Mr. President, the people of New England have had quite enough of this. We are extremely resentful of being discriminated against—forced to assume indefensible economic burdens simply for the profit and well being of other regions of the country. It is not fair, it is not equitable, and it is most assuredly not a proper legislative goal.

On top of everything else, another result of this bill would be to cause substantial unemployment in the New England and Middle Atlantic States. Denied raw cane sugar, refineries would have to either drastically decrease volume or perhaps even close. Dockworkers would lose substantial employment since there would be no ships to unload. Additionally, a host of manufacturing firms—especially small businesses which produce ice cream, baked goods and a host of other products—would be forced to pay economic tribute to the sugar farmers of the South, Midwest, and Far West.

Mr. President, it is my hope that my distinguished colleagues will, in their wisdom, see fit to treat the New England and Middle Atlantic States fairly and not to discriminate against us. The administration's proposal of 15 cents per pound, combined with direct subsidy payments should the cost of production increase, more than meets the needs of sugar producers. Just as importantly, it does it in a way that is fair to all regions of the country.●

Mr. MUSKIE. Mr. President, I rise in opposition to the Sugar Stabilization Act of 1978 as proposed by the Finance Committee.

Although this bill does not violate the spending ceiling or revenue floor of the second budget resolution, it has a significant inflationary impact which cannot be ignored. Based on preliminary CBO estimates, in fiscal 1979 this bill will reduce outlays by about $0.2 billion, and reduce revenues by a slightly smaller amount. This means the bill will reduce the deficit by less than $50 million. But this reduction in the deficit comes at a great cost to the American consumer.

We have before us another case of the Senate legislating inflation. This bill will increase prices for sugar by over 40 percent in the next 5 years and will cost consumers over $3.5 billion in increased expenditures for sweeteners.

I have great sympathy for the plight of this Nation's farmers. Many of my constituents in Maine are hard working farmers who have struggled through lean years. However, they have not asked the Congress for a guaranteed profit that keeps all but the most inefficient farmers in business.

The U.S. Department of Agriculture estimates that the average costs of producing sugar are at least 5 percent less than the support price in this bill. Our farm programs were never designed to treat agriculture as a regulated industry where the Federal Government insured each producer a profit.

I am not opposed to the principle of farm income stabilization. It has long been a goal supported by Congress and the American people. However, I do strongly object to an attempt to unduly enhance the incomes of 14,000 growers and processors at an enormous cost to the consumers of this country.

This bill is estimated to add nearly a full point to the Consumer Price Index for food over the next 5 years. This disturbs me greatly. Food price inflation significantly affects the inflation psychology of the American consumer. Food items are purchased with greater frequency than almost any other items and this leads to an increased awareness of inflation and potentially inflationary responses.

During the debate on the recent tax bill much concern was expressed for those Americans with low incomes. The burden of this bill will fall most heavily on low income consumers who spend a larger portion of their disposable income on food and whose diets consist of more sugar and items containing sugar.

The distribution of benefits from this program only adds to the inequity. A small number of sugar processing firms receive substantial benefits from this program. Furthermore, the increased returns from this legislation will go primarily to the largest sugar growers. This is especially true among sugarcane growers where 1 percent of the growers will obtain over 50 percent of the benefits from the higher prices received for sugarcane.

As an alternative I would like to state my strong support for the amendment offered by Senator METZENBAUM. This amendment would revise the proposed sugar program to dramatically reduce its direct inflationary cost. In accepting the amendment the impact on consumer expenditures and food price inflation would be only one-tenth of that in the Finance Committee bill.

The Metzenbaum amendment would treat sugar producers no differently from wheat, feed grain, or cotton farmers. Profits would not be guaranteed but substantial losses to sugar producers would be prevented. This is consistent with the goals of American agricultural policies dating back to the 1930's.

Finally, acceptance of this amendment would reduce the risk of a Presidential veto, which would otherwise prevent the continuation of some form of income protection for domestic sugar producers.

The Senate is about to adjourn shortly. The defeat of this bill will provide one last opportunity to show the American people that the Congress will take the lead in fighting the battle on inflation.

Mr. President, in closing let me note that this bill as proposed by the Finance Committee is subject to a section 303 point of order under the Budget Act consistent with the Chair's ruling last week. In view of the Senate's vote on the appeal of that ruling, I now merely note this violation, and reserve my right to reopen the issue at an appropriate time.

A REASONABLE SUGAR POLICY

Mr. McGOVERN. Mr. President, I support the sugar legislation originally introduced by my distinguished colleague from Idaho (Mr. CHURCH) designed to establish a domestic market price for sugar at $0.17 per pound and to protect the domestic market through periodic adjustments in duties and fees on imported sugar. It also provides authority for the President to use import quotas if the domestic price is inadequately protected through fees.

In my opinion, an initial domestic market price objective of $.17 is justified. Provisions for escalation are also warranted if sugar growers in this country are to remain in business. Various studies on cost of production for sugar, depending on geographic sections of the country as well as whether the producer is a cane or beet farmer, range from $.15 per pound to slightly in excess of $.17 per pound. The figure contained in this bill is thus certainly not unwarranted.

Mr. President, there is substantial opposition to this legislation on behalf of some consumer groups. Let me remind the body that consumers for the past several years have had the advantage of sugar prices as low as $.09 per pound raw sugar equivalent. During this time, the world price has been severely depressed, beet and cane growers by the hundreds have gone out of business, and industrial users (by far the largest consumers of sugar sweeteners) have reaped millions of dollars in profits by using cheap sugar in products that remain at the same prices or even higher prices on grocery store shelves and at soft drink counters.

The time has come to strike a reasonable balance between the producer and consumer interests. Without in any way espousing a protectionist attitude, the time has also come to put some sanity into the sugar import situation. We need reasonable protection for domestic farmers rather than opening the United States to a world dumping ground for that portion of the world supply which cannot find a home elsewhere. Previously low sugar prices only provide a bonanza for the soft drink and sweetener industry who take the world residue at bargain basement prices and fail to pass the profits on the consumers.

Mr. President, in closing, I further want to make reference to the Dole amendment which I am cosponsoring which has the effect of outlawing cash payments. Sugar should not be protected from the Treasury. The fee system in the past has not only paid for the sugar program but also made money for the Government. It should be preserved.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. The clerk will call the roll.

Mr. BAKER. Mr. President, I wonder before we do that if we might have a quorum call.

The PRESIDING OFFICER. A motion to lay on the table is not debatable.

Mr. CRANSTON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Regular order, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Ohio. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Delaware (Mr. BIDEN), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from South Dakota (Mr. McGOVERN), the Senator from New Hampshire (Mr. McINTYRE), the Senator from New York (Mr. MOYNIHAN), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Alabama (Mr. SPARKMAN), the Senator from Mississippi (Mr. STENNIS), the Senator from Illinois (Mr. STEVENSON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. BAKER. I announce that the Senator from New Jersey (Mr. CASE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. McCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from Kansas (Mr. PEARSON), the Senator from Virginia (Mr. SCOTT), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

The PRESIDING OFFICER (Mr. STONE). Have all Senators in the Chamber recorded their vote?

The result was announced—yeas 47, nays 25, as follows:

[Rollcall Vote No. 488 Leg.]

YEAS—47

Anderson	DeConcini	Jackson
Bartlett	Dole	Johnston
Bellmon	Ford	Leahy
Bentsen	Garn	Long
Bumpers	Gravel	Magnuson
Burdick	Hansen	Matsunaga
Byrd, Harry F., Jr.	Hart	Melcher

So the motion to lay on the table UP amendment No. 2090 was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2091

Mr. CHURCH. Mr. President, on behalf of myself and Senators RANDOLPH, JAVITS, GLENN, and BAYH, I send an amendment to the desk.

The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) proposes an unprinted amendment numbered 2091.

Mr. CHURCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . To authorize a contribution by the United States to the Tin Buffer Stock established under the Fifth International Tin Agreement, and for other purposes.

(a) Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President, on behalf of the United States, is authorized to contribute, with or without monetary compensation, up to five thousand long tons of tin metal to the Tin Buffer Stock established under the Fifth International Tin Agreement.

(b) Notwithstanding any other provision of law, the Administrator of General Services is authorized to transfer to the International Tin Council such amount of tin metal not exceeding five thousand long tons as may be directed by the President for the purpose set forth in section 1: Provided, That such amount has been determined to be excess pursuant to section 2 of the Strategic and Critical Materials Stock Piling Act and that the United States contribution to the Tin Buffer Stock shall not prevent unilateral disposals of tin by the United States from the national stockpile.

(c) Any proceeds accruing to the United States as a result of liquidation of the Tin Buffer Stock or prior refund of the United States contribution to the Tin Buffer Stock shall be treated in the same manner as proceeds from the disposition of materials determined to be excess pursuant to section 2 of the Strategic and Critical Stock Piling Act.

(d) Any amount of tin metal accruing to the United States as a result of liquidation of the Tin Buffer Stock or prior refund of the United States contribution to the Tin Buffer Stock shall be incorporated in the national stockpile and supplemental stockpile to the extent required to meet the objective for tin metal determined pursuant to section 2 of the Strategic and Critical Materials Stock Piling Act. Any tin metal not so incorporated shall be treated in the same manner as materials determined to be excess pursuant to section 2 of such Act.

(e) The President shall transmit to the Congress at the beginning of each fiscal year a written report detailing the activities of the Tin Buffer Stock, and such other pertinent information on its administration as will enable the Congress to evaluate the participation of the United States in the Fifth International Tin Agreement.

(f) The President shall transmit to the Congress, at least sixty days prior to any transfer or sale of tin metal by the United States as a participant in the Fifth International Tin Agreement, a report projecting the impact of such action on the economy of the United States and on the economic and political development of the major tin exporting nations.

(g)(1) The Administration of General Services is hereby authorized to dispose of, by negotiation or otherwise, approximately thirty thousand long tons of tin now held in the national stockpile established pursuant to the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98–98h–1) and the supplemental stockpile established pursuant to section 104(b) of the Agricultural Trade Development and Assistance Act of 1954 (68 State. 456, as amended by 73 Stat. 607).

(2) The disposition authorized by subsection (a) may be made without regard to the requirements of section 3 of the Strategic and Critical Materials Stock Piling Act, except that the time and method of such disposition shall be fixed with due regard to the protection of the United States against avoidable loss and the protection of producers, processors, and consumers against avoidable disruption of their usual markets.

(h)(1) Any moneys received pursuant to the sales of tin from the national stockpile which are authorized by this section shall be covered into a special account which shall be established in the Treasury of the United States.

(2) Moneys covered into such account shall be available only for deposit, in accordance with legislation enacted after the enactment of this section, in a special fund in the Treasury established by such legislation as a depository for moneys derived from sales of excess materials under the Strategic and Critical Materials Stock Piling Act. If such legislation has not been enacted within 3 years after the enactment of this section, any moneys in the special account established pursuant to this subsection and any moneys thereafter received pursuant to sales of tin under this section shall be covered into the Treasury as miscellaneous receipts.

The PRESIDING OFFICER. The Senate will be in order. Will Senators kindly cease conversations?

Mr. CHURCH. Mr. President, this amendment to H.R. 7108 would authorize the President to contribute up to 5,000 long tons of tin metal from the national defense stockpile to the tin buffer stock established under the Fifth International Tin Agreement. In addition, the amendment authorizes the General Services Administrator to dispose of another 30,000 tons of surplus tin from the domestic strategic stockpile.

The United States joined the Fifth International Tin Agreement in 1976 in the belief that such an agreement can be of great benefit for both producer and consumer countries by providing an element of price and supply stability in a volatile world market. In May 1977, Secretary of State Vance pledged that the United States would make a voluntary contribution to the tin buffer stock, which is the central mechanism for stabilizing world tin prices. The administration has been seeking congressional approval for such a contribution ever since.

A U.S. contribution of 5,000 tons of tin to the international buffer stock will not only make good on our pledge under the agreement; it will also be an important step in curbing the high rate of inflation in this country. The United States is the world's largest consumer of tin and imports almost all of the tin it consumes. At the moment, large users of tin, such as the steel and canning industries, are paying premium prices for tin, because of a general shortage on the market, and because the international buffer stock is depleted. The tin contributed by the United States will be sold by the Tin Council on the open market, thus easing the shortage, and helping to bring down the price to below the target ceiling set in the international agreement. Disposal of an additional 30,000 tons of tin from the strategic stockpile could have an even greater beneficial effect on the price.

At present, the U.S. strategic stockpile has a surplus of some 165,000 tons of tin. Therefore, disposal of the volume of tin proposed in this amendment would in no way impinge upon the security function of the stockpile.

All revenues accruing to the Treasury from the tin disposal would be set aside in a special fund until such time as the Congress passes new stockpile management legislation. A comprehensive review of stockpile management policy has been underway in the Congress for some time and such legislation may well be expected to pass next year. Should new legislation not be enacted within 3 years, the tin revenues would revert back to the General Treasury.

H.R. 9486, recently passed by the House, contains a provision authorizing a contribution to the tin buffer stock, and disposal of an additional 30,000 tons from the stockpiles. The Senate Armed Services Committee has likewise endorsed a contribution to the International Agreement.

Senate adoption of this amendment will allow the U.S. Government at last to make good on an international pledge which was made well over a year ago, and to take steps which will substantially reduce the inflationary impact of the present high price of tin. I urge my colleagues to vote for this amendment.

Mr. LONG. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. LONG. Does not the administration strongly favor the amendment?

Mr. CHURCH. The administration does indeed favor the amendment; and I might add that tin prices have now reached an all-time high, so that the effect of keeping our pledge will be to bring those prices down, and it will be of great benefit to our consumers.

Mr. LONG. This will help reduce the cost of living. Is that correct?

Mr. CHURCH. Yes.

Mr. LONG. I will accept the amendment. I hope the Senate will agree to the amendment.

Mr. RANDOLPH. Mr. President, as a cosponsor of the amendment offered by the able Senator from Idaho (Mr. CHURCH), I speak in support of its approval.

The able chairman of the committee, Senator LONG has just spoken about the administration's support; and the Senator from Idaho has added comments about the prices of tin.

I speak in support of its approval. The strategic materials tin stockpile currently contains over 200,500 long tons of tin. Of that total, only 32,500 long tons are necessary to fulfill the stockpile goals pursuant to the strategic and Critical Materials Stockpiling Act. Thus there are 168,000 long tons of tin which could be made available for sale while still maintaining critical national stockpile emergency goals. This amendment proposes to dispose of 30,000 long tons of tin for domestic sale and 5,000 tons for the international tin buffer stock, from the stockpile.

I am concerned with our commitments to the international buffer stock as well as the domestic tin plate industry in our State of West Virginia. This industry, which is a part of the domestic steel industry, provides jobs for more than 5,000 workers in West Virginia. Their jobs and the price of tin plate used in food containers throughout our country is threatened by the price of tin imported into the United States. In January 1976, when the 95th Congress convened, the average selling price of tin on the Penang market was $3.01 per pound. That same pound of tin today is selling at $6.55 per pound. This is more than 100-percent increase in price in less than 2 years.

Total consumption of tin in the United States is approximately 61,000 tons per year. The tin plate canning industry uses approximately 18,500 tons of that total, West Virginia uses 4,000 tons to produce tin plate. During the past 2 years, the cost to purchase tin by this one industry in West Virginia has increased by $26,640,000 per year. This increase has been brought about by two factors: First, an inability of foreign tin producers to supply the world market; and second, the fluctuation of tin prices by commodity speculators throughout the world. I believe the release of tin from the stockpile will have a stabling impact on these escalating tin prices.

There is significant precedence for this action. In 1962, by House Concurrent Resolution 473, we released 50,000 tons of tin for domestic sale. Again in 1964, by House Concurrent Resolution 300, we released 98,000 tons of tin. The sale of that tin did help to overcome the shortfall in world supply and had a stabilizing impact on world prices. All of that 148,000 tons of tin has now been sold and prices are fluctuating again on world markets. It is time for the Congress to again authorize release of a relatively small amount of excess tin from the stockpile. I urge your approved of this amendment.

On Monday, September 25, by a vote of 308 to 75, the House passed H.R. 9846, authorizing the release of 35,000 tons of tin. For the same reasons as the other body voted overwhelming for release, we, too, should act to approve the pending amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

UP AMENDMENT NO. 2092

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk for myself and the distinguished Senators from Iowa, Senator CULVER and Senator CLARK, and the Senator from South Dakota, Senator MCGOVERN, and the Senator from Minnesota, Senator ANDERSON, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) for himself and Mr. CULVER, Mr. CLARK, Mr. MCGOVERN, Mr. ANDERSON, Mr. BAYH, and Mr. STONE, proposes an unprinted amendment numbered 2092.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

S. 7200

On page 18, immediately after section 209, insert the following: New section 210. Limitation of Price Support Payments under other law.

During such time as this title has force and effect, the Secretary of Agriculture may not make payments to, or on behalf of, producers and processors of sugarcane or sugar beets under section 301 of the Agricultural Act of 1949 (7 U.S.C. 1447) or any other provision of law that authorizes payments by the Secretary of Agriculture to achieve price support levels for such commodities.

Mr. DOLE. Mr. President, I offer as an amendment to the proposed amendment, a new section numbered 210. Section 210 will prohibit the use of price support payments to producers and processors of sugarcane or sugar beets while the provisions for fees and quotas found in title II of the bill are in force and have effect.

I believe we should use the market as much as possible in meeting our price objective under this act. There are others, however, who believe that we ought to use Government payments as the means by which the objective should be met. It seems to me that the choice, boiled down, is between the marketplace and Government subsidy.

The multimillion dollar subsidies and, therefore, borrowed money, will be spent if the administration has its way. In a letter dated October 1, Secretary Bergland has stated:

We will protect the returns to sugar producers and processors using existing authorities.

Unfortunately, the Secretary seems to have forgotten that the payments he would make come from the public funds that are collected by taxes or borrowing. The more payments are made, the more borrowings have to be used to supply those payments. The greater the deficit spending, the more we fuel inflation. It is not too hard to follow the pea in Mr. Bergland's shell game.

No subsidy comes free. We will learn it the hard way if we allow the administration to use payments as a method of keeping sugar processors and producers viable.

Another hazard we face by maintaining the payments program is that it would permit a continuing surge of low-priced sugar imports. We saw this happen in 1977 when the administration fell back on the payments authority it had under law to keep import prices low. When low priced sugar imports keep coming in, that means the direct payments will have to keep going out to cover our sugar farmers and processors.

We must act now to prevent a subsidy program that would keep government in the inflation business. The farmers do not want a subsidy program; most of all, the taxpayer can do without it. What we can accomplish, by adopting this amendment, is to insure that the farmer will get his price in the marketplace where it should be. To let the bill stand will only result in Government increasing the cost to the taxpayer.

In the current marketing year, corn prices could have been about 4 cents a bushel higher if the Carter administration had not mishandled the sugar program. This translates to a loss for corn growers of about $160 million in the past several months.

Mr. President, the administration handling of the sugar program to date has been ill-conceived and misdirected. My brief arguments here only highlight a few of the problems. I urge my colleagues to support my amendment which in effect will leave open only those avenues for action which are most equitable and most effective in our market economy.

Mr. President, as indicated, this amendment is offered by myself, the distinguished Senators from Iowa, Senator CULVER and Senator CLARK, along with Senator MCGOVERN of South Dakota and Senator ANDERSON of Minnesota.

Mr. President, the amendment would offer a new section which would prohibit the use of price support payments to producers and processors of sugarcane or sugar beets while the provisions for fees and quotas found in title II of the bill are in force and have effect.

I might suggest what this does is force the Secretary to use the program rather than direct payments that would cause the high prices the distinguished Senator from Ohio was discussing earlier.

Many of us believe we should use the marketplace as much as possible in meeting our price objectives under this act.

There are others, however, who believe that we should use Government payments as a means by which the objective should be met.

It seems to me that the choice boils

down to between the marketplace and Government subsidy.

The multimillion dollar subsidies and therefore borrowed money would be spent if the administration has its way.

I suggest that in a letter dated October 7 from Secretary Bergland, which was sent to many Senators, he said:

We will protect the returns to sugar producers and processors using existing authorities.

He went on to say he was talking about payments.

So, I just hope the amendment might be accepted.

Mr. President, I am willing to put in the RECORD a letter from the Secretary of Agriculture, along with a reply to that letter to the Secretary of Agriculture, along with telegrams in support and in opposition to this bill, and along with a clipping that indicates the sugar beet industry is on its knees.

Mr. President, I ask unanimous consent that those materials be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
October 7, 1978.

HON. ROBERT DOLE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DOLE: Once again a critical juncture in the determination of a public policy for sugar has arrived. You soon will be asked to vote on a bill that will provide implementing authority for the International Sugar Agreement, provide a minimum domestic market price objective for sugar, and authorize minimum wage determinations for sugar field workers. The House passed H.R. 13750, a measure containing these authorities on October 6.

The bill before the Senate authorizes the President to carry out and enforce the provisions of the International Sugar Agreement, signed at New York City on December 9, 1977. There are no substantive differences in these provisions in the House and Senate bills. The United States was a leading force in negotiating the International Sugar Agreement, and must be a member for the agreement to be successful. In our view, a successful International Sugar Agreement is the key to greater stability in world sugar prices and to a viable world and domestic sugar industry. The Administration supports passage of these provisions.

The Senate bill also directs the Secretary of Agriculture to establish a domestic market price objective for sugar, authorizes either the President or Secretary of Agriculture to protect the domestic market price for sugar through the imposition and periodic adjustment in duties and fees on imported sugar, and provides authority for the President to use import quotas if the domestic market price is inadequately protected through duties and fees.

There is a major difference between the pricing provisions that are acceptable to the Administration and those in the Senate bill. A domestic market price objective for sugar in excess of 15 cents a pound, raw value, or any automatic escalator on the domestic market price threatens any sugar legislation this session. The President will sign a bill that permits the price of sugar in the United States to remain at 15 cents a pound until the world sugar price pushes it upward.

The Senate bill provides for an initial domestic market price objective for sugar of 17 cents a pound, raw value, and it is automatically escalated (indexed) every six months based upon changes in the average of the wholesale price index (WPI) and the index of prices paid by farmers for commodities and services, including interest, taxes and farm wage rates. With these pricing provisions, the domestic price of sugar to consumers would automatically rise, irrespective of the world or domestic supply and demand situation for sweeteners. The price of sugar to consumers would rise simply because the price of other goods and services rose.

This provision would guarantee continued upward pressure on consumer prices. It is highly inflationary. Americans will consume 160 to 164 billion pounds of sugar and other sweeteners over the next five years, an annual average of 32 to 33 billion pounds a year. The pricing provisions in the bill reported by the Committee on Finance would, according to our analyses, cost sweetener users and consumers in excess of $4 billion more over the five-year life of the bill than would be the case under a measure supported by the Administration.

Initially, the Administration proposed a domestic market price objective of 13.5 cents a pound. The sugar producing and processing industry, together with the corn sweetener processing industry and some of the sugar refiners, developed the bill that contains a domestic price objective of 17 cents a pound with an automatic market price escalator.

The House Agriculture Committee reduced the initial price objective to 16 cents a pound, but retained the automatic price escalator. When the measure was before the Trade Subcommittee of the House Ways and Means Committee, the Administration agreed to support a 14.5 cent price objective provided the automatic escalator were removed. The Ways and Means Committee eliminated the automatic escalator but approved a domestic price objective of 15 cents a pound. On October 2, the President notified the Speaker of the House that the pricing provisions in the Ways and Means Committee version were acceptable. Unfortunately, the full House on October 6 adopted an amendment that escalates the domestic market price based upon changes in production costs.

The provisions with respect to restrictions on imported sugar through a duty and fee system and, if necessary, import quotas, as passed by the House are supported by the Administration.

The Senate bill and the House passed measure also contain farm labor provisions. The Administration favors a floor amendment that would shift the authority for farm labor provisions to the Secretary of Labor instead of myself, and make them less specific.

We believe that labor matters are more appropriately handled by the Secretary of Labor. It is also our judgment that the labor provisions, including the minimum wage rates for 1978 through 1982, are too specific. None of us can know the future well enough to determine with precision what the minimum wage rates should be over the next five years. Instead, the bill should provide guidance to those who must make these determinations in the year of concern, and the labor standards should be generally consistent with those applied under other Federal laws.

In closing, let me reaffirm that the Administration feels strongly that we must meet our commitment to provide equitable income protection to domestic sugar growers. But, this can be done in a manner that is consistent with other economic goals and that will not exacerbate the primary economic problem confronting all of us today.

We will protect the returns to sugar producers and processors using existing authorities. I can assure you that the level of support to producers and processors will take into account changes in their production costs, including labor costs. It is unnecessary to increase the price of all sweeteners (both the domestic and foreign production) to all the people just to protect the returns of those who produce sugar. That can be accomplished much more efficiently through deficiency payments whenever the market price is below a fair price to producers and processors.

Sincerely,

BOB BERGLAND,
Secretary.

OCTOBER 11, 1978.

HON. ROBERT DOLE,
Senate Office Building,
Washington, D.C.:

Vote no on House-Senate conference sugar bill. Will unnecessarily raise sugar prices immediately. Inflationary cost to consumer $4.5 billion over life of bill:

OCTOBER 11, 1978.

Senator ROBERT DOLE:

The National Corn Growers Association and its affiliated State Corn Growers Association remind you of the urgent stake your states corn growers have in approving sugar-sweetener legislations. We remain opposed to the use of treasury payments. Getting a fair price in the marketplace saves U.S. taxpayers, protects domestic producers, against unfair foreign dumping, and avoids subsidizing big industrial users.

With a large corn crop coming on, the importance of passing the sugar stabilization act becomes even more critical. Failure to pass favorable sugar-sweetener legislation has already cost American corn farmers 4 cents per bushel this year.

JOHN W. CURRY,
President, National Corn Growers Association.

BEGINNING OF THE END FOR SUGAR BEETS?

(By Karen Freiberg)

When farmers in southwest Kansas start digging their sugar beets two weeks from now, it could be the beginning of the end, says Bill Turrentine, a Garden City sugar beet grower.

The Colo-Kan Sugar Co., a cooperative refinery owned by sugar beet producers in southwest Kansas and southeast Colorado, has lost nearly $1.5 million during the past two years from sagging sugar prices, he said.

According to Turrentine, a member of the Colo-Kan board of directors, continued low sugar prices have put operation of the factory next year in jeopardy.

"If, and I say this conservatively, we continue to have the circumstances that we have now, it's going to put us in a precarious situation to stay in business," and Turrentine. "I don't want to flat out say we won't be in business, because I don't know."

Turrentine said the decision to continue operation of the refinery at Rocky Ford, Colo., would rest on the price of sugar.

The Rocky Ford factory is owned by growers in Stanton, Grant, Haskell, Kearny and Finney counties, who ship their beets 200 miles to the plant for processing. Producers in about five southeastern Colorado counties also ship beets there.

In 1974, a year when low world sugar production drove prices skyward, Kansas beet producers received an average of about $47.62 per ton of beets, according to the Kansas Crop Reporting Service. Raw sugar prices rose to a record high of 65.5 cents a pound.

Within a year Congress failed to renew the Sugar Act protecting domestic sugar producers from competition on the world market.

Raw sugar prices dropped during the next two years, dipping at times to under 10 cents a pound.

Raw sugar prices in New York are about 14 cents a pound, said Turrentine. New York raw prices are based on the world market price plus the cost of handling, freight and insurance from points of origin.

Cost of refining the raw sugar is an additional 4 to 5 cents per pound, said Turrentine.

He said raw prices "in excess of 17 cents a pound" will be necessary for the factory and the growers to survive.

Sugar beet growers are paid by the ton of beets they bring into the factory and the percent of sugar in the beets.

Last year the Colo-Kan Sugar Co. paid growers $15.11 per ton of beets at about 14.5 percent sugar. This year, said Turrentine, the price will be at least $17 and "maybe exceed $18 a ton.

"But when it costs $24 and $27 a ton to produce these things, you can see what it's going to do to the average grower," he added.

Growers are paid for their fall crop in three installments during the year. The first and largest payment, said Turrentine, comes right after the harvest. A second payment follows in April and if prices have been good and the cooperative has made money, a third payment is made in September.

How much a grower receives during the year depends on the price at which the cooperative can sell its refined sugar.

In 1976, the first year the Colo-Kan cooperative lost money, Turrentine said the initial payment to growers was too high.

"The best we could do with our computer was figure out what the possibility of the price structure would be during the year. But prices were so volatile we didn't even come close, and we overpaid. By the second payment we had overpaid to the tune of $700,000," he said.

By the end of the year, said Turrentine, the losses were prorated "back across the patronage reserves."

A similar situation occurred last year.

The operation of a cooperative calls for a percentage of profits to be distributed to the grower-members, or patrons, and a percentage is accumulated in an account called a patronage fund used to finance the assets of the company and is eventually redistributed among the patrons.

Beet growers in southwest Kansas are not the only ones wondering about their futures.

Sugar beets are grown in two districts in western Kansas. Farmers in the northwest district, which includes Sherman, Sheridan, Cheyenne and Wallace counties, contract production with Great Western Sugar Co., head-quartered in Denver, Colo.

Beet production in both districts has been dropping for several years. In 1975, 43,000 acres of beets were harvested in the state. By 1977 that figure had dropped to 24,000 acres. The Crop Reporting Service has forecast 26,000 acres will be harvested this year.

According to Don Lindschield, Great Western agricultural manager at the company's refining plant at Goodland, Kan., 22,773 acres have been contracted in Kansas and northwestern Colorado. That's about 1,700 acres more than were harvested last year.

Last year Great Western paid growers about $22 per ton for beets with a 14 percent sugar content, according to LaMar Henry, senior vice president for agriculture.

"That's an extremely depressed price situation," said Henry. "It's below cost of production to the grower and the company."

Lindschield said average sugar content for the upcoming crop "looks to be higher than last year's 14 percent." One percent of sugar means about a $2 price difference per ton of beets.

Sugar beets have been grown in western Kansas for 75 years. According to Turrentine, beets have been a "real good money making crop, subject to a few crop failures, up to the last three years.

He said there is a reluctance to allow a refinery to stop production in spite of a loss situation because "it has traditionally meant it will never start up again."

Two bills now before Congress would set U.S. raw prices at between 15 and 17 cents a pound based on certain control measures, including tariffs and import quotas.

Mr. DOLE. Mr. President, there is the story about a Kansas producer and the difficulty he has had, because of governmental interference and lack of price supports that even meets the costs of production.

I say, finally, as late as September, Secretary Bergland said the cost of producing sugar was about 16 cents per pound. That is the Secretary of Agriculture. That is the highest authority I know as far as American agriculture is concerned.

I say that in response to my friend from Ohio, Senator METZENBAUM, it is not a ripoff for the American farmer, the sugarbeet producer and the sugarcane producer, and in this case the corn producer, the whole sweetener industry. All they want is the right to make a profit. If they cannot make a profit in the marketplace I do not think many are looking for Government subsidies, and my amendment and the amendment offered by me on behalf of four other Senators would make certain that did not happen.

I, therefore, hope the amendment might be accepted.

Mr. President, Tuesday I received a letter from Secretary of Agriculture Bob Bergland commenting on the House-passed sugar bill (H.R. 13750) and commenting on the pending Senate version of this legislation.

The letter was not surprising.

Secretary Bergland indicates that President Carter will sign a bill with a price support level of 15 cents per pound, if there is no escalator provision for inflation of the cost of production to farmers. They maintain that such future increases can be "accomplished more efficiently through deficiency payments whenever the market price is below a fair price to producers and processors."

A 15-cent-per-pound price support level for sugar producers is not enough to cover present cost of production. Secretary Bergland stated:

We know it costs about 16 cents a pound to produce American sugar.

That was on September 14, 1978, before the Agricultural Council.

The price support level in the Senate bill is far more realistic at 16 cents per pound, and provides for a "viable" domestic sugar industry—which President Carter has said is his goal.

Mr. President, I urge my colleagues to accept the price support level of the Senate bill. It will assure that future price support levels will be adjusted if inflation continues and the level set by the bill can be discussed in conference between 16 cents in our bill and the 15 cents provided in the House bill.

As to the Secretary's comments that deficiency payments from the U.S. Treasury would be "more efficient," than receiving the price support level from the marketplace, this is traditional bureaucratic demagoguery.

If we are to choose whether farm supports are to come direct from the marketplace, or from the Treasury from collected taxes (and continual deficits plus interest) through payments administered by the Government bureaucracy, I can see no choice. Supporting the price in the market and bypassing the bureaucratic process is definitely more efficient and less costly to the taxpayer. Taxpayers would still pay the bill through more taxes or through increased Federal deficits and resulting inflation.

This is exactly what we saw when the administration arranged payments of over $200 million of unappropriated funds to sugar producers and processors for the 1977 crop. This was done in violation of express instructions by the Congress. It also violated a specific agreement between Senator LONG and Secretary Bergland. I maintain this procedure compounds inflationary pressures. These funds were borrowed. With current interest rates the cost of borrowed funds doubles in 7 years. It also increased demand for borrowed funds and thereby increases interest rates. This raises the consumer price index.

Mr. President, Secretary Bergland's letter does, however, serve to outline the administration's bidding procedure on sugar legislation. He indicates their initial proposal for domestic sugar prices was 13.5 cents per pound. He then indicates that when faced with a prospect of 17 cents per pound, they raised their ante to 14.5 cents per pound in the House Ways and Means Committee markup, providing the escalator provision contained therein was dropped. Now, in Secretary Bergland's letter, since the House approved 15 cents per pound last Friday, he indicates President Carter will support the 15-cent level if the escalator provision the House inserted on the floor is dropped. We have seen the administration up their bid from 13.5 cents per pound to 15 cents per pound. This is not their last offer.

Especially after the Secretary of Agri-

culture stated on September 14, 1978, that the average cost of production was 16 cents per pound. Mr. President, I urge my colleagues to maintain the provisions of the Senate bill.

Mr. President, I offered an amendment in the Finance Committee when we were marking up this bill. It would have prohibited the use of payments to producer and processors to subsidize farmers. It was not accepted as the chairman felt the administration would not use such deficiency payments to maintain the support level, but would use the import fees and quota provisions contained in the bill.

The letter I received from Secretary Bergland (and I assume other Senators received the same letter) admits their intent to use such payments to "protect the returns of those who produce sugar." I hope that Chairman LONG will now join me in support of this amendment to assure that the fees and quota provisions of our bill are the only means available to reach the price objective.

The Secretary's letter indicates:

It is unnecessary to increase the price of all sweeteners (both domestic and foreign production) to all the people just to protect the returns of those who produce sugar.

This is the Secretary's way of telling us that the administration is not concerned with the low prices corn farmers are facing. The administration would rather any domestic demand for sweeteners be filled by cheap, below cost of production, imported foreign sugar rather than from any other source, such as sweetener made from corn. We know this, from last year's action by the administration in not imposing fees or quotas, allowing over 6 million tons of sugar to enter the United States to be used by food and beverage manufacturers, which cost the corn farmers of this Nation $160 million by denying them access to this domestic market.

Secretary Bergland has indicated he feels farmers growing sugar beets and sugar cane should find other crops to grow on their land. He proposes to force this change through support levels below the cost of production due to imported sugar. Furthermore, he will deny corn producers throughout the Nation the increased price of all corn that would result from an increased demand for domestic corn sweeteners. Obviously, the administration is not concerned with sugar farmers or corn farmers.

Again, this attitude is not surprising. The thousands of grain farmers who came to Washington earlier this year know the administration's attitude and its lack of concern for the viable future of American agriculture.

Moreover, this administration's proposal will make us more and more dependent on imports—a major factor in our loss in the value of the dollar—and a great inflation contributor.

The Ways and Means Committee bill would require increased import costs over the 5-year period, amounting to $2,407 million, as compared to the Senate Finance Committee bill contained in H.R. 7108.

[In millions of dollars]

Year	Ways and Means	S. 2990	Balance-of payment loss
1978-79	870	722	148
1979-80	1,051	764	287
1980-81	1,306	870	436
1981-82	1,539	893	646
1982-83	1,724	834	890
Total	6,490	4,083	2,407

Not only would there be an increase in the unfavorable balance of trade, but also there would be a Treasury loss in import duties and fees with the ways and means bill, as compared with the H.R. 13750.

IMPORT FEES

[In millions of dollars]

Year	S. 2990	Ways and Means
1978-79	739	630
1979-80	725	479
1980-81	523	224
1981-82	465	62
1982-83	476	61
Total	2,928	1,456

The import duties lost would be $1,472 million.

On top of this loss of revenue the Ways and Means proposal permits payments under other legislation. This would probably permit payments in the area of $500 million depending on vague decisions by the Secretary of Agriculture.

Thus, the total adverse budget impact would be about $2 billion. This must come from borrowed funds or increased taxes.

The Treasury is running an extremely high budget deficit. This is reflected in the cost of borrowing, as follows:

(Week of September 22, 1978)

6 months U.S. Treasury bill (coupon equivalent yield)	8.65
1 year U.S. Treasury bill (coupon equivalent yield)	8.80
2 years U.S. Treasury note	8.74
9 years U.S. Treasury note 8 percent, August 15, 1986	8.52

It is oversimplistic to compare the economic effect of sugar payments on consumer costs with the effect of import fees. Payments come from borrowed money. Every additional expenditure item adds upward pressure to interest rates. The higher interest rates affect every item throughout the Consumer Price Index. The administration has not taken the interest cost factor into consideration in its analysis. At current rates, the borrowed money used to make sugar payments would double in less than 8 years.

The eminent economist, Eliot Janeway, in responding to questions from Representative FITHIAN stated:

The first relates to the problem of inflation; and, therefore, to its main source: Overborrowing as measured by the rising trend of interest rates, especially long-term rates, which the Federal Reserve Board cannot control. It is axiomatic that any measure which calls for more borrowing will fuel "the engines of inflation" and that any alternative expedient will cool them off. The administration's policy of direct payments to processors would admittedly be financed by more Government borrowing; and would, therefore, fuel inflation. QED.

The second relates to the real dimensions of the inflationary problem. The administration's approach considers inflation in a purely domestic frame of reference—as if containing it called for merely an exercise in wage and price restraint.

The evidence of the real world, however, reminds us every day that the problem is thoroughly international; and, consequently, that no purely domestic expedient will work. Certainly, the collapse of the dollar and the surge in the trade deficit are contributing to the disastrous spiral of higher interest rates which is accelerating inflation.

The administration proposal would step up sugar imports first by reducing the price, and second by reducing domestic production. Its international sugar policy is in conflict with its international oil policy. On oil, the administration is demanding an import fee—that is, a tariff—to cut imports and improve our trade deficit. But on sugar, it is demanding more imports—at the price of a higher trade deficit—on the far-fetched theory that this would combat inflation.

I urge each of you to read the complete Janeway letter which Representative FITHIAN inserted in the September 20 CONGRESSIONAL RECORD.

It is of great significance to all of us to recognize that—

First. In the case of steel, we have a reference price system for imports, which has reduced imports effectively, and increased U.S. jobs in the steel industry. In his September 28 press conference, President Carter took great pride in the effectiveness of this import control program. He did not offer Government payments to our steel producers.

Second. In the case of petroleum, the President has wanted Congress to authorize a very high import fee to reduce imports. Oil, not sugar, is a major factor affecting living and operating costs. No Government payments were offered to the domestic petroleum industry.

Third. In all other agricultural cases under section 22 including price supports, the Federal Government has arranged to support the price through import management. There is no satisfactory reason to justify a different policy for sugar. Farmers should receive their returns in the marketplace.

Why is there a different proposed policy for sugar? We cannot fathom the different economics.

For consumers, we refer again to the Janeway letter where we find the following item:

In 1947, the retail price of sugar was 9.7 cents a pound. I reckon that it took about 5 minutes to earn that much in 1947. In 1977, the retail price of sugar was up to 21.62 cents a pound; but adjusted for inflation, the "real" price was down to 11.9 cents. At 1977's cash wage level, only a few seconds over 2 minutes would have earned enough to buy a pound.

President Carter issued a statement on September 26, 1978, which stated:

The large trade deficits the United States has experienced in recent years have weakened the value of the dollar, intensified inflationary pressures in our own economy, and heightened instability in the world economy."

His sugar proposals would increase our

trade deficit and increase inflationary pressures.

On September 28, 1978, he stated at a press conference:

> We are cutting down the Federal deficit. We have a very tight constraint on spending. This is important in controlling inflation.

His sugar proposals increase budget deficits and increase inflationary pressures.

The Senate Finance Committee bill contained in H.R. 7108 makes good economic sense and should be passed.

I urge your support.

Mr. LONG. Mr. President, in view of the fact the amendment will be in conference between the Senate and the House of Representatives and if the higher price in the Senate bill could be agreed to it would be appropriate to agree to either have no payments or have a limitation. On the other hand, the payments might very much be necessary with the lower price in the House bill.

I think it would be appropriate that they be in conference. Therefore, Mr. President, I am willing to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. MATSUNAGA and Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I rise in strong support of H.R. 7200, as amended.

Recognizing that the agricultural segment of our country was in need of help, the first session of this 95th Congress passed the Food and Agriculture Act of 1977 which became Public Law 95–113 on September 29, 1977. Unfortunately, that act did not completely solve the farmer's problems and we can certainly expect them back on the Hill next year. Although the act has been of some help to sugar growers and producers, support under the act will expire at the end of this year, since it was made applicable only to the 1977 and 1978 crops of beet and cane sugar.

The Sugar Stabilization Act of 1978, now being debated, was introduced by the Senator from Idaho, Mr. CHURCH, on April 25 of this year with 33 cosponsors. The bill is designed to provide continued support for cane and beet sugar producers on a more realistic basis and also provide for the implementation of the International Sugar Agreement to which the United States became a signatory in December 1977.

Sugar is one of the world's most regulated commodities with approximately 85 percent of total world production coming under some type of domestic or foreign law or regulation; and sugar in the United States has been under regulation since the Revolutionary War. The first piece of general legislation enacted by the first U.S. Congress in 1789 included tariffs on sugar. The depression of 1929 drove home the point that tariffs alone could not be the sole tool to regulate U.S. sugar supplies and in 1934 the Jones-Costigan Act amended the Agricultural Adjustment Act to include sugar as a basic commodity under the general farm program. This amendment provided for a processing tax on refined sugar, for benefit payments to sugar beet and sugarcane growers under production adjustment contracts, and for quotas for domestic and foreign areas supplying the U.S. market. In 1936 the Supreme Court declared the benefit payments and taxes on sugar to be unconstitutional but quotas were not questioned and continued in effect. The Sugar Act of 1937, which embodied the basic principles of the Jones-Costigan Act, was signed into law on September 1 of that year and continued in effect until succeeeded by the Sugar Act of 1948 which was extended seven times with various amendments. The act was terminated on December 31, 1974. The Sugar Act of 1948 was without question the most successful agricultural program ever enacted into law. It was designed to achieve three major goals:

First. To assure consumers adequate supplies of sugar at a reasonable price.

Second. To maintain a viable domestic sugar industry.

Third. To promote the export trade of the United States.

It was also designed to be self-supporting. During the 30 years of its existence the Sugar Act of 1948, as amended from time to time, achieved these goals to a remarkable degree. In addition it contributed immensely to the development of a vigorous sugar industry within our national borders, resulted in the improvement of wages and working conditions of farm laborers and put more than $660 million into the U.S. Treasury after deducting all operating costs.

For 4 of the 5 years from 1970 through 1974 world shortages of sugar resulted in excessively high prices, which encouraged production throughout the world. Overproduction in turn led to falling prices. With this chain of events, domestic producers today are plagued by declining revenues and increased production costs due to inflation. While on the subject of inflation, let me state emphatically that sugar producers are not the cause of inflation, but rather, the victims of it—as are all of the agricultural segments of our economy.

Much has been said about the "inflationary effects" of the pending measure, and about how it would serve "special interest" groups. At a time when both the administration and the Congress are bent on a program to reduce the tax load on business, industry, and the worker, it is puzzling to this Senator that the administration would rather pay direct benefit payments to sugar producers out of the Federal Treasury, that is, out of the taxpayer's pocket rather than from revenues generated from tariffs and fees on foreign imports. Inflation is a thoroughly international problem and cannot be solved by domestic expedients alone. Direct payments have the effect of subsidizing processor imports at the taxpayers expense, while ignoring the fact that foreign governments provide support to their sugar producers.

The American consumer, if not spoiled by the abundance of "fast food"—fancy packaging and processing for convenience—certainly ignores the fact that this aspect of the food chain is what is responsible for the increasing cost of his food. It is in the processing, packaging, transportation, and marketing of food products where the major costs lie, but the farmer, the producer, is getting a smaller cut of the pie as prices continue to rise.

The administration has not insisted on direct payments to the grain producers but has rather pressed the grain farmers to take acreage out of production. In theory, sugar beet and cane growers in the Continental United States could shift to other crops, but this ignores the high capital investment in plants and equipment peculiar to their uses and needs which would be idle, and they could only switch to crops already in excess. My own State of Hawaii would not even enjoy this dubious luxury.

Since 1851 studies have been made and experiments conducted on alternative crops to sugar cane but none have been found. Depending upon the island of the group in question, crop land in sugar ranges from 83 percent to 96 percent of the total crop land. Lest some of my colleagues feel that this is strictly an agricultural problem, let me point out that the sugar industry in my State has a capital investment in plants and equipment of more than $1,250,000,000 at today's prices—and this figure is even higher in other areas of the mainland United States. These investments benefitted the steel producers and manufacturers of Pennsylvania, Ohio, Illinois and other industrial segments of our great country. The "special interest" group in this country to be benefitted by this sugar bill includes general industry, the industrial users, the refiners and the consumers as well as the growers and processors of sugar.

On May 11 of this year, I chaired a public hearing on S. 2990 held by the Finance Committee's Subcommittee on Tourism and Sugar and on October 3 the full committee ordered H.R. 7108 favorably reported with an amendment in the nature of a substitute. The substance of H.R. 7108, a bill to temporarily permit duty-free entry of certain papermaking machinery (Yankee Dryer Cylinders), was passed by the Senate on September 30, 1978, as an amendment to H.R. 8755.

The first part of the amendment to H.R. 7108 is the substance of S. 2990, the Sugar Stabilization Act of 1978, with amendments. The committee amendment authorizes the President to take such actions as are necessary or appropriate to implement the obligations and secure the rights to the United States under the International Sugar Agreement (ISA). The ISA has been submitted to the Senate as a treaty for advice and consent.

The committee amendment also establishes a domestic sugar program which will remain in effect for 5 years. Under the domestic sugar program, a U.S. market objective for raw sugar of 16 cents per pound is established. The market price objective is to be adjusted every 6 months beginning on October 1, 1979, to maintain for the semiannual period the

same ratio between the market price objective and an average of the parity index and the wholesale price index for the preceding calendar quarter as existed between the price objective for the 1978 sugar supply year and that average during the 12-month period before the date of enactment.

A mandatory fee on imported sugar will be the primary method for achieving the U.S. market price objective. The Secretary of Agriculture would be required to impose a fee on sugar imports when he determines that the average of daily import prices for sugar during a sugar supply year (October through September), or 6-month period thereof, will be less than the U.S. market price objective (16 cents per pound until October 1, 1979). The fee would be equal to an amount (not in excess of 20 cents per pound) which the Secretary determines will achieve the current U.S. market price objective when added to the daily price for raw sugar imports. Whenever the import fee will not achieve the U.S. market price objective for a sugar supply year, or 6-month period thereof, the Secretary would be required to establish a global quota on sugar imports which, together with the import fee, will achieve the market objective.

Under the committee amendment, imports of refined sugar are prohibited. Import restraints on sugar-containing products are also provided. The committee clarified a position of S. 2990 which exempts from the import fees and quotas sugar imported for the production of polyhydric alcohol. That exemption applies only with respect to polyhydric alcohols which are not substitutes for sugar as a sweetener in human food consumption. Finally, the committee amendment provides minimum wages and labor standards for sugar field workers identical to the provisions in H.R. 13570, as passed by the House of Representatives on October 6, 1978.

Under present law, the Secretary of the Treasury is required, upon complaint by a domestic industry, to impose countervailing duties, in addition to regular duties, on imports entering the United States if he finds that the imports receive a foreign subsidy. The additional duty, which is equivalent to the amount of the subsidy, is intended to offset the foreign subsidy practice. In the Trade Act of 1974, Congress directed the President to seek new international rules on subsidy practices in the Tokyo round of multilateral trade negotiations (MTN). To permit the President to avoid confrontations over the U.S. countervailing duty law while a subsidies code is being negotiated, Congress permitted countervailing duties to be waived, that is, not collected even though a subsidy exists, until January 3, 1979, under certain conditions.

The waiver authority has been exercised 19 times. In 1977, the value of imports subject to waivers was $607 million. Countervailing duties not collected on those imports totaled $47 million.

On September 28, 1978, the President sent a message to Congress asking that the countervailing duty waiver authority be extended until Congress completes its consideration of the results of the MTN. The President stated that "prospects for reaching agreement by year end on a subsidy/countervailing duty code which meets basic U.S. objectives are good." He also stated that failure to extend the waiver authority until Congress can consider whether or not to implement that code will "seriously jeopardize" the ability of the Special Representative for Trade Negotiations to negotiate such a code.

The second part of the committee amendment to H.R. 7108 would extend the authority of the Secretary of the Treasury to waive countervailing duties under the following conditions:

The waiver authority would be extended if, before January 3, 1979, the President determines, upon the recommendation of the Special Representative for Trade Negotiations, and notifies Congress of his determination, that:

Negotiations have been concluded establishing new international rules and procedures governing the use of internal and export subsidies which first, adequately protect U.S. agricultural and industrial trading interests, and second, provide for effective enforcement of the substantive rules;

The MTN as a whole has been substantially completed; and

Failure to extend the waiver will seriously jeopardize the completion of the MTN.

The waiver authority would be extended to the earliest of the following dates:

The date on which either House of Congress defeats on a vote of final passage the domestic implementing bill for the subsidy/countervailing code;

The date of enactment of such implementing bill; or

September 1, 1979.

Existing waivers, which would continue in effect, and any future waivers made during the period of the waiver authority extension would be subject to the existing conditions in the law for granting waivers. All waivers would be subject to the existing congressional override provisions under which either House of Congress by majority vote may disapprove a waiver. If an override resolution is adopted, imports covered by that resolution become subject to countervailing duties immediately.

Mr. President, the bill as reported by the Finance Committee contains the same basic elements as the bill cosponsored by 34 Senators and I urge its passage.

● Mr. CHURCH. Mr. President, it is essential that we understand the importance and the nature of the sugar beet industry in the United States. I therefore request unanimous consent that a short description of the sugar beet industry be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE U.S. SUGAR BEET INDUSTRY

Sugarbeets are produced on approximately 1.4 million acres each year by some 14,000 farms located in 17 states extending from Ohio and Michigan to California, and from the Canadian border to Texas and New Mexico. The sugar is extracted from the beets in 51 processing facilities positioned throughout the sugarbeet growing area.

Because of the agricultural nature of the beet sugar industry the processing plants, almost without exception, are located in smaller, rural communities. With some 250–350 workers each (members of the AFL/CIO), the beet plants, are commonly the largest local employer and the most important element in the area's economy. The total annual industry payroll exceeds $200 million and, even at the current sugar prices, the value of their output totals in excess of $900 million annually.

The growers share directly in the market proceeds of the sugar they produce on their farms as a result of a unique participating contract with the processors. The farm value of sugarbeet crops has averaged over $700 million per year since 1970, however the estimated value of the 1977 crop dropped to $573 million.

A comparison of the estimated 1977 crop value—$573 million—relates to USDA's estimated cost of production of $602,635,075 and illustrates why domestic sugarbeet production will be curtailed drastically if the situation continues.

A breakdown of cost component factors shows that America's 14,000 sugarbeet farmers—among the world's most efficient—pay wages totalling $152 million, incur annual machinery costs of over $60 million, spend nearly $24 million each year for repairs and maintenance of farm equipment and pay out over $120 million for fertilizer and other agricultural supplies to produce their beet crops. Property taxes alone on the nation's 1.4 million acres of sugarbeet farmland average nearly $13 million annually. This is, in effect, created wealth which circulates throughout the economy many times. It means jobs—in the fields, in the plants and within satellite industries.

These American farm families, along with their processor-partners, are involved in a billion dollar U.S. industry providing a basic commodity of which this country is a deficit producer. (Beet sugar meets some 35% of U.S. consumption demands, domestically produced cane sugar 20%. The rest is imported. Over the past five years sugar imports have contributed over $6 billion to this country's balance of payments deficit.)

The processing companies, confronted with drastically low prices on the one hand, have not escaped the impact of the inflation characterizing this nation's economy. Based on the weighted average costs compiled from 36 processing facilities, energy bills were 144 percent higher for the 1976 crop than they were for the 1974 crop; packaging and other materials were 102 percent higher; labor, including fringe benefits, was 24 percent higher and other fixed costs were up 17 percent.●

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. LONG. Mr. President, we have been acting on the sugar bill, as amended to a House bill that had no connection with sugar. We have done this to insure that we could have the opportunity to take up the bill today.

However, I am sure and I know all Senators agree that the more orderly procedure would be to act on this measure, as an amendment to the House-passed sugar bill, which is H.R. 13750.

That bill is now pending in the Finance Committee.

I, therefore, ask unanimous consent that the Finance Committee be discharged from further consideration of H.R. 13570 and the Senate proceed to its immediate consideration; that the amendment in the nature of a substitute, as amended, to H.R. 7200 approved by the Senate be adopted as an amendment in the nature of a substitute to H.R. 13750, and I ask unanimous consent that H.R. 7200 be indefinitely postponed.

Mr. JAVITS. Mr. President, reserving the right to object, and I do not expect to object, but we understood that there were going to be no welfare amendments dealt with because H.R. 7200 was being used as a vehicle for this. Does this change anything on that score?

Mr. LONG. If it is all the same with the Senator, I would be happy to have H.R. 7200 returned to the calendar.

Mr. JAVITS. I do not require any further assurance than that of the Senator that this does not result in any welfare amendments being carried along with the sugar bill.

Mr. LONG. No, just the opposite. There would be no welfare amendment. It would be strictly a sugar bill with the amendments agreed to here.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana?

Without objection, it is so ordered.

Third reading of the bill.

The legislative clerk proceeded to read the bill by title.

Mr. BROOKE. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair will state to the Senator that no amendment is in order at this time. We had third reading of the bill, of each bill.

Mr. BROOKE. Beg pardon?

The PRESIDING OFFICER. We had third reading of each bill.

Mr. KENNEDY. I think my colleague, the Senator from Massachusetts, was on his feet at that time seeking recognition.

The PRESIDING OFFICER. Does the Senator request unanimous consent for the consideration of his amendment?

Mr. LONG. Mr. President, I have to object to this. If I knew what the amendment is the Senator will be glad to——

Mr. KENNEDY. I suggest the absence of a quorum, Mr. President.

Mr. ROBERT C. BYRD. Mr. President, I hope the Senator will withhold that. The Senator asked unanimous consent a moment ago. I think it took care of the entire matter. It was not objected to.

Mr. LONG. It was not.

Mr. BROOKE. There had been no third reading of the bill before I called up my amendment.

Mr. LONG. Mr. President, the bill went to third reading before I asked——

The PRESIDING OFFICER. The Senator is correct. The bill had been on third reading before the Senator from Louisiana asked unanimous consent.

Mr. LONG. The bill was on third reading which I understood was the appropriate proceeding. After third reading was agreed to, then I asked unanimous consent that we substitute this bill for the text of the Sugar Act in the committee.

The PRESIDING OFFICER. That is correct.

Mr. LONG. Which is the standard way of doing business.

The PRESIDING OFFICER. The substitute had already been agreed to for H.R. 13750.

Mr. CURTIS. Let us vote.

The PRESIDING OFFICER. No further amendment, therefore, is in order except by unanimous consent.

Mr. ROBERT C. BYRD. Vote.

The PRESIDING OFFICER. The question is on the adoption of the bill, as amended.

[Putting the question.]

Mr. CHAFEE. Mr. President, are we going to have the yeas and nays on this?

Mr. ROBERT C. BYRD. Not on this, but on final passage.

Mr. CHAFEE. Are we not on final passage?

Mr. ROBERT C. BYRD. Not yet.

The PRESIDING OFFICER. Third reading of H.R. 13750.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. ABOUREZK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ABOUREZK. Is it in order now for the Senator from Massachusetts to offer his amendment?

The PRESIDING OFFICER. No further amendment is in order.

Mr. ABOUREZK. Then we are not at third reading.

The PRESIDING OFFICER. The substitute has already been adopted. Third reading is automatic.

Mr. ROBERT C. BYRD. Third reading of the bill.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. ROBERT C. BYRD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall it pass?

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. Mr. President, this is the last rollcall vote tonight.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Delaware (Mr. BIDEN), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New York (Mr. MOYNIHAN), the Senator from Wisconsin (Mr. NELSON), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Alabama (Mr. SPARKMAN), the Senator from Mississippi (Mr. STENNIS), the Senator from Illinois (Mr. STEVENSON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY), would vote "yea."

Mr. BAKER. I announce that the Senator from New Jersey (Mr. CASE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from Kansas (Mr. PEARSON), the Senator from Virginia (Mr. SCOTT), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

The PRESIDING OFFICER. Have all Senators in the Chamber recorded their votes?

The result was announced—yeas 50, nays 22, as follows:

[Rollcall Vote No. 489 Leg.]

YEAS—50

Anderson	DeConcini	Johnston
Bartlett	Dole	Leahy
Bayh	Ford	Long

Humphrey	Scott	

So the bill (H.R. 13750), as amended, was passed.

Mr. CURTIS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, I have two routine requests.

First, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments to H.R. 13750.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I move that the Senate insist on its amendments, that it request a conference with the House of Representatives thereon, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. LONG, Mr. MATSUNAGA, Mr. BENTSEN, Mr. CURTIS, and Mr. DOLE conferees on the part of the Senate.

ADDITIONAL CLOTURE ENDORSEMENT

Mr. RANDOLPH. Mr. President, I ask unanimous consent that on the motion to invoke cloture on the motion to proceed to the consideration of S. 3279, I be permitted to be joined on that cloture motion.

The PRESIDING OFFICER. Without objection, the Senator will be permitted to sign the cloture motion.

EASTERN TELEPHONE SUPPLY AND MANUFACTURING, INC.

Mr. LONG. Mr. President, I am informed that H.R. 10161, previously passed by the House of Representatives and the Senate is at the desk. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. LONG. Mr. President, I ask that the Chair lay before the Senate the message from the House of Representatives on H.R. 10161.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate numbered 1 to the bill (H.R. 10161) entitled "An Act for the relief of Eastern Telephone Supply and Manufacturing, Incorporated."

Resolved, That the House disagree to the amendment of the Senate numbered 2 to the aforesaid bill.

Resolved, That the House agree to the amendment of the Senate to the title of the bill.

Mr. LONG. Mr. President, this bill was passed by the Senate with amendments. The House sent the bill back to the Senate, accepting the Senate's bill with amendments, but disagreeing to the freight car amendment.

Unless the Senate now reconsiders and sends the bill back to the House without the freight car amendment, I am informed the bill cannot be passed, and that it will die.

I move that the Senate recede from its amendment No. 2, which is the amendment needed for freight cars.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

Is there objection? Without objection, it is so ordered.

The Senator from West Virginia.

EDUCATION AMENDMENTS OF 1978—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I submit a report of the committee of conference on H.R. 15 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 15) to extend and amend expiring elementary and secondary education programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the proceedings of the House of Representatives.)

Mr. ROBERT C. BYRD. Mr. President, the Senate just recently agreed to the conference report on the Elementary and Secondary Education Act Amendments of 1978.

This action represents a major legislative accomplishment of the 95th Congress. It renews the Federal commitment to support education and assures that students from every income level will have access to learning opportunities. That commitment is as old as the Republic itself, and I think it is appropriate at this time to examine more closely the historical development of education in America and the role of the Federal Government in its growth.

Mr. President, it has been said that education is the Nation's largest and perhaps most open enterprise. Almost all Americans become involved in it at one or more periods in their lives.

During the 1977–78 school year, education was the major occupation of approximately 63.8 million people. That total represents an estimated 60.4 million students enrolled in schools and colleges, 3.1 million teachers, and about 300,000 superintendents, principals, supervisors and other instructional staff members. In a Nation of approximately 219 million people, this means that almost 3 out of every 10 Americans is directly involved in the educational process.

Expenditures for public and private education from kindergarten through graduate school were approximately $144 billion for the 1977–78 school year. Total expenditures for the 1978–79 school year are expected to exceed $155 billion. Elementary and secondary schools will spend about $100 billion, while colleges and universities will spend $55 billion.

Adequate financing for education is a prerequisite for quality education. While State and local governments finance the greater portion of education costs, continually rising expenses have necessitated their seeking additional funding from traditional contributors. The major contributor to education has been the Federal Government. A participant in education since 1785, the Federal Government's role in providing support to education has expanded as the education system itself has grown larger and more diverse and complex.

In recent years, this role has grown substantially. Federal grants in fiscal year 1966 amounted to $5.2 billion. In 1976, they reached almost $19.1 billion. Grants to elementary and secondary education increased from $2 billion to about $4.8 billion during this 10-year period, while grants to higher education went from $2.3 billion to $9.6 billion. The largest increase, however, was in grants for vocational technical and continuing education, which rose from $923 million in 1966 to about $4.7 billion in 1976. This amounted to about a fivefold increase in one decade.

As evidenced by the preceding figures, the Federal Government has repeatedly demonstrated its willingness to appropriate funds for the support of education. This year has been no exception. The Congress reaffirmed the Federal commitment to support education with its consideration of a number of education bills: amendments to the Higher Act of 1965 and amendments to the Elementary and Secondary Education Act of 1965 (ESEA), among them.

The bills authorize continued funding for the general purposes of improving educational quality in the Nation's elementary and secondary schools and colleges and universities and strengthening programs which make educational opportunities available to students from low-income backgrounds. The funding contained in ESEA insures continued maintenance of essential State and local education programs for disadvantaged youths from low-income school districts. The Higher Education Act amendments will continue providing financial assistance to students whose own financial situation would deny them access to college.

While no one can argue that State and local governments could not continue education programs for financially-burdened students without Federal assistance, many have argued the question of exactly what the proper role of the Federal Government in education is and should be. Some argue that State and local governments can do an adequate job of public education without Federal assistance. Others maintain that the responsibilities of the States to support education are so varied and wide that some could never provide an adequate level of education without Federal assistance. Others insist that the national interest requires that the Federal Government support education in every State.

It is worthwhile at this point, Mr. President, to examine the role of Federal participation in education from an historical perspective. This approach, I believe, will lend a clearer, fuller understanding of what the proper role of the Federal Government in education is today and how that role is performed with respect to the provisions contained in the education legislation considered by the 95th Congress.

All of us recognize the importance and significance of education. It is fundamental to the continued health, security and well-being of our nation. Almost 200 years ago, one of our Founding Fathers, Thomas Jefferson, said of American education:

The Commonwealth requires the Education of her people as the safeguard of order and liberty. . . . Above all things, I hope the education of the common people will be attended to: convinced that on this good sense we may rely with the most security for the preservation of a due degree of liberty. . . .

The history of education in the United

States is one of continual adaptation to recognized social and economic needs; its development reflects changes in the prevailing social, political and economic conditions of the times.

This history also traces the Federal Government's role as a participant in American education's growth. The Federal commitment to education is as old as the Republic itself. Even before the adoption of the Constitution in 1789, the national Congress, operating under the Articles of Confederation, established a role for the Federal Government in education. Under the Survey Ordinance of 1785, which outlined the disposal of land in the Western Territory, one section of land in every township was set aside for the endowment of education; 2 years later, the Northwest Ordinance included a provision requiring land to be reserved for local schools. This document contained the first statement of policy by Congress with respect to education:

> Religion, morality, and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged.

Several years later, when the Constitution was adopted, no specific reference was made to the Federal Government's role in education. Since the 10th amendment to the Constitution provided that powers not delegated to the Federal Government were reserved to the States, public education, as it progressed, came generally under State jurisdiction. Federal involvement grew out of provisions contained in the General Welfare Clause. Article I, section 8 of the Constitution authorizes Congress to levy taxes and appropriate moneys to provide for the general welfare.

In colonial America, the primary purpose of education was to provide religious education. Children were taught rudimentary reading skills so that they could be instructed in the lessons of the Bible. In addition to their religious character, most schools were private.

Later in the 17th century, a number of States took steps to establish some kind of central control over schools and require parents to see that their children attend. They also sought to establish minimum standards for the curriculum: instructions in reading, religion, the capital laws, and preparation for a trade. These goals were achieved with varying degrees of success. Government participation during this time was minimal and limited mostly to the granting of charters and occasional subsidies to private academies and colleges.

Educational instruction underwent fundamental changes in the 18th century. Schools began introducing courses in literature and manners to prepare students for formal and social life. Vocational education also went through a period of growth during this period, and academies appeared which offered college-preparatory courses as well as training for business or trade.

Also during the 18th century, the growth of religious freedom and the spread of sectarian controversies altered State and Federal support for private institutions, and, in turn, affected the further development and character of both private and public institutions.

As a result of these movements, tax support to sectarian institutions was barred, and a prohibition against legal intervention in what were defined as private colleges was instituted. Having lost State and Federal support, private institutions were free to exercise greater control over enrollment and curriculum decisions. Their programs preserved the traditional college liberal arts model. Public schools, on the other hand, sought to please State legislatures and so offered courses of a pragmatic and professional nature.

Late in the 19th and early in the 20th centuries, education as we know it today made its greatest strides in development. Increasing urbanization and industrialization stimulated an increase in the number and types of institutions and in the number of students. By 1918, every state had compulsory education laws.

AID TO HIGHER EDUCATION

Much of the early history of Federal participation in education concerns Federal aid to higher education. It was the subject of most of the legislation and received a major portion of Federal funds allocated for educational purposes.

The most significant 19th century development in Federal assistance to higher education was passage of the Morrill Act in 1862, providing land grants to States and territories for the establishment of colleges specializing in agriculture and mechanical arts.

The bill, named for Representative, and later Senator, Justin S. Morrill of Vermont, was supported by those having an interest in agricultural education and who were dissatisfied with the limited kinds of college courses offered at that time. Classical studies were virtually the only subjects taught. Pure science was neglected, and applied science courses in agriculture and the mechanical arts were almost nonexistent.

The legislation specified the type of education which was to be offered by the land grant colleges. The interest from the sale of the land or scrip was to be devoted to:

> The endowment, support, and maintenance of at least one college where the leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanics arts.

States which accepted the funds did so with the knowledge that these requirements had to be met.

In 1890, the Second Morrill Act established a policy of annual appropriations to land grant colleges for:

> Instruction in agriculture, the mechanics arts, the English language, and the various branches of mathematical, physical, natural and economic science, with special reference to their application in the industries of life.

The Morrill Acts marked the beginning of the Federal Government's participation in decisions concerning the choice of school curricula. For three quarters of a century, from 1785 when legislation was enacted for the first time setting aside tracts of land for education until 1862, it had exercised little or no control over the teaching programs of the land grant colleges and universities. The legislation enacted in 1862 and 1890 represented the first instances of Federal support being given on a conditional basis in order to attain a specific national goal.

The years following World War II represent the most significant period of sustained congressional consideration of general Federal aid to education. Numerous programs were enacted during this period in response to the increasingly diverse and complex changes which occurred in the United States and the world after the war. However, most of the programs provided limited assistance to specially targeted groups or activities.

In 1944, the Servicemen's Readjustment Act—better known as the GI bill of rights—was enacted to take care of the educational needs of veterans who had interrupted their education or who could not continue postsecondary education due to military service. Almost eight million veterans received financial aid for tuition, books, supplies, counseling services and student living expenses. Similar programs were established in subsequent years to assist veterans of other wars.

Programs which assisted students in their pursuit of an education but were not strictly education-oriented were also initiated. Among them was the 1950 College Housing Act which authorized 40-year low-interest Government loans for public and private colleges and universities to provide student housing.

In 1957, the Soviet Union launched Sputnik I, resulting in widespread criticism of the American education system. There was growing concern that existing educational programs had an inadequate representation of courses in science, mathematics and foreign languages and that talented youth were being denied the opportunity of a college education because of insufficient funds. Many feared that the situation at that time was having a deleterious effect on the quality of American science and our ability to compete with the rest of the world in scientific achievement.

The American education system underwent an intense re-evaluation, resulting in passage of the National Defense Education Act of 1958. According to the Congressional Quarterly, it was "by far the largest Federal commitment to the national general education level." It provided an original authorization of $1 billion to set up a program to provide and improve the teaching of science, math and foreign languages at all school levels. This represented the first general Federal aid program to be enacted by Congress.

Higher education grew at a rapid pace during the 1960's and early 1970's. Increased Federal participation paralleled this growth. Major new initiatives were enacted to help finance the increasing costs of higher education and provide additional aid to students who could not afford to cover the expenses alone.

The sharp increase in college enrollments during this period created a shortage of classrooms and related facilities. To correct this problem, Congress enacted in 1963 the Higher Education Facilities Act, which authorized grants and

loans for construction, rehabilitation or improvement of needed academic and related facilities in under-graduate and graduate institutions.

The diversity and variety of educational programs were expanded to help students prepare themselves for careers in an increasingly complex and technical society. Programs in vocational education were established to help train students in their choice of a variety of vocational and technical careers. Federal assistance was provided under the Vocational Education Act of 1963 which authorized increased Federal funding for vocational education programs. Eligibility was broadened to include training in any occupation that did not require 4 years of college.

Congress expanded existing college assistance programs with passage of the 1965 Higher Education Act. The legislation authorized a 3-year, $2.5 billion program which included grants and loans to students; grants for libraries and library training programs; grants for developing institutions; fellowships for persons engaged in education careers; and funds to help pay for construction projects at public community colleges and technical institutes.

The Higher Education Act of 1965 has been amended a number of times since its enactment. Each time, the Congress has sought to update provisions in the legislation, making them more responsive to the changing needs and interests of recipients of aid under this act, as well as having them better reflect changes in the educational system itself. This periodic review also seeks to address familiar issues associated with aid to higher education, that is, enrollment growth, scholastic achievement, desegregation, access to higher education by women and other minorities, and financing in general.

This year, Congress again considered amendments to the Higher Education Act. Proposed changes reflect our concern with inflation and the rising costs of education and their impact on lower- and middle-income taxpayers. It is becoming increasingly difficult for these groups to pay for their children's educations without some type of assistance.

Proposed amendments to the act will ease the financial burden placed on lower- and middle-income taxpayers by the high cost of education. Students who otherwise would not be able to attend college due to insufficient financial means will have a better chance of obtaining Federal aid under the proposed funding increases in the bill.

AID TO ELEMENTARY AND SECONDARY EDUCATION

In its early stages of development, education below the college level remained for a long time a matter of church and family responsibility. The first elementary schools provided reading courses so children could be instructed in the lessons of the Bible.

Secondary education became the responsibility of private academies. Government participation was limited to granting charters and occasional subsidies.

As noted earlier, sectarian controversies and a growing spirit of religious freedom influenced the withdrawal of tax support for sectarian institutions as well as a prohibition against legal intervention in the affairs of private schools. After these events, limited State control of public institutions accelerated. Seeking the approval of State legislatures, public schools offered programs instructing students in the daily activities of the working world.

Federal participation in education below the college level during these years was limited, at best. In 1917, passage of the Smith-Hughes Act marked the beginning of a new policy of Federal participation in elementary and secondary education. The legislation provided funds to assist States in developing vocational education programs at public schools. The program was limited, however, to courses in home economics, agriculture, trade and industrial education, and teacher-training courses in these fields.

The years between 1940 and 1965 represent a significant period in the history of Federal participation in elementary and secondary education. Numerous programs were enacted by Congress to assist States in their education efforts. However, they were limited in that they provided assistance for particular programs for the purpose of attaining a specific goal.

The first of these was the Lanham Act of 1940. Amended in 1941, it was an emergency war act providing aid to communities financially burdened by increased school enrollments because of the presence of nearby military installation. Federal aid was provided for construction, maintenance, and operation of schools in these federally impacted areas. It was a forerunner to emergency school aid between 1946 and 1950 and impacted areas aid of 1950.

The National Defense Education Act of 1958 included Federal aid for elementary and secondary education for programs in science, mathematics and foreign languages. Students showing a talent for these subjects were given priority attention in this program, which was established to strengthen America's scientific abilities by drawing more students into programs of a scientific nature. This legislation represented the first step toward general Federal aid for elementary and secondary education. However, it was still limited in that it covered only those programs of a scientific nature, and students showing promise in careers as scientists were the primary recipients of aid.

Other examples of legislation which provided limited Federal aid for a specific purpose included the National School Lunch Act (1946) and the School Milk Program Act (1954).

During these same years, the concept of general Federal aid to education gained acceptance slowly. Numerous efforts were made to enact some type of general aid bill, but they were held up by intense debate.

In the 1960's, however, fundamental changes in the Congress and in the social fabric of the Nation were paving the way for passage of the first general aid bill for elementary and secondary education. The education needs of previously underserved children became more fully realized, and Congress focused increased attention on how best to accommodate the special needs and interests of disadvantaged students.

The additional services required by these groups and the best means of delivering them were addressed in the Elementary and Secondary Education Act of 1965. The purpose of the act was to improve the educational quality in the Nation's elementary and secondary schools with particular emphasis upon school districts serving a large number of children from low-income families. Grants were provided to help purchase instructional materials; to assist State educational agencies in fulfilling the educational needs of children in these low-income districts; and to improve and strengthen education-related activities.

The act has been amended several times to reflect changing social and economic conditions, as well as to include additional programs and services for children other than those from low-income families. The special educational needs of handicapped children and non-English speaking children have contributed to the increasing diversity and size of the programs authorized by this legislation.

ESEA was amended in 1966 to include programs and projects for the education of handicapped children. In 1967, bilingual education was added to the act.

Over the years, obsolete programs have been eliminated, others have been updated to reflect the increasing variety of students and student needs, others have been consolidated to avoid duplication and permit smoother, faster administration.

The Elementary and Secondary Education Act Amendments of 1978 will benefit over 6.5 million students from disadvantaged backgrounds. The current dissatisfaction and concern of many people with the achievement levels of students have been addressed in the legislation. Assistance is provided to States and local educational agencies for programs to help improve and strengthen the basic skills of reading, mathematics, and oral and written communications. The bilingual education program is improved and strengthened. Additional services are provided for Indian children.

The actions taken by the 95th Congress to amend the Higher Education Act and the Elementary and Secondary Education Act restates the role of Federal participation in education—to support State and local governments in their efforts to provide an adequate education for students of all ages; to protect the education rights of disadvantaged students and insure that their special needs are met; and to insure uniform, adequate education standards nationwide.

● Mr. PELL. Mr. President, the conference report on H.R. 15, the Education Amendments of 1978, to my mind represents one of the best pieces of legislation dealing with Federal assistance to elementary and secondary education ever brought before the Senate. It was the product of long and hard negotiation with our colleagues from the House Education and Labor Committee. The ensu-

ing compromise represents a balanced approach to Federal aid to elementary and secondary education.

The conference agreement extends existing programs, as amended, through fiscal year 1983. It seeks to reduce the amount of paperwork required of State and local education officials to the greatest extent possible. In addition, it assures children in nonpublic schools of full participation in federally assisted educational programs.

Title I of the conference agreement rewrites title I of the Elementary and Secondary Education Act, the major Federal program of aid to elementary and secondary education, to make its requirements simpler and clearer. New moneys appropriated for compensatory education programs will be equally split between the formula in existing law, which is based on the 1970 census and the presence of children receiving aid to families with dependent children, and a new formula based upon the 1975 Census Bureau survey of income and education. Reliance upon both of these indices of poverty will give the program a solid statistical base, while reflecting some changes in residence patterns of the poor which have occurred since 1970. The net result deals even-handedly with all areas of the country.

In addition, the conference agreement adopted two new programs sought by the administration—a program of matching funds for incentive grants for States to adopt their own compensatory education programs, and a program of $400 million in grants to urban and rural school districts enrolling an extremely high number or percentage of children from low-income families. No State will receive less than 0.25 percent of the funds available for the concentration grant program.

The bill adopts the administration's new basic skills program, with emphasis on grants from the Secretary for projects seeking to improve reading, writing, mathematics, and communications skills. As we are all to well aware, recent studies have shown an alarming decline in our students' basic skills capacity. This program seeks to reverse this decline.

In the area of paperwork reduction, the conference agreement authorizes the Secretary of Health, Education, and Welfare to serve as a coordinator of data and information requests from all Federal agencies to schools and colleges. He would have the power to deny duplicative and unnecessarily burdensome requests, subject to the review of the Office of Management and Budget. In other programs, annual reports are changed to biennial submissions, and applications are required only once every 3 years. This should substantially reduce the flow of paper between our Nation's schools and Washington, D.C.

The conference agreement extends the provisions of several successful categorical aid programs, such as metric education and arts in education. In addition, it expands the authorization for others, such as education of gifted and talented children and women's educational equity.

By far the most difficult issue for the conferees to resolve was impact aid. The House bill expanded the existing law, without changing its basic structure as a three-tier system of mandatory funding levels. The Senate amendment sought to strike the tier system completely, giving discretion in funding levels and categories of children to the appropriations process. The conferees met until the early morning hours in an attempt to compromise these substantial differences, but broke up in continued disagreement.

The final agreement, reached after a number of additional hours of discussion, represents, to my mind, the best compromise we could have achieved in sustaining the intent of the Senate. It provides a measure of flexibility for the appropriations process to determine relative funding levels, while assuring school districts currently receiving impact aid that they will not suffer catastrophic and immediate reductions in their impact aid payments. As the program progresses through the years, it is my hope that impact aid payments to various school districts become an accurate reflection of their actual need and the effects of Federal impact.

I would like to pay tribute to my fellow conferees for their long and untiring efforts in arriving at a successful conference agreement. I would also like to express my personal gratitude to Chairman CARL A. PERKINS of the House conferees, who chaired the conference with an experienced gavel. Without his persistence and good humor, the conference could have dissolved at several points.

Finally, I would like to thank the Government Printing Office for their outstanding service in preparing drafts of the bill and statement of managers during this frenzied period. In addition, I would like to express my appreciation to Blair Crownover of the office of the Senate Legislative Counsel and to Steve Cope of the office of the House Legislative Counsel, for the many long hours they put in in drafting and honing the final conference document.

I urge my colleagues to adopt this report.●

● Mr. JAVITS. Mr. President, after several days of conference, including one especially challenging session that stretched until 2:30 a.m., I am pleased to announce my support for the conference agreement on H.R. 15, the Elementary and Secondary Education Amendments of 1978. Before discussing the conference report, however, I would like to give credit to certain of my colleagues in both Houses whose expertise with this vast piece of legislation, and whose remarkable fortitude in the face of some radical differences between the two bills deserve special mention.

I offer my respect and congratulations to Senator PELL, the Education Subcommittee chairman, for his leadership in producing a conference report in which we can all take great pride.

On the House side, I wish to credit three Members in particular. Representative CARL PERKINS, chairman of the full Education and Labor Committee, masterfully chaired the conference committee with an experienced and disciplined hand. Representative AL QUIE, ranking minority member of the Education Subcommittee and the full committee, has clearly improved the quality of this legislation as well as numerous other education measures by his active and responsible participation. And Representative BILL FORD, long a vigorous and expert member of the Elementary, Secondary and Vocational Education Subcommittee, showed an impressive in-depth and wide-ranging knowledge of the various issues before us in conference.

This conference agreement on H.R. 15 contains programs necessary to provide educational opportunity for all. It successfully balances the various competing interests for additional funds with the reality of budget constraints. It adheres to categorical prescriptions for funds, providing money only for specified Federal purposes. The conference was not an easy one, for multitudes of differences between the House and Senate bills and a number of major discrepancies represented highly conflicting points of view. The resulting agreement as contained in the conference report carries my full and enthusiastic support.

Throughout the development of H.R. 15, I have stressed three primary goals: increased equity in the distribution of aid to urban and rural school districts, reduction of paperwork, and full participation in eligible programs by students in nonpublic schools. The conference agreement achieves all three goals.

In addition, the final legislation contains two expanded programs in which I have a unique personal interest: gifted and talented children, and adult education programs which includes a new authorization for adult immigrants.

Under ESEA title I, the single largest programs for Federal education funds, the conference agreement provides a new program authorizing $400 million in "concentration grants" for school districts with the highest numbers and concentrations of low-income children. All school districts in counties with over 5,000 or 20 percent poor children are entitled to receive funds in addition to their basic grant amount for providing remedial services to disadvantaged children. This will benefit the most needy urban and rural school districts in the Nation.

The title I formula is revised to permit a full count, rather than the two-thirds in current law, of children in families whose payments from AFDC raise their income above the poverty level.

And beginning in fiscal year 1980, 50 percent of the basic grant funds above the fiscal year 1979 appropriated level will be distributed according to new data derived from combining the population count according to the 1975 survey of income and education with a poverty level set at 50 percent of the national median income.

Unlike the 1974 bill, which was highly discriminatory to my State, this agreement represents a balanced approach throughout the Nation.

The impact aid program contained the largest discrepancy between the House and Senate bills. The Senate bill, in the interest of budgetary restraint and greater congressional funding flexibility,

deleted "tier two" entirely from the existing structure of mandated appropriations. The House version, in the interest of assuring funds to school districts serving many children whose parents live or work on nontaxable Federal property, mandated increased appropriations for all types of students in the impact program. After long hours of debate and discussion, a compromise was reached which fixes the appropriations for a portion, rather than all, of the second tier. The end result is greater leeway in the appropriations process than the Congress now enjoys under current law for determining spending levels, and fairer treatment of various classes of students. A hold harmless provision is included to avoid any abrupt radical reductions in any school district.

The conference report merges my proposals for building an expanded program for gifted and talented children with a similar proposal sponsored by Representative PURSELL in the House bill. Mr. PURSELL shares my firm commitment to establishing the best possible vehicle for improving services to these children, and H.R. 15 contains such a vehicle. This will build upon the success of the gifted program over the last four years in the "basket" of the Special Projects Act. A new program will provide State grants for statewide planning and local programs. Research and evaluation capabilities and a clearinghouse are also authorized. A set percentage of the funds must be used to identify and serve disadvantaged children who show special promise.

An expanded adult education delivery system and new program for adult immigrants, which I sponsored in the Senate version, are also included in the education amendments. The service delivery system will be opened up to permit not just educational institutions, but also businesses, labor unions, community organizations, and other local groups to operate programs in various locations and with flexible schedules suited to the needs of adults desiring basic educational courses.

The conferees retained a Senate amendment which places into the statute, for the first time, specific and detailed authority for the highly successful national assessment of educational progress (NAEP). As NAEP is an ongoing activity, this provision is intended to take effect immediately upon enactment of H.R. 15 into law, to prevent severe disruption or delay in the surveys. In recent years the assessment has given the Congress, the education community and concerned families a comprehensive view of what students across the country are actually learning. It is the intention of the conferees that by giving NAEP statutory authority we will assure continuation of a reliable and valuable research tool. I fully expect that the officials in HEW will act promptly to transfer NAEP activity to NIE and assure a smooth transition while maintaining the continuity which is vital to this study. H.R. 15 maintains the current practice of awarding this effort on a competitive basis to the best qualified provider of services. I believe this kind of competition is proper and necessary to secure the best possible quality and usefulness. However, any such competition carried out after enactment of H.R. 15 must conform with its new provisions.

H.R. 15 is a massive piece of legislation containing numerous programs not mentioned in my preceding remarks, yet it fulfills only partially the responsibility of the Federal Government to assure that all groups of students have an equal opportunity to receive an education of high quality.

Mr. President, the sheer size of this measure placed a tremendous burden on the expertise and dedication of many staff members. I should like to note the contribution of the Senate Human Resources Committee staff and the House Education and Labor Committee staff, who devoted many hours to the preparation of the documents for the conference report. I should also like to give well-deserved credit to the Office of Legislative Counsel and the staff of the Government Printing Office. They worked literally around the clock and 7 days a week to produce the necessary documents which record the agreement of the conferees. In particular, I would like to mention the dedicated and expert services of Mr. Blair Crownover of the Senate Legislative Counsel and Mr. Steve Cope of the House Legislative Counsel.●

Mr. BELLMON. Mr. President, I would like to take this opportunity to congratulate the Senate conferees on their work in what I know was a most difficult conference.

In all candor, and with some regret I must admit that an amendment I sponsored contributed to the difficulty of their task. My amendment, which would have eliminated the tier funding structure in impact aid, nearly deadlocked the conference. I am well aware that some of the Senate conferees strongly opposed this amendment on the floor of the Senate. I am also aware that the House conferees were adamant in their insistence that they could not accept this amendment. I admire and appreciate the way Senators PELL, JAVITS, EAGLETON, STAFFORD, and all of the other Senate conferees supported the Senate position; and I am extremely pleased with the compromise finally reached by the conferees.

If we are to achieve our common goal of balancing the Federal budget in the near future, we must be able to review competing priorities as we appropriate funds. The compromise achieved in conference makes significant progress toward this objective, as it applies to the impact aid program.

Once again, Mr. President, I want to congratulate the Senate conferees.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Louisiana.

DUTY ON WOOL

Mr. LONG. Mr. President, the other day the Senate approved as title VI of the big tax cut bill a series of welfare amendments. We have run into a problem in getting the proper consideration of these matters by the House conferees on the tax bill.

To ease this logjam, I believe that we should put these matters on another bill.

Mr. President, I therefore ask unanimous consent that the Committee on Finance be discharged from further consideration of H.R. 3946, a bill to suspend for a temporary period the rate of duty on wool; that the Senate proceed to its immediate consideration; that the only amendment that would be in order would be an amendment to be offered by the Senator from California (Mr. CRANSTON) incorporating the Senate-passed provisions of the tax bill, and that the amendment not be subject to further amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3946) to suspend for a temporary period the rate of duty on wool not finer than 46s.

UP AMENDMENT NO. 2903

Mr. CRANSTON. Mr. President, I send to the desk the amendment described by the Senator from Louisiana and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes an unprinted amendment numbered 2903.

Mr. CRANSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

TITLE I—ADOPTION AND FOSTER CARE, AND CHILD WELFARE SERVICES

FEDERAL PAYMENTS FOR ADOPTION ASSISTANCE AND FOSTER CARE

SEC. -01. (a) Title IV of the Social Security Act is amended by adding at the end thereof the following new part:

"'PART E—FEDERAL PAYMENTS FOR ADOPTION ASSISTANCE AND FOSTER CARE

"STATE PLAN FOR ADOPTION ASSISTANCE AND FOSTER CARE

"SEC. 470. (a) In order for a State to be eligible for payments under this part, it shall have a plan approved by the Secretary which provides—

"(1) that the State agency responsible for administering the program authorized by part B of this title shall administer the program authorized by this part;

"(2) that the plan shall be in effect in all political subdivisions of the State, and, if administered by them, be mandatory upon them;

"(3) that the State shall assure that the programs at the local level assisted under this part will be coordinated with the programs at the State or local level assisted under parts A and B of this title, under title XX of this Act, or under any other appropriate provision of Federal law;

"(4) that the State will, in the adminis-

tration of its programs under this part, use such methods relating to the establishment and maintenance of personnel standards on a merit basis as are found by the Secretary to be necessary for the proper and efficient operation of the programs, except that the Secretary shall exercise no authority with respect to the selection, tenure of office, or compensation of any individual employed in accordance with such methods;

"(5) that the State agency referred to in paragraph (1) (hereinafter in this part referred to as the 'State agency') will make such reports, in such form and containing such information as the Secretary may from time to time require, and comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and certification of such reports;

"(6) that the State agency will monitor and conduct periodic evaluations of activities carried out under this part;

"(7) safeguards which restrict the use of or disclosure of information concerning individuals assisted under the State plan to purposes directly connected with (A) the administration of the plan of the State approved under this part, the plan or program of the State under part A, B, C, or D of this title or under title I, V, X, XIV, XVI (as in effect in Puerto Rico, Guam, and the Virgin Islands), XIX, or XX, or the supplemental security income program established by title XVI, (B) any investigation, prosecution, or criminal proceeding, conducted in connection with the administration of any such plan or program, (C) the administration of any other Federal or federally assisted program which provides assistance, in cash or in kind, or services, directly to individuals on the basis of need, and (D) any audit or similar activity conducted in connection with the administration of any such plan or program by any governmental agency which is authorized by law to conduct such audit or activity; and the safeguards so provided shall prohibit disclosure, to any committee or a legislature body (other than the Committee on Finance of the Senate, the Committee on Ways and Means of the House of Representatives, and any agency referred to in clause (D) with respect to an activity which identifies by name or address any such applicant or recipient; except that nothing contained herein shall preclude a State from providing standards which restrict disclosure to purposes more limited than those specified herein, or which, in the case of adoptions, prevent disclosure entirely;

"(8) that where any agency of the State has reason to believe that the home or institution in which a child resides whose care is being paid for in whole or in part with funds provided under this part or part B of this title is unsuitable for the child because of the neglect, abuse, or exploitation of such child, it shall bring such condition to the attention of the appropriate court or law enforcement agency;

"(9) that the standards referred to in section 2003(d)(1)(F) shall be applied by the State to any foster family home or child care institution receiving funds under this part or part B of this title;

"(10) for periodic review of the standards referred to in the preceding paragraph and amounts paid as foster care maintenance payments and adoption assistance payments to assure their continuing appropriateness;

"(11) that any individual who is denied a request for benefits available pursuant to this part or part B of this title (or whose request for benefits is not acted upon within a reasonable time) will be informed of the reasons for the denial or delay and, if he so requests, will be offered an opportunity to meet with a representative of the agency administering the plan to discuss the reasons for the denial or delay; and

"(12) that the State shall arrange for a periodic and independently conducted audit of the programs assisted under this part and part B of this title, which shall be conducted no less frequently than once every three years.

"(b) The Secretary shall approve any plan which complies with the provisions of subsection (a) of this section. However, in any case in which the Secretary finds, after reasonable notice and opportunity for a hearing, that a State plan which has been approved by the Secretary no longer complies with the provisions of subsection (a), or that in the administration of the plan there is a substantial failure to comply with the provisions of the plan, the Secretary shall notify the State that further payments will not be made to the State under this part, or that such payments will be made to the State but reduced by an amount which the Secretary determines appropriate, until the Secretary is satisfied that there is no longer any such failure to comply, and until he is so satisfied he shall make no further payments to the State, or shall reduce such payments by the amount specified in his notification to the State.

"FOSTER CARE MAINTENANCE PAYMENTS PROGRAM

"SEC. 471. (a) Each State with a plan approved under this part may make foster care maintenance payments (as defined in section 475(4)) under this part only with respect to a child who would meet the requirements of section 406(a) or of section 407 of this Act but for his removal from the home of a relative (specified in section 406(a)) if—

"(1) the removal from the home was (A) the result of a judicial determination to the effect that continuation therein would be contrary to the welfare of such child;

"(2) such child's placement and care are the responsibility of (A) the State agency administering the State plan approved under section 470, or (B) any other public agency with whom the State agency administering or supervising the administration of the State plan approved under section 470 has made an agreement which is still in effect;

"(3) such child has been placed in a foster family home or child-care institution as a result of such determination;

"(4) such child—

"(A) received aid under the State plan approved under section 402 in or for the month in which court proceedings leading to the removal of such child from the home was initiated, or

"(B)(i) would have received such aid in or for such month if application had been made therefor, or (ii) had been living with a relative specified in section 406(a) within six months prior to the month in which such proceedings were initiated, and would have received such aid in or for such month if in such month he had been living with such a relative and application therefor had been made; and "(5) there is a case plan (as defined in section 475(1) of the part) for such child (including periodic review of the necessity for the child's being in a foster family home or child-care institution).

"(b) Foster care maintenance payments may be made under this part only in behalf of a child described in subsection (a) of this section—

"(1) in the foster family home of any individual, whether the payments therefor are made to such individual or to a public or nonprofit private child-placement or child-care agency, or

"(2) in a child-care institution, whether the payments therefor are made to such institution or to a public or nonprofit private child-placement or child-care agency, which payments shall be limited so as to include in such payments only those items which are included in the term 'foster care maintenance payment' (as defined in section 475(4)).

"(c) For the purposes of this part and part B of this title, (1) the term 'foster family home' means a foster family home for children which is licensed by the State in which it is situated or has been approved, by the agency of such State having responsibility for licensing homes of this type, as meeting the standards established for such licensing; and (2) the term 'child-care institution' means a nonprofit private child-care institution, or (subject to the succeeding sentence) a public child-care institution which accommodates no more than twenty-five children, which is licensed by the State in which it is situated or has been approved, by the agency of such State responsible for licensing or approval of institutions of this type, as meeting the standards established for such licensing; but the term shall not include detention facilities, forestry camps, training schools, or any other facility operated primarily for the detention of children who are determined to be delinquent. A public institution which on the effective date of this part accommodates children and which, except for the provisions of this sentence would be a child-care institution (as defined in the preceding sentence), shall not, for purposes of this part, be considered to be a child-care institution (as so defined) with respect to any child who was in such institution on the date of enactment of this part.

"(d) For purposes of title XIX of this Act, any child with respect to whom foster care maintenance payments are made under this section shall be deemed to be a dependent child as defined in section 406 and shall be deemed to be a recipient of aid to families with dependent children under part A of this title.

"ADOPTION ASSISTANCE PROGRAM

"SEC. 472. (a)(1) Each State with a plan approved under this part may, directly or through another public or nonprofit private agency, make adoption assistance payments pursuant to an adoption assistance agreement in amounts determined under paragraph (3) of this subsection to parents who are eligible for such payments pursuant to paragraph (2) of this subsection and who, after the effective date of this section, adopt a child who—

"(A) would meet the requirements of section 406(a) or section 407 of this Act except for his removal from the home of a relative (specified in section 406(a)) as a result of a judicial determination to the effect that continuation therein would be contrary to the welfare of such child,

"(B)(i) received aid under the State plan approved under section 402 in or for the month in which court proceedings leading to the removal of such child from the home were initiated, or

"(ii)(I) would have received such aid in or for such month if application had been made therefor, or (II) had been living with a relative specified in section 406(a) within six months prior to the month in which such proceedings were initiated, and would have received such aid in or for such month if in such month he had been living with such a relative and application therefor had been made, and

"(C) the State has determined, pursuant to subsection (c) of this section, is a child with special needs.

"(2) Parents may be eligible for adoption assistance payments under this part only if their income at the time of the adoption does not exceed 115 per centum of the median income of a family of four in the State, adjusted in accordance with regulations of the Secretary to take into account the size of the family after adoption. Notwithstanding the preceding sentence, parents whose income is above the limit specified therein may be eligible for assistance payments under this part if the State or local agency administering the program under this

section determines that there are special circumstances (as defined in regulations of the Secretary) in the family which warrant adoption assistance payments.

"(3) The amount of the adoption assistance payments shall be determined through agreement between the adoptive parent (or parents) and the State or local agency administering the program under this section, which shall take into consideration the circumstances of the adopting parents and the needs of the child being adopted, and may be readjusted periodically, with the concurrence of the adopting parents (which may be specified in the adoption assistance agreement), depending upon changes in such circumstances. However, in no case may the amount of the adoption assistance payment exceed the foster care maintenance payment which would have been paid during the period if the child with respect to whom the adoption assistance payment is made had been in a foster family home.

"(4) Notwithstanding the preceding two paragraphs, (A) no payment may be made to parents pursuant to this section with respect to any month in a calendar year following a calendar year in which the income of such parents exceeds the limits specified in paragraph (2), unless the State or local agency administering the program under this section has determined, pursuant to paragraph (2), that there are special circumstances in the family which warrant adoption assistance payments, (B) no payment may be made to parents with respect to any child who has attained the age of eighteen, and (C) no payment may be made to parents with respect to any child if the State determines that the parents are no longer legally responsible for the support of the child or if the State determines that the child is no longer receiving any support from such parents. Parents who have been receiving adoption assistance payments under this section shall keep the State or local agency administering the program under this section informed of circumstances which would, pursuant to this subsection, make them ineligible for such assistance payments, or eligible for assistance payments in a different amount.

"(5) For the purposes of this part, individuals with whom a child (who the State determines, pursuant to subsection (c), is a child with special needs) is placed for adoption, pursuant to an interlocutory decree, shall be eligible for adoption assistance payments under this subsection, during the period of the placement, on the same terms and subject to the same conditions as if such individuals had adopted such child.

"(b) Any child—

"(1) who the State determines meets the requirements of subsection (a); and

"(2) who is placed for adoption or adopted following such determination

shall, with respect to any medical condition which was in existence at the time the child was adopted, retain such eligibility until the age of eighteen under such plan. However, a State may provide to such a child full eligibility for medical assistance under the State's plan approved under title XIX.

"(c) For purposes of this section, a child shall not be considered a child with special needs unless—

"(1) the State has determined that the child cannot or should not be returned to the home of his parents; and

"(2) the State has first determined (A) that there exists with respect to the child a specific factor or condition because of which it is reasonable to conclude that such child cannot be placed with adoptive parents without providing adoption assistance, and (B) that, except, where it would be against the best interests of the child because of such factors as the existence of significant emotional ties with prospective adoptive parents while in the care of such parents as a foster child, a reasonable, but unsuccessful, effort has been made to place the child with appropriate adoptive parents without providing adoptive assistance under this section.

"(d) Notwithstanding any other provision of this part, no adoption assistance payment under a State plan approved under this part shall be made pursuant to any adoption assistance agreement entered into after September 30, 1983.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 473. For the purpose of carrying out this part, other than section 476, there are authorized to be appropriated for each fiscal year (commencing with the fiscal year which begins October 1, 1978) such sums as may be necessary.

"PAYMENTS TO STATES; ALLOTMENTS TO STATES

"SEC. 474. (a) For each quarter beginning after September 30, 1978, each State which has a plan approved under this part (subject to the limitations imposed by subsection (b)) shall be entitled to a payment equal to the sum of—

"(1) an amount equal to the Federal medical assistance percentage (as defined in section 1905(b) of this Act) of the total amount expended during such quarter as foster care maintenance payments under section 471 for children in foster family homes or child-care institutions; plus

"(2) an amount equal to the Federal medical assistance percentage (as defined in section 1905(b) of this Act) of the total amount expended during such quarter as adoption assistance payments under section 472 pursuant to adoption assistance agreements entered into prior to October 1, 1983; plus

"(3) an amount equal to the sum of the following proportions of the total amounts expended during such quarter as found necessary by the Secretary for the proper and efficient administration of the State plan—

"(A) 75 per centum of so much of such expenditures as are for the training (including both short- and long-term training at educational institutions through grants to such institutions or by direct financial assistance to students enrolled in such institutions) of personnel employed or preparing for employment by the State agency or by the local agency administering the plan in the political subdivision, and

"(B) one-half of the remainder of such expenditures.

"(b)(1) Nothwithstanding the provisions of subsection (a)(1) and (a)(3), with respect to expenditures relating to foster care, the aggregate of the sums payable to any State thereunder, with respect to expenditures relating to foster care, for the calendar quarters in any fiscal year shall not exceed the State's allotment for such year.

"(2) For purposes of this subsection, a State's allotment for the fiscal year ending September 30, 1977, shall be equal to the amount of the Federal funds payable to such State under section 403 on account of expenditures for aid with respect to which Federal financial participation is authorized pursuant to section 408 (including administrative expenditures attributable to the provision of such aid). In the event that there is a dispute between any State and the Secretary as to the amount of such expenditures for such fiscal year, then, until the beginning of the fiscal year immediately following the fiscal year in which the dispute is finally resolved, the amount of the State's allotment for such fiscal year shall be deemed to be the amount of Federal funds which would have been payable under such section 403 if the amount of such expenditures were equal to the amount thereof claimed by the State.

"(3)(A) For the fiscal year 1979, the allotment of each State shall be equal to 120 per centum of its allotment for the preceding year or (if greater) the amount provided under subparagraph (B). For the fiscal years 1980, 1981, 1982, and 1983 the allotment of each State shall be equal to 110 per centum of the amount of its allotment for the preceding fiscal year, or (if greater) the amount provided under subparagraph (B). For the fiscal year 1984 and each fiscal year thereafter, the allotment of each State shall be equal to its allotment for the fiscal year 1983, or (if greater) the amount provided under subparagraph (B).

"(B) The amount of any State's allotment, for any fiscal year referred to in subparagraph (A), shall be the amount determined under such paragraph or (if greater) an amount which bears the same ratio to $100,000,000 as the under age twenty-one population of such State bears to the under age twenty-one population of the fifty States and the District of Columbia. The Secretary shall promulgate the amount of each State's allotment, for the fiscal year 1979, no later than thirty days after the date of enactment of this part, and for any succeding fiscal year, prior to the first day of the third month of the preceding fiscal year, on the basis of the most recent satisfactory data available from the Department of Commerce.

"(c) For the fiscal year 1979, and each fiscal year thereafter, sums available to a State from its allotment under subsection (b) for carrying out this part, which the State does not claim as reimbursement for expenditures in such year pursuant to subsecton (a) of this section, may be claimed by the State as reimbursement for expenditures in such year pursuant to part B of this title, in addition to such sums available pursuant to section 420 for carrying out that part.

"DEFINITIONS

"SEC. 475. As used in this part or part B of this title:

"(1) The term 'case plan' means a written document which includes at least the following information: a description of the type of home or institution in which a child is to be placed, including a discussion of the appropriateness of the placement and how the agency which is responsible for the child plans to carry out the judicial determination made with respect to the child in accordance with section 471(a)(1); a plan of services that will be provided to the parents, child, and foster parents in order to improve the conditions in the parents' home, facilitate return of the child to his own home or the permanent placement of the child, and address the needs of the child while in foster care, including a discussion of the appropriateness of the services that have been provided to the child under the plan.

"(2) The term 'parents' means biological or adoptive parents or legal guardians, as determined by applicable State law.

"(3) The term 'adoption assistance agreement' means a written and consensual agreement, binding on the parties to the agreement, between the State agency, other relevant agencies, and the prospective adopting parents of a minor which specifies, at a minimum, the amounts of the adoption assistance payments and any additional services and assistance which are to be provided as part of such agreement.

"(4) The term 'foster care maintenence payments' means payments to cover the cost of (and the cost of providing) food, clothing, shelter, daily supervision, school supplies, a child's personal incidentals, liability insurance with respect to a child, and reasonable travel to the child's home for visitation. In the case of institutional care, such term shall include the reasonable costs of administration and operation of such institution as are necessarily required to provide the items described in the preceding sentence.

"TECHNICAL ASSISTANCE; DATA COLLECTION AND EVALUATION

"SEC. 476. (a) The Secretary may provide technical assistance to the States to assist them to develop the programs authorized under this part and shall periodically (1) evaluate the programs authorized under this part and part B of this title and (2) collect and publish data pertaining to the incidence and characteristics of foster care and adoption in this country.

"(b) Each State shall submit statistical reports as the Secretary may require with respect to children for whom payments are made under this part containing information with respect to such children including legal status, demographic characteristics, location, and length of any stay in foster care.".

(b)(1) Effective with respect to expenditures made after September 30, 1978, section 408 of the Social Security Act is, subject to paragraph (2), repealed.

(2) The repeal made by paragraph (1) shall not be applicable in the case of any State for any quarter prior to the first quarter, which begins after September 30, 1978, in which such State has in effect a State plan approved under part E of the Social Security Act, or (if earlier), such repeal shall be effective with respect to expenditures made after September 30, 1979. During any period with respect to which the repeal made by paragraph (1) is not applicable in the case of a State, the aggregeate of the sums payable to the State, under the State's plan approved under part A of title IV of the Social Security Act, with respect to expenditures (including administrative expenditures) authorized or incurred by reason of the provisions of section 408 of such Act shall not exceed the amount of the allotment which such State would have had for such period under section 474(b) if such State had had an approved plan under part E of such title IV.

(c) For the first fiscal year with respect to which there is appropriated under section 420 of the Social Security Act a sum which is subject to the restriction authorized under section 428(a) of such Act, any administrative expenses incurred by a State, under its State plan approved under part E of such Act, for any of the purposes described in section 428(b)(1) of such Act shall be subject to Federal financial participation under such part E without regard to whether the inclusion of such expenditures could cause the total of such State's expenditures under such plan (insofar as it relates to foster care) to exceed the amount of the State's allotment, imposed by section 474(b) of such Act, for such fiscal year.

(d) The amendments made by this section shall be effective on and after October 1, 1977.

CHILD WELFARE SERVICES GRANTS

SEC. 102. (a) Section 423 of the Social Security Act (including the caption thereto) is amended to read as follows:

"FEDERAL SHARE

"SEC. 423. The 'Federal share' for any State shall, effective on and after October 1, 1978, be 75 per centum.".

(b) Section 425 of such Act is amended by adding at the end thereof the following new sentence: "Expenditures made by a State for any calendar quarter which begins after September 30, 1978, for foster care services which do not constitute child welfare services shall be treated, for purposes of making Federal payments under this part with respect to expenditures for child welfare services, as if such foster care services did constitute child welfare services; except that, the amount payable to the State with respect to expenditures made for child welfare services and for foster care services during any such quarter shall not exceed 100 per centum of the amount of the expenditures made for child welfare services as determined without regard to this sentence.".

(c) Part B of title IV of such Act is further amended by adding at the end thereof the following new section:

"LIMITATION ON PAYMENTS WITH RESPECT TO FOSTER CARE

"SEC. 427. Notwithstanding any other provision of this part, if for any fiscal year which begins after September 30, 1978, there is appropriated under section 420 an amount in excess of the amount appropriated for the fiscal year ending on September 30, 1978, the amount payable to any State for expenditures made to provide child welfare services in the form of foster care maintenance payments in foster family homes or other foster care facilities, shall not exceed the amount of its allotment (before application of the provisions of section 424) under this part for the fiscal year ending September 30, 1978. Funds made available to any State pursuant to section 474(c) shall be subject to the limitation imposed by the preceding sentence.".

(d) Section 425 of such Act is amended by inserting "(a)" immediately after "SEC. 425." and by adding at the end thereof the following new subsection:

"(b) Funds expended by a State for any calendar quarter to comply with the statistical report required by section 476(b), and funds expended with respect to nonrecurring costs of adoption proceedings in the case of children placed for adoption with respect to whom assistance is provided under a State plan for adoption assistance approved under part E of this title, shall be deemed to have been expended for child welfare services.".

CASE REVIEW AND OTHER SERVICES FOR CHILDREN IN FOSTER CARE

SEC. 103. Part B of title IV of the Social Security Act is amended by adding after section 427 (as added by section 102(c) of this Act) the following new sections:

"PORTIONS OF INCREASED ALLOTMENTS TO BE USED FOR CERTAIN SERVICES

"SEC. 428. (a)(1) If, for any fiscal year after 1978, there is appropriated under section 420 a sum in excess of the sum appropriated thereunder for the fiscal year 1978, the appropriation Act by which such sum is appropriated may set aside the amount of such excess necessary for the carrying out of the activities and programs described in subsections (b) and (c).

"(2) Whenever a specified amount of the sum appropriated under section 420 for any fiscal year is set aside pursuant to paragraph (1), the allotment of each State for such fiscal year shall be adjusted accordingly so as to restrict the availability of funds to the carrying out of the activities and programs described in subsections (b) and (c).

"(b) For the first year that any amount of a State's allotment is restricted under subsection (a)(2), the amount so restricted may, except as provided in subsection (c), be expended only for the following purposes (and amounts so expended shall be conclusively presumed to be expended for child welfare services):

"(1) for the purpose of conducting an inventory of all children who have been in foster care under the responsibility of the State for a period of six months preceding the inventory; for the purpose of determining the appropriateness of, and necessity for, the current foster placement, whether the child can be or should be returned to his parents or should be freed for adoption, and the services necessary to facilitate either the return of the child or the placement of the child for adoption or legal guardianship;

"(2) for the purpose of designing and developing to the satisfaction of the Secretary—

"(A) a statewide information system from which the status, demographic characteristics, location, and goals for the placement of every child in foster care or who has been in such care within the preceding twelve months can readily be determined;

"(B) a case review system for each child receiving foster care under the supervision of the State; and

"(C) a service program designed to help children remain with their families and, where appropriate, help children return to families from which they have been removed or be placed for adoption or legal guardianship.

"(c) For any fiscal year (after the first fiscal year) that any amount of a State's allotment is restricted under subsection (a)(2), the amount so restricted may be expended only for the implementation and operation of the systems and programs described in subsection (b)(2) (and amounts for such purposes shall be conclusively presumed to be expended for child welfare services). In the case of any State which has completed an inventory of the type specified in subsection (b)(1) and the design and development of the program and systems referred to in subsection (b)(2) prior to the first fiscal year referred to in subsection (b), or at any time prior to the end of such fiscal year, the amount of such State's allotment which is restricted under subsection (a)(2) may thereafter be used for the purposes specified in the first sentence of this subsection.

"(d)(1) As used in subsection (b)(2)(B), the term 'case review system' means a procedure for assuring that—

"(A) each child has a case plan designed to achieve placement in the least restrictive (most family-like) setting available and in close proximity to the parents' parents, to a change in the child's placement, and to any determination affecting visitation privileges of parents.

"(2) As used in paragraph (1)(B), the term 'administrative review' means a review open to the participation of the parents of the child, conducted by a panel of appropriate persons at least one of whom is not responsible for the case management of, or the delivery of services to, either the child or the parents who are the subject of the review.

"PAYMENTS TO INDIAN TRIBAL ORGANIZATIONS

"SEC. 429. (a) The Secretary may, in appropriate cases (as determined by the Secretary) make payments under this part directly to an Indian tribal organization within any State which has a plan for child-welfare services approved under this part. Such payments shall be made in such manner and in such amounts as the Secretary determines to be appropriate.

"(b) Amounts paid under subsection (a) shall be deemed to be a part of the allotment (as determined under section 421) for the State in which such Indian tribal organization is located.

"(c) For purposes of this section—

"(1) the term 'tribal organization' means the recognized governing body of any Indian tribe, or any legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body; and

"(2) the term 'Indian tribe' means any tribe, band, nation, or other organized group or community of Indians (including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (Public Law 92-203; 85 Stat. 688)) which (A) is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians, or (B) is located on, or in proximity to, a Federal or State reservation or rancheria.".

EARNED INCOME DISREGARD

SEC. -04. (a) Section 402(a)(7) of the Social Security Act is amended by striking

out "any expenses" and inserting in lieu thereof "any child care expenses".

(b) Section 402(a)(8)(A)(ii) of the Social Security Act is amended to read as follows:

"(ii) in the case of earned income of a dependent child not included under clause (i), a relative receiving such aid, and any other individual (living in the same home as such relative and child) whose needs are taken into account in making such determination, (I) the first $60 of earned income for individuals who are employed at least forty hours per week, or at least thirty-five hours per week and are earning at least $92 per week; and (II) the first $30 of earned income for individuals not meeting the criteria of subclause (I), plus (III) in each case, one-third of up to $300 of additional earnings, and one-fifth of such additional earnings in excess of $300, except that in each case an amount equal to the reasonable child care expenses incurred (subject to such limitations as the Secretary may prescribe in regulations) shall first be deducted before computing such individual's earned income (except that the provisions of this clause (ii) shall not apply to earned income derived from participation on a project maintained under the programs established by section 432(b)(2) and (3)); and".

(c)(1) The amendments made by this section shall become effective on January 1, 1979.

(2) A State plan for aid and services to needy families with children shall not be regarded as failing to comply with the requirements imposed with respect to approved State plans under part A of title IV of the Social Security Act, and the amount payable to any State under such part shall not be decreased, solely because such State plan fails to comply with the requirements of paragraph (7) or (8) of section 402(a) of the Social Security Act as in effect after the date of enactment of this Act and prior to January 1, 1979, if such State plan complies with the requirements of such paragraphs as amended by this section.

TITLE II—OTHER AMENDMENTS RELATING TO SOCIAL SECURITY ACT

SEC. -01. (a)(1) Section 2002(a)(2)(A) of the Social Security Act is amended—

(A) by striking out "$2,500,000,000" and inserting in lieu thereof "the amount specified in clause (ii)";

(B) by inserting "(i)" after "(2)(A)"; and

(C) by adding the following clause at the end thereof:

"(ii) The amount specified for purposes of clause (i) is $2,500,000,000 for fiscal years prior to fiscal year 1979, $2,700,000,000 for fiscal year 1979, and $2,900,000,000 for fiscal years after fiscal year 1979.".

(2) Section 3 of Public Law 94-401 is amended—

(A) in the matter preceding paragraph (1) of subsection (a)—

(i) by striking out the word "and" which appears after "1977,", and

(ii) by inserting after "1978," the following: "and the fiscal year ending September 30, 1979,",

(B) in subsection (a)(1), by adding after and below subparagraph (B) the following new subparagraph:

"(C) 107.407 per centum of the amount of the limitation so imposed (as determined without regard to this section) in the case of such fiscal year ending September 30, 1979, or",

(C) in subsection (a)(2), by striking out "or either such fiscal year" and inserting in lieu thereof "or any such fiscal year",

(D) in subsection (b), by striking out "or either fiscal year" and inserting in lieu thereof "or any fiscal year",

(E) in subsections (c)(1) and (c)(2)(A), by striking out "or either fiscal year" and inserting in lieu thereof "or any fiscal year (other than the fiscal year ending September 30, 1979)",

(F) in subsection (d)(1)—

(i) by striking out the word "or" which appears after "1977,", and

(ii) by inserting after "1978" the following: ", or the fiscal year ending September 30, 1979", and

(G) in subsection (d)(2), by striking out "for either such fiscal year" and inserting in lieu thereof "for any such fiscal year".

(b) Section 2004(1) of such Act is amended by striking out "either the Federal Government or the State government" and inserting in lieu thereof "the Federal Government, the State government, or the county governments within such State".

(c)(1) Section 2004(1) of such Act (as amended by subsection (b)) is further amended by inserting before the semi-colon at the end thereof the following: ", and the end of such fiscal year or either of the next two succeeding fiscal years is established as the end of the State's services program period".

(2) Section 2004 of such Act is amended—

(A) by striking out "services program year" each place it appears and inserting in lieu thereof "services program period";

(B) by striking out "annual" in paragraph (2) (in the matter preceding subparagraph (A)) and in paragraph (4); and

(C) by striking out "during that year" in paragraph (2) (in the matter preceding subparagraph (A)) and inserting in lieu thereof "during that period".

(3) Section 2002(a)(3)(B) of such Act is amended by striking out "annual".

(4) Sections 2003(d)(1) and 2005 of such Act are each amended by striking out "services program year" and inserting in lieu thereof in each instance "services program period".

(5) Section 2003(b) of such Act is amended—

(A) by striking out "each services program year" and inserting in lieu thereof "each fiscal year (as selected by the State under section 2004(1)) within each services program period"; and

(B) by striking out "and services program year" and inserting in lieu thereof "any services program period".

ADDITIONAL FEDERAL FUNDING UNDER AID TO FAMILIES WITH DEPENDENT CHILDREN PROGRAMS FOR CERTAIN MECHANIZED CLAIMS PROCESSING AND INFORMATION RETRIEVAL SYSTEMS

SEC. -02. (a) Section 403(a)(3) of the Social Security Act is amended by—

(1) striking out "and" at the end of subparagraph (A);

(2) redesignating subparagraph (B) thereof as subparagraph (D); and

(3) by adding after subparagraph (A) the following new subparagraphs:

"(B) 90 per centum of so much of the sums expended during such quarter (commencing with the quarter which begins January 1, 1979) as are attributable to the planning, design, development, or installation of such statewide mechanized claims processing and information retrieval systems as (i) meet the conditions of section 402(a)(30), and (ii) the Secretary determines are likely to provide more efficient, economical, and effective administration of the plan and to be compatible with the claims processing and information retrieval systems utilized in the administration of State plans approved under title XIX, and State programs with respect to which there is Federal financial participation under title XX,

"(C) 75 per centum of so much of the sums expended during such quarter (commencing with the quarter which begins January 1, 1979) as are attributable to the operation of systems (whether such systems are operated directly by the State or by another person under contract with the State) of the type described in subparagraph (B) (whether or not designed, developed, or installed with assistance under such subparagraph) and which meet the conditions of section 402(a)(30), and".

(b)(1) Section 402(a) of the Social Security Act is amended—

(A) by striking out "and" at the end of subparagraph (28),

(B) by striking out the period at the end of the subparagraph (29) and inserting in lieu of such period the following: "; and", and

(C) by adding after and below subparagraph (29) thereof the following new subparagraph:

"(30) at the option of the State, provide, effective January 1, 1979 (or at the beginning of such subsequent calendar quarter as the State shall elect), for the establishment and operation, in accordance with an (initial and annually updated) advance automatic data processing planning document approved under subsection (d), of an automated statewide management information system designed effectively and efficiently, to assist management in the administration of the State plan for aid to families with dependent children approved under this part, so as (A) to control and account for (i) all the factors in the total eligibility determination process under such plan for aid (including, but not limited to, (I) identifiable correlation factors (such as social security numbers, names, dates of birth, home addresses, and mailing addresses (including potal ZIP codes), of all applicants and recipients of such aid and the relative with whom any child who is such an applicant or recipient is living) to assure sufficient compatibility among the systems of different jurisdictions to permit periodic screening to determine whether an individual is or has been receiving benefits from more than one jurisdiction, (II) checking records of applicants and recipients of such aid on a periodic basis with other agencies, both intra- and inter-State, for determination and verification of eligibility and payment pursuant to requirements imposed by other provisions of this Act), (ii) the costs, quality, and delivery of funds and services furnished to applicants for and recipients of such aid, (B) to notify the appropriate officials of child support, food stamp, social service, and medical assistance programs approved under title XIX whenever the case becomes ineligible or the amount of aid or services is changed, and (C) to provide for security against unauthorized access to, or use of, the data in such system.".

(2) Section 402 of such Act is further amended by adding at the end thereof the following new subsection:

"(d)(1) The Secretary shall not approve the initial and annually updated advance automatic data processing planning document, referred to in subsection (a)(30), unless he finds that such document, when implemented, will generally carry out the objectives of the statewide management system referred to in such subsection, and such document—

"(A) provides for the conduct of, and reflects the results of, requirements analysis studies, which include consideration of the program mission, functions, organization, services, constraints, and current support, of, in, or relating to, such system,

"(B) contains a description of the proposed statewide management system referred to in section 403(a)(3)(D), including a description of information flows, input data, and output reports and uses,

"(C) sets forth the security and interface requirements to be employed in such statewide management system,

"(D) describes the projected resource requirements for staff and other needs, and the resources available or expected to be available to meet such requirements,

"(E) includes cost-benefit analyses of each alternative management system, data processing services failure of such system to comply with such criteria, requirements, and other undertakings so prescribed.".

(c) Title IV of the Social Security Act is further amended by inserting after section 411 the following new section:

"TECHNICAL ASSISTANCE FOR DEVELOPING MANAGEMENT INFORMATION SYSTEMS

"SEC. 412. The Secretary shall provide such technical assistance to States as he determines necessary to assist States to plan, design, develop, or install and provide for the security of, the management information systems referred to in section 403(a)(3)(B) of this Act.".

IMPLEMENTATION OF WORK AND TRAINING REQUIREMENTS UNDER AID TO FAMILIES WITH DEPENDENT CHILDREN PROGRAMS

SEC. –03. (a) Section 402(a)(19)(A) of Social Security Act is amended—

(1) by striking so much of subparagraph (A) as follows "(A)" and precedes clause (i), and inserting in lieu thereof the following: "that every individual, as a condition of eligibility for aid under this part, shall register for manpower services, training, employment, and other employment related activities with the Secretary of Labor as provided by regulations issued by him, unless such individual is—";

failure of such system to comply with such criteria, requirements, and other undertakings so prescribed.".

(c) Title IV of the Social Security Act is further amended by inserting after section 411 the following new section:

"TECHNICAL ASSISTANCE FOR DEVELOPING MANAGEMENT INFORMATION SYSTEMS

"SEC. 412. The Secretary shall provide such technical assistance to States as he determines necessary to assist States to plan, design, develop, or install and provide for the security of, the management information systems referred to in section 403(a)(3)(B) of this Act.".

IMPLEMENTATION OF WORK AND TRAINING REQUIREMENTS UNDER AID TO FAMILIES WITH DEPENDENT CHILDREN PROGRAMS

SEC. —03. (a) Section 402(a)(19)(A) of the Social Security Act is amended—

(1) by striking so much of subparagraph (A) as follows "(A)" and precedes clause (i), and inserting in lieu thereof the following: "that every individual, as a condition of eligibility for aid under this part, shall register for manpower services, training, employment, and other employment related activities with the Secretary of Labor as provided by regulations issued by him, unless such individual is—";

(2) in clause (vi) of subparagraph (A), by striking out "under section 433(g)";

(3) by striking out the word "or" after clause (v);

(4) by adding the word "or" after clause (vi); and

(5) by adding after clause (vi) the following new clause:

"(vii) a person who is working not less than 30 hours per week;".

(b) Section 402(a)(19)(B) of such Act is amended by inserting "to families with dependent children" immediately after "that aid".

(c) Section 402(a)(19)(D) of such Act is amended by striking out ", and income derived from a special work project under the program established by section 432(b)(3)".

(d) Section 402(a)(19)(F) of such Act is amended—

(1) by striking out, in the matter preceding clause (i), "and for so long as any child, relative, or individual (certified to the Secretary of Labor pursuant to subparagraph (G))" and inserting in lieu thereof "(and for such period as is prescribed under joint regulations of the Secretary and the Secretary of Labor) any child, relative or individual", and

(2) by inserting "and" at the end of clause (iv), and by striking so much of such subparagraph (F) as follows clause (iv).

(e) Section 402(a)(19)(G) of such Act is amended—

(1) in clause (i), by inserting "(which will, to the maximum extent feasible, be located in the same facility as that utilized for the administration of programs established pursuant to section 432(b)(1), (2), or (3))" immediately after "administrative unit",

(2) by striking out, in clause (ii), "subparagraph (A)", and inserting in lieu thereof "subparagraph (A) of this paragraph, (I)",

(3) by striking out "part C" where it first appears in clause (ii) and inserting in lieu thereof "section 432(b)(1), (2), or (3)".

(4) by striking out, in clause (ii), "employment or training under part C," and inserting in lieu thereof "employment or training under section 432(b)(1), (2), or (3), (II) such social and supportive services as are necessary to enable such individuals as determined appropriate by the Secretary of Labor actively to engage in other employment related (including but not limited to employment search) activities, and (III) for a period deemed appropriate by the Secretary of Labor after such an individual accepts employment, such social and supportive services are as reasonable and necessary to enable him to retain such employment,".

(f) Section 403(c) of such Act is amended by striking "part C" and inserting in lieu thereof "section 432(b)(1), (2), or (3)".

(g) Section 403(d)(1) of such Act is amended by adding at the end thereof the following new sentence: "In determining the amount of the expenditures made under a State plan for any quarter with respect to social and supportive services pursuant to section 402(a)(19)(G), there shall be included the fair and reasonable value of goods and services furnished in kind from the State or any political subdivision thereof.".

(h) The amendments made by this section (other than those made by subsections (c) and (d)) shall take effect on January 1, 1979, and the joint regulations referred to in section 402(a)(19)(F) of the Social Security Act (as amended by this section) shall be promulgated on or before such date, and take effect on such date.

INCENTIVE TO REPORT EARNED INCOME BY AID TO FAMILIES WITH DEPENDENT CHILDREN RECIPIENTS

SEC. –04. (a) Section 402(a)(8) of the Social Security Act is amended—

(1) by inserting "or" at the end of subparagraph (D) thereof, and

(2) by adding after subparagraph (D) the following new subparagraph:

"(E) any of the persons specified in clause (i) or (ii) of subparagraph (A) if there is a failure without good cause to make a timely report (as prescribed by the State plan) to the State agency of earned income received in such month;".

(b) The amendments made by this section shall take effect on January 1, 1979.

PAYMENT TO STATES FOR COMPENSATION OF COURT PERSONNEL IN CHILD SUPPORT CASES

SEC. –05. Section 455 of the Social Security Act is amended by adding after subsection (b) the following new subsection:

"(c)(1) Payment under subsection (a) shall be made with respect to compensation for judges and other support and administrative personnel of the courts who perform services directly related to the child support program established under the provisions of this part, but only for that portion of such compensation as relates to such services which are clearly identifiable with and directly related to such program.

"(2) Payments made as provided in paragraph (1) shall be made only with respect to amounts expended by a State on or after January 1, 1979, and only for amounts expended in a calendar year which exceed the amount expended by such State for such purposes in the twelve-month period beginning July 1, 1976.

"(3) Payments made to any State with respect to compensation as provided in paragraph (1) may be made by such State directly to the courts if such State so provides.".

CHANGE IN PUBLIC ASSISTANCE MATCHING FORMULA FOR PUERTO RICO, THE VIRGIN ISLANDS, AND GUAM

SEC. –06. Section 1118 of the Social Security Act is amended by adding at the end thereof the following new sentence: "For purposes of the preceding sentence, the term 'Federal medical assistance percentage' shall, in the case of Puerto Rico, the Virgin Islands, and Guam, mean 75 per centum when applied to quarters in fiscal years which commence after September 30, 1978.".

INCREASE IN AMOUNT OF PUBLIC ASSISTANCE DOLLAR LIMITATIONS FOR PUERTO RICO, THE VIRGIN ISLANDS, AND GUAM

SEC. –07. Subsection (a) of section 1108 of the Social Security Act is amended—

(a) in paragraph (1)—

(1) by striking out "or" at the end of clause (D),

(2) by striking out the semicolon at the end of clause (E) and inserting in lieu thereof "prior to the fiscal year 1979, or"; and

(3) by adding at the end thereof the following new subparagraph:

"(F) $72,000,000 with respect to the fiscal year 1979 and each fiscal year thereafter;",

(b) in paragraph (2)—

(1) by striking out "or" at the end of clause (D),

(2) by striking out "; and" at the end of clause (E) and inserting in lieu thereof "prior to the fiscal year 1979, or"; and

(3) by adding at the end thereof the following new subparagraph;

"(F) $2,400,000 with respect to the fiscal year 1979 and each fiscal year thereafter; and",

and

(c) in paragraph (3)—

(1) by striking out "or" at the end of clause (D),

(2) by striking out the period at the end of clause (E) and inserting in lieu thereof "prior to the fiscal year 1979, or"; and

(3) by adding at the end thereof the following new subparagraph:

"(F) $3,300,000 with respect to the fiscal year 1979 and each fiscal year thereafter.".

NORTHERN MARIANA ISLANDS

SEC. 608. (a) Section 3(a) of the Social Security Act (as in effect on the effective date of this section with respect to the Commonwealth of Puerto Rico, the Virgin Islands, and Guam) is amended, in paragraphs (1) and (2), by striking out "and Guam," each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands,".

(b)(1) Section 403(a) of the Social Security Act (as in effect on the effective date of this section with respect to the Commonwealth of Puerto Rico, the Virgin Islands, and Guam) is amended, in paragraphs (1) and (2), by striking out "and Guam," each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands,".

(2) Section 423 of the Social Security Act is amended, in subsections (a) and (b), by striking out "and Guam" each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands".

(c) Section 1003(a) of the Social Security Act (as in effect on the effective date of this section with respect to the Commonwealth of Puerto Rico, the Virgin Islands, and

Guam) is amended, in paragraphs (1) and (2), by striking out "and Guam," each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands,".

(d) Section 1403(a) of the Social Security Act (as in effect on the effective date of this section with respect to the Commonwealth of Puerto Rico, the Virgin Islands, and Guam) is amended, in paragraphs (1) and (2), by striking out "and Guam," each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands,".

(e) Section 1603(a) of the Social Security Act (as in effect on the effective date of this section with respect to the Commonwealth of Puerto Rico, the Virgin Islands, and Guam) is amended, in paragraphs (1) and (2), by striking out "and Guam," each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands,".

(f) Section 1905(b) of the Social Security Act is amended by striking out "and Guam" and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands".

(g)(1) Section 1101(a) of the Social Security Act is amended—

(A) in the first sentence thereof, by striking out "and Guam" and inserting in lieu thereof ", Guam, and the Commonwealth of the Northern Mariana Islands", and

(B) in the fourth sentence thereof, by striking out "and Guam" each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands".

(2) Section 1101(a)(8) of the Social Security Act is amended in subparagraphs (A) and (B), by striking out "and Guam" each place it appears therein and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands".

(h)(1) Section 1108(a) of the Social Security Act is amended—

(A) by striking out "and" at the end of paragraph (2),

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and", and

(C) by adding at the end thereof the following new paragraph:

"(4) for payment to the Commonwealth of the Northern Mariana Islands shall not exceed $570,000 with respect to fiscal year 1979 and each fiscal year thereafter.".

(2) Section 1108(b) of such Act is amended—

(A) by striking out "and" at the end of paragraph (2),

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof ", and ", and

(C) by adding at the end thereof the following new paragraph:

"(4) for payment to the Commonwealth of the Northern Mariana Islands shall not exceed $15,000.".

(3) Section 1108(c) of such Act is amended—

(A) by striking out "and" at the end of paragraph (2),

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof ", and", and

(C) by adding at the end thereof the following new paragraph:

"(4) for payment to the Commonwealth of the Northern Mariana Islands shall not exceed $160,000.".

(4) Section 1108(d) of such Act is amended by inserting "the Commonwealth of the Northern Mariana Islands," immediately after "Samoa,".

(5) The heading to section 1108 of such Act is amended by striking out "AND GUAM" and inserting in lieu thereof "GUAM, AND THE NORTHERN MARIANA ISLANDS".

(i) The last sentence of section 1118 of the Social Security Act, as added by section 807 of this Act, is amended by striking out "and Guam" and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands".

(j) Section 248 of Public Law 90-248 is amended—

(1) in subsection (b), by striking out "and Guam" and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands",

(2)(A) in the first sentence of subsection (c), by striking out "or Guam" and inserting in lieu thereof "Guam, or the Commonwealth of the Northern Mariana Islands",

(B) in the second sentence of subsection (c), by striking out "and Guam" and inserting in lieu thereof "Guam, or the Commonwealth of the Northern Mariana Islands",

(B) in the second sentence of subsection (c), by striking out "and Guam" and inserting in lieu thereof "Guam, and the Commonwealth of the Northern Mariana Islands", and

(3) in subsection (d), by striking out "or Guam" and inserting in lieu thereof "Guam, or the Commonwealth of the Northern Mariana Islands".

(k)(1) The provisions of titles I, X, XIV, and XVI of the Social Security Act (as applicable on the effective date of this section to Puerto Rico, the Virgin Islands, and Guam) shall be applicable to and in effect with respect to the Commonwealth of the Northern Mariana Islands.

(2) Section 7(b) of Public Law 93-647 is amended by striking out "or Guam" and inserting in lieu thereof "Guam, or the Commonwealth of the Northern Mariana Islands".

(l) The amendments made by this section shall become effective on October 1, 1978.

(m) Section 502 of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States (approved by Public Law 94-241) shall be construed as if the clause "Section 228 of Title II and Title XVI of the Social Security Act as it applies to the several States" did not appear therein and, notwithstanding any provision of such section, no provision of the Social Security Act shall be or become applicable to the Northern Mariana Islands or any resident thereof by reason of the provisions of such section 502.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 3946), as amended, was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, I have two routine motions.

First, I move to reconsider the vote by which H.R. 3946 passed the Senate.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, I ask that the Senate insist on its amendment to H.R. 3946 and request a conference with the House of Representatives and that the Chair appoint the conferees on behalf of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. LONG, Mr. TALMADGE, Mr. MOYNIHAN, Mr. CURTIS, and Mr. HATCH conferees on the part of the Senate.

PROTECTION OF PRIVACY OF RAPE VICTIMS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House on H.R. 4727.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4727) to amend the Federal Rules of Evidence to provide for the protection of the privacy of rape victims.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill be considered as having been read twice and that the Senate proceed to the immediate consideration of H.R. 4727.

The PRESIDING OFFICER. Without objection, it is so orderd.

Mr. THURMOND. Mr. President, the House passed the above bill Tuesday, October 10, 1978. It is being held at the desk pending a decision as to whether to refer it to committee (thereby killing it) or to pass it without amendment.

Senators BAYH and BENTSEN presently have bills on the subject pending in the Criminal Laws Subcommittee. An abbreviated version passed the Senate as part of S. 1437, the criminal code bill.

H.R. 4727, as passed by the House, essentially does the following:

First. Prohibits any use of reputation or opinion evidence of the past sexual behavior of the victim in a criminal prosecution for rape or assault with intent to commit rape.

Second. Restricts the use of direct evidence of the past sexual behavior of the victim of rape and assault with intent to commit rape to three situations:

(a) Where the judge finds after a hearing that admission of the evidence is required under the Constitution;

(b) The judge finds after a hearing that the past sexual behavior was with a person other than the accused and is being offered to show that someone other than the accused was the source of semen or injury; and

(c) The judge finds after a hearing that the past sexual behavior was with the accused and is offered by the accused solely on the issue of consent.

Third. Creates notice and hearing procedures on the evidentiary issues delineated by the bill.

Mr. President, I think this is a good bill. I think it is unconscionable when rape cases are tried that they can go back and try to attack a woman's veracity, her virtue, and so forth. This bill, as I understand it, will alleviate that situation.

I would inquire of the distinguished Senator from Indiana if he construes the bill that way.

Mr. BAYH. Mr. President, on October 10, the House of Representatives passed H.R. 4727, legislation to amend the Federal Rules of Evidence to provide for the protection of the privacy of rape victims. This legislation is identical to legislation I introduced in the Senate on March 23, 1977, S. 1100. The purpose of the House-passed measure, as well as my original bill, is to make the prosecution of Federal rape cases more effective and equitable for rape victims, and to serve as a model statute for State laws.

At the present time, many women rape victims are reluctant to report a rape or to testify during the trial itself. Many of these women fear that once they take the witness stand they will be subjected to a painful cross-examination into the intimate details of their past sexual histories. In Federal court and in most State courts, the trial judge is free to decide on a case-by-case basis. whether a victim can be cross-examined indiscriminately as to her past sexual relationships. Unfortunately, in many instances such questioning has degenerated into a public humiliation of the victim herself, and has had little relevance to the prosecution of the case in question.

The unfortunate result of this practice has been that women are hesitant to cooperate with police and prosecutors in bringing such cases to trial. After suffering the trauma of rape, many victims are understandably reluctant to put themselves through another ordeal on the witness stand. The practice of subjecting rape victims to such interrogation has been clearly shown to act as a deterrent on effective law enforcement for the crime of rape.

H.R. 4727 seeks to correct this unfortunate situation by amending the Federal Rules of Evidence concerning the admissability of evidence relating to rape victim's prior sexual history. Under the provisions of H.R. 4727, a new rule of evidence, applicable only in criminal cases, would make evidence of prior sexual history inadmissable except under three circumstances.

First, in order to make sure that we are infringing upon a defendant's civil liberties, such evidence may be admissable where it is required under the Constitution. This exception is intended to cover those instances where, because of an unusual set of circumstances, if the general rule of inadmissability were to be followed, it might deprive a defendant of his constitutional rights.

The second circumstance in which the defendant can offer evidence of a rape victim's prior sexual history is where the defendant raises the issue of consent and the evidence is of sexual behavior with the defendant.

The third circumstance in which a court can admit evidence of prior sexual history is where the evidence may show that sexual relations occurred between the victim and someone other than the defendant.

Evidence which might fall under these exceptions is not automatically admissible however. If the defendant proposed to offer evidence in either category, he must first make a written offer of proof which is submitted to the presiding judge. If the judge then decides after an in camera hearing that such evidence is admissible, he must make a written order specifically identifying the evidence to be admitted and describing exactly the areas of cross-examination to be permitted. This procedure is designed to afford the victim maximum notice of the questioning that may occur.

It is our hope that this legislation will serve as a model statute for individual State laws. To date at least 30 States, including my own State or Indiana, are more progressive than the Federal Government on this issue.

One need only look to a few statistics to show that a majority of the rapes committed are never reported. For example, the New York City Police Department estimates that only 1 in every 10 rapes committed in that city are ever reported. An 18-month-long study by the Denver Anti-Crime Council showed that 43.2 percent of reported rapes during the study period were never brought to trial because the victim refused to prosecute.

The crime of forcible rape is the fastest growing crime in the United States. The number of forcible rapes has increased an astonishing 62 percent since 1968. FBI statistics for 1976 show that reported rapes nationwide numbered 56,730. This means there is one rape every 10 minutes. I hope that my colleagues will join me in supporting this legislation which will provide for fairer and more effective prosecution of rape crimes.

Mr. President, I compliment the distinguished Congresswoman from Brooklyn, Congresswoman HOLTZMAN, for her initiative in joining in this legislation which is before us.

Mr. President, there have been a lot of people involved in this. The Senator from South Carolina expressed his concern, of course, as a member of the Judiciary Committee.

I would like to pay particular attention to the contributions made by the distinguished Senator from Delaware, the chairman of the subcommittee in Judiciary which has jurisdiction over this measure. Senator BIDEN has done yeoman work in bringing the Senate's attention to this matter.

Also I would like to call the Senate's attention to the long-time and continuing interest of the distinguished Senator from Texas (Mr. BENTSEN). He introduced similar legislation sometime ago and was looking forward to being here on the floor of the Senate at the time this was being debated. However, as a member of the Finance Committee and as a member of the conference committee which is in the process of trying to resolve some of the differences between the House and the Senate on certain legislation, it is not possible for him to be here.

I do want the RECORD to show that he has had a long-time, continuing interest in this, and has made a valuable contribution to this legislation reaching its present status.

PRIVACY PROTECTION FOR RAPE VICTIMS ACT OF 1978

● Mr. BIDEN. Mr. President, I am pleased to join my colleague from Indiana in moving that the Senate pass H.R. 4727, the Privacy Protection for Rape Victims Act of 1978. In enacting this legislation we will address a problem which has plagued our criminal justice system for generations.

Rape is one of the most heinous and fastest growing crimes in this country. According to the FBI, since 1962 forcible rapes have increased 62 percent. Yet, rape is also one of the most underreported violent crimes. Even when the crime is reported victims are often unwilling to proceed with prosecution. In New York City only one-tenth of all rapes are actually reported and another study in Denver found that over 40 percent of rape victims were unwilling to cooperate with a prosecution.

The rules of evidence used in criminal trials are a major cause of the reluctance of women to report rapes or to participate in the prosecution. These rules of evidence add to the shock and horror of rape by allowing the victim of the rape to be treated as if she somehow encouraged the rape.

The enactment of this legislation will eliminate the traditional defense strategy, too often permitted by our laws, of placing the victim and her reputation on trial in lieu of the defendant. This legislation will end the practice, at least in the Federal system, wherein rape victims are bullied and cross-examined about their prior sexual experiences. Indeed, in many cases the victims, no doubt, find the trial almost as degrading as the rape itself.

Thirty States have already taken action very similar to the bill that we propose today. However, in the Federal system it is still permissible to cross-examine the victim about past sexual behavior. This bill will modernize the Federal rules and at the same time serve as a model for reform in the remaining States.

The Advisory Committee notes on rule 404(a) of the Federal Rules of Evidence indicate that the rule clearly permits the use of opinion or reputation evidence or the use of evidence of specific behavior to show the character of a rape victim when the defendant raises the issue of consent. Of course this is the traditional approach by which a sharp defense counsel can often intimidate a rape victim.

In our zeal to correct this abuse it is important that we keep in mind the constitutional rights of the defendant to a fair trial. Therefore this bill has been carefully drafted to keep the reform within constitutional limits.

The bill clearly permits the defendant to offer evidence where it is constitutionally required. Indeed, the bill specifically recognizes two circumstances where the evidence may be admitted. However, the bill also would establish a special in camera procedure whereby the question of admissibility could be litigated without harm to the privacy rights of the victim or the constitutional rights of the defendant.

This bill is simple and noncontroversial. I understand it enjoys the support of the Justice Department as well as the American Civil Liberties Union. I urge my colleagues to vote in favor of this

bill not only for those reasons but because it will be a constructive addition to the law and to its enforcement.

Finally, I would like to insert in the CONGRESSIONAL RECORD some material offered by the American Bar Association in its testimony in favor of the bill on the House side. The material consists of a hypothetical interrogation of a robbery victim, assuming the robbery victim were asked the same kinds of questions a rape victim is often asked in cross-examination. Although the interrogation is humorous for the hypothetical robbery victim, it is not so funny for the real victims of rape:

"YOU ASKED FOR IT"

In the following exchange, a hold-up victim is asked questions similar to those asked of a rape victim. The testimony here—indeed, the whole line of questioning—would be inadmissible. In the case of the rape victim, it would be allowable—and quite standard.

"Mr. Smith, you were held up at gunpoint on the corner of First and Main?"

"Yes."

"Did you struggle with the robber?"

"No."

"Why not?"

"He was armed."

"Then you made a conscious decision to comply with his demands rather than resist?"

"Yes."

"Did you scream? Cry out?"

"No, I was afraid."

"I see. Have you ever been held up before?"

"No."

"Have you ever given money away?"

"Yes, of course. . . ."

"And you did so willingly?"

"What are you getting at?"

"Well, let's put it this way, Mr. Smith. You've given money away in the past—in fact you've quite a reputation for philanthropy. How can we be sure that you weren't contriving to have your money taken away from you by force?"

"Listen, if I wanted. . . ."

"Never mind. What time did this hold-up take place, Mr. Smith?"

"About 11 p.m."

"You were out walking on the street at 11 p.m.? Doing what?"

"Just walking."

"Just walking? You know it's quite dangerous being out on the street that late at night. Weren't you aware that you could have been held up?"

"I hadn't thought about it."

"What were you wearing at that time, Mr. Smith?"

"Let's see . . . a suit. Yes, a suit."

"An expensive suit?"

"Well, . . . yes. I'm a successful lawyer, you know."

"In other words, Mr. Smith, you were walking around the streets late at night in a suit that practically advertised the fact that you might be a good target for some easy money, isn't that so? I mean, if we didn't know better, Mr. Smith, we might even think you were asking for this to happen, mightn't we?"

"Look, can't we talk about the past history of the guy who did this to me?"

"Tell me, Mr. Smith—did you enjoy the experience? Did it make you feel good?"

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4727) was ordered to a third reading, was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SEIZURE OF VEHICLES USED IN SMUGGLNG ALIENS

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. HUDDLESTON, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1197, which is cleared, I understand, on both sides of the aisle.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 3093) to provide for the seizure, forfeiture, and disposition of vehicles used to illegally transport persons into the United States, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 2, beginning with line 1, strike through and including line 16, and insert in lieu thereof the following:

"(A) the owner, master, or other person in charge of such vessel, vehicle, or aircraft, was not, at the time of the alleged illegal act, a consenting party or privy thereto; or

"(B) the alleged illegal act occurred while such vessel, vehicle, or aircraft was in the illegal possession of any person other than the owner, as established by the criminal laws of the United States, or of any States.

"(2) The Attorney General shall, within one hundred and eighty days from the date of enactment of this Act, promulgate regulations setting forth procedures for the expeditious return to the owner, master, or other person in charge of any vessel, vehicle, or aircraft seized in violation of paragraph (1). In any such case, the owner, master, or other person in charge of such vessel, vehicle, or aircraft shall not incur any expenses, including costs of transportation, storage, damage, and attorney fees, associated with such seizure and forfeiture.

"(3) Any conveyance subject to seizure under this section may be seized without a warrant if there is probable cause to believe the conveyance has been used in violation of subsection (a) and circumstances exist where a warrant is not conditionally required."

On page 3, line 15, strike "(3)" and insert "(4)";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 274 of the Immigration and Nationality Act (8 U.S.C. 1324) is amended by redesignating subsection (b) as subsection (c) and adding a new subsection (b) as follows:

"(b)(1) Any vessel, vehicle, or aircraft which is used in the commission of a violation of subsection (a) shall be subject to seizure and forfeiture, except when—

"(A) the owner, master, or other person in charge of such vessel, vehicle, or aircraft, was not, at the time of the alleged illegal act, a consenting party or privy thereto; or

"(B) the alleged illegal act occurred while such vessel, vehicle, or aircraft was in the illegal possession of any person other than the owner, as established by the criminal laws of the United States, or of any States.

"(2) The Attorney General shall, within one hundred and eighty days from the date of enactment of this Act, promulgate regulations setting forth procedures for the expeditious return to the owner, master, or other person in charge of any vessel, vehicle, or aircraft seized in violation of paragraph (1). In any such case, the owner, master, or other person in charge of such vessel, vehicle, or aircraft shall not incur any expenses, including costs of transportation, storage, damage, and attorney fees, associated with such seizure and forfeiture.

"(3) Any conveyance subject to seizure under this section may be seized without a warrant if there is probable cause to believe the conveyance has been used in violation of subsection (a) and circumstances exist where a warrant is not conditionally required.

"(4) All provisions of law relating to the seizure, forfeiture, and disposition of vessels, vehicles, and aircraft for violations of customs law shall apply to violations of the provisions of this chapter: *Provided*, That—

"(A) duties imposed on customs officers or other persons regarding the seizure of such conveyances under customs law shall apply to seizures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General; and

"(B) proceedings instituted under this subsection respecting vessels shall be subject to the Supplemental Rules of Certain Admiralty and Maritime Claims.".

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, this legislation, S. 3093 will provide a valuable tool to the Immigration and Naturalization Service in their fight to curb the escalating flow of illegal immigrants into this country. The amendment would provide the INS with statutory authority to seize and forfeit vehicles used to transport illegal aliens into this country. Included in the amendment is ample protection for innocent parties who have a financial interest in the vehicles.

S. 3093 has been thoroughly reviewed by many interested parties who found it acceptable and necessary. It was originally introduced by Senator DECONCINI and me, and an extensive subcommittee hearing was chaired by the distinguished Senator from Arizona on August 14, 1978. Commissioner Costillo of the Immigration and Naturalization Service appeared at the hearing along with several other reputable witnesses and all endorsed the bill. The bill also has been approved and reported by the Senate Judiciary Committee.

The need for this authority is clearly evident. The Immigration and Naturalization Service is presently engaged in the almost impossible task of stopping the flow of hundreds of thousands of illegal aliens into this country each year. In fiscal year 1976 the small INS staff apprehended approximately 875,000 illegal aliens. However, even with this large number of apprehensions it is estimated that many more escaped undetected. While no single additional Federal statute will totally eliminate this underground travel, the amendment which I am introducing would act as a deterrent by removing vehicles from this activity and making smuggling operations more expensive.

The amendment is essentially the same as existing Federal law from which the

U.S. Customs Service derives its authority to seize vehicles used in smuggling contraband into the United States. These statutes have been upheld many times by the Federal courts, and their effectiveness in deterring smuggling is generally accepted. In fiscal year 1977 the Customs Service seized several thousand conveyances. Of these, 989 vehicles, 16 vessels and 25 aircraft were forfeited.

The U.S. Customs Service has found its authority to seize vehicles to be extremely beneficial to its antismuggling efforts. And it seems logical that such authority should be extended to the Immigration and Naturalization Service since smuggling is involved in both situations.

Illegal immigration is a problem of monumental proportions which, because of its growing size, has the potential to seriously affect every facet of our economic and social life in this country. Estimates place the number of illegal aliens now living in this country between 4 and 8 million.

Although the INS is apprehending close to a million per year, it is generally agreed that the total number is increasing. Most of the illegal aliens who enter this country are young adults who are seeking employment. They are usually emigrating from a developing country that has a high rate of unemployment, or underemployment. The primary cause of this situation is the excessively high birth rate of the developing countries. In 1976 the world population passed the 4 billion mark, and it is continuing to grow at a staggering rate. Mexico, which accounts for most of the illegal aliens entering the United States, will see its population double in only 20 years, and in 50 years it will probably have more people than the United States. Since most of the illegal aliens come from the Western Hemisphere countries, we can anticipate that the efforts to emigrate to the United States will increase proportionately.

With the high rates of unemployment which we have experienced in recent months, I believe that the large numbers of illegal aliens who are willing to accept almost any type of job under almost any kind of adverse working conditions have contributed to the excessively high rates of unemployment in this country.

Not only do illegal aliens take jobs which could be held by American citizens, many experts believe that they also depress working conditions in the industries in which they are concentrated. Because of their illegal status, the workers cannot take the chance of drawing attention to themselves by demanding safe and healthy working conditions.

If illegal aliens have a significant impact on the present economy of this country, the prospects become even more disconcerting if we anticipate what the future holds. Zero population growth estimates that at current population growth and legal immigration levels, 800,000 illegal immigrants entering the United States each year would add 80 million to our population within the next 50 years. This would be the equivalent of adding seven additional cities the size of New York City to this country.

The amendment would also be aimed at another side of the issue which directly affects the well-being and safety of the illegal aliens themselves. In response to the increased number of aliens seeking entry and the restrictive measures instituted along our borders to control it, alien smuggling has developed into a large illegal business. The smugglers, "coyotes" as they are called, prey upon those seeking a better standard of living. Aliens are often charged exorbitant amounts for transportation into the United States, and the indications are that the business is thriving.

Christopher Dickey, a reporter who has done a series of articles for the Washington Post on the problem of illegal aliens in the Washington area, has called the situation a "cyclical drama." According to Mr. Dickey, the illegal aliens who are apprehended by the INS and are sent back to their home country have little difficulty in locating a "coyote" who will bring them back. Each time an illegal comes back, others are encouraged to make the trip because of the stories of employers who are more than willing to give them a job at wages much higher than they could ever earn at home.

Stories of murder, robbery, rape, and squalid travel conditions are often associated with these smuggling operations. Although I do not condone the process of illegal entry, I do not have any sympathy for the "coyotes" who use the misery of others for their personal gain. This amendment would provide one way of striking back at this criminal element by taking some of the profit out of their operations.

Mr. President, I believe that the case for passage of this amendment has been more than substantiated and I urge its adoption.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to en bloc.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, this bill gives the U.S. Immigration Service and the Attorney General the right to seize any vehicle used to smuggle illegal aliens into the United States. Further, the rights of an innocent vehicle owner not a party to the illegal act are protected by an amendment to the bill which I offered in committee.

This bill gives the Immigration Service the authority the Treasury Department and the Drug Enforcement Administration already have in regard to conveyances used to transport illegal drugs, firearms and alcohol.

The necessity to justify this statute is well proven. The right of the State to invoke forfeiture is founded in the common law, and it is based upon the premise one should not profit by one's own wrong doing.

The frequency of its application in drug related cases made by Federal law enforcement personnel makes an ironclad case in favor of making this statute of forfeiture available to immigration personnel who are charged with the duty of stemming the flow of illegal aliens across our borders.

The Congress historically has reserved unto itself the right to control the flow of aliens into our Nation. This right of control casts the duty on the Congress to give the immigration personnel the means and authority to achieve the goals set by the Congress in the control of illegal immigration.

Mr. President, it should be noted that in 1973 the Congress passed amendments to the immigration laws. The House committee bill contained similar seizure language to that contained in S. 3093 as introduced. The provisions of the House committee bill were subject of "Individual Views" by CHARLES E. WIGGINS of California. Mr. President, I ask unanimous consent that those Views be included in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. THURMOND. The amendment which I authored, directs the Attorney General within 180 days to promulgate regulations setting forth procedures for the expeditious return to the owners or other persons in charge of any vessel seized in violation of these provisions who is not a party to the illegal act. In other words, innocent owners would be entitled to a prompt return to their vehicles. Under current law, it is sometimes months or even years before wholly innocent parties can retrieve their property. Very often this involves considerable expense, including attorney's fees, storage and transportation of the vehicle as well as any damage as might occur. These regulations to be provided would hold the innocent owners harmless for any such expenses.

In my view, this will have a deterrent effect on the Immigration Service and perhaps set a precedent for other agencies who currently have the broader seizure and forfeiture authority. It is possible that there may be abuse of this provision where parties who are really part and parcel of the illegal acts would somehow claim they were innocent of the act. This problem, of course, would be a question of fact for determination in the administrative proceedings on the issue of return of the vehicle. It is my view that this problem would occur only in a minority of cases.

Mr. President, with these added provisions, I believe that S. 3093 is a much better bill. It goes far to answer the objections posed previously by Congressman WIGGINS.

EXHIBIT 1

ADDITIONAL VIEWS OF CONGRESSMAN CHARLES E. WIGGINS

The primary objective of H.R. 982 is to protect those who have the right to make up the domestic labor force from unfair and unlawful competition from illegal aliens. Such an objective has my unqualified support.

This bill would broaden the range of persons subject to punishment for participating in the "exploitation" of illegal aliens. Existing law makes it a felony to smuggle or attempt to smuggle aliens into the United States, 8 U.S.C. 1324 (a). This bill would add sections (b) and (c) to section 1324 to provide punishment for those who knowingly

employ illegal aliens, or engage in the business of referring illegal aliens for employment. I fully support this expanded definition of culpable behavior, and defer to the judgment of the Committee on the form and severity of the penalty provisions.

However, the Committee has seen fit to include, as section (d), a provision which mandates the seizure and forfeiture of vessels, vehicles, or aircraft used "in furtherance of a violation" of existing section (a) and insofar as proposed section (b) applies to those who refer for a fee or transport illegal aliens. The clear intent of the Committee is to inflict further punishment on those who exploit illegal aliens in violation of this statute. In fact, however, this forfeiture provision will impose considerable hardship and expense on wholly innocent persons and business entities, as well as persons who for a variety of reasons have not or can not be convicted of a violation of this statute. Only occasionally will this punishment be inflicted solely on the offender the Committee intends to punish.

My objection to forefeitures is only incidentally based on the fact that they are grossly inefficient methods of punishment. This legislative command that property "shall be seized and forfeited" if used "in furtherance of a violation" of the law offends the spirit of the protections afforded a person's right to own property by the Constitution of the United States. The Fourth Amendment protects the right of the people "to be sure in their . . . effects, against unreasonable . . . seizures." Yet this proposed forfeiture provision permits, indeed commands, a federal law enforcement agent to seize and impound on the spot any automobile he believes "has been or is being used" in violation of this law.

Although this forfeiture provision is intended to inflict punishment for a crime, it is specifically made civil in nature. Civil proceedings are dramatically different from criminal proceedings. A defendant has no right to be confronted by the witnesses against him as guaranteed by the Sixth Amendment, and no right to refuse to testify except as to matters protected by the Fifth Amendment. The government needs only to prove its case beyond a preponderance of the evidence to prevail, not beyond all reasonable doubt as is the standard in criminal cases. The government can appeal civil judgments. Verdicts may be directed against the defendants in favor of the government. Worst of all, administrators of the very agency which seizes the asset, rather than impartial juries, often determine the truth of facts upon which liability is based.

The Fifth Amendment commands that no person shall be "deprived of . . . property without due process of law; nor shall private property be taken for public use without just compensation." If the Committee intends to publish criminal conduct by seizing the personal property of the wrongdoer, should not a criminal conviction be a prerequisite to the punishment? Can anyone seriously argue that depriving a person of a $5,000 automobile differs from depriving him of $5,000 in cash because one is termed a forfeiture and one a fine? The bill contains no such requirement.

Consider the following hypothetical situation. A ship owner is arrested for smuggling aliens and the boat he operates is seized. The owner is tried and acquitted of the smuggling charge. The forfeiture provision proposed here directs the government to file a civil complaint (libel) against the boat. If the government can prove beyond a preponderance of the evidence (which could well be the same evidence which failed to persuade in the criminal trial) that the boat was used in furtherance of smuggling it would be forfeit. The owner would have absolutely no remedy to recover his boat or any compensation for it. No plea of double jeopardy is available, although in fact, he was tried for essentially the same misconduct twice. A court would point out that the double jeopardy protection of the Fifth Amendment prohibits only the infliction of two criminal penalties for the same act. Here the second penalty is "civil."

The calculated avoidance of Constitutional safeguards and criminal procedures to punish by forfeiture those guilty of a "civil" crime is clearly abusive. However, this abusive statute would punish persons not even arguably guilty of any wrongdoing. Such a harsh and intolerable result goes beyond abuse and into the spirit of the Eighth Amendment prohibitions against the infliction of "cruel and unusual punishments."

Consider again the hypothetical case of the ship owner charged with smuggling aliens. If that owner were instead a captain, and the ship owned by some other person or corporation, it would still be seized and forfeit to the government. The United States Attorney is commanded by this statute to proceed to forfeit this ship even though he knows the owner is totally without guilt. The federal judge presiding at the forfeiture proceeding will award the ship to the government even if he knows the owner is innocent. This manifestly unfair result is inevitable because of the fiction, which underlies the forfeiture law, that the object itself is guilty of wrongdoing and should be punished. The only issue in the forfeiture proceeding is whether or not the ship was used in furtherance of a violation of the law. It is my impression that the great majority of automobiles, boats, and other vessels seized and forfeited are owned, wholly or in part, by leinholders, conditional sales vendors, lessors, or other third party interests. This statute, then, is primarily directed at them.

The innocent people who have lost their automobiles, airplanes, or boats to the federal government may petition the Attorney General for clemency. If they can prove complete innocence, according to standards of innocence required by the Attorney General, they may get their property back, or at least part of it. The decision of the Attorney General, with an exception for a single review petition addressed to him, is absolute and unappealable. Even if the Attorney General decides you are guilt free, he may keep your property and pay you an amount judged by him to be fair value, 28 CFR 917(i). Even if you prove your innocence, the Attorney General will not return any property until the innocent party pays the "costs and expenses incident to the seizure of the property including any court costs and accrued storage charges," 28 CFR 917 (a). Is it a wise and enlightened statute that punishes the innocent even when they prevail? What about their attorney fees? What about the cost of renting or buying a replacement automobile or boat while the government holds theirs? How will they be made whole for the mental anguish, inconvenience and aggravation of proving their innocence in the fact of implacable incomprehensible laws?

These petitions for clemency, called petitions for remission or mitigation, are repugnant on two scores. Firstly, granting unreviewable discretion over the property rights of others to an administrator, tacitly allows the arbitrary exercise of that discretion, and so is contrary to the basic tenet that all powers of discretion must be exercised reasonably. Secondly, an innocent person must prove his innocence by a petition to an unseen employee of the Attorney General to avoid punishment. To those who condone such practices on the ground that the Attorney General "is fair" in returning property to people he finds innocent, I say it is unwise policy, at the very least, to relinquish Constitutionally guaranteed rights to the government in the hope that the government will be fair and generous in protecting those rights.

The imposition of civil forfeiture penalties for criminal behavior has long been criticized by the Supreme Court, see *Boyd* v. *United States*, 116 U.S. 616 (1886). In the *United States* v. *Coin and Currency*, 401 U.S. 715, 726 (1970), the Court quotes Blackstone's condemnation of the seizure of the property of the innocent by forfeiture "as based upon 'superstition' inherited from the 'blind days' of feudalism." However, the responsibility to write the law rests with Congress not the Supreme Court. It is for Congress to carry out its Constitutional duties, here to regulate Immigration and Naturalization, in a reasonable manner. There is no compelling reason, in fact no reason whatsoever, to punish by forfeiture in this statute. To do so would only add to existing similar abuses of Congressional power.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1276), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

The bill provides statutory authority for the seizure of vehicles used to transport persons in violation of section 274 of the Immigration and Nationality Act (8 U.S.C. 1324 (a)). Section 1324(a) of 8 U.S.C. provides:

§ 1324. Bringing in and harboring certain aliens; persons liable; authority to arrest.

(a) Any person, including the owner, operator, pilot, master, commanding officer, agent, or consignee of any means of transportation who—

(1) brings into or lands in the United States, by any means of transportation or otherwise, or attempts, by himself or through another, to bring into or land in the United States, by any means of transportation or otherwise;

(2) knowing that he is in the United States in violation of law, and knowing or having reasonable grounds to believe that his last entry into the United States occurred less than 3 years prior thereto, transports, or moves, or attempts to transport or move within th United States by means of transportation or otherwise, in furtherance of such violation of law;

(3) willfully or knowingly conceals, harbors, or shields from detection, or attempts to conceal, harbor, or shield from detection, in any place, including any building or any means of transportation; or

(4) willfully or knowingly encourages or induces, or attempts to encourage or induce, either directly or indirectly, the entry into the United States of—

any alien, including an alein crewman, not duly admitted by an immigration officer or not lawfully entitled to enter or reside within the United States under the terms of this chapter or any other law relating to the immigration or expulsion of aliens, shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding $2,000 or by imprisonment for a term not exceeding 5 years, or both, for each alien in respect to whom any violation of this subsection occurs: *Provided, however,* That for the purposes of this section, employment (including the usual and normal practices incident to employment) shall not be deemed to constitute harboring.

Although agents of the Customs Service have authority to seize vehicles violating customs laws, the Immigration and Naturalization Service and agents enforcing the immigration laws have no authority to confiscate vehicles used to smuggle or transport aliens. This lacuna in the law has resulted in a significant inability to enforce immigration statutes.

Granting authority to seize vehicles used

to smuggle aliens into the country will allow Border Patrol agents to remove many vehicles from the smuggling trade. This strikes smugglers with a double blow: loss of use of the vehicle and cost of replacement. Leonel Castillo, Commissioner of the Immigration and Naturalization Service, in testimony before the Immigration and Naturalization Subcommittee, gave a classic example of the extent to which vehicles are used repeatedly and flagrantly by smugglers:

"At present, the INS has no authority to impound vehicles used in alien smuggling. As a result, when we make a smuggling arrest the owner of the vehicle may simply claim it from us. Often the vehicle is back in use for smuggling by the next day.

"I can illustrate this with several examples from the Chula Vista Border Patrol Sector where our officers have apprehended and successfully sought prosecution of a large number of smuggling rights. A 1978 Ford 1-ton stake bed truck was purchased on April 14, 1978. On April 29, the truck was stopped with smuggled aliens in it. The owner picked it up from storage the same day. The next day, April 30, the truck was stopped carrying smuggled aliens. Perhaps exercising an abundance of cautions, the owner waited 2 days, until May 2, before picking up the truck. Thereafter, the vehicle was stopped and seized by the Customs Service, which does have impoundment authority. In another case, a 1967 Chevrolet pickup engaged in smuggling operations was stopped by INS officers 12 times between April, 1977 and March, 1978.

"These are merely several examples of the blatant repeat violations which we encounter. In the Chula Vista Section, 828 of the 3,600 vehicles intercepted while transporting undocumented aliens during fiscal year 1977 were repeaters. Nationwide, the repeat rate is about 20 percent. Without new legislation, this "revolving door" phenomenon will continue."

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1201, 1209, 1214, 1231, 1232, 1234, and 1236.

Mr. BAKER. Mr. President, reserving the right to object, I shall not object. These items were cleared on our calendar. We are perfectly agreeable to their consideration and passage.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

VERMEJO RECLAMATION PROJECT, NEW MEXICO—CONTRACT AMENDMENT

The Senate proceeded to consider the bill (S. 876) to authorize the Secretary of the Interior to amend the contract for the construction, operation, and maintenance of the Vermejo reclamation project between the Vermejo Conservancy District, located in the State of New Mexico, and the United States, which had been reported from the Committee on Energy and Natural Resources with an amendment on page 1, line 4, strike "authorized with and subject" and insert "authorized, subject", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of the Interior is authorized, subject to the written consent of the Vermejo Conservancy District, to amend contract numbered 178r–458, dated August 7, 1952, as amended, between the Vermejo Conservancy District, located in the State of New Mexico, and the United States for the construction, operation, and maintenance of the Vermejo reclamation project, to relieve the Vermejo Conservancy District of its remaining repayment obligation under such contract and such other penalties or other assessments or costs including interest under such contract which may become due or owing before the date of enactment of this Act, and to transfer all right, title, and interest in or to the project facilities to the Vermejo Conservancy District; except that the Vermejo Conservancy District, to the extent practicable, shall continue to operate and maintain the facilities of the Vermejo reclamation project for the benefit of all authorized project users and in accordance with the authorized project purposes.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

D.C. "HOME RULE" ACT AMENDMENTS

The bill (H.R. 12116) to amend the District of Columbia Self-Government and Governmental Reorganization Act to repeal the authority of the President to sustain the vetoes by the Mayor of the District of Columbia of Acts passed by the Council of the District of Columbia and repassed by two-thirds of the Council, to change the period during which acts of the Council of the District of Columbia are subject to congressional review, and for other purposes, was considered, ordered to a third printing, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1291), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of this House-passed bill (H.R. 12116) is to amend the "Home Rule Act" (District of Columbia Self-Government and Governmental Reorganization Act) (approved December 24, 1973, 87 Stat. 774), in order (1) to grant the Mayor authority to exercise a pocket veto; (2) to repeal Presidential review of Council acts vetoed by the Mayor and overridden by the Council; (3) to shorten and make more predictable the congressional review period for acts passed by the Council; (4) to conform the newly-enacted referendum and initiative process to the congressional review procedures; and, (5) to increase the Council's review period for budget acts.

MAJOR PROVISIONS

H.R. 12116 amends the "Home Rule Act" as follows:

Section 404(e) is amended to prevent a Council bill from becoming an act without the Mayor's signature if the Council adjourns before expiration of the 10-day mayoral review period:

(a) To repeal the President's power to sustain the Mayor's veto of acts passed by the Council;

(b) To conform the provisions of the recently enacted Charter Amendment (providing for initiative and referendum) to the Home Rule Act requirements as to transmittals to Congress and the congressional review procedures, and

(c) To shorten the congressional review period of Council acts to 30 calendar days, not including weekends, holidays, or days when either House is in recess of more than 3 days or in adjournment sine die.

The District Charter Amendment No. 1 (providing for initiative and referendum) is amended to conform to section 602(c)—the congressional review process of acts passed by Council.

NEED FOR LEGISLATION

After several years of local government under the Home Rule Act, the District of Columbia has found that several provisions consistently cause unnecessary bottlenecks in the legislative process. The President's Task Force on the District of Columbia discussed many of these problem areas, and recommended a number of the changes reflected in this bill. The clearest recommendation to come out of the task force was that Federal intrusion in purely local District decisions should be reduced or eliminated wherever possible. The most needed changes are those that delay the effective date of legislation because of overly long or unnecessary review periods. These time restraints on the Mayor and the Council often cause great difficulties in carrying out their legislative duties.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PERMANENT SUSPENSION OF DUTY ON CERTAIN DYEING AND TANNING MATERIALS

The Senate proceeded to consider the bill (H.R. 11409) to extend indefinitely the period during which certain dyeing and tanning materials may be imported free of duty, which had been reported from the Committee on Finance with amendments as follows:

On page 2, line 15, strike "Sec. 2." and insert "(c)";

On page 2, line 15, strike "the first section of this Act" and insert "subsection (a) of this section";

On page 2, line 18, strike "June 30, 1978" and insert "the date of enactment of this Act";

On page 2, beginning with line 20, insert the following:

(d) Upon request therefor filed with the customs officer concerned on or before the

ninetieth day after the date of enactment of this Act, the entry of any article—

(1) which was made after June 30, 1978, and before the date of enactment of this Act, and

(2) with respect to which there would have been no duty if the amendment made by subsection (a) of this section applied to such entry

shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930, or any other provisions of law, be liquidated or reliquidated as though such entry has been made on the date of enactment of this Act.

SEC. 2. TEMPORARY SUSPENSION OF DUTY ON CERTAIN FIELD GLASSES AND BINOCULARS.

(a) Subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by inserting in numerical sequence the following new item:

"912.06 Field glasses, opera glasses, and prism binoculars, not designed for use with infra-red light (provided for in item 708.51 or 708.52, part 2A, schedule 7), Free. No Change. On or Before 12/31/79."

(b) The amendment made by subsection (a) shall apply with respect to articles entered, or withdrawn from warehouse, for consumption on or after the date of the enactment of this Act.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read:

An Act to make permanent the existing temporary suspension of duty on certain dyeing and tanning materials, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PURCHASE OF CALENDARS

The resolution (S. Res. 585) relating to the purchase of calendars was considered and agreed to, as follows:

S. RES. 585

Resolved, That the Committee on Rules and Administration is authorized to expend from the contingent fund of the Senate, upon vouchers approved by the chairman of that committee, not to exceed $47,840 for the purchase of one hundred and four thousand calendars. The calendars shall be distributed as prescribed by the committee.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MARY R. COTHRAN

The resolution (S. Res. 586) to pay a gratuity to Mary R. Cothran, was considered and agreed to, as follows:

S. RES. 586

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Mary R. Cothran, mother of Mary R. Cothran, an employee of the Senate at the time of her death, a sum equal to ten and one half months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GARY DAVES AND MARC CAYER

The bill (H.R. 4533) for the relief of Gary Daves and Marc Cayer, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JOHN F. JOHNSON

The bill (H.R. 9075) for the relief of John F. Johnson, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TECHNICAL AND CLERICAL CORRECTIONS—H.R. 3946

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of Senate amendments to H.R. 3946.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTRACT DISPUTES ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of calendar order No. 1039, S. 3178, the Contract Disputes Act of 1978.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to consider the bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies, which had been reported from the Committee on Governmental Affairs and the Committee on the Judiciary, jointly, with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Contract Disputes Act of 1978".

DEFINITIONS

SEC. 2. As used in this Act—

(1) the term "agency head" means the head and any assistant head of an executive agency, and may "upon the designation by" the head of an executive agency include the chief official of any principal division of the agency;

(2) the term "executive agency" means an executive department as defined in section 101 of title 5, United States Code, an independent establishment as defined by section 104 of title 5, United States Code (except that it shall not include the General Accounting Office); a military department as defined by section 102 of title 5, United States Code, and a wholly owned Government corporation as defined by section 846 of title 31, United States Code, the United States Postal Service, and the Postal Rate Commission;

(3) the term "contracting officer" means any person who, either by virtue of his position or by appointment in accordance with applicable regulations, has the authority to enter into and administer contracts and make determinations and findings with respect thereto. The term also includes the authorized representative of the contracting officer, acting within the limits of his authority;

(4) the term "contractor" means a party to a Government contract other than the Government;

(5) the term "Administrator" means the Administrator for Federal Procurement Policy appointed pursuant to the Office of Federal Procurement Policy Act;

(6) the term "agency board" means an agency board of contract appeals established under section 8 of this Act; and

(7) the term "misrepresentation" means a false statement of substantive fact, or any conduct which leads to a brief of a substantive fact material to proper understanding of the matter in hand, made with intent to deceive or mislead.

APPLICABILITY OF LAW

SEC. 3. Unless otherwise specifically provided herein, this Act applies to any express or implied contract (including those of the nonappropriated fund activities described in sections 1346 and 1491 of title 28, United States Code) entered into by an executive agency for—

(1) the procurement of property, other than real property in being;

(2) the procurement of services;

(3) the procurement of construction, alteration, repair or maintenance of real property; or,

(4) the disposal of personal property.

CLAIMS AND DISPUTES SETTLEMENT AUTHORITY

SEC. 4. (a) Before referring any claim to the Attorney General, or commencing any litigation concerning such claim, each agency head, in accordance with the provisions of the Federal Claims Collection Act of 1966, is authorized to settle, compromise, pay, or otherwise adjust any claim by or against, or dispute with, a contractor relating to a contract entered into by it or another agency on its behalf, including a claim or dispute initiated after award of a contract, based on breach of contract, mistake, misrepresentation, or other cause for contract modification or rescission, but excluding a claim or dispute for penalties or forfeitures prescribed by statute or regulation which another Federal agency is specifically authorized to administer, settle, or determine. This section shall not authorize any agency head to settle, compromise, pay, or otherwise adjust any claim involving fraud.

(b) If a contractor is unable to support any part of his claim and it is determined that such inability is attributable to misrepresentation of fact or fraud on the part of the contractor, he shall be liable to the Government for an amount equal to such unsupported part of the claim in addition to all costs to the Government attributable to the cost of reviewing said part of his claim.

DECISION BY THE CONTRACTING OFFICER

SEC. 5. (a) All contract claims submitted by a contractor against the Government or by the Government against a contractor shall be in writing. After the submission of a con-

tract claim, the contracting officer shall issue a decision in writing and shall mail or otherwise furnish a copy of the decision to the contractor. The decision shall state the reasons for the decision reached, and shall inform the contractor of his rights as provided in this Act. Specific findings of fact are not required, but, if made, shall not be binding in any subsequent proceeding.

(b) The contracting officer's decision on the claim shall be final and conclusive and not subject to review by a forum, tribunal, or Government agency, unless an appeal or suit is timely commenced as authorized by this Act.

(c) A contracting officer shall issue a decision on any submitted claim promptly and, in any event, he shall issue a decision within sixty days from his receipt of a written request from the contractor that a decision be rendered within that period. This period may be extended by written agreement between the contractor and the executive agency. Any failure by the contracting officer to issue a decision on a contract claim within the period required will be deemed to be a decision by the contracting officer denying the claim and will authorize the commencement of the appeal or suit on the claim as otherwise provided in this Act. However, in the event an appeal or suit is so commenced in the absence of a prior decision by the contracting officer, the tribunal concerned may, at its option, stay the proceedings to obtain a decision on the claim by the contracting officer.

INFORMAL ADMINISTRATIVE CONFERENCE

SEC. 6. (a) It is the policy of the Congress that contractor claims should be resolved by mutual agreement, in lieu of litigation, to the maximum extent feasible. Accordingly, a contractor shall be afforded at least one opportunity, before or after a contracting officer's decision pursuant to section 5, for an informal conference with the agency involved for the purpose of considering the possibility of disposing of the claim by mutual agreement. This conference will be held within thirty days of the request for such conference, or later if mutually agreeable between the contractor and the executive agency head.

(b) The conferees may consider any matter, written or oral, relevant to the claim, but testimony or evidence shall not be taken. Any documentary materials or oral statements submitted during the conference shall not be evidence in any subsequent appeal or suit in court on the claim unless offered anew and admissible under applicable rules of evidence of the agency board or court. Any offers of settlement or compromise during or resulting from the conference shall be without prejudice and shall not be evidence or referred to in any subsequent appeal or suit in court on the claim.

(c) The designee or designees of the agency head conducting the informal conference shall be selected from a level above the office to which the contracting officer is attached, and if feasible, shall not have participated significantly in any prior consideration of the claim.

(d) Whenever an appeal or suit is initiated pursuant to this Act and the agency board or court determines that at least one informal conference requested by the contractor has not been held, the agency board or court shall stay any further proceedings until the conference is held or waived by the contractor.

CONTRACTOR'S RIGHT OF APPEAL TO BOARD OF CONTRACT APPEALS

SEC. 7. Within ninety days from the date of receipt of a contracting officer's decision under section 5, the contractor may appeal such decision to an agency board of contract appeals, as provided in section 8.

AGENCY BOARDS OF CONTRACT APPEALS

SEC. 8. (a) (1) Except as provided in paragraph (2) an agency board of contract appeals may be established within an executive agency when the agency head, after consultation with the Administrator, determines from a workload study that the volume of contract claims justifies the establishment of a full-time agency board of at least five members who shall have no other inconsistent duties. Workload studies will be updated at least once every three years and submitted to the Administrator.

(2) The Board of Directors of the Tennessee Valley Authority may establish a board of contract appeals for the Authority of indeterminate number of members.

(b) (1) Except as provided in paragraph (2), the members of agency boards shall be selected and appointed to serve in the same manner as hearing examiners appointed pursuant to section 3105 of title 5 of the United States Code, with an additional requirement that such members shall have had not fewer than five years' experience in public contract law. Members of agency boards serving as such on the effective date of this Act shall be considered qualified. The chairman and vice chairman of each board shall be designated by the agency head from members so appointed. The chairman of each agency board shall receive compensation at a rate equal to that paid a GS–18 under the General Schedule contained in section 5332, United States Code, the vice chairman shall receive compensation at a rate equal to that paid a GS–17 under such General Schedule, and all other members shall receive compensation at a rate equal to that paid a GS–16 under such General Schedule. Such positions shall be in addition to the number of positions which may be placed in GS–16, GS–17, and GS–18 of such General Schedule under existing law.

(2) The Board of Directors of the Tennessee Valley Authority shall establish criteria for the appointment of members to its agency board of contract appeals established in subsection (a) (2), and shall designate a chairman of such board. The chairman of such board shall receive compensation at a rate equal to the daily rate paid a GS–18 under the General Schedule contained in section 5332, United States Code for each day he is engaged in the actual performance of his duties as a member of such board. All other members of such board shall receive compensation at a rate equal to the daily rate paid a GS–16 under such General Schedule for each day they are engaged in the actual performance of their duties as members of such board.

(c) If the volume of contract claims is not sufficient to justify an agency board under subsection (a) or if he otherwise considers it appropriate, any agency head shall arrange for appeals from decisions by contracting officers of his agency to be decided by a board of contract appeals of another executive agency. In the event an agency head is unable to make such an arrangement with another agency, he shall submit the case to the Administrator for placement with an agency board. The provisions of this subsection shall not apply to the Tennessee Valley Authority.

(d) Each agency board shall have jurisdiction to decide any appeal from a decision of a contracting officer (1) under a contract made by its agency, and (2) under a contract made by any other agency when such agency or the Administrator has designated the agency board to decide the appeal.

(e) An agency board shall provide to the fullest extent practicable, informal, expeditious, and inexpensive resolution of disputes, and shall issue a decision in writing or take other appropriate action on each appeal submitted, and shall mail or otherwise furnish a copy of the decision to the contractor and the contracting officer.

(f) The rules of each agency board shall include a procedure for the accelerated disposition of any appeal from a decision of a contracting officer where the amount in dispute is $50,000 or less. The accelerated procedure shall be applicable at the election of only the contractor. Appeals under the accelerated procedure shall be resolved, whenever possible, within one hundred and eighty days from the date either party elects to utilize such procedure.

(g) (1) The decision of an agency board of contract appeals shall be final, except that—

(A) a contractor may appeal such a decision to the Court of Claims within one hundred twenty days after the date of receipt of a copy of such decision, or

(B) the agency head, if he determines that an appeal should be taken, and with the prior approval of the Attorney General, transmits the decision of the board of contract appeals to the United States Court of Claims for judicial review, under section 2510 of title 28, United States Code, as amended herein, within one hundred and twenty days from the date of the agency's receipt of a copy of the board's decision.

(2) Notwithstanding the provisions of paragraph (1), the decision of the board of contract appeals of the Tennessee Valley Authority shall be final, except that—

(A) a contractor may appeal such a decision to a United States district court pursuant to the provisions of section 1337 of title 28, United States Code within one hundred twenty days after the date of receipt of a copy of such decision, or

(B) The Tennessee Valley Authority may appeal the decision to a United States district court pursuant to the provisions of section 1337 of title 28, United States Code, within one hundred twenty days after the date of the decision in any case.

(h) Pursuant to the authority conferred under the Office of Federal Procurement Policy Act, the Administrator is authorized and directed, as may be necessary or desirable to carry out the provisions of this Act, to issue rules and regulations with respect to—the establishment, functions, and procedures of the agency boards; and

(i) (1) Following one hundred and twenty days from the date of enactment of this Act, the contract claims of all part-time agency boards (excluding the Tennessee Valley Authority) and boards of four members or less shall be consolidated with existing boards with greater than four members.

(2) All remaining boards of greater than four members shall develop workload studies for approval by the agency head as specified in section 8(a) (1).

SMALL CLAIMS

SEC. 9. (a) The rules of each agency board shall include a procedure for the expedited disposition of any appeal from a decision of a contracting officer where the amount in dispute is $10,000 or less. The small claims procedure shall be applicable at the sole election of the contractor.

(b) The small claims procedure shall provide for simplified rules of procedure to facilitate the decision of any appeal thereunder. Such appeals may be decided by a single member of the agency board with such concurrences as may be provided by rule or regulation.

(c) Appeals under the small claims procedure shall be resolved, whenever possible within one hunderd twenty days from the date on which the contractor elects to utilize such procedure.

(d) A decision against the Government or the contractor reached under the small claims procedure shall be final and conclusive and shall not be set aside except in cases of fraud.

(e) Administrative determinations and final decisions under this section shall have no value as precedent for future cases under this Act.

(f) The Administrator is authorized to review at least every three years, beginning with the third year after the enactment of the Act, the dollar amount identified as

within the guidelines of small claims, and based upon economic indexes selected by the Administrator adjust that level accordingly.

ACTIONS IN COURT: JUDICIAL REVIEW OF BOARD DECISIONS

SEC. 10. (a)(1) Except as provided in paragraph (2), and in lieu of appealing the decision of the contracting officer under section 5 to an agency board, a contractor may bring an action directly on the claim in the United States Court of Claims, notwithstanding any contract provision, regulation, or rule of law to the contrary.

(2) In the case of an action against the Tennessee Valley Authority, the contractor may only bring an action directly on the claim in a United States district court pursuant to section 1337 of title 28, United States Code, notwithstanding any contract provision, regulation, or rule of law to the contrary.

(3) Any action under paragraph (1) or (2) shall be filed within twelve months from the date of the issuance of the decision of the contracting officer concerning the claim, and shall proceed de novo in accordance with the rules of the appropriate court.

(b) In the event of an appeal by a contractor or the Government from a decision of any agency board pursuant to section 8, notwithstanding any contract provision, regulation, or rules of law to the contrary, the decision of the agency board on any question of law shall not be final or conclusive, but the decision on any question of fact shall be final and conclusive and shall not be set aside unless the decision is fraudulent, or arbitrary, or capricious, or clearly erroneous.

(c) In any appeal by a contractor or the Government from a decision of any agency board pursuant to section 8, the court may render an opinion and judgment and remand the case for further action by the agency board or by the executive agency as appropriate, with such direction as the court considers just and proper, or, in its discretion and in lieu of remand it may retain the case and take such additional evidence or action as may be necessary for final disposition of the case.

(d) Except as otherwise provided in this Act, and notwithstanding any statute or other rule of law, or any contract provision, every claim founded upon the same express or implied contract with the United States shall constitute a separate cause of action for purposes of any suit in a court of competent jurisdiction, and such court may, in its discretion, consolidate separate claims for purposes of decision or judgment, or delay acting on claim pending action on another claim.

(e) If two or more suits arising from one contract are filed in the Court of Claims and one or more agency boards, for the convenience of parties or witnesses, in the interest of justice, the Court of Claims may order the consolidation of such suits in that court or transfer any suits to or among the agency boards involved.

(f) In any suit filed pursuant to this Act involving two or more claims, counterclaims, cross-claims, or third-party claims, and where a portion of one such claim can be divided for purposes of decision or judgment, and in any such suit where multiple parties are involved, the court, whenever such action is appropriate, may enter a judgment as to one or more but fewer than all of the claims, portions thereof, or parties.

SUBPENA, DISCOVERY, AND DEPOSITION

SEC. 11. A member of an agency board of contract appeals may administer oaths to witnesses, authorize depositions and discovery proceedings, and require by subpena the attendance of witnesses, and production of books and papers, for the taking of testimony or evidence by deposition or in the hearing of an appeal by the agency board. In case of contumacy or refusal to obey a subpena by a person who resides, is found, or transacts business within the jurisdiction of a United States district court, the court, upon application of the agency board through the Attorney General shall have jurisdiction to issue the person an order requiring him to appear before the agency board or a member thereof, to produce evidence or to give testimony, or both. Any failure of any such person to obey the order of the court may be punished by the court as a contempt thereof. The laws with respect to the giving of false testimony, evidence, or affidavits in a Federal court proceeding shall apply to appeals before agency boards.

INTEREST

SEC. 12. Interest on amounts found due contractors on claims shall be paid to the contractor from the date the claim under section 5 accrues until payment following either a final decision of an agency board or a final decision of a court of competent jurisdiction, whichever is later, or a prior settlement thereof. The interest provided for in this section shall be paid at the rate established by the Secretary of the Treasury pursuant to Public Law 92-41 (85 Stat. 97) for the Renegotiation Board.

APPROPRIATIONS

SEC. 13. (a) Any judgment against the United States on a claim under this Act shall be paid promptly in accordance with the procedures provided by section 1302 of the Act of July 27, 1956, (70 Stat. 694, as amended; 31 U.S.C. 724a).

(b) Any monetary award to a contractor by an agency board of contract appeals shall be paid promptly in accordance with the procedures contained in subsection (a) above.

(c) Payments made pursuant to subsections (a) and (b) shall be reimbursed to the fund provided by section 1302 of the Act of July 27, 1956, (70 Stat. 694, as amended; 31 U.S. 724a) by the agency whose appropriations were used for the contract out of available funds or by obtaining additional appropriations for such purposes.

(d)(1) Notwithstanding the provisions of subsection (a) through (c), any judgment against the Tennessee Valley Authority on a claim under this Act shall be paid promptly in accordance with the provisions of section 9(b) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831(h)).

(2) Notwithstanding the provisions of subsection (a) through (c), any monetary award to a contractor by the board of contract appeals for the Tennessee Valley Authority shall be paid in accordance with the provisions of section 9(b) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831 (h)).

AMENDMENTS AND REPEALS

SEC. 14. (a) The first sentence of section 1346(a)(2) of title 28, United States Code, is amended by inserting before the period a comma and the following: "except that the district courts shall not have jurisdiction of any civil action or claim against the United States founded upon any express or implied contract with the United States or for liquidated or unliquidated damages in cases not sounding in tort which are subject to sections 8(g)(1) and 10(a)(1) of the Contract Disputes Act of 1978".

(b) Section 2401(a) of title 28, United States Code, is amended by striking out "Every" at the beginning and inserting in lieu thereof "Except as provided by the Contract Disputes Act of 1978, every".

(c) Section 1302 of the Act of July 27, 1956, as amended (70 Stat. 694, as amended; 31 U.S.C. 724a), is amended by adding after "2677 of title 28" the words "and decisions of boards of contract appeals".

(d) Section 2414 of title 28, United States Code, is amended by striking out "Payment" at the beginning and inserting in lieu thereof "Except as provided by the Contract Disputes Act of 1978, payment".

(e) Section 2517(a) of title 28, United States Code, is amended by striking out "Every" at the beginning and inserting in lieu thereof "Except as provided by the Contract Disputes Act of 1978, every".

(f) Section 2517(b) of title 28, United States Code, is amended by inserting after "case or controversy" the following: ", unless the judgment is designated a partial judgment, in which event only the matters described therein shall be discharged,".

(g) There shall be added to subsection (c) of section 5108 of title 5, United States Code, a paragraph (17) reading as follows:

"(17) the heads of executive departments or agencies in which boards of contract appeals are established pursuant to the Contract Disputes Act of 1978, and subject to the standards and procedures prescribed by this chapter, but without regard to subsection (d) of this section, may place additional positions, not to exceed seventy in number, in GS-16, GS-17, and GS-18 for the independent quasi-judicial determination of contract disputes, with the allocation of such positions among such executive departments and agencies determined by the Administrator for Federal Procurement Policy on the basis of relative case load."

(h)(1) section 1346(a) of title 28, United States Code, is amended by adding at the end thereof the following new paragraph:

"(3) Any action for injunctive or declaratory relief to restrain the disclousre of, or declare the rights of any person with respect to, trade secrets, data submitted pursuant to express or implied contract provisions restricting disclosure, and privileged or confidential financial information submitted pursuant to an offer or unsolicited proposal.

(2)(A) chapter 91 of title 28, United States Code, is amended by adding immediately after section 1506 the following new section:

"§ 1507. Declaratory relief in contract cases

"The Court of Claims shall have jurisdiction to grant injunctive or declaratory relief in an action against the United States to restrain the disclosure of and to declare the rights of any person with respect to trade secrets, data submitted pursuant to express or implied contract provisions restricting disclosure, and priviliged or confidential financial information submitted pursuant to an offer or an unsolicited proposal.".

(B) The table of sections for chapter 91 of such title is amended by inserting immediately after the item relating to section 1506 the following new item:

"1507. Declaratory relief in contract cases.".

(i) The Act of May 11, 1954 (68 Stat. 81; 41 U.S.C. 321, 322), is repealed.

(j)(1) The proviso in the last sentence of the second paragraph of section 9(b) of the Tennessee Valley Authority Act of 1933 (41 Stat. 63; 16 U.S.C. 831(b)) is amended by inserting "and the Contracts Disputes Act of 1978," after "as amended.".

(2) Section 9(b) of such Act is further amended by striking out the period at the end of the last paragraph and inserting in lieu thereof "and the Contracts Disputes Act of 1978".

(k) The first sentence of section 2201 of title 28, United States Code, is amended by inserting "including the Court of Claims," immediately after "States,".

(l)(1) Section 2510 of title 28, United States Code, is amended by—

(A) inserting "(a)" immediately before such section; and

(B) adding the following new subsection at the end thereof:

"(b)(1) The head of any executive department or agency may, with the prior approval of the Attorney General, refer to the Court of Claims for judicial review any final

decision rendered by a board of contract appeals pursuant to the terms of any contract with the United States awarded by that department or agency which such head of such department or agency has concluded is not entitled to finality pursuant to the review standards specified in section 10(b) of the Contracts Disputes Act of 1978. The head of each executive department or agency shall make any referral under this section within one hundred and twenty days of the receipt of a copy of the final appeal decision.

"(2) The Court of Claims shall review the matter referred in accordance with the standards specified in section 10(b) of the Contracts Disputes Act of 1978. The Court shall proceed with judicial review on the administrative record made before the board of contract appeals on matters so referred as in other cases pending in such court, shall determine the issue of finality of the appeal decision, and shall, as appropriate, render judgment thereon, take additional evidence, or remand the matter pursuant to the authority specified in section 1491 of this title.".

(2) (A) The section heading of such section is amended to read as follows:

"§ 2510. Referral of cases by the Comptroller General or the head of an executive department or agency.".

(B) The item relating to section 2510 in the table of sections for chapter 165 of title 28, United States Code, is amended to read as follows:

"2510. Referral of cases by the Comptroller General or the head of an executive department or agency.".

SEVERABILITY CLAUSE

SEC. 15. If any provision of this Act, or the application of such provision to any persons or circumstances, is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

EFFECTIVE DATE OF ACT

SEC. 16. This Act shall apply to contracts entered into one hundred twenty days after the date of enactment. Notwithstanding any provision in a contract made before the effective date of this Act, the contractor may elect to proceed under this Act with respect to any claim pending then before the contracting officer or initiated thereafter.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. BAKER. Mr. President, I thank the managers of the contract disputes bill, S. 3178, for their cooperation in tailoring that bill to the needs of the Tennessee Valley Authority. The programs of TVA are diverse and its rules and responsibilities relative to the purchase and sales of property range from regulatory control to research and development in advanced chemical processes for fertilizers.

The TVA is a hybrid organization which possesses both the characteristics of a Federal agency and an independent corporation. The autonomy of its Board of Directors in setting policies is of paramount importance if TVA is to operate successfully in all of its modes.

For that reason, I have advocated a careful modification of S. 3178 to assure TVA's continued flexibility in procurement practices.

These modifications serve three purposes:

First, the sales of power and fertilizer by TVA are exempted from the bill. Those sales contracts are not currently subject to an administrative review process. The role of TVA in these agreements is both regulatory and commercial. Clearly these functions are not typical Federal procurement functions, and they are vital to the independent corporate role of TVA. It is essential that congressional action relative to these functions show careful concern for the continued autonomy of the Board of TVA in setting policies in these areas.

Second, while other contracts of TVA are subjected to the dispute process in the bill, the administrative procedures are controlled by the TVA. This further assures the independence of the agency.

Third, the modification deletes an amendment to the Tennessee Valley Authority Act. Amendments to this act would properly be within the jurisdiction of the Senate Environment and Public Works. The deletion of this provision helps avoid potential committee jurisdictional problems.

Mr. President, with that preface I have no objections to the adoption of S. 3178. I thank the managers of the bill for their cooperation and assistance.

Mr. THURMOND. Mr. President, as the ranking minority member of the Senate Judiciary Committee, I rise in support of S. 3178, a bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies, as amended in the nature of a substitute. S. 3178—the Contract Disputes Act of 1978—in the words of the report issued jointly by the Senate Committees on Governmental Affairs and Judiciary, ' provides a fair, balanced, and comprehensive statutory system of legal and administrative remedies in resolving Government contract claims. The act's provisions help to induce resolution of more contract disputes by negotiation prior to litigation; equalize the bargaining power of the parties when a dispute exists; provide alternate forums suitable to handle the different types of disputes; and insure fair and equitable treatment to contractors and Government agencies." The substitute bill was supported by the two Senate committees, jointly, without the filing of any minority or individual views. The distinguished Senators LAWTON CHILES and HOWARD METZENBAUM, submitted the 53-page report on behalf of the Committee on Governmental Affairs and the Committee on the Judiciary, respectively. The distinguished Senators DENNIS DECONCINI, H. JOHN HEINZ, HOWARD M. METZENBAUM and BOB PACKWOOD cosponsored the proposed legislation.

Mr. President, the proposed law implements recommendations made by the Commission on Government Procurement. Although some concern arose as to the impact of this bill on defense procurement contracts, these problems have been successfully resolved by amendments today considered with the bill. S. 3178 should be enacted.

Mr. METZENBAUM. Mr. President, earlier this year, the Subcommittee on Citizens and Shareholders Rights and Remedies of the Committee on the Judiciary, which I chair, held joint hearings with the Committee on Governmental Affairs' Subcommittee on Federal Spending and Open Government, chaired by Senator CHILES. Those hearings were extremely useful and played a role in producing what I consider an excellent piece of legislation. I am pleased to join the Senator from Florida as a cosponsor, and I am sure that my colleagues will join me in commending him for the outstanding contribution he has made in this bill toward reform of the Federal procurement process.

The Contracts Disputes Act of 1978 is the end result of years of careful study and analysis. In 1972, for example, the Commission on Government Procurement issued a report that was sharply critical of the manner in which the Federal Government handles disputes with contractors. That report found that too often the agency boards charged under the existing system with reviewing contract disputes had very little credibility with the parties to those disputes. Frequently, the boards were perceived by the parties as excessively responsive to the contracting agencies whose disputes they decided. Furthermore, the boards were often viewed as lacking the authority and prestige needed to make sound and objective decisions and the procedures established by the boards have been widely criticized for failing to provide the necessary procedural safeguards and due process. The board procedures have also been justly described as excessively cumbersome where smaller claims are concerned.

The bill before us addresses each of these longstanding problems.

The bill provides for strong and independent Agency Boards of Appeal by the simple expedient of prohibiting Board members from undertaking duties within any agency that would be inconsistent with their judicial role. In addition, the bill improves the factfinding ability of the Boards by providing them with subpena and discovery power. It also provides for increased compensation to Board members in order to insure that the Government will be able to retain the high caliber personnel needed to make the strengthened system work effectively. And finally, the bill simplifies procedures for handling claims involving $10,000 or less.

These changes are badly needed. They will streamline contract disputes and they will clarify what are now confusing procedures.

But, Mr. President, the bill will do more than simply improve administration. It also contains tough provisions designed to discourage unwarranted contractor claims against the Government.

There can be no doubt that inflated contractor claims have cost the taxpayers of this country many millions of dollars. Under the leadership of the Senator from Wisconsin, the Joint Economic Committee has turned up example after example of questionable claims made by contractors against the Federal Government. In some cases, it appears that contractors have made a practice of rou-

timely submitting such claims simply to test the limits of Government tolerance—or credibility.

The current investigation of the General Services Administration involves widespread fraud and misrepresentation on the part of contractors and agency officials. It is difficult to imagine a more compelling case for increasing the deterrent effect of our laws against fraud.

Section 5 of the bill would discourage fraudulent claims by making any contractor who submits a fraudulent or misrepresented claim liable for an amount equal to the level of the claim itself. This provision is separate and distinct from the rights now possessed by the Government in laws such as the False Claims Act and the forfeiture statute. It supplements existing law because it reaches incipient action for which there is presently no adequate remedy. This legislation is the appropriate place in which to address this problem because it puts the contractor on notice that the kind of "horsetrading" in which some have indulged in the past is no longer legitimate.

Mr. President, I want to make it clear that this provision will in no way limit the right of contractors to make legitimate claims for recovery of legitimate costs. It will have no effect on the vast majority of contractors. It is directed only against that small minority of contractors who seek to play fast and loose with public funds.

Mr. President, I believe that we would be remiss were we to fail to move on this legislation against those few contractors who do, in fact, engage in fraud and misrepresentation. Today, when taxpayers justifiably complain of excessive Government spending, we cannot afford to overlook any opportunity to put an end to dishonesty and waste.

In closing, Mr. President, I want to urge the Senate to act promptly to adopt this legislation. In doing so, we will insure that contractors will receive the fair and objective treatment to which they are entitled. And we shall do so in a way that will protect the interests of the taxpayer.

Mr. PROXMIRE. Mr. President, Senator CHILES has performed a real service for the taxpayer. The Contract Disputes Act of 1978 represents a major step forward toward the establishment of a comprehensive system for handling disputes arising out of Government contracts.

PROTECTS TAXPAYER

Any effort to balance the rights and obligations of interested parties when a contract claim is filed would be inherently difficult. In addition to the Government and the contractor who are obviously concerned with the way contract disputes are resolved, the taxpayer also has a legitimate concern. In the final analysis the taxpayer will pay the bill for any claims settlement requiring an outlay of public funds. Therefore his interests, too, need to be taken into account.

I am satisfied that the bill we are acting on today, S. 3178, protects the taxpayer and provides for a fair and balanced procedure for the resolution of claims.

CLAIMS MUST BE DECIDED ON THEIR MERITS

I believe there is a consensus among those who participated in the drafting of the act that contract claims against the Government be decided strictly on their merits. It is most important that the taxpayer be assured that no money is paid by the Government to a private contractor for an unsubstantiated claim. Regardless of the circumstances of any individual case, there is simply no justification for any Government agency paying for a claim unless it has been found to be meritorious after a thorough examination by professional Government claims examiners. It is my hope that this act will help eliminate the filing of unsubstantiated or inflated claims by contractors who have experienced cost overruns because of their own mismanagement or inefficiency.

PROCEDURES MAKE DELAYS UNNECESSARY

It is also important that meritorious claims be settled promptly and that there be no undue delay in the evaluation and settlement of claims. S. 3178 provides for procedures which should make undue delays unnecessary.

There is no way to insure against the possibility that a claim may be unsubstantiated, inflated, or fraudulent, or that a contractor may be unreasonable in settlement negotiations. There are stiff penalties for fraudulent claims, but a contractor can make it impossible to reach a voluntary settlement of any claim and he has many opportunities to delay the claims review process.

In such cases the Government must resign itself to following the established procedures. Under the act a contractor may appeal the decision of the contracting officer to the agency's Board of Contract Appeals or directly to the Court of Claims. If the contractor goes through the Board of Appeals the Board's decision may be appealed to the Court of Claims. In any event, the agency should be willing to follow the established procedures to their administrative or judicial conclusion.

There are also procedures in this act to prevent Government officials from unduly delaying the resolution of a claim. In the case of claims under $50,000, the contracting officer must issue a decision in 60 days. For larger claims the decision must be issued within a reasonable time taking into account the size and complexity of the claim.

PUBLIC LAW 85–804

The act does not deal with the set of problems that fall under Public Law 85–804. Public Law 85–804 provides for extra contractual relief to contractors. It is not, strictly speaking, a mechanism for resolving contract disputes. There is good reason, therefore, for dealing with the contract disputes process and Public Law 85–804 separately.

The manner in which Public Law 85–804 has been employed recently by the Navy has caused some concern within Congress. The Banking, Housing and Urban Affairs Committee has an interest in this matter because of its responsibilities for defense production. The Banking Committee has already begun to inquire into the way Public Law 85–804 affects defense production and it is planned that more be done in this area in the near future.

I congratulate Senator CHILES for the magnificent task he has performed. He has had to balance the concerns of many Government agencies, committees of Congress, and outside groups. He showed great wisdom and patience by arranging numerous meetings where the many concerns could be expressed and I personally appreciate the spirit of cooperation, the courtesy and the enormous energy with which he and his staff conducted themselves.

Mr. SASSER. Mr. President, I would like to take this opportunity to express my support for S. 3178, as amended.

S. 3178 is aimed at reestablishing principles of equitable treatment for both the Federal Government and Government contractors in contracts disputes and claims.

During the markup session of S. 3178 by the Governmental Affairs Committee, I raised some concerns as to the possible effects this bill would have on the operations of the Tennessee Valley Authority, particularly with respect to the sale of fertilizer and public power. I would like to commend both Senator CHILES and METZENBAUM for their work resolving the issues raised in this important area. I am pleased with the amendments which have been offered with regard to TVA.

TVA's independent corporate status is the result of the avowed intent of the President and the Congress that TVA should be created as "a corporation clothed with the power of Government but possessed with the flexibility and initiative of a private enterprise." With its own independently established procurement system, TVA has found it beneficial to maintain a degree of flexibility without recourse to lengthy and complex regulations and procedures.

TVA serves 7 of our 50 States; its energy solution for our region is a large part of our national answer to the energy crisis. My main concern is that TVA continue supplying electricity to the Tennessee Valley at the lowest possible cost. Our region is highly dependent on electricity, which means that rate increases are hard on all of us, particularly the poor and elderly. TVA must remain autonomous. TVA's contracting operation, which is geographically removed from the District of Columbia, should be as close as possible to the people it serves so that it can work for their interests.

Mr. President, S. 3178, as amended, is responsive to TVA's unique legal, contractual and program situation.

UP AMENDMENT NO. 2049

Mr. ROBERT C. BYRD. Mr. President, I send a series of amendments to the desk and ask that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes unprinted amendments numbered 2049.

Mr. ROBERT C. BYRD. I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 23, line 14, strike out "either by virtue of his position or".

On page 24, line 6, insert "of fact" immediately after " 'misrepresentation".

On page 24, line 12, insert "(a)" after "Sec. 3.".

On page 24, between lines 22 and 23, insert the following:

(b) With respect to contracts of the Tennessee Valley Authority, the provisions of this Act shall apply only to those contracts which contain a disputes clause requiring that a contract dispute be resolved through an agency administrative process. Notwithstanding any other provision of this Act, contracts of the Tennessee Valley Authority for the sale of fertilizer or electric power or related to the conduct or operation of the electric power system shall be excluded from the Act.

(c) This Act does not apply to a contract with a foreign government, or agency thereof, or international organization, or subsidiary body thereof, if the head of the agency determines that the application of the Act to the contract would not be in the public interest.

On page 24, beginning on line 23, strike out all through line 14 on page 25, and insert in lieu thereof the following:

MARITIME CONTRACTS

SEC. 4. Appeals under paragraph (g) of section 8 and suits under section 10, arising out of maritime contracts, shall be governed by the Act of March 9, 1920, as amended (41 Stat. 525, as amended; 46 U.S.C. 741–752) or the Act of March 3, 1925, as amended (43 Stat. 1112, as amended; 46 U.S.C. 781–790) as applicable, to the extent that those Acts are not inconsistent with this Act.

On page 25, line 21, insert immediately after the period the following: "Liability under this subsection shall be determined within 6 years of the commission of such misrepresentation of fact or fraud."

On page 25, between lines 14 and 15, insert the following:

"FRAUDULENT CLAIMS"

On page 25, line 15, strike out "(b)" and insert in lieu thereof "SEC. 5.".

On page 25, beginning with lines 23, strike out all through line 7 on page 26, and insert in lieu thereof:

"SEC. 6. (a) All claims by a contractor against the government relating to a contract shall be in writing and shall be submitted to the contracting officer for a decision. All claims by the government against a contractor relating to a contract shall be the subject of a decision by the contracting officer. The contracting officer shall issue his decisions in writing, and shall mail or otherwise furnish a copy of the decision to the contractor. The decision shall state the reasons for the decision reached, and shall inform the contractor of his rights as provided in this Act. Specific findings of fact are not required, but, if made, shall not be binding in any subsequent proceeding. The authority of this subsection shall not extend to a claim or dispute for penalties of forfeitures prescribed by statute or regulation which another Federal agency is especially authorized to administer, settle, or determine. This section shall not authorize any agency head to settle, compromise, pay, or otherwise adjust any claim involving fraud.".

On page 26, line 9, strike out "a forum." and insert "any forum,".

On page 26, line 11, add the following at the end thereof: "Nothing in this Act shall prohibit executive agencies from including a clause in government contracts requiring that pending final decision of an appeal, action, or final settlement, a contractor shall proceed diligently with performance of the contract in accordance with the contracting officer's decision.".

On page 26, beginning on line 12, strike out all through line 2 on page 27 and insert in lieu thereof the following:

(c)(1) A contracting officer shall issue a decision on any submitted claim of $50,000 or less within sixty days from his receipt of a written request from the contractor that a decision be rendered within that period. For claims of more than $50,000, the contractor shall certify that the claim is made in good faith, that the supporting data are accurate and complete to the best of his knowledge and belief, and that the amount requested accurately reflects the contract adjustment for which the contractor believes the government is liable.

(2) A contracting officer shall, within sixty days of receipt of a submitted certified claim over $50,000—

(A) issue a decision; or

(B) notify the contractor of the time within which a decision will be issued.

(3) The decision of a contracting officer on submitted claims shall be issued within a reasonable time, in accordance with regulations promulgated by the agency, taking into account such factors as the size and complexity of the claim and the adequacy of the information in support of the claim provided by the contractor.

(4) A contractor may request the agency board of contract appeals to direct a contracting officer to issue a decision in a specified period of time, as determined by the board, in the event of undue delay on the part of the contracting officer.

(5) Any failure by the contracting officer to issue a decision on a contract claim within the period required will be deemed to be a decision by the contracting officer denying the claim and will authorize the commencement of the appeal or suit on the claim as otherwise provided in this Act. However, in the event an appeal or suit is so commenced in the absence of a prior decision by the contracting officer, the tribunal concerned may, at its option, stay the proceedings to obtain a decision on the claim by the contracting officer.

On page 27, beginning on line 3, strike out all through line 11 on page 28.

On page 28, line 15, strike "5" and insert in lieu thereof "6".

On page 34, line 16, strike "5" and insert in lieu thereof "6".

On page 28, line 24, strike out "five" and insert in lieu thereof "three".

On page 29, line 12, strike out "Members" and insert "Full-time members".

On page 29, line 5, insert "an" immediately before "indeterminate".

On page 31, line 18, strike out "either party" and insert "the contractor".

On page 31, line 1, strike out "under" both times it appears and insert in lieu thereof "relating to".

On page 31, line 4, immediately after the period, add the following: "In exercising this jurisdiction, the agency board is authorized to grant any relief that would be available to a litigant asserting a contract claim in the Court of Claims.".

On page 31, line 15, immediately before "election" insert "sole".

On page 32, beginning with the word "rules" on line 23, strike out through the dash on line 24 and insert: "guidelines with respect to criteria for".

On page 32, line 25, strike out the semicolon and the word "and" and insert "(except for a board established by the Tennessee Valley Authority).".

On page 33, strike lines 1 through 9 and insert the following in lieu thereof:

(i) Within one hundred and twenty days from the date of enactment of this Act, all agency boards, except that of the Tennessee Valley Authority, of three or more full time members shall develop workload studies for approval by the agency head as specified in section 8(a)(1).

On page 34, lines 8 and 9, strike out "identified as within the guidelines of small claims," and insert in lieu thereof "defined in section 9(a) as a small claim,".

On page 35, strike out lines 13 and 14 and insert in lieu thereof the following: "decision is fraudulent, or arbitrary, or capricious, or so grossly erroneous as to necessarily imply bad faith, or if such decision is not supported by substantial evidence.".

On page 35, line 2, strike out "issuance" and insert "receipt by the contractor".

On page 35, beginning on line 24, strike out all through line 7 on page 36.

On page 36, line 8, strike out "(e)" and insert in lieu thereof "(d)".

On page 36, line 14, strike out "(f)" and insert in lieu thereof "(e)".

On page 36, line 10, strike out the comma and insert "or".

On page 37, line 6, immediately after "General" add a comma and the following: "or upon application by the board of contract appeals of the Tennessee Valley Authority,".

On page 37, line 11, beginning with the word "The" immediately after the period, strike out all through the period on line 14.

On page 37, strike out lines 16 through 21 and insert in lieu thereof the following:

"Sec. 12. Interest on amounts found due contractors on claims shall be paid to the contractor from the date the contracting officer receives the claim pursuant to section 6(a) from the contractor until payment thereof. The interest provided for in this section shall".

On page 40, beginning with line 25, strike out through the matter following line 14 on page 42.

On page 42, line 15, strike out "(1)" and insert "h."

On page 43, immediately after the matter appearing after line 24, insert the following new subsection:

(i) Section 1491 of title 28, United States Code, is amended by adding the following sentence at the end of the first paragraph thereof: "The Court of Claims shall have jurisdiction to render judgment upon any claim by or against, or dispute with, a contractor arising under the Contract Disputes Act of 1978.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the explanation of the amendments be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXPLANATION OF AMENDMENTS—S. 3178

The great majority of the submitted amendments to S. 3178 are technical and clarifying in nature.

The five amendments dealing with the Tennessee Valley Authority clarify the application of S. 3178 to the operation of the TVA. The purpose of these amendments is to maintain the status quo regarding the traditional flexibility and independence of the Tennessee Valley Authority and to establish the terms and conditions of its contracts while bringing under the Act those ordinary procurement contracts of TVA in which a disputes clause is used. For the purposes of the TVA, the term "disputes clause" is intended to mean the kind of disputes procedure usually found in ordinary Government procurement contracts; that is, a clause which requires a contractor to pursue a claim first in an agency-conducted administrative process before going to court. It does not include other kinds of mechanisms negotiated in a contract, like specifying an independent third party to decide certain kinds of matters or special mechanisms to establish prices or price adjustments in long-term contracts. It is recognized that the Tennessee Valley Au-

thority has highly specialized purchasing needs and that it must have the freedom to exercise its business judgment in individual instances to be able to maintain the efficiency of its operations.

Although contracts relating to the electric power system and fertilizer sales of the Tennessee Valley Authority have not historically contained a disputes clause, they have been specifically exempted because their unique nature transcends the ordinary procurement and disposal contracts this Act intends to cover.

These amendments relating to the operation of the Tennessee Valley Authority would permit the TVA to implement the Act entirely on its own and not be subject to the regulations of the Administrator of the Office of Federal Procurement Policy. Also, the agency board of the TVA may enforce its own subpenas. And lastly, the amendment to the TVA Act is deleted as unnecessary and potentially misleading.

The amendments which delete sections 4(a) and add new language to reported sections 5(a), 8(d), and 13(b), address the concerns expressed by the Banking, Housing and Urban Affairs Committee, the subcommittee on Priorities and Economy in Government of the Joint Economic Committee and the Armed Services Committee that the Act not permit the Contracting Officer or the Agency Boards to grant the discretionary relief solely authorized by Public Law 85–804. The Act does not permit contracting officers or Agency Boards to grant such relief. Executive agency compromise and settlement authority is not addressed in this Act as this is a matter considered to be included in their existing procurement/acquisition authority under the established precedents. "All disputes" authority to eliminate the present problem whereby contested "breach" of contract cases cannot be resolved within the current disputes process is conferred to the executive agencies and the agency boards by the provisions in new Section 6(a) and 8(d) requiring all claims to be the subject of a Contracting Officer's decision and granting full jurisdiction in the Board of Contract Appeals to grant appropriate relief. The grant of authority to the agency boards in the amendment to section 8(d) is meant to supplement those situations where there is inadequate authority on the part of the contracting officer to fully resolve disputes. Agency boards will now have the same authority as the Court of Claims would have in contract cases under section 10(a), and will be in a position to hear the appeals of all contracting officers' decisions.

Section 12, Interest, is amended to address the concerns expressed by the executive agencies as well as the Armed Services Committee and the Justice Department that the determination as to "the date the claim accrues" could cause problems in defining the actual date when interest should start. There was added concern that contractors might delay submission of claims, thus not allowing the procuring agency the opportunity to review the claim at an early stage and possibly disposed of it. Because of these concerns, Section 12 has been amended to provide for interest on amounts found due contractors to be paid from the date the contracting officer receives the claim from the contractor until the payment thereof. This will provide a specific date from which interest will be paid and serve as an incentive for contractors to submit claims as soon as they are identified.

The amendment deleting section 10(d) of S. 3178 is out of a concern that the section might be interpreted as permitting contractors to split claims arising out of the same set of facts, thereby needlessly multiplying causes of action and encouraging forum shopping. It is not the intention of the committees to change the present law regarding joinder, compulsory counterclaims and definition of separate claims.

The amendment which strikes the last sentence of section 11 deals with the laws relating to false statements. Since such laws would be applicable by their own terms in appropriate situations the language of the bill might be construed as being a limit rather than a clarification.

The amendment to the reported section 5 (b) is a provision that would allow executive agencies the right to include in their contracts a clause requiring that pending final decision of an appeal or suit, or final settlement, a contractor shall proceed diligently with performance of the contract in accordance with the Contracting Officer's decision. This amendment addresses the concern of the Department of Defense that by not including such a statement in the statute, they might be precluded from inserting and enforcing sections in their contracts requiring that contractors continue performance on their contracts pending final determination of their claims. This will give the executive agencies the flexibility they currently have to include such clauses in their contracts.

Section 3 of S. 3178 is amended by adding a new subsection 3(c). This new section responds to the concerns of the Department of Defense in the handling of disputes in purchasing of supplies and services with foreign governments. These contracts are often regarded by other governments as being international agreements rather than conventional commercial transactions. Consistent with this characterization, these agreements frequently provide that disputes arising during performance of the agreement will be resolved through consultation among the governments. This amendment would give the agency head the authority and flexibility to deal with these types of cases.

The amendment to reported section 4(b) establishes a six-year statute of limitations for cases involving misrepresentation of fact or fraud.

Section 6 is deleted from the reported S. 3178. It is still the policy of Congress that contractor claims should be resolved by mutual agreement, in lieu of litigation, to the maximum extent possible. This amendment, however, reflects the concerns of the Department of Defense, Senator Proxmire, and Admiral Rickover that contractors will use this statutory authority for a meeting with superiors of the contracting officer to undermine the negotiating position of the contracting officer. I am sensitive to this concern. I also continue to believe that every effort should be made to limit the number of cases that need to be litigated. In many instances this can be accomplished by an informal conference. While this amendment deletes the statutory requirement to make available to the contractor an informal conference, I would expect that the executive agencies and the contractors will make every effort to resolve claims and disputes by mutual agreement, in lieu of litigation, to the maximum extent feasible.

Section 14(k) of the reported S. 3178 has been eliminated from the Act. This section would have given the Court of Claims jurisdiction under the Declaratory Judgment Act. The elimination of this provision addresses concerns expressed by the Justice Department, the Department of Defense and the Armed Services Committee that allowed the Court of Claims declaratory judgment authority would undermine the disputes resolving process by permitting, in some cases, access to the Court before presentation of a claim to the contracting officer. The subject of equity relief was never addressed by the Procurement Commission and I do not believe that S. 3178 is the correct forum for making this change in the jurisdiction of the Court of Claims.

A new section 4, Maritime Contracts, is added to S. 3178. The legislative report defined very precisely that the current jurisdictions for Maritime Contract claims is to be maintained and not changed by S. 3178. Concern has been expressed by the Department of Defense that this position should be included in the statute, thus section 4 has been added.

Section 10(b) is amended to change the standard of review on appeals of agency board decisions from "clearly erroneous" to "substantial evidence." As was stated in the legislative report of S. 3178, testimony was almost evenly divided between maintaining the current standard of "substantial evidence" and changing to "clearly erroneous." I am persuaded to retain the current standard for the following reasons:

1. Little hard evidence has been documented that the current standard is not working.

2. "Substantial evidence" is the almost universal standard for reviewing fact determinations by expert administrative bodies. It is the present standard and has been used for the last 24 years to review contracting decisions.

3. A major thrust of S. 3178 is to make the agency boards more prestigious and independent. Changing the standard of review would be counter-productive to this objective. The bill, therefore, makes no change in the present standard of review of agency board decisions.

Section 5(c) in the reported S. 3178 (section 6(c) in the Act as passed by the Senate) has been amended due to the concerns expressed by the Department of Defense, Senator Proxmire, and Admiral Rickover that the provisions of section 5(c), with regard to setting a time limit of 60 days after written request for a decision, were too limiting, especially for large, complex claims. The intent to this provision was to safeguard the interests of the contractor from possible unreasonable delays by contracting officers. This amendment would satisfy both concerns. The ultimate decision as to the appropriate time limit if there is a conflict by the contractor and the contracting officer will be made by the agency board after a petition by the contractor. This will safeguard the contracting officer from an arbitrary and unreasonable request from a contractor on a large complex claim and would also afford the contractor relief from possible delaying tactics of a contracting officer.

Section 14(h) in the reported S. 3178 has been eliminated from the Act. This action addressed concerns expressed by the Department of Defense, the Armed Services Committee, and the Administrative Practices Subcommittee in the Senate. The letter received from the Subcommittee Chairman, James Abourezk, is attached.

WASHINGTON, D.C.,
October 5, 1978.

Hon. LAWTON CHILES,
Chairman, Subcommittee on Federal Spending Practices and Open Government, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR LAWTON: I am writing to express the reasons for our opposition to § 14(h) of S. 3178, the Contract Disputes Act of 1978.

S. 3178, § 14(h), would vest in the Court of Claims and the district courts jurisdiction "to restrain the disclosure of and to declare the rights of any person with respect to trade secrets, data submitted pursuant to express or implied contract provisions restricting disclosure, and privileged or confidential financial information submitted pursuant to an offer or an unsolicited proposal."

As you may know, the Subcommittee on Administrative Practice and Procedure has general and legislative oversight responsibility for the Freedom of Information Act (FOIA). Generally, we are concerned that

the effect of § 14(h), if enacted, would be to revise extensively and unwisely current FOIA law with regard to the disclosure of allegedly confidential commercial information submitted by private contractors to government agencies.

Our specific reasons for opposing § 14(h) are as follows:

1. Enactment of § 14(h) would be premature in view of the pending Supreme Court case of Chrysler v. Brown.

The Supreme Court this term will decide the case of *Chrysler Corporation v. Schlesinger*, 565 F. 2d 1172 (3rd Cir. 1977), *cert. granted sub. nom., Chrysler Corporation v. Brown*, Sup. Ct. No. 77-922 (March 6, 1978). This important case raises a number of relevant issues, the resolution of which may make 14(h) unnecessary. For example, the Court will consider whether or not exemption 4 of FOIA, 5 U.S.C. 552(b)(4), mandates that confidential commercial information falling within the exemption not be publicly disclosed. The Court will also have the opportunity to address other issues raised by so-called "reverse FOIA" cases, including the rights of the information submitter, the obligations of Federal agencies to protect confidential business information, and the applicability of various laws currently relied upon to withhold trade secret information, in particular, 18 U.S.C. § 1905.

2. Government contractors currently have an adequate remedy to protect against the disclosure of their confidential commercial information.

The Committee report accompanying S. 3178 declares that the purpose of § 14(h) "is to provide the district courts and the Court of Claims with express authority for the protection of contractors with regards to their trade secrets and privileged and confidential information where there is currently no remedy at law." S. Rep. No. 1118, 95th Cong., 2nd Sess. 34 (1978). In fact, government contractors at present do have an adequate remedy for enjoining the disclosure of confidential commercial information. All the courts which have considered the issue have agreed that a cause of action does lie under one or more existing statutes, whether, for example, under FOIA itself, or 28 U.S.C. § 1331. *See, e.g., Chrysler Corporation* v. *Schlesinger*, 565 F. 2d 1172 (3rd Cir. 1977), cert. granted sub. nom., *Chrysler Corporation* v. *Brown*, Sup. Ct. No 77-922 (March 6, 1978); *General Dynamics Corp.* v. *Marshall*, 572 F. 2d 1211 (8th Cir. 1978); *Sears, Roebuck & Co.* v. *Eckerd*, No. 77-1417 (7th Cir., April 25, 1978); *Westinghouse Electric Corp.* v. *Schlesinger*, 542 F. 2d 1190 (4th Cir. 1976); *Charles River Park "A" Inc.* v. *HUD*, 519 F. 2d 935 (D.C. Cir. 1975). Submitters of business information, therefore, clearly have an adequate remedy to prevent unauthorized disclosure of allegedly confidential commercial information.

3. The enactment of § 14(h) would exacerbate the serious problem of forum shopping that currently exists with "reverse FOIA" suits.

Section 14(h) would create equitable jurisdiction for the first time in the Court of Claims, as well as in district courts, to grant injunctive or declaratory relief to restrain the disclosure of trade secrets and confidential commercial information. Currently, one of the more serious procedural problems with the "reverse FOIA" suit is the fact that it encourages the information submitter to engage in forum shopping. Thus, forums are often deliberately chosen to be as inconvenient as possible for the information requester so that the requester will be unable or unwilling to intervene in the reverse information proceeeding. Such forum shopping also becomes a problem for government agencies.

Increasingly, they are being confronted with "reverse FOIA" lawsuits filed by multiple plaintiffs in different parts of the country, where the requested information was submitted by several persons or companies, despite the fact that the questions presented are essentially the same. The creation of still another forum for "reverse FOIA" litigation, as provided under § 14(h), would only exacerbate this problem.

4. Section 14(h) does not provide the courts with adequate guidance concerning the specific standards of review to be used in reviewing actions brought under this section.

With regard to standards of review, the Committee report notes only that "[i]t is expected that the courts would use the well-developed standards for determining what are trade secrets and what is privileged information." S. Rep. No. 1118, supra, at 34. Would these "well-developed standards" be derived from the extensive number of FOIA precedents, or from general tort law precedents, which accept a far broader definition of what constitutes "confidential" or "privileged" information? The report does not indicate.

Nor does section 14(h) or the report indicate whether the appropriate standard to review an agency decision under the section is the usual "abuse of discretion" standard in the Administrative Procedure Act, limited to review on the agency record, or de novo review as under the Freedom of Information Act. This is another issue which the Supreme Court is likely to address in the Chrysler case. Without clearer guidance on the standard of review, section 14(h) could result in differing courts applying different standards in reviewing the increasing number of cases being brought to enjoin government agencies from releasing allegedly confidential information. I think you'll agree with me such an intolerable situation would create needless confusion and uncertainty.

5. Both our Subcommittee and the House Subcommittee on Government Information and Individual Rights are currently studying the problems of requests for confidential commercial information and "reverse FOIA" lawsuits.

During the 95th Congress, both Congressional committees with jurisdiction over FOIA have examined the numerous issues raised by FOIA requests for business data and expect to be dealing with the issues again in the 96th Congress. See, e.g., Hearings before the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary, U.S. Senate, on "Oversight of the Freedom of Information Act", 95th Cong., 1st Session (1978); Hearings before the Government Information and Individual Rights Subcommittee of the Government Operations Committee, U.S. House of Representatives, on the "Business Record Exemption of the Freedom of Information Act", 95th Cong., 1st Session. (1977). The House Subcommittee has released a comprehensive report on the issues, H.R. Rep. No. 1382, "Freedom of Information Act Requests for Business Data and Reverse FOIA Lawsuits", and our Subcommittee expects to release a report before the end of this Congress. Both the hearings and the reports are concerned with the issues raised by § 14(h) and discussed in this letter, including the Chrysler v. Brown case, and the problems of forum shopping and the appropriate standard of review in "reverse FOIA" suits. Should the Chrysler case not adequately resolve these and other "reverse FOIA" issues, legislative action would then be appropriate.

I share your concern about the issues raised by the growing number of lawsuits involving allegedly confidential business information. S. 3187, § 14(h), however, will only worsen the situation and I hope you'll agree to delete the provision from the bill.

Sincerely,

JAMES ABOUREZK,
Chairman, Subcommittee on Administrative Practice and Procedure.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate now proceed to the immediate consideration of H.R. 11002, Calendar Order No. 1181.

The PRESIDING OFFICER. The clerk will state the bill.

The legislative clerk read as follows:

A bill (H.R. 11002) to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the bill.

Mr. ROBERT C. BYRD. Mr. President, I move to strike all after the enacting clause of H.R. 11002 and to substitute therefor the text of S. 3178 as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

The PRESIDING OFFICER. The question is on engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read the third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 11002) was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that consideration of S. 3178 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business now and that Senators may be permitted to speak up to 3 minutes therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that on October 11, 1978, he approved and signed the following acts:

S. 3467. An act to designate the United States Department of Agriculture's Pecan Field Station in Brownwood, Texas, as the "W. R. 'Bob' Poage Pecan Field station"; and

S.J. Res. 29. A joint resolution to authorize the President to issue a proclamation designating that week in November 1978, which includes Thanksgiving Day as "National Family Week".

MESSAGES FROM THE HOUSE

At 1:45 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 6237. An act to amend section 9441 of title 10, United States Code, to provide for the budgeting by the Secretary of Defense, the authorization of appropriations, and the use of those appropriated funds by the Secretary of the Air Force, for certain specified purposes to assist the Civil Air Patrol in providing services in connection with the noncombatant mission of the Air Force;

H.R. 8222. An act to apply duty-free treatment under certain circumstances to articles produced in the insular possessions of the United States, and for other purposes; and

H.R. 9701. An act to amend the Budget and Accounting Procedures Act of 1950 to require that the Comptroller General provide for a financial audit with respect to pension plans for officers and employees of the Federal Government and its agencies and instrumentalities, to require that an annual report, including a financial statement and an actuarial statement, be furnished to the Congress and the Comptroller General with respect to such plans, and for other purposes.

The message also announced that the House has passed S. 1315, an act to provide more effectively for the use of interpreters in courts of the United States, and for other purposes, with an amendment in which it requests the concurrence of the Senate.

The message further announced that the House has passed S. 3083, an act to extend the authorizations for the Noise Control Act of 1972, to expand the quiet communities program, and for other purposes, with amendments in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendment of the Senate to H.R. 4319, an act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes, with an amendment in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the amendment of the Senate to the text of H.R. 11092, an act to increase the authorization of appropriations under the act of December 22, 1974 (88 Stat. 112), with an amendment in which it requests the concurrence of the Senate; and that the House agrees to the amendment of the Senate to the title of the bill.

At 3:38 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the House agrees to the amendments of the Senate Nos. 2 and 3 to the amendment of the House to S. 2093, an act to provide that the Exchange Stabilization Fund shall not be available for payment of administrative expenses, and for other purposes; that the House agrees to the amendment of the Senate No. 1 to the amendment of the House to the bill, with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to H.R. 12929, an act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1979, and for other purposes; that the House recedes from its disagreement to the amendments of the Senate Nos. 2, 6, 13, 18, 20, 22, 27, 35, 45, 60, 66, 77, 81, 83, 90, 100, 104, and 106 to the bill, and concurs therein; that the House recedes from its disagreement to the amendments of the Senate Nos. 9, 15, 16, 23, 24, 25, 29, 31, 32, 33, 38, 39, 42, 44, 57, 72, 80, and 92 to the bill, and concurs therein each with an amendment; and that the House insists on its disagreement to the amendment of the Senate No. 103 to the bill.

The message further announced that the House disagrees to the amendment of the Senate to H.R. 13511, an act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. ULLMAN, Mr. ROSTENKOWSKI, Mr. VANIK, Mr. BURLESON of Texas, Mr. CORMAN, Mr. GIBBOS, Mr. WAGGONNER, Mr. CONABLE, Mr. DUNCAN of Tennessee, and Mr. ARCHER were appointed managers of the conference on the part of the House.

At 7 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed S. 2403, an act to consent to certain amendments to the New Hampshire-Vermont Interstate School Compact, approved by Public Law 91–21, without amendment.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to S. 1566, an act to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information.

The message further announced that the House has passed the following bills, each with an amendment in which it requests the concurrence of the Senate:

S. 2049. An act to establish fees and allow per diem and mileage expenses for witnesses before United States Courts; and

S. 2075. An act to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service.

The message also announced that the House has passed H.R. 14289, an act to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to H.R. 13635, an act making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes; that the House recedes from its disagreement to the amendments of the Senate numbered 33 and 34 to the bill, and concurs therein; that the House recedes from its disagreement to the amendments of the Senate numbered 2, 4, 6, 10, 12, 27, 42, 44, 49, 51, and 58 and concurs therein each with an amendment in which it requests the concurrence of the Senate.

At 10:15 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the House has passed the following bill, without amendment:

S. 3540. An act to rename the U.S. Federal building in Yakima, Wash., the "Justice William O. Douglas Federal Building".

The message also announced that the House has agreed to the following concurrent resolutions, without amendment:

S. Con. Res. 111. A concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 11445; and

S. Con. Res. 112. A concurrent resolution directing the Secretary of the Senate to make corrections in the enrollment of S. 555.

The message further announced that the House has passed S. 1503, an act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes, with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has passed S. 3371, an act to repeal certain provisions of law establishing limits on the amount of land certain religious corporations may hold in any territory of the United States, with an amendment in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the amendment of the Senate to H.R. 5646, an act to amend the Regional Rail Reorganization Act of 1973 to require ConRail to make premium payments under certain medical and life insurance policies, to provide that ConRail shall be entitled to a loan under section 211(h) of such act in an amount required for such premium payments, and to provide that such premium payments shall be deemed to be expenses of administration of the respective railroads in reorganization, with amendments in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to S. 555, an act to establish certain Federal agencies, effect certain reorganizations of the Federal Government, to implement certain reforms in the operation of the Federal Government and to preserve and promote the integrity of public officials and institutions, and for other purposes.

The message further announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 9893. An act to amend the Internal Revenue Code of 1954 to increase the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes; and

H.R. 14145. An act to amend title 28 of the United States Code to make certain changes in the divisions within judicial districts and in the places of holding court, and to require the Director of the Administrative Office of the United States Courts to conduct a study of the judicial business of the Central District of California and the Eastern District of New York.

HOUSE BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled bills and joint resolution:

S. 1185. An act to regulate interstate commerce with respect to parimutual wagering on horseracing to maintain the stability of the horseracing industry, and for other purposes;

S. 1318. An act to permit the State of Hawaii to use the proceeds from the sale, lease, or other disposition of certain real property for any public purpose;

S. 1626. An act to clarify the status of certain legislative and judicial officers under the provisions of title 5, United States Code, relating to annual and sick leave, and for other purposes;

S. 2411. An act to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses for persons released from custody pending their appearance to face criminal charges before that court, any division of that court, or any court of the United States in another judicial district;

S. 3373. An act to amend title 10, United States Code, to authorize the Secretary of Defense to provide transportation to the Girl Scouts of the United States of America in connection with International World Friendship Events or Troops on Foreign Soil meetings, and for other purposes;

H.R. 8755. An act to make specific provisions for ball or roller bearing pillow block, flange, take-up, cartridge, and hanger units in the Tariff Schedules of the United States, and for other purposes;

H.R. 10587. An act to improve the range conditions of the public rangelands;

H.R. 11035. An act to incorporate the United States Capitol Historical Society;

H.R. 11318 An act to amend the Small Business Act and the Small Business Investment Act of 1958;

H.R. 11445. An act to amend the Small Business Investment Act of 1958;

H.R. 11658. An act to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing Great Lakes vessels in an amount not exceeding 87½ percent of the actual or depreciated actual cost of each vessel;

HR. 12051. An act relating to the application of certain provisions of the Internal Revenue Code of 1954 to specified transactions by certain public employee retirement systems created by the State of New York or any of its political subdivisions;

H.R. 12165. An act extending until the close of June 30, 1981, the existing suspension of duties on certain metal waste and scrap, unwrought metal, and other articles of metal, and for other purposes;

H.R. 12264. An act to designate certain lands in the State of Wisconsin as wilderness;

H.R. 13167. An act to amend the Internal Revenue Code of 1954 to insure that the deduction for contributions to a black lung benefit trust be allowed for any such contributions which are made for the purpose of satisfying unfunded future liability, and for other purposes;

H.R. 13767. An act to amend the Federal Property and Administrative Services Act of 1949 to permit the recovery of replacement cost of motor vehicles and other related equipment and supplies; and

H.J. Res. 685. Joint resolution to designate October 7, 1979, the Sunday of "Fire Preventive Week" as Firefighters Memorial Sunday"; to designate October 14, 1978, as "National Jogging Day"; and to designate and authorize the President to proclaim February 11, 1979, as "National Inventors' Day".

The enrolled bills and joint resolution were subsequently signed by the Acting President pro tempore (Mr. MORGAN).

At 12:30 a.m., a message from the House of Representatives delivered by Mr. Berry, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate H.R. 12931, an act making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1979, and for other purposes; that the House recedes from its disagreement to the amendments of the Senate numbered 14, 18, 21, 24, 37, 41, 46, 48, 65, 73, and 82 to the bill, and concurs therein; that the House recedes from its disagreement to the amendments of the Senate numbered 16, 40, 45, and 94, and concurs therein each with an amendment in which it requests the concurrence of the Senate.

HOUSE BILLS REFERRED

The following bills were read twice by their titles and referred as indicated:

H.R. 6237. An act to amend section 9441 of title 10, United States Code, to provide for the budgeting by the Secretary of Defense, the authorization of appropriations, and the use of those appropriated funds by the Secrteary of the Air Force, for certain specified purposes to assist the Civil Air Patrol in providing services in connection with the noncombatant mission of the Air Force, to the Committee on Armed Services.

H.R. 8222. An act to apply duty-free treatment under certain circumstances to articles produced in the insular possessions of the United States, and for other purposes; to the Committee on Finance.

H.R. 9701. An act to amend the Budget and Accounting Procedures Act of 1950 to require that the Comptroller General provide for a financial audit with respect to pension plans for officers and employees of the Federal Government and its agencies and instrumentalities, to require that an annual report, including a financial statement and an actuarial statement, be furnished to the Congress and the Comptroller General with respect to such plans, and for other purposes to the Committee on Governmental Affairs.

H.R. 9893. An act to amend the Internal Revenue Code of 1954 to increase the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes; to the Committee on Finance.

H.R. 14145. An act to amend title 28 of the United States Code to make certain changes in the divisions within judicial districts and in the places of holding court, and to require the Director of the Administrative Office of the United States Courts to conduct a study of the judicial business of the Central District of California and the Eastern District of New York; to the Committee on the Judiciary.

H.R. 14289. An act to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions; to the Committee on Banking, Housing, and Urban Affairs.

REPORT OF A COMMITTEE SUBMITTED DURING THE RECESS

Under the authority of the order of Wednesday, October 11, 1978, the following report of a committee was submitted during the recess:

EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978—CONFERENCE REPORT

Mr. WILLIAMS, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2570) to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes (Rept. No. 95–1325).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 545. A resolution to refer S. 3451 to the Court of Claims for the relief of Lance Industries, Incorporated (Rept. No. 95–1326).

BOUNDARY WATERS CANOE AREA WILDERNESS—CONFERENCE REPORT

Mr. ABOUREZK, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12250) to designate the Boundary Waters Canoe Area Wilderness, to establish the Boundary Waters Canoe Area Mining Protection Area, and for other purposes (Rept. No. 95–1327).

By Mr. CRANSTON, from the Committee on Veterans' Affairs:

Report Pursuant to Section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 95–1328).

VETERANS' AND SURVIVORS' PENSION IMPROVEMENT ACT OF 1978—CONFERENCE REPORT

Mr. CRANSTON, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10173) to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes (Rept. No. 95–1329).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 1112. A bill for the relief of Gladys Yan Chan Lu (Rept. No. 95–1330).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment, but with an amendment to the title:

H.R. 1405. An act for the relief of Jennet Juanita Miller (Rept. No. 95–1331).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

H.R. 2756. An act for the relief of Marlene Holder (Rept. No. 95–1332).

H.R. 3618. An act for the relief of Martha Castro Fitz Maurice (Rept. No. 95–1333).

H.R. 9610. An act for the relief of Raymond Vishnu Clemons (Rept. No. 95–1334).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

H.R. 1422. An act for the relief of Julio Ortiz-Medina (Rept. No. 95–1335).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. WILLIAMS, from the Committee on Human Resources:

Earl Oliver, of Illinois, to be a Member of the Railroad Retirement Board.

(The above nomination from the Committee on Human Resources was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PROXMIRE, from he Committee on Banking, Housing, and Urban Affairs:

Adolph Philip Schuman, of California, to be a Director of the Securities Investor Protection Corporation.

The following-named persons to be Members of the Board of Directors of the National Corporation for Housing Partnerships:

Patricia K. Ritter, of Connecticut;

Kennon V. Rothchild, of Minnesota;

Herman J. Russell, of Georgia.

(The above nominations from the Committee on Banking, Housing, and Urban Affairs were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. CANNON. Mr. President, as in executive session, I report favorably sundry nominations in the Coast Guard which have previously appeared in the CONGRESSIONAL RECORD and, to save the expense of printing them on the Executive Calendar, I ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of September 25, and October 2, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. MATSUNAGA:

S. 3588. A bill for the relief of Vivian Lim Ong; to the Committee on the Judiciary.

By Mr. STEVENSON (for himself, Mr. CANNON, Mr. FORD, Mr. ZORINSKY, and Mr. RIEGLE):

S. 3589. A bill to establish an operational Earth Data and Information Service, in the National Aeronautics and Space Administration, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. MAGNUSON:

S. 3590. A bill for the relief of Jennifer Ferrer; to the Committee on the Judiciary.

By Mr. ANDERSON:

S. 3591. A bill for the relief of Antonio J. Marfori; to the Committee on the Judiciary.

By Mr. HELMS:

S. 3592. A bill to repeal the Credit Control Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. JOHNSTON:

S. 3593. A bill to authorize the enlistment of citizens of the Northern Mariana Islands in the Armed Forces of the United States of America; to the Committee on Armed Services.

By Mr. DOLE:

S. 3594. A bill to amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled outside the United States by its manufacturer, if duty was paid on such replacement engine during a previous importation; to the Committee on Finance.

By Mr. CANNON:

S. 3595. A bill to amend section 202(d) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, to extend the deadline for filing a report of rulemaking procedures; considered and passed.

By Mr. HEINZ:

S. 3596. A bill to provide expanded readjustment benefits for Vietnam-era veterans by promoting employment of such veterans through tax credits and job vouchers, by providing increased funding and improved programs for health and psychological care for such veterans, by improving education assistance under the GI bill for such veterans, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. DURKIN (for himself and Mr. MCINTYRE):

S. 3597. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of liquefied natural gas and liquefied petroleum gas facilities, to provide standards with respect to the siting, construction, and operation of liquefied natural gas facilities, to establish a comprehensive liability and compensation fund for such facilities, to provide for the licensing of such facilities beyond the limits of territorial sea subject to the jurisdiction of the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STEVENSON (for himself, Mr. CANNON, Mr. FORD, Mr. ZORINSKY, and Mr. RIEGLE):

S. 3589. A bill to establish an operational Earth Data and Information Service, in the National Aeronautics and Space Administration, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EARTH DATA AND INFORMATION SERVICE ACT OF 1978

● Mr. STEVENSON. Mr. President, I introduce today for myself an Senators CANNON, FORD, ZORINSKY, and RIEGLE the Earth Data and Information Service Act of 1978. This legislation establishes and and provides the institutional framework for developing and managing an operational service to provide data and information on resources and the environment using remote-sensing satellite technology.

This present bill is a refinement of S. 657 introduced by Senator WENDELL FORD of Kentucky during the first session of the 95th Congress. S. 657, in turn, was an outgrowth of legislation introduced in the 94th Congress by former Senator Frank Moss of Utah and Senator FORD. This background suggests the continuing interest of Senators in establishing an operational remote-sensing satellite system.

This legislation is also related to the Space Policy Act of 1978 (S. 3530) which I introduced on September 27, 1978. One of the specific goals of the U.S. space program to be achieved within the next 10 years, as enumerated in S. 3530, is "the establishment and operation of a system of remote-sensing of the Earth's resources, environment, and related conditions." The legislation I introduce today will achieve this goal.

NEED FOR OPERATIONAL SYSTEM

Landsat 1 was launched by the National Aeronautics and Space Administration in July 1972. Since that time, NASA has devoted considerable effort to developing the technology of remote sensing of the Earth's resources and environment by satellite. These research and development efforts have been carried out in collaboration with other Federal departments—Interior, Agriculture, Commerce, and State—State, regional, and local governments, private companies, and a number of foreign countries. A third generation satellite—Landsat C—was launched this year, and Landsat D is scheduled for launch in 1981.

The usefulness of remote-sensing technology is well documented. Landsat data is now being used in relation to agriculture, water resources, forestry, rangeland management, energy and minerals exploration, coastal zone management, mapping, geodesy, and in responding to natural disasters. This year NASA has launched the first Seasat which is developing a wealth of data and information related to oceans, fisheries, climate, and weather. Other satellites using remote-sensing technology are now operating or are in development.

The issues which this legislation addresses are clear cut: Does the research and development to date on remote-sensing technology justify a commitment to a permanent system? How should such a system be developed?

On the basis of extensive testimony,

the usefulness of the technology seems clear. Moreover, a commitment by the Federal Government to move toward a fully operational system, as provided in this legislation, is an essential step in aggregating the users of this technology in the public and private sectors.

While there is support in Congress for creating an operational remote-sensing satellite system, opinion within the executive branch seems to be divided. Last year the Subcommittee on Science, Technology, and Space held hearings on Senator FORD's bill, S. 657. At that time a number of Federal agencies, including NASA, the Department of the Interior, and the Department of Agriculture, were prepared to testify in support of the basic objectives of S. 657. The evening before the hearing these agencies were instructed by the Office of Management and Budget to change their testimony so as to be in opposition to S. 657.

Dr. Frank Press, Director of the Office of Science and Technology Policy, testified that it was "premature" to commit the Federal Government to support of an operational remote-sensing system. At that hearing Dr. Press also announced the formation of an ad hoc interagency committee to address the question of when, in the administration's view, an operational remote-sensing system would be feasible.

This particular committee established by Dr. Press never considered the question of operational status. However, it decided—wisely I believe—to include a multispectral scanning instrument on the Landsat D satellite to be launched in 1981. The operational issue has been reviewed subsequently by the Space Policy Review Committee, chaired by Dr. Press, and its recommendations were sent to President Carter earlier this month.

During the 17 months which has elapsed since Dr. Press' initial appearance before the subcommittee, several useful reports examining the management of remote-sensing satellites have been prepared. These include: "State and Local Government Perspectives on a Landsat Information System," prepared by the National Resource and Environment Task Force of the Intergovernmental Science, Engineering and Technology Advisory Panel; "State Legislative Recommendations on Landsat Technology," prepared by the National Conference of State Legislatures; and "Earth Information From Space by Remote Sensing," a report prepared for Dr. Press by Bruno Augenstein, Willis H. Shapley, and Eugene B. Skolnikoff. Earlier the Committee on Remote Sensing for development, chaired by Harland Cleveland, of the National Academy of Sciences considered the relevance of remote-sensing satellites to resource planning in developing countries.

These reports recognized the importance of pushing ahead with an operational remote-sensing system so that users can have a continuous, timely and usable flow of data. This conclusion does not mean there are no problems with the existing Landsat system or does it lessen the importance of making remote-sensing technology more sensitive to the needs of users. But how can these improvements best be achieved? By keeping the technology locked in the artificial world of experimental research and development? Or by establishing a framework to move in an orderly way from experimentation to a permament operational system? The legislation I introduce today follows the latter course.

DESCRIPTION OF LEGISLATION

Anyone familiar with the problem of establishing an operational remote-sensing system knows there is no perfect or self-evident solution. There are many possible approaches. However, after considerable thought and discussion, I have concluded that the most satisfactory approach is to charge NASA with primary responsibility for developing an operational system during an interim period of 7 years. However, once the system has been perfected, the President would recommend to Congress a permanent management structure. This could be retention of the responsibility by NASA, shifting responsibility to another Federal agency, creating a new Federal agency or Government corporation, or shifting responsibility to the private sector.

Responsibility within NASA is lodged in an office separated from the agency's research and development function. However, a principal reason for choosing NASA for this assignment is the importance of maintaining close ties between operational management of the system and continuing research and development activities. NASA is also directed to work closely with the user community in developing the operational system. Emphasis will be on developing useful data and basic information products. Users will bear principal responsibility for refining these data into more specialized information.

To some degree, the question of whether the system is "operational" is a semantic one. This legislation recognizes that a period of time is needed to bring the present experimental system to operational status. Nonetheless, the legislation also assumes that development of this operational system means a commitment by the Federal Government to maintain such a system at the end of the interim period of 7 years.

The legislation establishes an Earth Data and Information Service as a separate office in NASA. The principal operating arm of the Service is an Earth data and information system—an integrated collection of satellites, ground equipment, facilities, and procedures that produce data and basic information products for public and private users.

Authority to establish and manage the Service is vested in the Administrator of NASA. Direct operational responsibility rests with the General Manager of the Service, who is appointed by the President by and with the advice and consent of the Senate. The bill gives the Administrator and the General Manager considerable latitude in achieving the purposes of the act.

The interim period of 7 years is to be used for developing the institutional, financial, technical, and marketing capabilities needed to bring the Service to full operational status. During this interim period, whenever he deems it feasible, the President will prepare and transmit to the Congress recommendations on the appropriate organizational entity to continue an operational service after the interim period.

The Service is directed to meet the needs of all users, domestic and foreign, government and private, at terms to be established by the Administrator. By the end of the 7-year period, income should cover the costs of maintaining and operating the Service.

Since the Service will provide global data and information, there is likely to be considerable international interest in these products. Under the bill, the Service is encouraged to engage in international activities; the Administrator of NASA under the supervision of the President, and with the advice and participation of the Secretary of State, is given this responsibility. I personally believe that the potential for collaboration among nations in using remote-sensing technology is very real. The United States, for example, should take the initiative in developing a global information system that would serve the international community. Creation of a U.S. Earth Data and Information Service is the necessary first step in such a process.

The legislation requires that all U.S. remote-sensing satellites be subject to authorization, regulation, and supervision of the Federal Government. However, this restriction does not preclude contractual or other arrangements with the private sector and other users. Definition of the role of the private sector will be one of the major items to be worked out during the interim period. There also is to be continuing participation of users in planning the system and in acquiring, processing, analyzing, and distributing data and basic information products.

Under the bill, the President has authority to transfer to the Service functions or parts of functions of any other department or agency of the United States which relate primarily to the functions of the Service.

The President is to transmit annually to the Congress a report on the accomplishments of the Service. This report is to include an evaluation of the activities and accomplishments of the Service and recommendations.

Finally, the bill authorizes to be appropriated to the Service $20 million for fiscal year 1979 for the purposes of carrying out the provisions of the act. Further appropriations would have to be authorized annually by the Congress as part of NASA's budget.

A FIRST, BUT ESSENTIAL, STEP

In simplest terms, the bill creates an institutional framework for developing an operational remote-sensing system. It also provides a straightforward process for transforming the present experimental program into an operational system. The legislation does not prejudge the ultimate disposition of this system. It simply identifies NASA as the most sensible locale for the system during the 7-year interim period.

Testimony before the Subcommittee on Science, Technology and Space, to-

gether with the recent surveys of remote-sensing activties discussed above, indicates that a clear decision to establish such a framework is needed. The benefits of such a system, already considerable, will increase rapidly once the user community knows that data and information are guaranteed for the foreseeable future.

In weighing the recommendations of the Space Policy Review Committee, President Carter has decided to follow a policy which simply endorses the status quo; that is, proceed with the development of Landsat D and retain the existing systems as an experimental, research and development effort. I very much regret this decision. My concern is based primarily on the belief that a useful operational system can only be developed by exposing the existing experimental effort to the demands and pressures of the user community. I believe further that the utility of remotely sensed data has been sufficiently demonstrated to warrant this transitional step from experimental to operational status. Given these two factors, I see no compelling reason to postpone further a decision to initiate this transition. Despite the President's present view, I remain hopeful that a more positive approach can be worked out next year in the process of considering the Earth Data and Information Service Act.

As with the Space Policy Act, this legislation is being introduced now to provide an opportunity for evaluation and comment by Members of the Senate and House, officials in the executive branch, and State, regional, and local governments, and others. I plan to reintroduce the legislation at the opening of the 96th Congress and proceed promptly with hearings before the Subcommittee on Science, Technology, and Space. I hope that the Commerce Committee will report the bill prior to May 15, 1979 and that it will be enacted during the first session.

Mr. President, I ask unanimous consent that the text of the Earth Data and Information Services Act of 1978 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3589

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Earth Data and Information Service Act of 1978".

PURPOSE

SEC. 2. It is the purpose of this Act to establish the institutional framework for an operational earth data and information service based primarily on data obtained by remote sensing satellites and to provide improved cooperation between the government and private sectors and between the United States and the other nations of the world.

DEFINITIONS

SEC. 3. For the purposes of this title—

(1) "Administration" means the National Aeronautics and Space Administration;

(2) "Administrator" means the Administrator of the National Aeronautics and Space Administration;

(3) "Data" means a set of signals acquired by a spacecraft, other vehicle, or other means by remote sensing or otherwise from objects on the Earth's surface, within the Earth's atmosphere or in space and transmitted from such spacecraft, other vehicle or other means to an Earth ground station including such corrections to the acquired signals by preliminary processing as needed to make the acquired signals complete and useful for further processing into information products;

(4) "Basic Information Products" means a number of information products meeting the needs of a broad spectrum of users and specifically defined in advance by the Service;

(5) "Interim Period" means that period immediately following the date of enactment of this Act during which the Service develops the institutional, financial, technical, and marketing capabilities needed to bring the Service to operational status, but such period may not exceed 7 years;

(6) "Operational Service" means a commitment to, and the provision of, a service embodying the integrated institutional, managerial, financial, technical, and marketing operations to assure the timely and continuous flow of reliable and useful data and basic information products to the users;

(7) "Service" means the Earth Data and Information Service established under section 6;

(8) "System" means Earth Data and Information System which includes—

(A) the earth remote sensing satellites and other observation devices,

(B) the associated ground equipment for command and control,

(C) data reception, aggregation, preprocessing and processing,

(D) the development of basic information products from the data, and

(E) the archiving and the disseminating of the data and basic information products by the Service;

designed to contribute to the understanding of the quality and quantity of the Earth's resources and environment; except the term does not include systems established primarily for: (i) purposes of national security, (ii) the National Weather Service, or (iii) commercial telecommunications, either domestic or international; and

(9) "User" means any person or organization, governmental or private, domestic or foreign, which uses data or basic information products, or both, provided by the service.

FINDINGS

SEC. 4. The Congress, recognizing that effective management of the Earth's resources and environment is essential to the needs of mankind, including the prevention of the needless depletion of resources, and that the acquisition and interpretation of data on the quality and quantity of the Earth's resources and environment are necessary for their effective management, finds that—

(1) there now exist technologies that can provide the opportunity for better management of the Earth's resources and environment;

(2) data provided by Earth remote-sensing satellites and other sources, and basic information products derived from such data, have a broad community of users requiring the timely and continuous availability of reliable data and basic information products;

(3) an operational service should be established so as to contribute to the attainment of national objectives, to serve the needs of the Federal, State and local governments and the private sector, and to provide for the betterment of all mankind through cooperative programs with other nations and international organizations;

(4) the successful development of an operational service is dependent on the establishment of an operational System;

(5) an interim period is needed to develop the institutional, financial, technical and market structure for an operational service; and

(6) continuing research and development of remote sensing systems is essential.

POLICY

SEC. 5. (a) The Congress declares that it is the policy of the United States that—

(1) the United States acknowledges the fundamental right of nations to acquire data from space;

(2) the United States shall develop and operate active and passive remote sensing systems on a global basis in support of national needs, and to meet the needs of other users;

(3) all United States Earth-oriented remote sensing satellites shall require Federal Government authorization, regulation, and supervision;

(4) technological advances in the remote sensing of the Earth from space shall be permitted pursuant to appropriate governmental controls which shall be based upon an assessment of civil benefits, national security, and foreign policy; and

(5) the Administrator, under supervision of the President, and with the guidance of the Secretary of State, shall cooperate with other nations and groups of nations in carrying out the provisions of this Act.

(b) The Congress of the United States directs that—

(1) the Service shall provide rapid processing of, and ready access to, the data and basic information products produced by the System at a reasonable cost to the users;

(2) the Service shall be developed so as to encourage and promote competition among suppliers of equipment and services for the System and to promote maximum use of remote sensing data and basic information products; and

(3) the products provided by the Service shall be made available to all users, both domestic and foreign, on the basis of charges to be established by the Administrator.

EARTH DATA AND INFORMATION SERVICE

SEC. 6. (a)(1) There is established in the Administration the Earth Data and Information Service.

(2) The functions of the Administrator under this Act shall be administered through the Service or in his absence by the Deputy Administrator or in the absence of both by an official of the Administration appointed by the President for a period not to exceed 30 days.

(b)(1) The Service shall be headed by a General Manager, who shall be appointed from civilian life by the President by and with the advice and consent of the Senate. Under the direction of the Administrator, the General Manager shall be responsible for the exercise of all powers and the discharge of all duties of the Service.

(2) There shall be in the Service a Deputy General Manager, who shall be appointed from civilian life by the President, by and with the advice and consent of the Senate, and shall perform such duties and exercise such power as the General Manager may prescribe. The Deputy General Manager shall act for, and exercise the powers of, the General Manager during his absence or disability.

(c) The General Manager and the Deputy General Manager shall not engage in any other business, vocation, or employment while serving as such.

(d) Whenever the President determines that it is feasible to do so, during the interim period but not later than 180 days prior to the end of the interim period, the President shall prepare and transmit to the Congress recommendations on the appropriate organizational entity best designed to continue an operational service as a Federal agency, (either as an independent agency or as a unit of an existing agency), a Government corporation or a private corporation. In

carrying out the provisions of this subsection, if the President determines that it is in the best interest of the Nation that the Service remain in the Administration, the President shall report that determination and the reasons for the determination to the Congress not later than 180 days prior to the end of the interim period.

FUNCTIONS OF THE SERVICE

SEC. 7. (a) In order to carry out the purposes of this Act, the Administrator shall establish in the Service an Earth Data and Information System. The Administrator shall develop and manage the System so that it becomes operational at the earliest practical date during the interim period.

(b) The Administrator is authorized to plan, initiate, construct, acquire, own, manage, and operate the System either directly or in conjunction with business concerns or foreign governments.

(c)(1) The Administrator is authorized to establish such communication networks as may be necessary to transmit data and basic information products on a timely basis consistent with the needs of the users as determined by the Service in consultation with the users. Insofar as practicable, the communications services needed to establish such communication networks shall be procured from the private sector.

(2) Before establishing any communications network authorized by this subsection the Administrator shall consult with the National Telecommunications Information Agency of the Department of Commerce, and the Federal Communications Commission.

(d) The Administrator shall—

(1) provide recommendations for continued research and development by the Administration on remote sensing components, subsystems, and systems for both space and ground operations of the System;

(2) arrange for the participation of the scientific, technical and user communities in planning the System, and in acquiring, processing, analyzing, and distributing data and basic information products to the users; and

(3) provide for the widest practical and appropriate dissemination of the data and basic information products to the users.

(e) In order to carry out the purposes of this Act, the Administrator is authorized—

(1) to conduct or contract for research and development, systems operations, and for user training related to its mission;

(2) to acquire the physical facilities, equipment and devices, necessary to its operations, including remote sensing satellites and associated equipment, the necessary ground facilities, whether by construction, purchase or gift;

(3) to provide satellite launching and related services;

(4) to enter into contracts or other arrangements with the user community, including departments and agencies of the Federal Government, State and local governments, and private businesses and individuals, on such terms as the Administrator may deem appropriate;

(5) to develop plans for the technical specifications of all elements of the system; and

(6) to appoint and fix the compensation of such officers and employees as may be necessary.

(f) The Administrator, under the supervision of the President, may participate in a program of international activities related to the functions of the service, pursuant to agreements made by the President or by the President, by and with the advice and consent of the Senate, as may be appropriate. Under the supervision of the President and with the advice of the Secretary of State, the Administrator may initiate and conduct negotiations with foreign nations or international organizations relating specifically to the functions of the Administrator under this Act. The Administrator shall keep the Secretary of State informed of discussions or negotiations with any foreign nation or international organization. The Secretary of State shall keep the Administrator advised on significant foreign policy considerations and developments related to such discussions and negotiations. The Administrator shall request the Secretary of State to assist in such discussions and negotiations and the Secretary shall render such assistance as may be appropriate.

REGULATIONS

SEC. 8. The President and the Administrator (with the consent of the President) are authorized to establish such regulations as may be necessary to carry out the provisions of this Act.

USER CHARGES

SEC. 9. (a) The Administrator shall establish a schedule of charges for products and services provided to users as required to carry out the provisions of this Act. The Administrator shall design such charges to assure, insofar as practical, that by the end of the interim period, the income from such charges, combined with any other income to the Service, will cover the costs of the Service exclusive of costs incurred by the Administration for research, development and testing on remote sensing systems, subsystems and components carried out under the National Aeronautics and Space Act of 1958.

(b) Each department or agency of the Federal Government needing data and basic information products of the kind that are provided by the Service, shall procure such data and basic information products from the Service. The Administrator with the agreement of the President shall establish the fees charged to such departments and agencies for such data and basic information products.

(c) In the establishment of charges and the collection of such charges from the users, the Administrator is exempt from and is not restricted or limited to charges for reproduction and handling set forth in section 552 of title 5, United States Code.

(d) Nothing in this section shall be construed to limit or otherwise affect the information, analysis, and distribution functions of any department or agency of the Federal Government.

PROHIBITION OF REPRODUCTION FOR SALE OR DISTRIBUTION OF DATA AND BASIC INFORMATION PRODUCTS

SEC. 10. (a) It shall be unlawful for any person to reproduce for sale or distribution, or to sell or distribute, any data or basic information product produced by the Service except in accordance with conditions specified by the Administrator.

(b)(1) Whoever violates any provision of subsection (a) or, any regulation issued under subsection (a), shall be subject to a civil penalty of not to exceed $5,000 for each such violation.

(2) Any such civil penalty may be compromised by the Administrator. In determining the amount of the penalty, or the amount agreed in the compromise, the appropriateness of such penalty to the size of the business of the person charged and the gravity of the violation shall be considered. The amount of such penalty, when finally determined, or the amount agreed upon in the compromise, may be deducted from any sums owing by the United States to the person charged.

(c)(1) The United States district court shall have jurisdiction, for cause shown, to restrain or enjoin violations of subsection (a) of this section upon petition by the appropriate United States attorney, or the Attorney General on behalf of the United States.

(2) Actions under paragraph (1) of this subsection may be brought in the district where any act or transaction constituting the violation occurred or in the district court where the defendant is found or is an inhabitant or transacts business, and process in such cases may be served in any other district or where the defendant is an inhabitant or wherever the defendant may be found.

(3) In any action brought under this subsection, subpoenas for witnesses who are required to attend a United States district court, may run into any other district.

APPLICABILITY OF THE NATIONAL AERONAUTICS AND SPACE ACT OF 1958

SEC. 11. (a) Except as otherwise provided in this Act, the Administrator shall, in carrying out his functions under this Act, have the same powers and authority the Administration has under the National Aeronautics and Space Act of 1958 to carry out its functions under that Act.

(b) Nothing in this Act shall be construed to reduce or otherwise affect the authority of the Administration under the National Aeronautics and Space Act of 1958 to continue the research, development, and testing of remote sensing components, subsystems, and systems for experimental purposes, provided that such research and development activities shall be coordinated with the activities of the Service.

TRANSFER OF RELATED FUNCTIONS

SEC. 12. (a) Subject to the provisions of this section, the President during the interim period, may transfer to the Service any functions and parts of functions of any other department or agency of the United States, or of any officer or organizational entity thereof, which relate primarily to the functions of the Service as prescribed by this Act. In connection with any such transfer, the President may, under this section or other applicable authority, provide for appropriate transfers of records, property, civilian personnel, and funds.

(b) Whenever any such transfer is made prior to January 1, 1981, the President shall transmit to the Speaker of the House of Representatives and the President pro tempore of the Senate a full and complete report concerning the nature and effect of such transfer.

(c) After December 31, 1980, no transfer shall be made under this section until—

(1) a full and complete report concerning the nature and effect of such proposed transfer has been transmitted by the President to the Congress, and

(2) the first period of sixty calendar days of regular session of the Congress following the date of receipt of such report by the Congress has expired without the adoption by the Congress of a concurrent resolution stating that the Congress does not favor such transfer.

REPORTS TO THE CONGRESS

SEC. 13. (a) The Administrator shall transmit to the President, who in turn shall transmit to the Congress in January of each year, a report which shall include a comprehensive description of the activities and accomplishments of the Service during the preceding calendar year together with an evaluation of such activities and accomplishments in terms of the attainment of the objectives of this Act and such recommendations including recommendations for additional legislation as the Administrator deems necessary or desirable. The President may transmit each such report to the Congress as part of his report to the Congress as required under section 206 of the National Aeronautics and Space Administration Act of 1958.

(b) No information which has been classified for reasons of national security shall be included in any report made under this section, unless such information has been declassified by or pursuant to authority given by the President.

COMPENSATION OF OFFICERS

SEC. 14. (a) Section 5314 of title 5, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(66) General Manager, Earth Data and Information Service, National Aeronautics and Space Administration.".

(b) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(114) Deputy General Manager, Earth Data and Information Service, National Aeronautics and Space Administration.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. (a) There are authorized to be appropriated to the Service $20,000,000 for the fiscal year 1979, for the purposes of carrying out the provisions of this Act, including research and development, operations of the Service, construction of facilities and payment of personnel. None of the funds appropriated pursuant to this Act may be used for the acquisition or condemnation of any real property, or the construction of any facility in excess of $500,000 unless (1) a period of 30 days has passed after the receipt by the Speaker of the House of Representatives and the President of the Senate and the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, of notice given by the Administrator containing a full and complete statement of the acquisition or construction proposed to be taken, or (2) each such committee before the expiration of such period has transmitted to the General Manager written notice to the effect that such committee has no objection to the proposed acquisition or construction. Sums appropriated pursuant to this subsection for the construction of facilities, or for research and development activities, shall remain available until expended.

(b) Any funds appropriated for the construction of facilities may be used for emergency repairs of existing facilities when such existing facilities are made inoperable by major breakdown, accident, or other circumstances and such repairs are deemed by the General Manager to be of greater urgency than the construction of new facilities.

(c) Notwithstanding the provisions of this or any other law, no appropriation may be made to the Service for any fiscal year or portion thereof beginning after September 30, 1980, unless previously authorized by legislation hereafter enacted by the Congress.●

By Mr. JOHNSTON:

S. 3593. A bill to authorize the enlistment of citizens of the Northern Mariana Islands in the Armed Forces of the United States of America; to the Committee on Armed Services.

● Mr. JOHNSTON. Mr. President, I send to the desk for appropriate referral legislation to enable citizens of the Northern Mariana Islands to enlist in the Armed Forces of the United States. I am introducing this legislation at the request of Governor Comacho, who had earlier written to me requesting my assistance in determining why citizens of the Northern Marianas could not enlist. In response to that request I, together with Senator JACKSON, chairman of the Committee on Energy and Natural Resources, wrote to the Department of Defense. Their response indicated that the difficulty could be resolved with respect to the Navy and the Marine Corps by an appropriate modification to their regulations but that it would be necessary for an amendment to existing statutes to cover the U.S. Army and Air Force.

Mr. President during the last Congress the covenant to establish the Commonwealth of the Northern Mariana Islands was enacted. That historic moment brought to fruition the hopes and desires of a people long separated from their relatives in Guam. Their desire to join the United States and to assume burdens and responsibilities attendant on citizenship is nowhere better exemplified than in the request from Governor Comacho that the citizens be permitted to enlist and serve in the Armed Forces of the country they have joined.

Mr. President, I am fully in support of this legislation and I urge prompt and favorable consideration by the Congress. I ask unanimous consent that the response of the Department of Defense to the committee's inquiry be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF DEFENSE,
Washington, D.C., September 7, 1978.

Hon. HENRY M. JACKSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JACKSON: I have been asked to reply to your letter dated August 10, 1978 concerning the enlistment of citizens of the Commonwealth of the Northern Mariana Islands in the armed services of the United States. As you can see by the attached letter from Representative Edward DLG. Pangelinan, we have given this matter very careful attention.

We have concluded that there should be no legal obstacle to enlistment by citizens of the Commonwealth in the Navy and the Marine Corps. However, existing statutes must be amended to permit such enlistments in the Army and the Air Force.

The United States Army and United States Air Force are precluded by statute from accepting enlistments except from citizens of the United States or persons "lawfully admitted for permanent residence." 10 U.S.C. Sections 505, 3253, 8253 (1970). The United States Marine Corps and the United States Navy require only changes in their regulations because they are not subject to statutes. United States Marine Corps Military Personnel Procurement Manual, Volume IV, MCO P 1100.74, Sec. 2006, January 3, 1977; Navy Recruiting Manual: COMNAVCRUT COM Instruction 1130.8A 2-I-15 (2-I-18, CH-16, August 4, 1977). We have recommended that the Navy and the Marine Corps take the necessary actions to amend their regulations to permit enlistment of qualified persons from the Northern Marianas. We also have advised counsel for the Commonwealth that we would have no objection should they decide to seek amendments to the statutes governing enlistment in the Army and the Air Force.

Sincerely,

BRENT N. RUSHFORTH,
Assistant General Counsel for International, Intelligence, and Investigative Programs.●

By Mr. DOLE:

S. 3594. A bill to amend the tariff schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled outside the United States by its manufacturer, if duty was paid on such replacement engine during a previous importation; to the Committee on Finance.

DUTY STATUS OF AIRCRAFT ENGINES

BILL TO CLARIFY DUTY STATUS OF AIRCRAFT ENGINES

● Mr. DOLE. Mr. President, I am introducing at this time a bill to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled outside the United States by its manufacturer, providing duty was originally paid on the replacement engine during a previous importation.

This proposal is a modification of Public Law 95-198, which was enacted into law on November 23, 1977. That amendment to the tariff schedules of the United States provided duty-free treatment for aircraft replacement engines being used temporarily in place of engines being overhauled in the United States. My proposal simply extends that duty-free status for those engines replacing similar engines which are being repaired—not in the United States—but outside the United States by the original manufacturer. This is a fair and even-handed method for dealing with a problem which most of us see as unnecessarily burdensome to the aircraft industry. This modification will not detract from the effectiveness of last year's act for U.S.-based engine overhaul shops, nor will the addition of this exemption place any burden upon the U.S. Customs Service in administration of the tariff schedules of the United States.

In certain instances, when a foreign aircraft owner's engine requires repair or overhaul, the owner will contact a U.S. aircraft company for a replacement engine while he forwards the engine requiring repairs or overhaul directly to the engine manufacturer. In many cases, the manufacturer is not located within the United States. When the repair engine is shipped back to the foreign aircraft owner, the replacement or "loaner" engine is returned to the United States, subject to ad valorem duty. It is my understanding that the duty levied on the full replacement value of the engine and the amount charged for duty often exceeds the actual cost of the loan.

Mr. President, it seems logical that we should attempt to protect our domestic aircraft manufacturers to the extent possible in this regard. The validity of that logic has already been confirmed through our enactment of Public Law 95-198 last year. It now remains for us to insure that that protection extends to our domestic aircraft manufacturers in all cases, not just in an arbitrarily selected few instances. I trust that the committee will give careful consideration to this bill, which I intend to reintroduce in the 96th Congress.●

By Mr. HEINZ:

S. 3596. A bill to provide expanded readjustment benefits for Vietnam-era veterans by promoting employment of such veterans through tax credits and job vouchers, by providing increased funding and improved programs for health and psychological care for such veterans, by improving education assistance under the GI bill for such veterans, and for other purposes; to the Committee on Veterans' Affairs.

VIETNAM VETERANS ACT

● Mr. HEINZ. Mr. President, the bill that I am introducing today amends title 38 of the United States Code to correct longstanding inadequacies in Vietnam veterans' benefits. This bill, which can be referred to as the Vietnam Veterans Act, contains provisions for employment, health, education and housing problems experienced by Vietnam veterans today. The final section of the bill commissions a study of veterans policy.

Although the current level of unemployment among Vietnam veterans stands at only 6.3 percent, this figure does not adequately describe the actual employment opportunities for veterans. Of the employed veterans, 855,000 earn less than $4,000 per year and close to 3 million earn less than $9,000 per year. Unemployment among black veterans hit 11.2 percent last quarter, and the double digit figure for disabled veterans exceeds 35 percent.

Clearly then, the existing veterans' employment programs HIRE 1, HIRE 2, and VA–OJT, have failed to place the veteran in a competitive market position. Even the CETA program failed to reach the administration's goal of hiring 200,000 veterans, reaching only 98,000 last year. The bill I am introducing today addresses these problems.

Title I of this bill provides two alternatives, an employer tax credit program and a job voucher program, which feature streamlined delivery systems aimed at veterans with serious employment problems. The tax credit will hopefully rectify the problem caused by the excess of regulations which have plagued the HIRE programs. The tax credit section provides up to $3,000 in tax credits per veteran during the first year of employment, and up to $1,000 during the second year. The credit is calculated at a rate of 50 percent of wages paid, up to the first $6,000, during the first year and 16⅔ percent during the second year. To be eligible, an employer must hire a veteran receiving food stamps or eligible for food stamps upon registering.

The ready accessibility of the tax credit is its most appealing feature. If the veteran is eligible for food stamps the employer becomes immediately eligible for the credit upon completion of his/her income tax return. Because the funds are readily obtained, but restricted to training of lower income veterans, this program has the greatest potential benefit for the less employable veterans.

The job voucher program also included in title I focuses on the problem of underemployment. Under its provisions a veteran may use up to 1 year of his GI bill entitlement as a voucher which will provide direct monetary reimbursement to employers initiating training programs. Eligibility would be confined to veterans meeting needs tests similar to those under CETA, and the amount of the subsidy will equal the amount of the payment under fulltime education enrollment: $311 for single veterans, $422 for a veteran with two dependents. Any use of the entitlement as a voucher will be subtracted from the veteran's total period of entitlement under the GI bill, which presently is a maximum of 45 months.

I think these two provisions go a long way toward giving the unemployed veteran the means to enter the private sector, thus reducing the need for long-term Government support. But most importantly, the tax credit for employers and the job voucher programs provide these unemployed, underemployed, and less-employable Americans with the job opportunities they deserve.

Title II of this bill addresses the major health care problems confronting the veteran. A recent report by the administration cites a 23-percent higher suicide rate for Vietnam veterans than for nonveterans under the age of 34. According to a multiyear Cleveland study, 25 to 33 percent of noncombat and 40 to 50 percent of combat veterans face serious readjustment problems. Alcohol abuse is on the increase. And estimates by the President's Commission on Mental Health indicate that more than 200,000 Vietnam veterans need treatment for drug abuse. Unfortunately, the Veterans Administration has felt that its ability to deal with these problems is limited both by the time lapse before the recognition of problems and by the fact that readjustment problems are not serious enough disorders to be classified as diseases.

The Vietnam Veterans Act grants the VA special authority to treat readjustment problems for veterans who request it within 2 years of the bill's enactment. To help ensure that these services will actually be used by Vietnam veterans, the section leaves maximum room for the use of contract services. This contracting approach additionally obviates the need for the VA to develop a huge counseling apparatus which will be phased in and out of existence at greater expense to the taxpayer.

Education problems experienced by Vietnam veterans are addressed in title III of the bill.

For the 1978–79 school year, the average 12 months budget for a single self-supporting student will total $4,546 at a public 4-year, post-secondary institution. Although the maximum potential benefits available through all sources could total $6,894.50, the benefits actually realized by the single veteran will average only $2,007. This difference, explained in part by the eligibility requirements and payment provisions of the GI bill, becomes more significant when considered in relation to the disparity in benefit payments between different sectors of the country. The education provisions included in title III not only seek to equalize these differences but they attempt to extend the scope of educational benefits for veterans.

In the present benefit program, entitlement benefits account for the bulk of educational assistance. Entitlement benefits, however, are paid at a flat rate of $311 per month for a single veteran. While this amounts to $3,730 annually, it fails to reflect the tuition cost differentials throughout the Nation. In sectors where educational costs are lower, specifically in the Southern and Western States, economic incentives exist and more veterans are induced to participate. This disparity in participation rates is exemplified by California and Pennsylvania. In California, State university costs come to only $630 and GI bill participation reaches 68.7 percent; while in Pennsylvania, the costs of education amount to $1,149 annually and GI bill participation is only 43.5 percent. Among Vietnam veterans, participation in these two States is even more disparate—54.7 percent in California, and 20.1 percent in Pennsylvania.

The tuition equalizer in title III sees to help those veterans from States where tuition is more expensive. Under the provision of the bill, any veteran must meet the first $400 in tuition and fees out of the basic GI bill payment. The VA would then reimburse a veteran for 50 percent of up to the next $1,200 in tuition and fees. This provides a total available supplement tuition benefit of $600.

Title III also contains two additional provisions; extension of the delimiting date for veterans who were discharged before December 31, 1970, while maintaining the 10-year delimitation for veterans discharged after that date; and repeal of the State matching requirement to facilitate the use of tuition acceleration programs.

If the objectives of the GI bill are to provide equal benefits for equal service, these three provisions constitute a positive step in that direction.

Finally, titles IV and V of this act provide for an expanded State home loan program and a commission to review Vietnam veteran policies.

Under the proposed State home loan program, the VA would be authorized to cover the administrative start-up costs of State loan programs. These programs, patterned after the successful California State home loan program, will provide additional money to make available higher loans at interest rates below the prevailing market rate.

The interagency review of Vietnam policy just released by the President focused on existing programs. It did not begin to examine the underlying needs and structures of all veterans benefits outside the confines of Federal limitations. Title V commissions such a comprehensive study.

While I am aware that there is precious little time remaining in this 95th Session of the Congress, I am introducing this important piece of legislation today in the hope that my colleagues will have sufficient opportunity to review all the provisions and work with me toward early enactment of this bill in the next session.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3596

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO TITLE 38, UNITED STATES CODE

SECTION 1. (a) This Act may be cited as the "Vietnam Veterans Act".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms or an amendment to, or repeal of, a section or other provision, the reference shall be considered to

be made to a section or other provision of title 38, United States Code.

TITLE I—EMPLOYMENT

TAX CREDIT FOR EMPLOYERS HIRING VIETNAM-ERA VETERANS

SEC. 101. (a) Section 51 of the Internal Revenue Code of 1954 (relating to amount of credit) is amended to read as follows:

"§ 51. Amount of credit.

"(a) Determination of amount.—The amount of the credit allowable by section 44B for the taxable year shall be the sum of—

"(1) 50 percent of the qualified first-year wages for such year, and

"(2) 16⅔ percent of the qualified second-year wages for such year,

reduced by the amount paid to the taxpayer for such year under section 2015 of title 38, United States Code.

"(b) Qualified wages defined.—For purposes of this subpart—

"(1) In general.—The term 'qualified wages' means the wages paid or incurred by the employer during the taxable year to eligible Vietnam-era veterans.

"(2) Qualified first-year wages.—The term 'qualified first-year wages' means, with respect to any individual, qualified wages attributable to service rendered during the 1-year period beginning with the day the individual begins work for the employer.

"(3) Qualified second-year wages.—The term 'qualified second-year wages' means, with respect to any individual, the qualified wages attributable to service rendered during the 1-year period beginning on the day after the last day of the 1-year period with respect to such individual determined under paragraph (2).

"(4) Only first $6,000 of wages per year taken into account.—The amount of the qualified first-year wages, and the amount of the qualified second-year wages, which may be taken into account with respect to any individual shall not exceed $6,000 per year.

"(5) Wages defined.—Except as provided in subsection (g)(2), the term 'wages' has the meaning given to such term by subsection (b) of section 3306 (determined without regard to any dollar limitation contained in such section).

"(c) Eligible Vietnam-era veteran defined.—

"(1) In general.—For purposes of this section, the term 'eligible Vietnam-era veteran' means any individual who is certified by the Secretary of Labor as—

"(A)(i) having served on active duty (other than active duty for training) in the Armed Forces of the United States for a period of more than 180 days, any part of which occurred after August 4, 1964, and before May 8, 1975, or

"(ii) having been discharged or released from active duty in the Armed Forces of the United States for a service-connected disability, if any part of such active duty was performed after August 4, 1964, and before May 8, 1975;

"(B) not having any day during the pre-employment period which was a day of extended active duty in the Armed Forces of the United States; and

"(C) meeting the food stamp requirements of paragraph (2).

For purposes of subparagraph (B), the term 'extended active duty' means a period of more than 90 days during which the individual was on active duty (other than active duty for training).

"(2) Food stamp requirements.—An individual meets the food stamp requirements of this paragraph if the appropriate food stamp agency determines that, during the pre-employment period, such individual was a member of a household which, at any time during such period, was receiving food stamps under the Food Stamp Act of 1977.

"(3) Pre-employment period.—For purposes of this subsection, the term 'pre-employment period' means the 60-day period ending on the date the individual is hired by the employer.

"(d) Qualified first-year wages cannot exceed 30 percent of FUTA wages for all employees.—The amount of the qualified first-year wages which may be taken into account under subsection (a)(1) for any taxable year shall not exceed 30 percent of the aggregate unemployment insurance wages paid by the employer during the calendar year ending in such taxable year. For purposes of the preceding sentence, the term 'unemployment insurance wages' has the meaning given to the term 'wages' by section 3306(b).

"(e) Remuneration must be for trade or business employment.—

"(1) In general.—For purposes of this subpart, remuneration paid by an employer to an employee during any year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in a trade or business of the employer.

(2) Special rule for certain determination.—Any determination as to whether paragraph (1), or subparagraph (A) or (B) of subsection (g)(1), applies with respect to any employee for any year shall be made without regard to subsections (a) and (b) of section 52.

"(3) Year defined.—For purposes of this subsection and subsection (f), the term 'year' means the taxable year; except that, for purposes of applying so much of such subsections as relates to subsection (d), such term means the calendar year.

"(f) Special rules for agricultural labor and railway labor.—For purposes of this subpart—

"(1) Unemployment insurance wages.—

"(A) Agricultural labor.—If the services performed by any employee for an employer during more than one-half of any paid period (within the meaning of section 3306(d)) taken into account with respect to any year constitute agricultural labor (within the meaning of section 3306(k)), the term 'unemployment insurance wages' means, with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes 'wages' within the meaning of section 3121(a), except that the contribution and benefit base for each calendar year shall be deemed to be $6,000.

"(B) Railway labor.—If more than one-half of remuneration paid by an employer to an employee during any year is remuneration for service described in section 3306(c)(9), the term 'unemployment insurance wages' means, with respect to such employee for such year, an amount equal to so much of the remuneration paid to such employee during such year which would be subject to contributions under section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)), if the maximum amount subject to such contributions were $500 per month.

"(2) Wages.—In any case to which subparagraph (A) or (B) if paragraph (1) applies, the term 'wages' means unemployment insurance wages (determined without regard to any dollar limitation)."

(b)(1)(A) Section 52 of such Code (relating to special rules for computing credit for employment of certain new employees) is amended—

(i) by striking out subsections (c), (e), (i), and (j); and

(ii) by redesignating subsections (d), (f), (g), and (h) as subsections (c), (d), (e), and (f), respectively.

(B) Subsections (a) and (b) of section 52 of such Code are each amended by striking out "proportionate contribution to the increase in unemployment insurance wages" and inserting in lieu thereof "proportionate share of the wages".

(C) Subsection (e) of section 52 of such Code (as redesignated by subparagraph (A)) is amended—(i) by adding "and" at the end of paragraph (1); (ii) by striking out ", and" at the end of paragraph (2) and inserting a period; and

(iii) by striking out paragraph (3).

(2) Section 53 of such Code (relating to limitation based on amount of tax) is amended by striking out subsection (b) and by redesignating subsection (c) as subsection (b).

(3) The section heading of section 44B of such Code is amended to read as follows:

"§ 44B. Credit for employment of certain Vietnam-era veterans.",

(4) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by striking out the item relating to section 44B and inserting in lieu thereof the following:

"44B. Credit for employment of certain Vietnam-era veterans.".

(5) The subpart heading of subpart D of part IV of subchapter A of chapter 1 of such Code is amended to read as follows:

"Subpart D—Rules for Computing Credit for Employment of Certain Vietnam-era Veterans.".

(6) The table of subparts for such part IV is amended by striking out the item relating to subpart D and inserting in lieu thereof the following:

"Subpart D. Rules for computing credit for employment of certain Vietnam-era veterans.".

(c)(1) Except as otherwise provided in this subsection, the amendments made by this section shall apply to amounts paid or incurred after December 31, 1978, in taxable years ending after such date.

(2) In the case of an individual who is an eligible Vietnam-era veteran (within the meaning of section 51(c)(1) of the Internal Revenue Code of 1954) such individual shall be taken into account for purposes of the credit allowable by section 443 of such Code only if such individual is first hired by the employer after December 31, 1978.

(3) In the case of a taxable year which begins in 1978 and ends after December 31, 1978, the amount of the credit allowable by section 44B of the Internal Revenue Code of 1954 (determined without regard to section 53 of such Code) shall be the sum of—

(A) the amount of the credit which would be so allowable without regard to the amendments made by this section; and

(B) the amount which would be so allowable by reason of the amendments made by this section.

(4) The amendments made by subsection (b)(2) shall apply to taxable years beginning after December 31, 1978.

JOB VOUCHER PROGRAM UTILIZING EDUCATION ASSISTANCE ENTITLEMENT

SEC. 102. (a)(1) Chapter 42, relating to employment and training of disabled and Vietnam era veterans, is amended by adding at the end thereof the following new section:

"§ 2015. Job voucher employment assistance program

"(a)(1) A veteran of the Vietnam era who is eligible for educational assistance under chapter 34 of this title and who meets the requirements of paragraph (2) of this subsection may use not more than twelve months of such entitlement for employment assistance under this section, but the amount of such educational assistance to which the veteran is entitled shall be re-

duced by the amount of any employment assistance used under this section.

"(2) To be eligible for employment assistance under this section, a veteran must be certified by the Deputy Assistant Secretary of Labor for Veterans' Employment as being eligible for public service employment under the Comprehensive Employment and Training Act of 1973.

"(b)(1) Except as provided in paragraph (3) of this subsection, an employer (other than the Federal Government) who after the date of the enactment of this section employs a veteran of the Vietnam era in a job meeting the requirements of subsection (c) (and regulations prescribed thereunder) shall be eligible to receive a monthly payment from the Administrator for so long as the veteran is employed by such employer and the veteran is eligible for employment assistance under subsection (a) of this section.

"(2)(A) To receive a payment under paragraph (1), an employer shall submit a voucher to the Administrator at such time, in such form and manner, and containing such information as the Administrator may by regulation require. Upon receipt of such a voucher, the Administrator shall make the payment authorized by paragraph (1) of this subsection.

"(B) The amount of a monthly payment under paragraph (1) of this subsection shall be the amount of the monthly educational assistance allowance to which the veteran would be entitled under section 1682(a)(1) of this title if at the time of such payment the veteran was pursuing a program of education under chapter 34 of this title on a full-time basis.

"(3) An employer shall not be eligible to receive a payment under this section with respect to the employment of a veteran for any period of the employment of such veteran for which the employer has taken a tax credit allowed under section 44B of the Internal Revenue Code of 1954.

"(c) In order for a veteran to receive employment assistance under this section, the job in which the veteran is employed and with respect to which the assistance is sought must be one that provides significant training opportunities, satisfactory to the Administrator, for the veteran. The Administrator shall prescribe regulations to define 'significant training opportunities' for the purposes of this subsection.

"(d) In this section, the term 'veteran of the Vietnam era' has the meaning given such term by section 2011(2)(A) of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2015. Job voucher employment assistance program.".

(b) The amendments made by subsection (a) shall take effect on July 1, 1979.

ADVERTISING OF AVAILABILITY OF TAX CREDIT AND JOBS VOUCHER

SEC. 103. (a) The Administrator of Veterans' Affairs, in consultation with the Secretary of Labor and the Secretary of the Treasury, shall take appropriate steps to inform both veterans of the Vietnam era and employers of the availability of the tax credit provided by section 44B of the Internal Revenue Code of 1954 (as amended by section 101) and of the job voucher provided by section 201 of title 38, United States Code (as added by section 102).

(b) There is authorized to be appropriated for fiscal year 1980 the sum of $2,000,000 for the purchase of advertising to carry out the provisions of subsection (a).

TITLE II—HEALTH AND PSYCHOLOGICAL CARE

PSYCHOLOGICAL READJUSTMENT

SEC. 201. (a) Chapter 17, relating to hospital, nursing home, domiciliary, and medical care, is amended by inserting after section 612 the following new section:

"§ 612A. Eligibility for readjustment counseling

"(a) The Administrator shall provide a general mental and psychological assessment and evaluation to any eligible veteran who served on active duty during the Vietnam era to determine whether the veteran has emotional or psychological problems related to readjustment from military to civilian life. To be eligible for such assessment and evaluation, a veteran must request such assessment and evaluation before the end of the one-year period beginning on the date of such veteran's last discharge or release from active duty or within two years after the date of the enactment of this section, whichever is later.

"(b)(1)(A) If, on the basis of an assessment and evaluation provided to a veteran under subsection (a) of this section, a physician employed by the Veterans' Administration certifies that the provision of mental health services to the veteran would facilitate the successful readjustment of the veteran to civilian life, the veteran shall be provided such mental health services as may be necessary for such purpose on an outpatient basis under the conditions specified for the provision of medical services under section 612(f)(1)(B) of this title.

"(B) For the purpose of the provision of such services, the counseling provided under subsection (a) of this section shall be deemed to have been provided as a part of hospital care.

"(C) A certification under subparagraph (A) of this paragraph may be made on the basis of a written report prepared on the basis of the mental and psychological assessment and evaluation provided under subsection (a) of this section.

"(2) Any hospital care and other medical services considered necessary as a result of counseling provided under subsection (a) of this section shall be provided only in accordance with the eligibility criteria otherwise set forth in this chapter (including the criteria set forth in section 611(b) of this title).

"(3) The Administrator shall provide referral services to veterans who are not eligible to have mental health services provided under this title to assist such veterans in obtaining mental health services from sources outside the Veterans' Administration.

"(c) The Administrator shall prescribe uniform national standards for the provision of mental health services under this section to ensure the provision of high quality mental health services under this section in all areas of the United States.".

(b) The table of sections at the beginning of chapter 17 is amended by inserting after the item relating to section 612 the following new item:

"612A. Eligibility for readjustment counseling.".

DRUG AND ALCOHOL DEPENDENCY AND ABUSE TREATMENT

SEC. 202. (a) Subchapter II of chapter 17 is amended by adding at the end thereof the following new section:

"§ 620A. Treatment and rehabilitation for disabilities resulting from alcohol or drug dependence or abuse

"(a)(1) The Administrator shall establish and operate specialized medical programs for persons described in paragraph (3) of this subsection who have disabilities resulting from alcohol or drug dependence or abuse. Such programs shall provide such inpatient and outpatient care and rehabilitative services as the Administrator determines are reasonably necessary for the recovery and rehabilitation of such persons from such disabilities, shall be provided on a nationwide basis, and shall include individual counseling and referral services, crisis intervention services, and treatment of the symptoms of detoxification.

"(2)(A) In operating programs established under paragraph (1) of this subsection, the Administrator shall use the most effective treatment and rehabilitation methods available, including community alcohol and drug abuse treatment facilities, and shall use, to the maximum extent practicable, the utilization of satellite facilities, halfway houses, and encounter-style therapeutic communities and the use of counselors who have recovered from such disabilities. Care under such programs shall be provided beyond the detoxification period and shall be designed to bring about, to the maximum extent possible, the recovery of the person being treated from the disability involved and, to the maximum extent practicable, the restoration of the person to society as a productive, self-sufficient citizen.

"(B) The Administrator, in operating such programs, may contract for the use of private halfway-house facilities for such programs. The Administrator shall prescribe regulations to govern contracting under the preceding sentence.

"(3) Notwithstanding any other provision of this title, the Administrator shall provide treatment and services under this section to any person (other than a person barred from receiving benefits by section 3103 of this title) who served in the active military, naval, or air service during the Vietnam era and whose service during such era was the basis for awarding a Southeast Asia campaign ribbon.

"(b) If the Administrator determines that it is essential to a successful program of treatment and rehabilitation of a person who has received an initial evaluation or initial treatment under this section that treatment (including the furnishing of medication) and rehabilitative services be provided as part of the same program to a member of the person's immediate family who is also suffering from a disability resulting from alcohol or drug dependence or abuse, then the Administrator shall, if requested, pay the cost (up to an amount considered reasonable by the Administrator) of the provision of like treatment and services to the person, in a community facility approved by the Administrator, for which the Administrator contracts and at which the family member has been accepted for treatment with the person.

"(c) The Administrator shall offer each person being provided treatment and rehabilitative services under this section a method of treatment that is drug-free unless it is medically contraindicated to do so.

"(d) The Administrator shall utilize all available resources of the Veterans' Administration and shall use peer-group veterans in seeking out and providing counseling for eligible persons applying for treatment and rehabilitative services under this section.

"(e) The Administrator, in consultation with the Secretary of Labor, the Civil Service Commission, the National Institute on Drug Abuse, and the National Institute on Alcohol Abuse and Alcoholism, shall take all appropriate steps—

"(1) to urge Federal agencies and appropriate private and public firms, organiza-

tions, agencies, and persons to provide appropriate employment and training to persons who have been provided treatment and rehabilitative services under this section and who have been determined by competent medical authority to be sufficiently rehabilitated so as to be employable; and

"(2) to provide all possible assistance to the Secretary of Labor in placing such persons in positions providing such employment and training.

"(f) Upon receipt of an application for treatment and rehabilitative services under this section by any person who has been discharged or released from a period of active military, naval, or air service under conditions other than honorable, the Administrator shall—

"(1) advise such person of such person's rights to apply to the appropriate military department for review of such discharge or release under section 1552 and 1553 of title 10;

"(2) advise such person of the policy of such department with respect to reviews of discharges received in connection with drug use or possession; and

"(3) advise such person of all benefits under this title and under any other law to which such person is entitled or would be entitled with a discharge or release from such period of service under honorable conditions.

"(g)(1) The Administrator shall make available treatment and rehabilitative services under this section for any person eligible for such treatment and services who has been charged with, or convicted of, a criminal offense by any court of competent jurisdiction in the United States and who is not confined and not required to participate in a treatment and rehabilitation program by any such court.

"(2) The Administrator may also make available treatment and rehabilitative services under this section for any person eligible for such treatment and services who is under the jurisdiction of a court of competent jurisdiction as the result of having been charged with, or having been convicted of, a criminal offense and who is required to participate in a treatment and rehabilitation program by such court, but such services shall be provided only under such conditions as the Administrator determines will insure that the participation of such person in the program in question will not impair the voluntary nature of the treatment and rehabilitative services being provided to other patients in such program.

"(h) The Administrator shall submit as a part of the annual report submitted pursuant to section 214 of this title a full report on the programs carried out under this section.".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 620 the following new item:

"620A. Treatment and rehabilitation for disabilities resultng from alcohol or drug dependence or abuse.".

CHOICE OF HEALTH CARE FACILITIES

SEC. 203. (a) Subchapter III of chapter 17 is amended by adding at the end thereof the following new section:

"§ 629. Choice of facilities for certain mental health care for Southeast Asia veterans

"(a)(1) Any person whose active military, naval, or air service during the Vietnam era was the basis for the awarding of a Southeast Asia campaign ribbon and who is eligible for care and treatment under section 612A of this title or under section 620A of this title may, at the election of such person, receive such care and treatment through a community mental health center providing mental health services under the Community Mental Health Centers Act (42 U.S.C. 2689 et seq.).

"(2) The Administrator shall reimburse each community mental health center for the reasonable value of any care and treatment provided by it to a person which such person could have received from the Veterans' Administration and shall reimburse a person for any amount paid by such person to a community mental health center for such care and treatment.

"(b)(1) To assure that mental health care is available to persons whose active military, naval, or air service during the Vietnam era was the basis for the awarding of a Southeast Asia campaign ribbon, the Administrator shall contract for the provision of mental health care to such persons under such plans as the Administrator considers appropriate. The types of mental health care which may be provided under such plans are the types of care and treatment authorized to be provided under sections 612A and 620A of this title.

"(2) In contracting for plans under paragraph (1) of this subsection, the Administrator shall provide that no mental health care shall be available under such a plan in an area designated by the Administrator as having adequate mental health care available through community mental health centers operating under the Community Mental Health Centers Act and through which an eligible person may receive such care under subsection (a).

"(3) Any plan contracted for under this subsection shall include provision for payment by the Administrator for any service of the least of the following amounts:

"(A) 100 per centum of the actual charge for such service.

"(B) 100 per centum of the usual charge for such service of the physician providing the service.

"(C) 100 per centum of the reasonable charge for such service.

"(4) No benefit shall be payable under any plan contracted for under this subsection in the case of any person enrolled in any other insurance, medical service, or health plan provided by law or through employment unless the person certifies that the particular benefit being claimed is not payable under such other plan.".

(b) The table of sections at the beginning of chapter 17 is amended by adding after the item relating to section 628 the following new item:

"629. Choice of facilities for certain mental health care for Southeast Asia veterans.".

GENERAL ACCOUNTING OFFICE REPRESENTATIVES IN VETERANS' ADMINISTRATION HOSPITALS

SEC. 204. (a) Subchapter III of chapter 17 is amended by adding after section 629 (as added by section 203 of this Act) the following new section:

"§ 630. Ombudsmen for patients in Veterans' Administration facilities

"The Administrator shall authorize any employee of the General Accounting Office assigned by the Comptroller General of the United States to duty in a facility of the Veterans' Administration providing hospital care, nursing home care, or domiciliary care under this chapter to have reasonable access to the patients in such facility and to the records and books of such facility. Any such employee so assigned may act as an ombudsman on behalf of patients in such facility to the head of such facility and to the Administrator.".

(b) The table of sections at the beginning of chapter 17 is amended by adding after the item relating to section 629 (as added by section 203 of this Act) the following new item:

"630. Ombudsman for patients in Veterans' Administration facilities.".

ADVERTISING OF PROGRAMS

SEC. 205. (a) The Administrator of Veterans' Affairs, in consultation with the Secretary of Health, Education, and Welfare, shall take appropriate steps to inform veterans of the Vietnam era of the availability of the programs under sections 612A, 602A, and 629 of title 38, United States Code (as added by sections 201, 202, and 203, respectively, of this Act).

(b) There is authorrized to be appropriated for fiscal year 1980 the sum of $2,000,000 for the purchase of advertising to carry out the provisions of subsection (a).

TITLE III—GI BILL EDUCATION ASSISTANCE

EXTENSION OF DELIMITING DATE

SEC. 301. (a) Subsection (a) of section 1662, relating to time limitations for completing a program of education, is amended to read as follows:

"DELIMITING PERIOD FOR ELIGIBILITY FOR EDUCATIONAL ASSISTANCE

"(a)(1) No educational assistance shall be provided to an eligible veteran under this chapter after the end of the 10-year period beginning on the date of such veteran's last discharge or release from active duty after January 31, 1955, except that—

"(A) any eligible veteran whose last discharge or release from active duty was during the period beginning on August 5, 1964, and ending on December 31, 1970, shall be eligible for such assistance until January 1, 1984; and

"(B) any eligible veteran who was prevented from initiating or completing such veteran's chosen program of education within such 10-year period because of a physical or mental disability which was not the result of such veteran's own willful misconduct shall, upon application, be granted an extension of the applicable period of eligibility for such length of time as the Administrator determines, from the evidence, that such veteran was prevented from initiating or completing such program of education.

"(2)(A) Notwithstanding the provisions of paragraph (1) of this subsection, any veteran shall be permitted to use any of such veteran's unused entitlement under section 1661 of this title for the purposes of eligibility for an education loan under the provisions of section 1798 of this title after the expiration of the period of such entitlement otherwise applicable to such veteran under such paragraph, if such veteran was pursuing an approved program of education on a full-time basis at the time of the expiration of such eligibility.

"(B) Notwithstanding any other provision of this chapter or any provision of chapter 36 of this title, any veteran whose period of eligibility for educational assistance is extended under subparagraph (A) of this paragraph may continue to use any unused loan entitlement under this paragraph as long as the veteran continues to be enrolled on a full-time basis in pursuit of the approved program of education in which such veteran was enrolled at the time of expiration of such veteran's eligibility until the earlier of—

"(i) the date such entitlement is exhausted,

"(ii) the date of the expiration of the period of eligibility otherwise applicable to such veteran under paragraph (1) of this subsection, or

"(iii) the date such veteran has completed the approved program of education in which such veteran was enrolled at the end of the period of eligibility referred to in paragraph (1) of this subsection.".

(b) Section 1662 is amended by adding at the end thereof the following new subsection:

"(f) Educational assistance under this chapter or chapter 36 of this title for which a veteran is eligible by virtue of an extension of eligibility for educational assistance provided by subsection (a)(1)(A) of this section may not be used for a program of education leading to a degree higher than a baccalaureate degree.".

(c) The amendments made by this section shall take effect on July 1, 1979.

TUITION EQUALIZER

SEC. 302. (a) Section 1682 is amended by adding at the end thereof the following new subsection:

"(f)(1) In addition to the educational asistance allowance payable to any eligible veteran under this chapter, there shall be paid to each such veteran (other than a veteran who is on active duty or is enrolled in a program that is pursued on less than a half-time basis, a program of flight training, or a program of instruction leading to a degree higher than a baccalaureate degree) a supplemental tuition allowance as described in this subsection.

"(2) The amount of supplemental tuition allowance payable to any veteran for any school year may not exceed $900 and shall be determined as follows:

"(A) The veteran shall pay the first $400 of the tuition and fees charged the veteran for that school year.

"(B) The Administrator shall reimburse 50 per centum of the next $1,200 of the tuition and fees paid by the veteran for that school year.

"(3) Application for supplemental tuition assistance under this subsection shall be made by a veteran to the Administrator in such form and manner as the Administrator shall prescribe, including certification from the educational institution of the amount of tuition and fees actually paid by the veteran for academic periods completed by the veteran.

"(4) In computing the amount of supplemental tuition allowances to which a veteran is entitled, the Administrator shall recognize as tuition and fees for any school year the lesser of the following amounts:

"(A) The amount of actual tuition and fees paid by the veteran.

"(B) The amount equal to the actual tuition and fees in effect on September 1, 1978.

"(5) For purposes of this subsection, the term 'school year' shall be defined by the Administrator to carry out the purpose of assisting veterans in the payment of their tuition and fees, but in no case may such term be defined to exceed twelve consecutive months.".

(b) The amendment made by subsection (a) of this section shall take effect on July 1, 1979.

REPEAL OF STATE MATCHING REQUIREMENT UNDER LOAN PROGRAM

SEC. 303. (a) Subsection (b) of section 1682A, relating to accelerated payments of educational assistance allowances, is amended—

(1) in paragraph (6)—

(A) by striking out "(A)"; and

(B) by striking out ", or (B) on which the appropriate State or local governmental unit establishes a program described in clause (8) of the subsection, whichever date is the later;" and inserting in lieu thereof "; and";

(2) by striking out "; and" at the end of paragraph (7) and inserting in lieu thereof a period; and

(3) by striking out paragraph (8).

(b) Subsection (c) of such section is amended by striking out "and matching amounts paid to the Administrator by a State or local governmental unit, as described in subsection (b)(8) of this section,".

(c) Subsection (d) of such section is amended—

(1) by striking out "33⅓ per centum" both places it appears therein and inserting in lieu thereof "66⅔ per centum";

(2) by striking out "are in excess of $700 for such school term" and inserting in lieu thereof "for such school term are in excess of the sum of $700 and any amount received by such veteran as a supplemental tuition allowance for such school term under section 1682(f) of this title";

(3) by inserting "or" before "(3)"; and

(4) by striking out "or (4)" and all that follows in such subsection through "of such veteran,".

(d) Section 1798(f)(1) is amended by striking out "and any matching contribution by a State or local governmental unit pursuant to section 1682A(b)(8) of this title".

ADVERTISING OF PROGRAMS

SEC. 304. (a) The Administrator of Veterans' Affairs, in consultation with the Secretary of Health, Education, and Welfare and the Secretary of Labor, shall take appropriate steps to inform veterans of the Vietnam era of the provisions of the amendments made by this title.

(b) There is authorized to be appropriated for fiscal year 1980 the sum of $2,000,000 for the purchase of advertising to carry out the provisions of subsection (a).

TITLE IV—ADMINISTRATIVE COSTS FOR STATE HOME LOAN PROGRAMS

GRANTS TO STATES FOR START-UP COSTS OF HOME LOAN PROGRAMS

SEC. 401. (a) Chapter 37, relating to home, condominium, and mobile home loans, is amended by adding at the end thereof the following new section:

"§ 1828. State home loan programs

"(a) The Administrator may enter into an agreement with a State or local government to pay such government the reasonable administrative expenses involved in establishing a veteran's home loan program meeting the requirements of subsection (b).

"(b) A program for which the Administrator may make payments under subsection (a) is a program that provides for the making of direct home loans to veterans (including veterans of the Vietnam era, as such term is defined in section 2011(2)(A) of this title) at interest rates below the prevailing market interest rate.

"(c) The Administrator shall prescribe regulations to carry out this section.".

(b) The table of sections at the beginning of chapter 37 is amended by adding at the end thereof the following new item:

"§ 1828. State home loan programs.".

TITLE V—COMMISSION TO STUDY VETERANS' BENEFITS ESTABLISHMENT

SEC. 501. There is established a commission to be known as the Commission on Veterans' Benefits (hereinafter in this title referred to as the "Commission").

FUNCTION OF COMMISSION

SEC. 502. (a) The Commission shall make a comprehensive study and appraisal of the structure, scope, and administration of the laws of the United States providing benefits to veterans and their dependents. In conducting such study, the Commission shall review and, where applicable, utilize the findings of the President's Commission on Veterans' Pensions and the report of the National Academy of Sciences on Veterans' Administration health care.

(b) In carrying out such review and study, the Commission shall give particular attention to—

(1) the needs of veterans of the Vietnam era and how the needs of such veterans differ from the needs of veterans of earlier periods of armed conflict of the United States;

(2) changes in basic military, social, fiscal, and economic factors in the society and culture of the United States that affect the role of veterans benefits;

(3) the conditions under which veterans benefits should be provided to different categories of veterans; and

(4) the relationship of the various veterans benefits to each other, to benefits for persons on active duty in the Armed Forces, and to the broader social security benefits and other benefits provided by the United States to persons without regard to their status as veterans or members of the Armed Forces.

MEMBERSHIP

SEC. 503. (a) The Commission shall be composed of seven members appointed by the President, two of whom shall be veterans of the Vietnam era, two of whom shall be members of women's and minority groups, and at least one of whom shall not be an officer or employee of the United States.

(b) Members shall be appointed for the life of the Commission.

(c)(1) Except as provided in paragraph (2), members of the Commission shall each be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS–17 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of duties vested in the Commission.

(2) Members of the Commission who are full-time officers or employees of the United States or Members of Congress shall receive no additional pay on account of their service on the Commission.

(3) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5 of the United States Code.

(d) Four members of the Commission shall constitute a quorum but a lesser number may hold hearings.

(e) The Chairman of the Commission shall be designated by the President from the members of the Commission who are not officers or employees of the United States.

(f) The Commission shall meet at the call of the Chairman or a majority of its members.

DIRECTOR AND STAFF OF COMMISSION; EXPERTS AND CONSULTANTS

SEC. 504. (a) The Commission shall have a Director who shall be appointed by the Commission and who shall be paid at a rate not to exceed the rate of basic pay in effect for grade GS–16 of the General Schedule.

(b) With the approval of the Commission, the Director may appoint and fix the pay of such additional personnel as he considers desirable.

(c) The Director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay in effect for grade GS–15 of the General Schedule.

(d) With the approval of the Commission, the Director may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the annual rate of basic pay in

effect for grade GS–15 of the General Schedule.

(e) Upon request of the Commission, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist it in carrying out its duties under this Act.

POWERS OF COMMISSION

SEC. 505. (a) The Commission may for the purpose of carrying out this title hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission may deem advisable.

(b) When so authorized by the Commission, any member or agent of the Commission may take any action which the Commission is authorized to take by this section.

(c) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this Act, upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(d) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

(e) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

REPORT

SEC. 506. The Commission shall transmit a report to the President and to each House of Congress not later than the end of the 18-month period beginning on the date of the enactment of this Act. The report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative action as it considers appropriate.

TERMINATION

SEC. 507. The Commission shall cease to exist 30 days after submitting its final report pursuant to section 506.

By Mr. DURKIN (for himself and Mr. McINTYRE):

S. 3597. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of liquefied natural gas and liquefied petroleum gas facilities, to provide standards with respect to the siting, construction, and operation of liquefied natural gas facilities, to establish a comprehensive liability and compensation fund for such facilities, to provide for the licensing of such facilities beyond the limits of territorial sea subject to the jurisdiction of the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

COMPREHENSIVE LIQUEFIED ENERGY GAS SITING SAFETY AND LIABILITY ACT OF 1976

Mr. DURKIN. Mr. President, huge quantities of liquefied natural gas (LNG) and liquefied petroleum gas (LPG) are being imported into the United States and transported through heavily populated areas. These materials, which are collectively referred to as liquefied energy gases or LEG, play an important role in our national energy supply, especially in New England which has no indigenous supplies of natural gas. However, these fuels are extremely hazardous materials; therefore they must be properly regulated to insure their safe transportation and storage.

Legislative action is necessary in the near future, because the Federal Government is not doing enough to protect the public from the dangers posed by the transportation and storage of LEG. Just several weeks ago, a freight train with two liquefied petroleum gas tank cars derailed in my own State, in Portsmouth, N.H. No accident or leak occurred, but if it had, a disaster could have resulted.

To insure that the public is adequately protected from the dangers of liquefied energy gas, we must seriously focus on several major areas, including: First, the question of liability and compensation for those involved in a liquefied energy gas incident; second, the improvement of Federal regulations regarding the siting, construction and operation of LNG facilities; and third, application of appropriate standards for LPG transportation and storage facilities.

Today, I am introducing the Comprehensive Liquefied Energy Gas Siting Safety and Liability Act of 1978. This bill has many purposes, including:

First. To improve existing Federal regulations pertaining to liquefied natural gas (LNG) facilities;

Second. To assure that industry has formally submitted to the Department of Transportation a contingency plan which sets forth those steps which are to be taken in event of an LNG accident;

Third. To establish a comprehensive liability and compensation fund for liquefied energy gas accidents;

Fourth. To provide for the licensing of LNG facilities both beyond and within the limits of the U.S. territorial sea;

Fifth. To insure adequate safeguards and protective measures are taken to prevent sabotage or terrorism threats to an LEG ship or facility;

Sixth. To subject the transportation and storage of liquefied petroleum gas (LPG) to the civil procedures authorized under the Natural Gas Pipeline Safety Act of 1968.

I am convinced that Congress must act in all of the areas covered in this bill, especially liquefied energy gas safety and liability. Evidence and studies provided by the General Accounting Office, the Office of Technology Assessment, and the Congressional Research Service all indicate the need for major improvements in the handling of Federal responsibilities in this area. Recently, I chaired Commerce Committee hearings in Boston that further convinced me of the immediate need for improvements in Federal regulation over LEG. At these hearings a wide range of witnesses, local officials from New Hampshire, fire department officials, and State and Federal regulatory agencies all testified on the pressing need to improve Federal regulation of LEG.

LNG SAFETY AND FEDERAL REGULATIONS

Few would argue with the proposition that we must have Federal regulations to promote the safety of LNG facilities. In order to realize the need for improved Federal regulations, we must be aware of the hazards and safety requirements of LNG.

If LNG spills from its container, it rapidly vaporizes and becomes a highly flammable and explosive gas. Under these conditions, it represents a hazard to both people and property. Being very cold (−260° F), it will freeze skin tissue on contact. LNG can cause asphyxiation when it evaporates. If LNG vapor is mixed with air and ignited within some type of confinement, such as a building, the resulting rapid release of energy will cause the pressure of the LNG to rise to the point where the confining medium bursts or explodes.

One hazard possibly resulting from the escape of LNG is fire. If accidentally spilled on the ground, LNG evaporates very rapidly; and if the resulting vapor is ignited right away, a fire will develop over the evaporating pool of liquid, and it will continue to burn until all of the liquid has evaporated. If the spill is large, the fire may be of substantial dimensions, and the resulting thermal radiation can cause injury and damage at some distance away from the fire. If released LNG is not ignited, it will form a cloud that will move downwind. The natural turbulence of the air will dilute the vapor cloud as it travels downwind. Eventually it will become so diluted that it is no longer flammable, but if the cloud is ignited at some point downwind before it becomes fully diluted, it will burn and cause thermal injury and damage to anything it envelopes. Furthermore, such an accident could set off innumerable secondary explosions and fires, especially in built-up areas. We have an obligation to undertake every effort to insure this does not happen. Similar problems exist in regard to liquefied petroleum gases, or LPG, which is actually more prevalent in our energy supply system.

Another potential danger associated with LNG is the vulnerability to sabotage of facilities containing this fuel. GAO found that the security procedures and physical barriers at liquid energy gas facilities are generally not adequate to deter even an untrained saboteur. Successful sabotage at such a facility in an urban area could cause a catastrophe. Security at liquid energy gas facilities must be improved.

Of special concern is the fact that LNG is often stored in heavily populated areas and is also transported by trucks on busy streets and highways. For example, plants that store LNG during periods of low gas demand are located in Memphis, Tenn.; Charlotte, N.C.; Des Moines, Iowa; Baltimore, Md.; Brooklyn, N.Y., and Columbus, Ga. LNG is transported by truck through parts of Boston and throughout new England.

LPG ground transportation is also pervasive. LPG trucks travel on nearly every major highway in New England.

If a substantial amount of LNG were released in a populated area a major catastrophe could ensue. I am convinced that increased and more effective measures are needed to insure against the unique dangers LNG and LPG pose. Unexpected release of LNG resulting from a collision of an LNG tanker, from faulty containerization of LNG on board, or from careless handling or improper storage or processing of the material on land

could endanger life and property over a large geographical area, according to the GAO, dikes surrounding LNG tanks cannot contain the surge of LNG from a massive rupture or collapse of a tank wall.

In view of these potential dangers, any rational person would hope that the Federal Government would have acted to insure the safety of these facilities before they become so prevalent. However, this is not the case.

Regulatory agencies and witnesses before both the House and Senate Commerce Committees have criticized the regulatory activities of Federal agencies charged with insuring the safe transport of LNG. GAO noted that although the Coast Guard inspects all LNG ships before they enter U.S. harbors, these inspections do not include an examination of the operating condition of control equipment. GAO has found that Federal regulation and inspection of LNG importation, transportation, and storage have not been adequate to insure the public safety.

Furthermore, OTA indicated that the Coast Guard could conduct more rigorous inspections of LNG tankers and that inspection technology now in use could be improved. The Congressional Research Service has suggested that the characteristics of the Federal regulatory system do not appear to be compatible with the optimal requirements desirable for a system that must regulate a material as potentially dangerous as is LNG, the National Transportation Safety Board has frequently criticized DOT's program concerning the transportation of hazardous materials, including LNG. In addition, it is notable that DOT has no special inspection program for liquefied energy gas trucks. DOT also does not issue special regulations designed to protect against sabotage of vehicles transporting LNG. The Congress must act to improve this situation.

I am sorry to report to this body that the Department of Transportation has failed to adopt comprehensive Federal standards regarding the siting, design operation, and maintenance of LNG facilities. In 1972, the industry consensus standards developed by the National Fire Protection Association were incorporated into the Federal Gas Pipeline Safety Regulations, supposedly as an interim measure pending the development of comprehensive standards. Despite widespread concern over the adequacy of these interim standards and growing importance of LNG as an energy resource, the promised comprehensive standards have never been adopted.

My bill addresses this problem by identifying the criteria to be considered by the Secretary in developing standards and setting firm deadlines for proposing and adopting them. I consider this program to be of the utmost importance since, unless effective action is taken promptly, a number of major facilities are likely to be proposed and constructed in the absence of adequate safety standards. We cannot wait another 6 years for DOT to implement improved Federal regulations.

To insure that these regulations are effectively implemented, the DOT would be required to license the construction of each facility and to inspect annually each LNG facility.

I consider the question of safety and siting of LNG facilities to be a State matter as well as a Federal responsibility. Therefore, under this bill any State agency may adopt additional or more stringent standards for LNG facilities as long as such standards are compatible with the Federal minimum standards. Also, the Governor of an affected State or a responsible State agency having appropriate jurisdiction must approve the specific location of a proposed LNG facility in the affected State before a construction permit is granted by DOT.

LIQUEFIED PETROLEUM GAS (LPG)

LPG is an extremely hazardous material. I am convinced that Federal regulations to protect the public from its dangers are also inadequate.

LPG is heavier than air. If accidently released, the gas forms a highly flammable cloud that clings to the ground and has the capacity to sink into sewers and subway tunnels. The LPG in one tank truck, if released and vaporized, could fill 110 miles of sewer or 15 miles of subway tunnel, If this gas were then to ignite and unprecedented catastrophe would occur.

Under certain conditions, LPG is subject to a phenomenon called a boiling liquid expanding vapor explosion (BLEVE), which magnifies its danger many times.

The force of an LPG explosion can propel ruptured tank like a rocket, trailing liquid flame hundreds of feet. In one BLEVE in Kingman, Ariz. in 1973, 12 firemen were killed and onlookers inside automobiles 1,000 feet from the explosion area were burned. The fact that LPG facilities usually include more than one storage tank and that railroad shipments frequently involve more than one tank car, increases the potential for BLEVE's.

I call your attention to another tragic incident. The town of Waverly, Tenn., experienced a BLEVE on February 25, 1978. A derailed railroad tank car carrying 30,000 gallons of propane exploded during cleanup operations 48 hours after the derailment had occurred. The explosion leveled a four-block square area of the town, killing 12 people and injuring scores more.

The National Transportation Safety Board reported that although LPG was involved in only about 10 percent of the pipeline accidents in 1976, it was responsible for 66 percent of the deaths and 48 percent of the injuries.

Federal regulations concerning LPG must be improved. Under the Comprehensive Liquefied Energy Gas Siting Safety and Liability Act of 1978 LPG will be covered by the civil procedures provided for the regulation of natural gas. This conforms to the repeated recommendations of the National Transportation Safety Board and the General Accounting Office and corrects a deficiency in the law which has allowed this highly volatile product to be regulated in the same way as other, much less dangerous, petroleum products like gasoline.

By including LPG under the regulatory procedures for natural gas, I do not intend that the same regulations should apply to both natural gas and LPG. LPG clearly presents greater and different hazards and should be separately subjected to regulations tailored to its unique properties and this bill will insure that this distinction is made in future regulations.

LIABILITY AND COMPENSATION

Mr. President, as a former insurance commissioner, I am certain of the need to hold those causing damage to other parties strictly liable for their actions. After reading the GAO's report on LNG/LPG liability, I am convinced that any one affected by a disaster involving these materials would not be compensated properly, or in a timely fashion.

The GAO found that a major LNG or LPG accident could cause damage of such severity that injured parties could not be fully compensated under existing arrangements. GAO noted present corporate structures and legal limits on liability offer great protection to the parent corporations. This may diminish their incentives for safety. Most of the assets in the LNG system are protected by these corporate chains, and the top corporations, which derive all of the profits, would generally not be liable for the consequences of an accident since often each facility or ship is owned by a separate "paper" corporation.

Mr. President, I am of the philosophy that those who share in the profits of an enterprise must also share in the risks.

GAO found that the frontline companies, which are most vulnerable to liability claims, are usually the most thinly capitalized in the chain. Most of their assets may be the ship or terminal itself, which is unlikely to survive an accident that does extensive offsite damage.

Furthermore, GAO noted the liability of shipowners and bareboat ship charterers is limited by U.S. statute to the postaccident value of the vessel, plus any amounts owing for freight, if they can prove that they did not know about the causes of the accident.

Claimants after a major LNG accident would face long, complex, and expensive litigation involving potential complications at every step in the legal process. If the defendant corporation is foreign-owned, it and its assets may be out of reach—in fact, it may be impossible to serve legal papers on the corporation unless it maintains an agent in the United States.

It is not always possible to prove the primary cause of a major accident, since critical evidence may be destroyed by the accident itself. If the accident resulted from sabotage or natural forces, the company may not be liable at all.

We must act to correct these inequities. Under the Comprehensive Liquefied Energy Gas Siting, Safety, and Liability Act of 1978, the following are some of the actions to be taken:

First. A "liquefied energy gas incident

liability and compensation fund" would be established.

Second. Except in certain special cases, the owner and operator of a vessel, facility, or company engaged in the transportation or operation of a liquefied energy gas facility/vessel shall be held jointly and severely liable, without regard to fault for damages arising out of an incident involving liquefied gas stored in, or discharged from, the vehicle vessel, or facility.

Third. Each owner or operator of a liquefied gas facility, vessel, or vehicle shall establish and maintain evidence of financial responsibility sufficient to satisfy the maximum amount of liability as defined in the bill.

Fourth. Establishment of a claims procedure for those adversely affected by a liquefied gas incident.

Mr. President, there are many other provisions in this comprehensive bill that are necessary to improve and upgrade Federal regulation over the transportation, siting, safety, and liability of liquefied energy gases.

I feel that the Congress must devote more attention to these issues in order to formulate responsible legislation. I have introduced this legislation today, not as a finished document, but as a working manuscript, with the goal of promoting congressional action in this vital area.

Considerable parts of this legislation draw on provisions of other legislation developed and introduced in the House of Representatives. I have tried to draw the most effective provisions from these bills in order to provide the framework for a coherent, effective legislative approach to the difficult issue of liquefied energy gas regulations. I hope that in hearings over the next few months we can begin to grapple with the difficult, but important, issues posed by the increasing use of these volatile energy sources in the United States.

Mr. President, I ask unanimous consent that the text of the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 3597

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Comprehensive Liquefied Energy Gas Siting Safety and Liability Act of 1978".

SECTION 1. Except as otherwise expressly provided, whenever in this Title any reference, amendment or repeal is expressed in terms of a reference or amendment to, or repeal of, a section or other provision, it shall be considered to be made to a section or other provision of the Natural Gas Pipeline Safety Act of 1968.

TITLE I. SITING AND SAFETY OF LNG FACILITIES

SEC. 101. Section 2(a), as redesignated, is amended by striking out "and" at the end of paragraph (10) (as redesignated), by striking out the period at the end of paragraph (11) (as redesignated) and inserting a semicolon in lieu thereof, and by adding at the end thereof the following new items:

"(12) 'Liquefied Natural Gas or LNG' means natural gas in a liquid, semisolid, or solid state;

"(13) 'Liquefied Natural Gas facility' or 'LNG facility' or use of LNG, or for LNG conversion in interstate or foreign commerce, but does not include any structure or equipment (or portion thereof) located in navigable waters (as defined in section 3(8) of the Federal Power Act (16) U.S.C. 796(8));

"(14) 'LNG conversion' means conversion of natural gas into LNG (liquefaction or solidification) or the conversion of LNG into natural gas (vaporization);

"(15) 'Construction' means construction, reconstruction, or erection, and includes, with respect to any LNG facility, any act which the Secretary determines would result in the creation or substantial increase of capacity of such facility for transporting or storing LNG or for LNG conversion:

"(16) 'Existing LNG facility' means—

(A) with respect to siting standards, any LNG facility for which application for regulatory approval was filed and finally approved by the appropriate Federal agencies before the date of enactment of this title.

(B) with respect to construction and operation standards, any LNG facility the construction of which commences within 210 days of the date of enactment of this title;

"(17) 'New LNG facility' means any LNG facility other than an existing LNG facility;

"(18) 'LNG accident' means any release, burning, or explosion of LNG resulting from—

"(A) a rupture or other failure of a storage tank, pipeline, or other LNG facility;

"(B) natural hazards (including earthquakes, hurricanes, and high winds);

"(C) sabotage; or

"(D) any other cause which accident results in property damage of an amount equal to or greater than $10,000 or personal injury, or both; and

"(19) 'Interstate or foreign commerce' means any trade, traffic, transportation, exchange, or other commerce—

"(A) between any State and any place outside of such State, or

"(B) which affects any trade, transportation, exchange, or other commerce described in subparagraph (A).".

SITING AND SAFETY STANDARDS

SEC. 102. (a) The Act is amended by redesignating sections 6 through 17 as sections 8 through 19, respectively, and by inserting after section 5 the following new section:

"STANDARDS FOR LNG FACILITIES

"SEC. 6. (a)(1) After the date standards first take effect under this section, no new LNG facility may be constructed, unless the Secretary approves such construction and then only to the extent that such construction is in accordance with the applicable standards prescribed under subsection (b) and such other terms and conditions as the Secretary determines are appropriate to assure that the facility will be constructed and operated in compliance with standards under subsection (b). After the effective date of standards issued under subsection (b) the Secretary shall issue a construction permit on the basis of an application submitted pursuant to this act and which meets the siting standards established pursuant to subsection (b) for all new LNG facilities.

"(2) The Secretary shall not approve construction of any LNG facility under this subsection unless the person seeking such approval submits (1) a contingency plan which sets forth those steps which are to be taken in the event of an LNG accident and which the Secretary determines to be adequate to ensure maximum protection of public health, safety, and property, and (2)

"(b) Not later than 180 days after the date of the enactment of this section, the Secretary shall publish—

"(F) the medical, law enforcement, and fire prevention and fighting capabilities existing near each such location to cope with risks created by such a facility;

"(G) the costs of constructing and operating such LNG facility at each such location, including the costs to the United States and to State and local governments which are associated with such construction and operation; and

"(2) with respect to standards applicable to the construction of any new LNG facility—

"(A) the thermal resistance and other characteristics of materials to be used in the construction of such facility as compared to alternative materials;

"(B) design factors (such as multiple diking, underground storage, insulated concrete, and vapor containment barriers);

"(C) the characteristics of the LNG to be stored or converted at, or transported by, such facility (for example, whether it is to be in a liquid, semisolid, or solid state); and

"(D) the public safety factors of the design as compared to alternative designs (particularly the ability under such a design to prevent and contain an LNG spill);

"(E) security aspects including anti-intrusion design features (such as double fencing, electronic detection devices, and lookout towers.); and

"(3) with respect to standards for the operation of any LNG facility—

"(A) the conditions, features, and type of equipment and structures which comprise, or which are used in connection with such facility;

"(B) the fire prevention, fire-fighting and containment equipment and structures which comprise, or which are used in connection with such facility;

"(F) the medical, law enforcement, and fire prevention and fighting capabilities existing near each such location to cope with risks created by such a facility;

"(G) the costs of constructing and operating such LNG facility at each such location, including the costs to the United States and to State and local governments which are associated with such construction and operation; and

"(2) with respect to standards applicable to the construction of any new LNG facility—

"(A) the thermal resistance and other characteristics of materials to be used in the construction of such facility as compared to alternative materials;

"(B) design factors (such as multiple diking, underground storage, insulated concrete, and vapor containment barriers);

"(C) the characteristics of the LNG to be stored or converted at, or transported by, such facility (for example, whether it is to be in a liquid, semisolid, or solid state); and

"(D) the public safety factors of the design as compared to alternative designs (particularly the ability under such a design to prevent and contain an LNG spill);

"(E) security aspects including anti-intrusion design features (such as double fencing, electronic detection devices, and lookout towers.); and

"(3) with respect to standards for the operation of any LNG facility—

"(A) the conditions, features, and type of equipment and structures which comprise, or which are used in connection with such facility;

"(B) the fire prevention, fire-fighting and containment equipment and structures which comprise, or which are used in connection with such facility;

"(C) the security measures to be used with respect to the operation of such facility for the prevention of sabotage or other intentional acts which could cause an LNG accident;

"(D) maintenance procedures and equipment;

"(E) the training of personnel with respect to the equipment, structures, measures, and

procedures described in subparagraphs (A), (B), (C), and (D); and

"(F) other factors and conditions relating to the safe handling of LNG.

"(e) At any time after the effective date of standards initially prescribed under subsections (b) and (c), the Secretary shall, on his own motion or on the motion of any person, amend such standards to the extent he considers necessary to reflect changes in technology or to otherwise carry out the purposes of this section.

"(f) Any standards prescribed under this section, and amendments thereto, shall become effective 30 days after the date of issuance of such standards unless the Secretary, for good cause recited, determines an earlier or later effective date is required as a result of the period reasonably necessary for compliance and such date is specified in the order establishing or amending such standard.

"(g) The provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply to all orders establishing, amending, or revoking, any standard established under this section. The Secretary shall afford interested persons an opportunity to participate fully in the establishment of such safety construction and siting standards through submission of written data, views, or arguments. The Secretary at his discretion may provide interested parties the opportunity to present oral testimony and have a full hearing on the record.

"(h) Any State agency may adopt additional or more stringent standards for LNG facilities if such standards are compatible with the Federal minimum standards.

"(i) The Secretary shall, within five days following the receipt by him of any application for construction of a liquefied natural gas facility pursuant to this section, notify the Governor of the affected State, in writing, concerning such application. No such application shall be approved unless at least one hearing is held in the affected local district in connection with such application.

(j) In no case shall the Secretary issue any permit for the construction of, or a license for the operation of, a liquefied natural gas facility unless: (1) environmental impact statements required by law in connection therewith have been prepared in accordance with such law. (2) The governor of the affected State, or a responsible State agency having jurisdiction with respect to such sitings within any such affected State, has approved the specific location of the proposed facility as contained in any such application.

(k) The Secretary shall approve or deny any application for construction of a liquefied natural gas facility or any application for a license to operate a liquefied natural gas facility submitted pursuant to this subtitle not later than ninety days after the last public hearing regarding such application.

(l) In carrying out the provisions of this title the Secretary shall consult with the Secretary of Energy to ensure that appropriate consideration is given to the technical economic and security aspects of LNG as they relate to the energy supply situation of the United States.

(m) After the effective date of the standards for the operation of new LNG facilities the Secretary shall issue regulations to ensure that such facilities are inspected at least on an annual basis by qualified Federal inspectors.

(b) (1) Section 2(a)(4), as redesignated, is amended by striking out "or affecting".

(2) Section 2(a)(10), as redesignated, is amended by inserting ", LNG facilities," after "pipeline facilities" the first place it appears therein.

(3) Section 3(d), as redesignated, is amended (A) by inserting "or LNG facilities" after "pipeline facilities"; and (B) by inserting after "in the same manner" the following: "and to the same extent".

(4) Section 4(b) (relating to Pipeline Transportation Safety Committee) is amended by inserting ", LNG facilities," after "pipeline facilities".

(5) Section 9 (relating to cooperation), as redesignated, is amended—

(A) by inserting "or LNG facility" after "affected pipeline facility" and after "gas pipeline"; and

(B) by inserting "or LNG facilities" after "pipeline facilities".

(6) Section 10 (relating to compliance), as redesignated, is amended by inserting "LNG facilities" after "pipeline facilities".

(7) Section 13 (relating to injunction and jurisdiction), as redesignated, is amended by inserting after "pipeline facility" the following: "or LNG facility".

(8) Section 14 (relating to inspection and maintenance plans), as redesignated, is amended—

(A) by inserting after "facilities" the following: "or LNG facilities" each place it appears;

(B) by striking out "pipeline safety" each place it appears and inserting in lieu thereof "pipeline and LNG facility safety"; and

(C) by inserting in paragraph (2) after "pipeline transportation" the following "or LNG facility".

(9) Section 14 (relating to records, etc.), as redesignated, is amended by inserting after "pipeline facilities" each place it appears the following: "and LNG facilities".

(10) Section 17(a)(2) (relating to annual report), as redesignated, is amended by inserting after "pipeline" the following: "or LNG facilities".

(11) Section 17(a)(4) (relating to annual report), as redesignated, is amended by striking out "and pipeline facilities" and inserting in lieu thereof ", pipeline facilities, and LNG facilites,".

ENFORCEMENT OF STANDARDS AND CIVIL PENALTIES

SEC. 103(a) Section 11(a) (relating to civil penalty), as redesignated by section 202 of this Act, is amended by inserting "(1)" before "Any person" and by adding at the end thereof the following new paragraph: shall be subject to a civil penalty of not to exceed $50,000 which penalty shall be in addition to any other penalties to which such person may be subject under this subsection.".

(b) The Act is further amended by redesignating sections 12 through 19 (as redesignated) as sections 13 through 20, respectively, and by inserting after section 11 the following new section:

"CRIMINAL PENALTY

"SEC. 12. Any person who willfully and knowingly violates the provisions of section 6 shall, on conviction thereof, be punished by a fine of not more than $50,000, or by imprisonment for not more than five years, or both.".

APPROPRIATIONS AUTHORIZATION

SEC. 205. Section 18(b) (relating to appropriations authorization), as redesignated, is amended by adding at the end thereof the following new paragraph;

"(3) There are authorized to be appropriated to carry out sections 6 of this Act for the fiscal year ending September 30, 1979, not to exceed $2,000,000.".

TITLE II. LIABILITY AND COMPENSATION FUND

SEC. 201. The Ports and Waterways Safety Act of 1972 is amended by adding at the end thereof the following:

"INTERNATIONAL AGREEMENTS

"SEC. 327. The Secretary of State, in consultation with the Secretary, shall seek effective international action and cooperation in support of the policy and purposes of this Act and may formulate, present, or support specific proposals in the United Nations and other competent international organizations for the development of appropriate international rules and regulations relative to the construction, ownership, and operation of offshore facilities and vessels transporting liquefied energy gases, with particular regard for measures that assure protection of such facilities as well as the promotion of navigational safety in the vicinity thereof. The Secretary shall also determine the feasibility and desirability of negotiating treaties or other means to establish effective liability insurance provisions governing the trans-national transportation of liquefied natural gas or liquefied petroleum gas.

"FUND ESTABLISHMENT

"SEC. 202. (a) There is established in the Treasury of the United States a Liquefied Energy Gas Incident Liability and Compensation Fund (hereinafter in this title referred to as the 'Fund'), to be available for the payment of claims under this subtitle. The Fund shall be administered by the Secretary and the Secretary of the Treasury, as provided in this subtitle. The Fund shall consist of an amount not to exceed $250,000,000, except that such limitation may be increased to the extent necessary to permit the deposit into the Fund of moneys referred to in paragraphs (2) and (3) of subsection (b) which are recovered or collected on behalf of the Fund. The Fund may sue or be sued in its own name.

"(b) The Fund shall be constituted from—

"(1) fees collected pursuant to subsection (c);

"(2) amounts recovered on behalf of the Fund under section 105; and

"(3) all other amounts recovered or collected on behalf of the Fund under this subtitle.

"(c)(1) The Secretary of the Treasury shall collect from the owner of each liquefied natural gas facility or liquefied petroleum gas importation facility more than 1 cent per thousand cubic feet of liquefied gas received at such facility for export, for entry into the United States, or for transportation in interstate commerce. Gas upon which a fee has been levied under this paragraph shall not be subject to a subsequent levy hereunder.

"(2) The Secretary of the Treasury shall from time to time, and in accordance with the limitation set forth in paragraph (1), modify or suspend the amount of the fee to be collected under this subsection in order to maintain the Fund at a level of not less than $50,000,000 and not more than $250,000,000, subject to permissible increase under section 102(a).

"(d)(1) The Secretary shall determine the amount in the Fund which is required for immediate access in order to meet potential obligations of the Fund.

"(2) All sums in the Fund in excess of the level determined under paragraph (1) shall be invested by the Secretary of the Treasury in income-producing securities issued by the United States. The income from, and the proceeds from the sale of, any securities held in the Fund shall be credited to the Fund.

"RECOVERABLE DAMAGES

"SEC. 203. Claims for damages arising out of a liquefied natural gas or liquefied petroleum gas accident may be asserted under this subtitle for—

"(1) personal injury; or

"(2) damage to, or destruction of, real or personal property in an amount equal to or exceeding $10,000.

"LIABILITY

"SEC. 2. (a)(1) Notwithstanding any other provision of law except as provided in subsections (b) and (c)—

"(A) the owner and operator of a vessel shall be held jointly and severally liable,

without regard to fault, for damages arising out of an incident involving liquefied natural gas or liquefied petroleum gas being carried on or being discharged from such vessel;

"(B) the owner and operator of a liquefied gas facility shall be held jointly and severally liable, without regard to fault, for damages arising out of an accident involving liquefied gas stored in or being discharged from such facility; and

"(2) The total of the liability under paragraph (1) of an owner or operator of a vessel, facility or transportation company shall not exceed $100,000,000, except that if the accident is caused primarily by—

"(A) the gross negligence or willful misconduct within the privity and knowledge of such owner or operator of such vessel or facility; or

"(B) a violation of applicable Federal safety, construction, or operating standards including hazardous materials transportation and pipeline safety standards; such owner and operator shall be jointly and severally liable for the full amount of such damages.

"(3) No liability shall be imposed under paragraph (1)—

"(A) when the accident is caused primarily by an act of war carried out by another nation; or by a natural phenomenon of an exceptional, inevitable, or irresistible character; or

"(B) as to a particular claimant, to the extent that the incident or damage is directly caused by the negligent or intentional act of such claimant.

"(b)(1) Except as provided in paragraph (2), the Fund shall be liable, without any limitation, for all damages for which a claim may be asserted under section 103 to the extent that the damage is not otherwise compensated.

"(2) No liability shall be imposed under paragraph (1)—

"(A) when the accident is caused primarily by an act of war carried out by another nation or by a natural phenomenon of an exceptional, inevitable, or irresistible character; or

"(B) as to a particular claimant, to the extent that the incident or damage is caused by the negligent or intentional act of such claimant.

"(3) If at any time the moneys available in the Fund are insufficient to meet the obligations of the Fund, the Secretary shall issue notes or other obligations to the Secretary of the Treasury in such forms and denominations, bearing such interest rates and maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of these notes or obligations shall be made by the Secretary from moneys in the Fund. These notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of comparable maturity. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and, for that purpose, he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purpose for which securities may be issued under that Act are extended to include any purchase of these notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of these notes or other obligations shall be treated as public debt transactions of the United States.

"SUBROGATION

"SEC. 205. (a) Any person, including the Fund, who pays any amount to a claimant for a loss compensable under section 103, shall be subrogated to all rights, claims, and causes of action which that claimant has under this subtitle.

"(b) Upon request of the Secretary, the Attorney General of the United States may commence an action on behalf of the Fund for any amount paid by the Fund to a claimant pursuant to this subtitle. Such an action may be commenced against any owner, operator, or person providing financial responsibility, or other person, who may be liable to the compensated claimant or to the Fund for the damages for which the amount was paid.

"FINANCIAL RESPONSIBILITY

"SEC. 206. (a) Each owner or operator of a liquefied energy gas facility, liquefied energy gas vessel, shall establish and maintain, in accordance with regulations promulgated by the Secretary, evidence of financial responsibility sufficient to satisfy the maximum amount of liability to which such owner or operator could be exposed in a case in which he would be entitled to limit his liability under section 204(a)(2). Financial responsibility may be established by any one, or a combination of, the following methods acceptable to the Secretary: (1) evidence of insurance, (2) security bonds, (3) qualification as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the Secretary.

"(b)(1) Any person who fails to comply with the requirements of this section shall be liable for a civil penalty of not more than $10,000.

"(2) The Secretary of the Treasury shall refuse the clearance required by section 4197 of the Revised Statutes of the United States to any vessel subject to this subsection, which does not meet the requirements for financial responsibility established under subsection (a).

"NOTIFICATION

"SEC. 207. The owner or operator of, or the person in charge of, a liquefied energy gas vessel or facility which is involved in an accident shall notify the Secretary as soon as he has knowledge of such accident. Notification received pursuant to this subsection or information obtained by the exploitation of such notification shall not be used against any person providing such notification in any criminal case, except a prosecution for perjury or for giving a false statement.

"CLAIMS PROCEDURE

"SEC. 208. (a) Whenever the Secretary receives notification under section 107, or information from any person alleging a liquefied energy gas accident involving liquefied energy gas vessel, or facility, he shall notify the owner or operator of the vessel, vehicle, or facility of any such allegation and of his liability under this subtitle. Such owner or operator may, within five days after receiving such notification, deny any allegation, or deny liability for damages for any of the reasons set forth in section 104(a)(3).

"(b) Any denial made under subsection (a) shall be adjudicated in accordance with the provisions of subsections (j) and (k).

"(c)(1) If a denial is not made pursuant to subsection (a) of this section, the owner and operator, or the person providing financial responsibility, shall advertise, in accordance with regulations promulgated by the Secretary, in any area where damages occurred or may occur, the procedures under which claims may be presented to such owners and operator or such person providing financial responsibility. The Secretary shall publish the text of such advertisement, in modified form if necessary, in the Federal Register. If any person fails to make any advertisement required by this paragraph, the Secretary shall do so and such person shall pay the costs of such advertisement.

"(2) If a denial is made pursuant to subsection (a) of this section, the Secretary shall advertise and publish procedures under which claims may be presented to the Secretary for payment from the Fund.

"(3) Any advertisement made under this subsection shall begin no later than fifteen days after the date of the notification of owners and operators under subsection (b) and shall continue for a period of no less than thirty days.

"(d)(1) Except as provided in subsection (e) of this section, all claims shall be presented (A) to the owner and operator, or (B) to the person providing financial responsibility.

"(2) Any person to whom a claim has been presented under paragraph (1) shall promptly notify the claimant of the rights which such claimant may have under this title and notify the Secretary of receipt of such claim.

"(e) The following claims may be presented to the Secretary for payment by the Fund:

"(1) Any claim for damages resulting from any accident with respect to which a denial has been made pursuant to subsection (a) of this section.

"(2) Any claim which has been presented to any person pursuant to subsection (c)(1) of this section, if such person—

"(A) has not accepted liability for such claim for any reason,

"(B) submits to the claimant a written offer for settlement of the claim, which the claimant rejects for any reason, or

"(C) has not settled such claim by agreement with the claimant within sixty days after the date on which (i) such claim was presented, or (ii) advertising was commenced pursuant to subsection (c) of this section, whichever date is later.

"(f) In the case of a claim which has been presented to any person under subsection (d)(1), and which may be presented to the Secretary under subsection (e)(2), such person shall, within two days after a request by the claimant, transmit directly to the Secretary such claim and such other supporting documents as the Secretary may by regulation prescribe, and such claim shall be deemed presented to the Secretary for payment by the Fund.

"(g)(1) Except as provided in paragraph (2), the Secretary shall use the facilities and services of private insurance and claims adjusting organizations or State Agencies in processing claims against the Fund and may contact to pay compensation for those facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (41 U.S.C. 5), upon a showing by the Secretary that advertising is not reasonably practicable. The Secretary may make advance payments to a contractor for services and facilities, and the Secretary may advance to the contractor funds to be used for the payment of claims. The Secretary may review and audit claim payments made pursuant to this subsection. A payment to a claimant for a single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary. When the services of a State agency are used in processing and settling claims, no payment may be made on a claim asserted on behalf of that State or any of it agencies or subdivisions unless the payment has been approved by the Secretary.

"(2) In the case of extraordinary circumstances in which the facilities and services of private organizations described in paragraph (1) are inadequate to process all claims against the Fund, the Secretary may use Federal personnel to the extent necessary to process such claims.

"(h)(1) The Secretary shall prescribe, and may from time to time amend, regulations

for the filing, processing, settlement, and adjudication of claims against the Fund for damages resulting from liquefied bulk gas incidents.

"(2) Each person's damage claims arising from one incident which are presented to the Secretary shall be presented in one form, which may be amended to include new claims as they are discovered. Damages which are known or reasonably should be known, and which are not included in the claim at the time compensation is made, shall be deemed waived.

"(3) All claims under this title shall be presented to the owner or operator, or the person providing financial responsibility, or to the Secretary for payment from the Fund, not later than three years after the discovery of any damage for which such claim is made, except that no such claim may be presented after the end of the six-year period beginning on the date on which advertising was begun pursuant to subsection (c)(1).

"(i) The following matters in dispute shall be submitted to the Secretary and adjudicated pursuant to the provisions of this section:

"(1) Upon the petition of a claimant, in the case of a claim which has been presented to the Secretary for payment by the Fund, and in which the Secretary—

"(A) has, for any reason, denied liability for such claim; or

"(B) has not settled such claim by agreement with such claimant within ninety days after the date on which (i) such claim was presented to the Secretary, or (ii) advertising was commenced pursuant to subsection (c)(2) of this section, whichever date is later.

"(2) Upon the petition of the owner and operator or the person providing financial responsibility, who is or may be liable for damages under this title—

"(A) any denial made pursuant to subsection (b)(1) of this section:

"(B) any objection to an exception to the limit of liability set forth in section 204 (a)(2) of this title; and

"(C) the amount of any payment or proposed payment by the Fund which may be recovered from such owner and operator, or such person providing financial responsibility, pursuant to section 205.

"(j)(1) Upon receipt of any matter in dispute submitted for adjudication pursuant to subsection (j) of this section, the Secretary shall refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code. Such hearing examiner shall promptly adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code.

"(2) For purposes of any hearing conducted pursuant to this subsection, the hearing examiner shall have the power to administer oaths and subpena the attendance and testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues presented for determination. Subpenas shall be issued and enforced in accordance with procedures in subsection (d) of section 555 of title 5, United States Code, and rules promulgated by the Secretary. If a person fails or refuses to obey a subpena, the Secretary may invoke the aid of the district court of the United States where the person is found, resides, or transacts business in requiring the attendance and testimony of the person and the production by him of books, papers, documents, or any tangible things.

"(3) A hearing conducted under this subsection shall be conducted within the United States judicial district within which the matter in dispute occurred, or, if such matter occurred within two or more districts, in any of the affected districts or, if such matter in dispute occurred outside of any district, in the nearest district.

"(k) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid shall be promptly disbursed by the Fund. Such decision shall not be reviewable by the Secretary.

"JUDICIAL REVIEW

"SEC. 209. (a) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner under section 108(j) may, not later than sixty days after such decision is made, seek judicial review of such decision (1) in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit, or (2) in the United States Court of Appeals for the District of Columbia.

"(b) In any case in which the person responsible for the incident, or the Fund, seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision of the hearing examiner is affirmed.

"JURISDICTION AND VENUE

"SEC. 210. (a) The United States district courts shall have original jurisdiction over all controversies arising under this subtitle, without regard to the citizenship of the parties or the amount in controversy.

"(b) Venue shall lie in any district (1) wherein the damage complained of occurred, or, if such damage occurred outside of any district, in the nearest district, or (2) wherein the defendant resides, may be found, or has its principal place of business. For the purposes of this section, the Fund shall reside in the District of Columbia.

"ACCESS TO RECORDS

"SEC. 211. (a) Each person responsible for contributing to the Fund in accordance with this subtitle shall keep such records and furnish such information as the Secretary shall prescribe in regulations. Collection shall be at such times and in such manner as shall be prescribed in regulations.

"(b) The Secretary shall have access to any books, documents, papers, and records of such person relevant to the administration of subtitle, and shall undertake regular examinations of and audits on the collection of fees.

"(c) The Comptroller General shall have access to any books, documents, papers, records, and other information of any person liable to contribute to the Fund, relevant to the administration of this title, and to all books, documents, papers, records, and other information of the Fund.

"ANNUAL REPORT

"SEC. 212. Within six months after the end of each fiscal year, the Secretary of the Treasury shall submit to the President of the Senate and the Speaker of the House of Representatives (1) a report on the administration of the Fund during such fiscal year, (2) a summary of the management and enforcement activities of the Fund, and (3) recommendations to the Congress for such additional legislative authority as may be necessary to improve the management of the Fund and the administration of the liability provisions of this subtitle.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 213(a) There are authorized to be appropriated such sums as may be necessary for the administration of the Fund.

"(b) The authority to issue notes or other obligations under section 104(b)(3) shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

"PREEMPTION

"SEC. 214 (a) Except as otherwise provided in this title, (1) no action may be brought in any court of the United States, or of any State or political subdivision thereof, for damages, for an economic loss described in section 202, a claim for which may be asserted when under this title, and (2) no person may be required to contribute to any fund, the purpose of which is to pay compensation for such a loss, or to establish or maintain evidence of financial responsibility relating to the satisfaction of a claim for such a loss.

"(b) Nothing in section (a) shall prohibit an action by the Fund, under any other provision of law, to recover compensation paid pursuant to this title.

"PRESIDENTIAL STUDY

"SEC. 215. The DOT Secretary shall study the adequacy of existing provisions of admiralty law and insurance practices related to coverage of vessels carrying liquefied gases and shall report to the Congress no later than 540 days after the enactment of this Act on his findings and recommendations.

"DEFINITIONS

"SEC. 216. For purposes of this title, the term—

"(1) 'Secretary' means the Secretary of the Department in which the Coast Guard is operating.

TITLE III. MISCELLANEOUS PROVISIONS

SUBTITLE A

Except as otherwise expressly provided, whenever in this subtitle, any reference, amendment or repeal is expressed in terms of a reference or amendment to, or repeal of, a section or other provision, it shall be considered to be made to a section or other provision of the Natural Gas Pipeline Safety Act of 1968.

WILLFUL DESTRUCTION OF INTERSTATE PIPELINE TRANSMISSION OR LNG FACILITIES

SEC. 301. Section 12 (as added by section 204 of this Act) is amended by inserting "(a)" after "SEC. 12." and by adding at the end thereof the following new subsection:

"(b) Any person who willfully injures or destroys, or attempts to injure or destroy—

"(1) any pipeline facility for the interstate transmission of gas, liquefied petroleum gas, or petroleum, including any facility or equipment covered under this Act under section 2 (b) or (d) used in the interstate transmission of gas or liquefied petroleum gas, or

"(2) any liquefied gas facility to which section 6 applies,

shall be fined not more than $15,000 or imprisoned not more than fifteen years, or both."

CITIZENS' CIVIL ACTION

SEC. 302. Section 20 (relating to citizen civil suits), as redesignated, is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"SEC. 20. (a)(1) Except as provided in subsection (b), any aggrieved person may commence a civil action for equitable relief as a citizen whenever such action constitutes a case or controversy—

"(A) against any person (including (i) the United States, and (ii) any other governmental instrumentality or the agency to the extent permitted by the 11th amendment to the Constitution) alleged to be in violation of any provision of this Act, any order or regulation issued under this Act, or any provision of this Act, any order or regulation issued under this Act, or any condition of approval pursuant to section 6 of this Act; or

"(B) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty under this Act, which is not discretionary with the Secretary.

"(2) Any action brought against the Sec-

retary under paragraph (1)(B) shall be brought in the district court for the District of Columbia or for the judicial district in which the facility involved is located or proposed to be located.

"(3) In suits brought under this section, the district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any provision of this Act or any condition of approval pursuant to section 6 of this Act or to order the Secretary to perform such act or duty, as the case may be.

"(b) No civil action may be commenced under this section—

"(1) under subsection (a)(1)(A)—

"(A) prior to 60 days after the plaintiff has given notice of the violation (i) to the Secretary (or to the applicable State agency in the case of a State which has been certified under section 5(a) and in which the violation is alleged to have occurred) and (ii) to any alleged violator; or

"(B) if the Secretary (or such State agency) has commenced and is diligently pursuing administrative proceedings or the Attorney General (or the chief law enforcement offices of such State) has commenced and is diligently prosecuting a civil or criminal action with respect to such matters in a court of the United States but in any such action any person may intervene as a matter of right; or

"(2) under subsection (a)(2) prior to 60 days after the plaintiff has given notice of such action to the Secretary (or such State agency.)

Notice under this subsection shall be given in such a manner as the Secretary shall prescribe by regulation.".

APPOINTMENTS OF DIRECTOR OF PIPELINE SAFETY OPERATIONS AND DIRECTOR OF MATERIALS TRANSPORTATION BUREAU

SEC. 303(a) Notwithstanding any other provision of law—

(1) no individual may serve for more than 180 days (in the aggregate) in an acting capacity in a position the principal duties of which were identified as of March 1, 1978, as assigned to the Director of the Office of Pipeline Safety Operations, Department of Transportation, or may serve as the Action Director of the Materials Transportation Bureau, Department of Transportation, and

(2) if a person is not appointed to such position within 180 days after a vacancy occurs in that position, the Secretary shall personally carry out the functions of such position until an appointment is made to that position and all delegations of authority under the Fuels Transportation Safety Act shall be suspended until such appointment is made.

(b) In the case of any vacancy in such positions on the date of the enactment of this Act, periods of service before the date of enactment shall not be taken into account for purposes of subsection (a).

LIQUEFIED PETROLEUM GAS SAFETY STANDARDS

SEC. 304. (a) Section 2(3) is amended—

(1) by striking out "transportation of gas" and inserting in lieu thereof "Pipeline transportation"; and

(2) by inserting after "interstate or foreign commerce" the following: ", or the transmission or distribution (but excluding the gathering) of liquefied petroleum gas by pipeline, in interstate or foreign commerce".

(b) Section 2 is amended by redesignating paragraphs (3) through (10) as paragraphs (4) through (11), respectively, and by inserting after paragraph (2) the following new paragraph:

"(3) 'Liquefied petroleum gas' means propane, butane, any related product, or mixture or combination thereof:".

(c) Section 2(2) is amended by inserting ", but such term does not include liquefied petroleum gas" after "toxic or corrosive".

(d) Section 2(4), as amended and redesignated, is further amended by inserting after "distribution of gas" the following: "(whether in a gaseous or nongaseous state)".

(e) Section 2 is amended by inserting "(a)" after "SEC. 2" and by adding at the end thereof the following new subsection:

"(b) Any storage facility, or category of storage facilities, physically connected to any pipeline facility, or facilities, used for the transmission or distribution of liquefied petroleum gas shall be included by the Secretary, by regulation, within the meaning of subsection (a)(4) if—

"(1) the Secretary finds that such inclusion would further the purposes of this Act; and

"(2) such facility has a storage capacity of 30,000 gallons or more, or is used in connection with one or more other storage facilities at the same site which have, in the aggregate, a storage capacity of 30,000 gallons or more.".

(f) Section 3 is amended by adding at the end thereof the following new subsection:

"(f)(1) Standards, or amendments to standards, required under this section by reason of the enactment of the Act of 1978 shall be prescribed not later than 18 months after the date of the enactment of such Act.

"(2) As soon as practicable but not later than 3 months after the enactment of such Act, the Secretary shall, by order, adopt interim minimum Federal safety standards for pipeline facilities and pipeline transportation to the extent not covered by this Act immediately before the date of the enactment of the comprehensive liquefied energy gas siting and safety Act of 1978. Such standards shall, to the extent the Secretary determines appropriate, be the State standards regulating pipeline facilities and pipeline transportation within such State on such date on enactment. In any State in which no such standards are in effect, the Secretary shall, by order, establish interim Federal safety standards for such pipeline facilities and pipeline transportation in such State which shall, to the extent the Secretary determines appropriate, be such standards as are common to a majority of States having safety standards for pipeline facilities and pipeline transportation on such date. Interim standards shall remain in effect until amended or revoked pursuant to this section. Any State agency may adopt such additional or more stringent standards for pipeline facilities and pipeline transportation not subject to the jurisdiction of the Federal Energy Regulatory Commission under the Natural Gas Act, or the Interstate Commerce Act, as are not incompatible with the Federal minimum standards."

(g)(1) The following provisions are amended by striking out "the transportation of gas" each place it appears and inserting in lieu thereof "pipeline transportation":

(A) section 2(a) (5) and (9), as redesignated by subsection (a);

(B) section 3(b) and (e);

(C) section 4(b);

(D) section 8(a);

(E) section 11;

(F) section 12(a);

(G) section 13(b); and

(H) section 14(a)(4).

(2) the following provisions are each amended by striking out "transportation of gas" each place it appears and inserting in lieu thereof "pipeline transportation":

(A) section 2(a) (5) and (9), as redesig-

(B) section 3(b) and (e);

(B) section 5(b)(3); and

(C) section 10(a).

(3) The following provisions are each amended by striking out "gas pipeline" each place it appears and inserting in lieu thereof "pipeline":

(A) section 3(e);

(B) section 4(a); and

(C) section 14(b).

(4) Section 2(a)(4), as redesignated and amended, is further amended by striking out "or its storage" and inserting in lieu thereof ", or its storage in connection with such gathering, transmission, or distribution,".

(5) Section 4(c)(1) is amended—

(A) by striking out "gas safety programs" and inserting in lieu thereof "pipeline safety programs", and

(B) by striking out "date of enactment of this section," and inserting in lieu thereof the following: "date of enactment of the Comprehensive Liquefied Energy Gas Siting and Safety Act of 1978."

(6) The short title set forth in the first section is amended to read as follows: "Fuels Transportation Safety Act".

COVERAGE OF CERTAIN NONPIPELINE FACILITIES

SEC. 305. (a) Section 2, as amended by this Act, is further amended by adding at the end thereof the following new subsection:

"(d)(1) If the Secretary finds that the purposes of this Act would be furthered, he may, by regulation, require that the provisions of this Act shall apply with respect to any specified type or class of facility or equipment used in the transportation on land of gas or liquefied petroleum gas, in interstate or foreign commerce, or storage in connection with such transportation, to the same extent and in the same manner as such provisions apply with respect to pipeline facilities.

"(2) This subsection (or any action hereunder) shall not be construed to relieve any person from having to meet standards or meeting other requirements under any other Federal law; except that, if any regulation under this subsection results in the imposition of a standard or other requirement relating to any matter that the Secretary finds is covered by any other standard or requirement pursuant to any provision of law under the jurisdiction of the Secretary, the Secretary shall so state in such regulation, and that standard or requirement shall supersede and preempt the standard or requirement pursuant to such other provision of law to the extent such matter is covered under the regulation under this subsection.".

(b) Section 5(a) is amended by inserting "section 2(c)," after "Except for".

"SUBTITLE B—OFFSHORE LIQUIFIED NATURAL GAS FACILITIES

SEC. 306. The Ports and Waterways Safety Act of 1972 is amended by adding at the end thereof the following:

"SEC. 321. It is the policy of the Congress in enacting this subtitle to—

"(1) authorize and regulate the location, design and construction, and operation of offshore liquefied natural gas facilities, by establishing standards for safety and environmental review;

"(2) encourage the construction and utilization of offshore liquefied natural gas transportation facilities and other facilities posing significant safety or environmental hazards to persons, property, and the natural environment, on the Outer Continental Shelf or in superjacent waters, subject to the jurisdiction of the United States.

"LICENSE

"SEC. 322. (a) No person may engage in the ownership, design, construction, or operation of an offshore liquefied natural gas facility except in accordance with a license issued pursuant to this subtitle. The license required by this subtitle shall be the sole approval required for any such facility with respect to siting and safety standards.

"(b) The Secretary is authorized, upon application and in accordance with the provisions of this subtitle, to issue, transfer, amend, or renew a license for the ownership,

construction, and operation of an offshore liquefied natural gas facility.

"(c) The Secretary may issue a license under this subtitle if—

"(1) he determines that the applicant's proposed location, and plans for design, construction, and operation comply with the requirements established pursuant to section 313, and the applicant agrees in writing that there will be no substantial change in such proposal and plans without prior approval in writing from the Secretary;

"(2) he determines that the applicant will comply with applicable laws and regulations, and any conditions the Secretary may prescribe in accordance with subsection (d)(1);

"(3) he determines that the facility will not unreasonably interfere with international navigation or other reasonable uses of the high seas, as defined by treaty, convention, or customary principles of international law;

"(4) he determines that the applicant is financially responsible,

"(5) the Governor of each adjacent coastal State has approved the issuance of the license pursuant to section 313(c)(1);

"(6) the adjacent coastal State to which the offshore facility is to be directly connected by pipeline has developed, or is making reasonable progress toward developing, an approved coastal zone management program pursuant to the Coastal Zone Management Act of 1972.

"(d)(1) In issuing a license for the ownership, construction, and operation of an offshore facility, the Secretary shall prescribe any conditions which he deems necessary to carry out the provisions of this subtitle.

"(2) The Secretary shall establish such bonding requirements or other assurances as he deems necessary to assure that, upon the revocation or termination of a license, the licensee will remove all components of the offshore facility. In the case of components lying in the subsoil below the seabed, the Secretary is authorized to waive the removal requirements if he finds that such removal is not otherwise necessary and that the remaining components do not constitute any threat to navigation or to the environment.

"(e) Upon application, licenses issued under this subtitle may be transferred if the Secretary determines that such transfer is in the public interest and that the transferee meets the requirements of this subtitle.

"(f) Any citizen of the United States who otherwise qualifies under the terms of this subtitle shall be eligible to be issued a license for the ownership, construction, and operation of an offshore facility.

"(g) Licenses issued under this subtitle shall be for a term of not to exceed twenty years. Each licensee shall have a preferential right to renew his license subject to the requirements of subsection (c) of this section, upon such conditions and for such term, not to exceed an additional ten years upon each renewal, as the Secretary determines to be reasonable and appropriate.

"APPLICATION

"SEC. 313. (a) Each person seeking a license for an offshore facility under this subtitle shall make an application to the Secretary in accordance with the provisions of this section. An application shall be in such form, and contain such information, as the Secretary may require, including—

"(1) the name and address of the applicant;

"(2) the name, address, and citizenship of any person with whom the applicant has made, or proposes to make, a significant contract for the construction or operation of the facility, and a copy of such contract;

"(3) an exact description of the proposed location, along with such other information as may be necessary to demonstrate compliance with the siting requirements prescribed under section 324(b);

"(4) detailed plans for the design of each component of the facility and for the construction of the facility, including anticipated dates of completion for each phase of construction, along with such other information as may be necessary to demonstrate compliance with the design and construction requirements prescribed under section 324(c);

"(5) such information with respect to proposed operating procedures as may be necessary to demonstrate compliance with the operation requirements prescribed under section 324(d);

"(6) such information as may be necessary to determine the impact of the proposed facility on the marine environment and on the environment of adjacent coastal States;

"(7) the financial and technical capabilities of the applicant to hold a license issued under this subtitle.

"(b)(1) Not later than twenty-one days after the receipt of an application, the Secretary shall determine whether the application contains all of the information required by subsection (a). The Secretary shall immediately notify the applicant of any required information that is not contained in the application. If the Secretary determines that the required information appears to be contained in the application, he shall, not later than five days after making such determination, publish notice of the application and a summary of the plans in the Federal Register.

"(2) At least one public hearing shall be held in each adjacent coastal State. Any interested person may present relevant material at any hearing. If the Secretary determines, after hearings in each adjacent coastal State are concluded, that there exists one or more specific and material factual issues which may be resolved by a formal evidentiary hearing, at least one adjudicatory hearing shall be held in accordance with the provisions of section 554 of title 5 of the United States Code in the District of Columbia. The record developed in any such adjudicatory hearing shall be the basis for the Secretary's decision to approve or deny a license. Hearings held pursuant to this subsection shall be consolidated insofar as practicable with hearings held by other agencies. All public hearings with respect to an application shall be concluded not later than two hundred and forty days after notice of the initial application has been published pursuant to paragraph (1) of this subsection.

"(c)(1) Not later than ten days after issuing notice of an application pursuant to subsection (b), the Secretary shall transmit a complete copy of the application to the Governor of each adjacent coastal State. The Secretary shall not issue a license if any such Governor notifies the Secretary of his disapproval of the application, and specifies the grounds on which the application is inconsistent with State programs relating to safety, environmental protection, land and water use, or coastal zone management, not later than forty-five days after the last public hearing on such application. The Secretary must condition a license so as to make it consistent with such State programs.

"(2) An adjacent coastal State may apply for financial assistance under the coastal energy impact program pursuant to section 7 of the Coastal Zone Management Act of 1972, as amended, for the recovery of any environmental, economic, and administrative costs incurred as a result of the construction and operation of an offshore facility.

"(d) The Secretary shall approve or deny any application submitted pursuant to this subtitle not later than ninety days after the last public hearing on a proposed license.

"(c)(1) The Secretary may establish and collect such fees as may be necessary to recover the costs of processing applications. In addition, adjacent coastal States may collect such fees as may be necessary to recover costs incurred in considering an application for an offshore facility adjacent to such State.

"(2) A licensee shall pay annually in advance to the Secretary the fair market rental value (as determined by the Secretary of the Interior) of the subsoil and seabed of the Outer Continental Shelf of the United States to be utilized by the offshore facility, including the fair market value of the right-of-way necessary for the pipeline segment of the facility located on such subsoil and seabed. Such funds are to be used by the Secretary to defray the costs of implementing this Act, the remainder are to be transferred to the general funds of the United States Treasury.

"SAFETY AND ENVIRONMENTAL STANDARDS

"SEC. 314. (a)(1) The Secretary shall, in consultation with the Secretary of the Interior and the Administrator of the National Oceanic and Atmospheric Administration, not later than one year after the date of the enactment of this Act, issue regulations prescribing safety and environmental standards for the location, design, and construction, and operation of offshore liquefied natural gas facilities, in accordance with the provisions of this section.

"(2) The Secretary shall periodically review and whenever necessary, revise in the same manner as originally developed, standards established pursuant to paragraph (1) of this subsection.

"(b) The Secretary shall prescribe standards for the siting of offshore liquefied natural gas facilities, which shall be designed to minimize the danger to persons, property, and the marine environment of an accident, and which shall include standards—

"(1) for the location of offshore facilities in safe navigation areas, taking into consideration navigational hazards and the adequacy of surveys and charts in the area of the proposed facility, and vessel traffic patterns, the existence of international approved traffic separation schemes, and other uses of the seas adjacent to the proposed facility;

"(2) for the location of offshore facilities at a safe distance from other facilities or operations which might be a hazard to the offshore facility or which might be endangered by a liquefied natural gas incident;

"(3) with respect to natural hazards, such as meteorological or geological conditions, which might present a danger to an offshore facility;

"(4) for incident prevention and control facilities capable of controlling an incident and minimizing damage;

"(5) with respect to the effect of facilities on the marine environment, oceanic currents and wave patterns, and alternative uses of the oceans; and

"(6) with respect to such other factors as the Secretary deems necessary.

"(c) The Secretary shall require that the best available technology be used in the design and construction of offshore facilities, by prescribing—

"(1) minimum standards for materials, and for methods and techniques of design and construction, which shall be applied to each such facility; and

"(2) additional standards which may be applied in individual cases as deemed necessary by the Secretary to carry out the purposes of this subtitle, and which may be prescribed as conditions to a license under section 322(d)(1).

"(d) The Secretary shall prescribe regulations for the operation of offshore facilities which shall be designed to insure the safe transfer and storage of liquefied natural gas, and which shall include standards—

"(1) for vessel safety in accordance with title I of this Act, including the establishment of safety zones around offshore facilities;

"(2) for the use of Coast Guard-certified tankermen in the handling and transfer of liquefied natural gas from vessels to facilities, and for the training of such other personnel as is necessary for the operation and protection of facilities;

"(3) for the availability and use of incident prevention and control equipment at facilties;

"(4) for the use of security measures at facilities for protection against intentional acts which might cause incidents;

"(5) for the maintenance in safe condition of facilities and equipment, and for periodic safety and health inspections by the Coast Guard; and

"(6) for any other safety measures deemed necessary by the Secretary.

"REGULATIONS

"SEC. 315. (a) The Secretary shall, as soon as practicable after the date of the enactment of this subtitle, issue regulations to carry out the purposes and provisions of this subtitle.

Such regulation shall pertain to, but need not be limited to, application, issuance, transfer, renewal, suspension, and termination of licenses. Such regulations shall provide for full consultation and cooperation with all other interested Federal agencies and departments and with any adjacent coastal State, and for consideration of the views of any interested members of the general public. The Secretary is further authorized, consistent with the purposes and provisions of this subtitle, to amend or rescind any such regulation.

"(b) The Secretary shall, consistent with the purposes of this subtitle, prescribe regulations relating to those activities involved in site evaluation and preconstruction testing at potential offshore facility locations that may (1) adversely affect the environment, (2) interfere with other authorized users of the Outer Continental Shelf, or (3) pose a threat to human health and welfare. Such activity may not be undertaken, after the issuance of such regulations, except in accordance with such regulations.

"RELATIONSHIP TO OTHER LAW

"SEC. 316. (a)(1) The Constitution, laws, and treaties of the United States shall apply to an offshore facility licensed under this subtitle and to activities connected, associated, or potentially interfering with the use or operation of any such facility, in the same manner as if such facility were an area of exclusive Federal jurisdiction located within a State. Nothing in this subtitle shall be construed to relieve, exempt, or immunize any person from any other requirement imposed by Federal law, regulation, or treaty. Offshore facilities licensed under this subtitle do not possess the status of islands and have no territorial seas of their own.

"(2) Except as otherwise provided by this subtitle, nothing in this subtitle shall in any way alter the responsibilities and authorities of a State or the United States within the territorial seas of the United States.

"(b) The law of the nearest adjacent coastal State is declared to be the law of the United States, and shall apply to any offshore facility licensed pursuant to this subtitle, to the extent applicable and not inconsistent with any provision or regulation under this subtitle or other Federal laws and regulations. All such applicable laws shall be administered and enforced by the appropriate officers and courts of the United States.

"(c) Except in a situation involving force majeure, a licensee of an offshore facility shall not permit a vessel, registered in or flying the flag of a foreign state, to call at, or otherwise utilize an offshore facility licensed under this subtitle unless (1) the foreign state involved, by specific agreement with the United States, has agreed to recognize the jurisdiction of the United States over the vessel and its personnel, in accordance with the provisions of this subtitle, while the vessel is located within the safety zone, and (2) the vessel owner or operator has designated an agent in the United States for receipt of service of process in the event of any claim or legal proceeding resulting from activities of the vessel or its personnel while located within such a safety zone.

"(d) The customs laws administered by the Secretary of the Treasury shall not apply to any offshore facility licensed under this subtitle, but all foreign articles to be used in the construction of any such offshore facility, including any component thereof, shall first be made subject to all applicable duties and taxes which would be imposed upon them by reason of their importation if they were imported for consumption in the United States. Duties and taxes shall be paid thereon in accordance with laws applicable to merchandise imported into the customs territory of the United States.

"(e) The United States district courts shall have original jurisdiction of any action arising out of or in connection with the construction or operation of an offshore facility. Any such action may be brought in the judicial district in which any defendant resides or may be found, or in the judicial district nearest the place where the cause of action arose.

"INTERNATIONAL AGREEMENTS

"SEC. 317. The Secretary of State, in consultation with the Secretary, shall seek effective international action and cooperation in support of the policy and purposes of this subtitle and may formulate, present, or support specific proposals in the United Nations and other competent international organizations for the development of appropriate international rules and regulations relative to the construction, ownership, and operation of offshore facilities, with particular regard for measures that assure protection of such facilities as well as the promotion of navigational safety in the vicinity thereof.

"SEC. 318. For purposes of this subtitle, the term—

"(1) 'Secretary' means the Secretary of the Department in which the Coast Guard is operating.

"(2) 'Offshore liquefied natural gas facility' or 'offshore facility' means a liquefied bulk gas facility, including vessels or installations used for the transfer, storage, and regasification of liquefied bulk gas are located on the Outer Continental Shelf or in superjacent waters subject to the jurisdiction of the United States.

"(3) 'Adjacent coastal State' means, with respect to an offshore facility, any coastal State which (A) would be directly connected by pipeline to an offshore facility, or (B) would be located within fifteen miles of a proposed offshore facility.

"(4) 'State' means any State of the United States of America, including its territories and possessions.

"(5) 'Liquefied natural gas incident' or 'incident' means an event of natural or manmade origin involving the transportation of liquefied bulk gases in the marine mode, and the transfer, storage, and regasification of such substances which causes, or poses an imminent threat of, significant damage to persons and property, real and personal.

"(6) 'Construction' means the supervising, inspection, actual building, repairing, or expanding of an onshore or offshore facility, or any of its components.

"(7) 'Person' includes an individual, a firm, corporation, association, partnership, consortium, joint venture, or governmental entity.

"(8) 'Vessel' means every description of watercraft or other artificial contrivance used and means of transportation on or through the water.

"(9) 'Owner' means any person holding title to, or, in the absence of title, any other indicia of ownership of, a vessel or facility, but does not include a person who, without participating in the management or operation of a vessel or facility, holds indicia of ownership primarily to protect his security interest in the vessel or facility.

"(10) 'Operator' means—

"(A) in the case of a vessel, a charterer by demise or any other person, except the owner, who is responsible for the operation, manning, victualing, and supplying of the vessel, or

"(B) in the case of a facility, any person, except the owner, responsible for the operation of the facility by agreement with the owner."

SECTION-BY-SECTION ANALYSIS; "LIQUEFIED ENERGY GAS SITING SAFETY AND LIABILITY ACT OF 1978"

TITLE I. SITING AND SAFETY STANDARDS

Section 102.—This section amends the SECTION-BY-SECTION ANALYSIS; "LIQUEFIED Natural Gas Pipeline Safety Act of 1968 by adding a new section which pertains to standards for the design, construction, operation, and maintenance of LNG facilities. No new liquefied natural gas facility may be constructed nor may construction occur with respect to an existing facility until the Secretary of Transportation (hereinafter "Secretary") determines that the construction, operation and maintenance of such facility would be in accordance with standards prescribed under this section. (The Secretary presently has the authority to seek a court order enjoining violations of a standard or rule under section 10, but there are no existing guidelines for standards.) After the effective date for the standards are issued under subsection B the Secretary shall issue a construction permit on the basis of the application submitted which meets standards applicable for all new LNG facilities.

Additionally, the Secretary shall not approve construction of a liquefied natural gas facility unless the applicant submits a contingency plan which details steps to be taken in case of a liquefied natural gas accident or supply interruption, and which the Secretary under this section determines to be adequate to ensure maximum protection of public health, safety, and property.

Construction standards prescribed under this section would not apply in the construction of those facilities for which an application for approval was filed and approved by appropriate Federal agencies before the date of enactment. The remaining facilities, defined as existing facilities, would be subject to standards mandated by this section which pertain to operation of facilities. If the capacity of an existing facility is to be expanded, standards mandated by this section pertaining to construction would be applicable to the expansion. New facilities would be subject to all standards mandated by this section.

The section requires that, within 180 days after enactment, the Secretary must establish minimum standards pertaining to: the remote siting of new stationary liquefied natural gas facilities; the design and construction of new LNG facilities; and the operation and maintenance of new facilities. Standards shall be developed independently by the Department of Transportation and shall make every effort to improve upon existing federal and industrial standards.

Within 270 days of enactment, the Secretary would be required to establish minimum standards pertaining to the operation and maintenance of any liquefied natural gas facility. After the effective date of operation and maintenance standards the Secretary shall issue operating permit for exist-

ing LNG facilities on the basis of an application submitted pursuant to the procedures prescribed in the bill.

In prescribing minimum standards for new stationary facilities the Secretary would be required to consider: (1) the nature of the use of the facility; (2) alternative locations; (3) existing and projected population and demographic characteristics of alternative locations and land uses near each location; (4) physical aspects of each location including seismic aspects; (5) medical, law enforcement and fire prevention and fire fighting capabilities of the location; and (6) costs of construction, operation and maintenance and the desirability of remote location.

In promulgating standards for the design and construction of any new liquefied natural gas facility the Secretary must consider: (1) thermal resistance and other characteristics of materials used in the construction of such facilities; (2) design factors (e.g., multiple diking); (3) the characteristics of the liquefied natural gas to be stored or converted (e.g., whether the gas is in liquid, semisolid or solid state); (4) the public safety factors of the design as compared to alternative designs (with special attention to design elements intended to prevent and contain a liquefied natural gas spill); and (5) security aspects, including anti-intrusion features.

In promulgating standards relating to the operation of any liquefied natural gas facility, the Secretary must consider the following: (1) the condition, features and type of equipment and structure utilized in the facility; (2) the fire prevention and containment equipment of the facility; (3) the security measures to be used to prevent sabotage; (4) training techniques in regard to the equipment; (5) its operation and security measures; and (6) other factors pertaining to the safe handling of liquefied natural gas.

Any standard prescribed under this section would become effective 30 days after the date of issuance unless the Secretary, upon a showing of good cause, determines that an earlier or later effective date is necessary to better assure compliance. Additionally, the Secretary would be directed to amend such regulations, on his own motion or on the motion of any person, in order to reflect changes in technology or to carry out the purposes of this section. The Secretary can also afford interested parties the opportunity to present testimony on such changes and to have full hearings on record.

The section also permits State agencies to adopt additional or more stringent standards for liquefied natural gas facilities provided those standards are compatible with Federal minimum standards. No construction application for a new LNG facility shall be approved without at least one hearing in the affected local district. Under no circumstance shall a permit be issued for construction, or licensing for operation of a facility without approval of the Governor of the affected state, or deny any application for construction, or licensing of a facility within a 90-day period after the last hearing regarding the application.

In carrying out the provisions of this title the Secretary also shall consult with the Secretary of Energy to ensure consideration of the technical, economic, and security aspects of liquefied energy gas supply. The Secretary is also required to issue regulations that ensure all LNG facilities inspected at least annually by qualified Federal inspectors.

The section also contains amendments of a technical and conforming nature, provides for civil and criminal penalties for violations and authorize $12 million to carry out the provisions of this title.

TITLE II. LIABILITY AND COMPENSATION

Section 201.—This section directs the Secretary of State, in consultation with the Secretary of Transportation, to seek international action in support of this bill. It authorizes the Secretary of State to formulate specific proposals for the U.N. and other international organizations dealing with construction, ownership and operation of offshore facilities and vessels carrying LEG, and directs the Secretary to determine the feasibility and desirability of negotiating treaties or other means to establish liability insurance covering LEG vessels.

Section 202.—This section establishes a Liquefied Energy Gas Incident Liability and Compensation Fund in the Treasury, and provides for joint administration by the Secretaries of the Treasury and Transportation. It authorizes a total amount for the Fund of up to $250 million, plus any additional amounts collected or recovered in later actions by the Fund and provides that the Fund may sue or be sued in its own name. The Fund shall be constituted from amounts recovered or collected, as well as fees of not more than 1 cent per thousand cubic feet on liquefied energy gases received for export, entry into the United States, or transportation in interstate commerce. These fees shall be collected from the owners of each liquefied natural gas facility or liquefied petroleum gas importation facility. The Secretary of the Treasury is directed to modify or suspend the amount of these fees in order to maintain the Fund at a level of between $50 million and $250 million. Any excess funds shall be invested by the Secretary of the Treasury in income-producing U.S. securities, with the proceeds credited to the Fund.

Section 203.—This section provides that damage claims may be asserted for an accident involving liquefied energy gases which involve personal injury (including death), or property damage equal to or exceeding $10,000.

Section 204.—This section provides strict liability for the owner and/or operator of a vessel carrying liquefied energy gases, or the owner/operator of a liquefied energy gas facility. Total liability for a specific claim is limited to $100 million, unless the incident is caused primarily by gross negligence or willful misconduct of the owner/operator or his agents, or by a violation of applicable Federal standards including hazardous materials or pipeline safety standards. This section also provides that no liability will be found if the accident is caused primarily by an act of war if such an act of war is carried out by another nation (this provision is designed to clarify the intent of legislation to cover any terrorist acts), or by an act of God. Furthermore, no liability is imposed if the damages are directly caused by the negligent or intentional actions of the claimant. If the Fund is inadequate to meet claims, the Secretary shall issue notes or other obligations to the Treasury. Ultimate redemption of these notes shall be made from the Fund. In the meantime the Treasury is directed to purchase such notes and these transactions are treated as public debt transactions.

Section 205.—This section subrogates the Fund as well as any other person paying any amount to claimants under the Act, and provides that upon the request of the Secretary of Transportation, the Attorney General shall bring an action on behalf of the Fund against any person who may be liable to the claimant or the Fund itself.

Section 206.—This section requires each owner/operator of a liquefied energy gas facility or vessel to maintain evidence of a financial responsibility that is adequate to satisfy the maximum limit of liability provided under Section 204. The Secretary is directed to promulgate regulations establishing methods to demonstrate financial responsibility, and provides that such a demonstration may include evidence of insurance, security bonds, qualification as a self-insurer, and/or other evidence of financial responsibility. A failure to comply creates liability for a civil penalty of not more than $10,000, and any vessel failing to comply with the requirements of the section shall be refused clearances.

Section 207.—This section requires the owner/operator of a liquefied energy gas vessel or facility to notify the Secretary as soon as he or she becomes aware of an accident involving LEG. Provides that any information received through or as a result of such notification shall not be used in a subsequent criminal case, except for a prosecution for perjury or for giving a false statement.

Section 208.—This section requires the Secretary of Transportation to notify the owner/operator of an LEG facility or vessel of any information related to an LEG accident as well as potential liability. The owner/operator then has five days to admit or deny liability for damages. If the owner/operator fails to deny liability, he (or his insurer) shall advertise claims procedures in accordance with regulations to be promulgated by the Secretary of Transportation; the Secretary of Transportation; the Secretary is also charged with publishing the advertisement in the *Federal Register*. If a denial is made, the Secretary is required to advertise procedures for presenting claims. Advertisements are required within fifteen days after the Secretary notifies owner/operators and must continue for at least thirty days. Any person to whom a claim has been presented is required to notify the claimant of all his or her legal rights and also notify the Secretary of the claim.

The following types of claims can be submitted directly to the Secretary: claims for which a denial has been filed, as well as those where the owner/operator has refused liability, submitted a written settlement offer which has been rejected by the claimant, or has not settled the claim within sixty days after the later of the dates on which the claim was presented or advertising was started.

The Secretary is also required to use and compensate private insurance companies or State agencies to process claims against the Fund, unless there are extraordinary circumstances where the Secretary determines that private or State facilities are inadequate. Each person's damage claims shall be presented in a single form that is amendable to include newly-discovered claims. However, damages that are known or reasonably should be known to the claimant, but that nevertheless are not included in the claim at the time that compensation is paid to the claimant are effectively waived.

The section also provides that all claims under the Act shall be presented to the owner/operator or his or her insurer, or to the Secreary for payment by the Fund, within three years after the discovery of damage. In any case, no claim may be presented after six years following the first day of advertising.

The section provides for the Secretary of Transportation to appoint a hearing examiner to hear any matter in which the Secretary has denied the petition of a claimant, or not settled a claim within ninety days after submission or first-advertising, or where the owner/operator objects to a denial or to an exception made by the Secretary to the limitation of liability. The examiner in these adjudicatory hearings shall have the power to administer oaths and subpoena witnesses and documents. Deci-

sions by the hearing examiners are not reviewable by the Secretary.

Section 209.—This section authorizes a party to seek review of the hearing examiner's decision in the United States Court of Appeals in the circuit where the damages occurred (or the nearest circuit if the damages occurred outside the jurisdiction of any circuit, or in the Court of Appeals for the District of Columbia): if the owner/operator appeals and the claimant prevails, fees and costs shall be awarded to the claimant.

Section 210.—This section provides that the United States District Courts shall have original jurisdiction for all controversies under this title, without regard to diversity of citizenship or the amount in controversy. Venue lies in any district where the damage occurred (or the nearest district if the damage occurred elsewhere), or where the defendant resides, may be found or has its principal place of business. The Fund "resides" in the District of Columbia.

Section 211.—This section requires each person responsible for contributing to the Fund to maintain such records as the Secretary of Transportation shall require.

The Secretary and the Comptroller General are given access to books and records relevant to the administration of this title.

Section 212.—This section requires the Secretary of the Treasury to submit an annual report on the administration of the Fund and any recommendations to the Congress within six months after the end of each fiscal year.

Section 213.—This section authorizes such sums as may be necessary to administer the Fund.

Section 214.—This section pre-empts other actions in the Federal or State courts for damages covered by this title.

Section 215.—This section requires the President to study the adequacy of existing provisions of admiralty law as well as marine insurance practices relative to the coverage of vessels carrying liquefied energy gases. A report to the Congress is required within a year and a half after enactment.

TITLE III

Subtitle A—Miscellaneous provisions

Willful destruction of interstate pipeline transmission or liquefied gas facilities

Section 301.—This section amends section 12 by subjecting any person who willfully injures or destroys or attempts to injure or destroy a pipeline facility for the interstate transmission of gas or petroleum or a liquefied gas facility to a fine of not more than $15,000 or imprisonment for not more than 15 years or both.

Citizen's Civil Action

Section 302.—This section amends section 20, as redesignated, (Citizens Civil Action) by redrafting subsections a and b to include reference to new section 6. The section provides that any person may commence a civil action for equitable relief whenever that citizen has a case or controversy against any person including the United States or any other government instrumentality (to the extent permitted by the 11th amendment of the Constitution) for violation of any provision, order or regulation of the Act or for violation of any condition of approval of new section 6 (Siting). Additionally, a citizen could bring suit against the Secretary for failure to perform any nondiscretionary act or duty. Any action brought against the Secretary must be brought in the district court of the District of Columbia or in the district court for the judicial district in which the facility is located or proposed to be located. The district court would have jurisdiction over suits brought under this section without regard to the amount in controversy or the citizenship of the parties.

A suit by a citizen against any person (involved in the shipment or storage of natural gas or liquified natural gas) or governmental entity for an alleged violation of the Act could not be brought prior to 60 days after the plaintiff has given notice to the Secretary, or to the appropriate State agency certified under section 5(a) and to the alleged violator.

A citizen could not bring a civil action against a person or governmental entity if the Secretary or Attorney General or chief law enforcement officer of a State has commenced a civil or criminal action, but the citizen could intervene as a matter of right. This provision tracks the existing provisions in the Act.

For purposes of this Act an "aggrieved" person means such person who otherwise has standing to bring such action notwithstanding the lack of any direct economic interest or injury thereto.

Appointments of Director of Office of Pipeline Safety Operations and Director of Materials Transportation Bureau

Section 303.—This section provides that no individual may serve as Acting Director of the Office of Pipeline Safety Operations, or as Acting Director of the Materials Transportation Bureau, of the Department of Transportation, for more than 180 days. It provides that if a Director of such an Office or Bureau is not appointed within 180 days after a vacancy occurs in such position, the Secretary of Transportation shall personally carry out the functions of such position and all delegations of authority under this Act shall be suspended until such appointment is made. It also provides that periods before the date of enactment shall not be taken into consideration in computing the 180-day period.

Liquefied Petroleum Gas Safety Standards

Section 304.—This section brings the transportation by pipeline of LPG within the ambit of the Act. The first step of this incorporation amends section 2 (Definitions), specifically section 2(3), to substitute "pipeline transportation" for the term "transportation of gas" and defines pipeline transportation to include the transmission or distribution (excluding gathering) of liquefied petroleum gas in interstate or foreign commerce.

Section 2(2) of the Act is amended to specifically exclude "liquefied petroleum gas" from the definition of "gas."

This section also permits the Secretary to include by regulation within the meaning of "'pipeline facilities" any storage facility or category of such facilities which are physically connected to any pipeline facility used for the transmission or distribution of liquefied petroleum gas if—

(1) The Secretary finds that the inclusion would further the purposes of the Act, and

(2) The facility has storage capacity of 30,000 gallons or more or is used in conjunction with other facilities having an aggregate storage capacity of 30,000 gallons or more.

The section also amends section 3 of the Act by requiring that new standards or amendments to standards pertaining to amendments described in this section shall be prescribed not later than 18 months after enactment. In the interim, the bill prescribes a procedure for interim regulations which parallels the procedure for interim regulations employed by the 1968 Act. Thus, within 3 months from enactment, the Secretary shall, by order, adopt interim minimum Federal safety standards for pipeline facilities to bring such facilities within the ambit of the Act. To the extent appropriate, such standards shall be the State standards regulating such facilities within such State on the date of enactment of this Act. If a State has no standards, the Secretary must promulgate standards which are common to a majority of States which have such standards. This provision also states that a State can adopt stricter standards for intrastate facilities, but cannot adopt or maintain more rigid standards for interstate facilites after Federal minimum interim standards are adopted.

The remaining provisions of the section are conforming, i.e., substitute "pipeline transportation" for "transportation of gas" in certain sections, etc.

Coverage of Certain Nonpipeline Facilities

Section 305.—This section authorizes the Secretary, if he finds the purposes of the Act would be furthered, to require by regulation that the provisions of the Act apply to specified types or classes of facilities or equipment used in the transportation on land of gas to the same extent or manner as pipeline facilities. If the Secretary promulgates a regulation or other requirement relating to a matter which is covered by another standard or requirement instituted pursuant to the authority of the Secretary, the Secretary shall so state in the regulation and the regulation issued pursuant to this Act shall supersede and preempt the prior standard or requirement.

Subtitle B—offshore liquefied natural gas facilities

Section 306.—This section amends the Ports and Waterways Safety Act of 1972 to establish regulatory procedures for the licensing, construction and operation of offshore liquefied natural gas facilities.

Section 313.—Application and licensing procedures for application for a construction license for an offshore LNG facility and specific information to be supplied by the applicant are prescribed. The Secretary is required to hold at least one public hearing in each adjacent coastal State which shall be basis for the Secretary's desire to approve or deny a license. The Secretary is required to approve or deny an application within 90 days after the last hearing.

The Secretary shall not issue a license if a Governor of an adjacent coastal state disapproves of the application on the grounds that the application is inconsistent with State programs relating to safety, environmental protection, land and water use, or coastal zone management.

Under this section, coastal states may apply for financial assistance under the coastal energy impact program pursuant to the Coastal Zone Management Act of 1972 for the recovery of any environmental, economic, and administrative costs incurred due to construction and operation of an offshore LNG facility.

Licensees shall pay the fair market rental value of the subsoil and seabed of the OCS used by an offshore facility.

Section 314.—Safety and Environmental Standards;

The Secretary shall within one year of enactment issue regulations establishing safety and environmental standards for the location, design, construction and operation of offshore LNG facilities.

The Secretary also shall issue standards for the siting of offshore LNG facilities designed to minimize the danger to persons, property, and the marine environment of an accident.

The Secretary shall require that the best available technology be used in the design and construction of offshore facilities by prescribing minimum standards for materials and methods and techniques of design and construction.

The Secretary also shall prescribe operating standards to ensure the safe transfer and storage of LNG.

Section 315.—Regulations:

The Secretary is authorized to insure regulations to carry out the provisions of this subtitle, including regulations to protect the environment and human health.

Section 316.—Relationship to Other Law

This section brings offshore LNG facilities

under the constitution, laws and treaties of the U.S. as well as the laws of the nearest adjacent coastal State.

No licensee shall permit a vessel flying a foreign flag to call at an offshore LNG facility unless the foreign state involved recognizes the jurisdiction of the U.S. over the vessel and if personnel in U.S. waters and the vessel owner has a designated agent in the U.S. to handle any claims.

The customs laws administered by the Secretary of the Treasury shall not apply to any offshore facility licensed under this subtitle.

U.S. district courts shall have original jurisdiction of any action arising out of construction or operation of an offshore facility.

Section 317.—International Agreements;

The Secretary of State shall seek international action in support of the policies and purposes of this subtitle.

Mr. DURKIN. Mr. President, I ask unanimous consent that the bill be jointly referred to the Committee on Commerce, Science, and Transportation and the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ADDITIONAL COSPONSORS

S. 1315

At the request of Mr. DECONCINI, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 1315, a bill to provide more effectively for the use of interpreters in courts of the United States, and for other purposes.

S. 3425

At the request of Mr. RIEGLE, his name was added as a cosponsor of S. 3425, a bill to amend title XVIII of the Social Security Act.

S. 3570 THROUGH S. 3577

At the request of Mr. STAFFORD, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 3570, S. 3571, S. 3572, S. 3573, S. 3574, S. 3575, S. 3576, and S. 3577, bills to amend the Public Buildings Act of 1959, as amended, to authorize the financing of the acquisition and the construction of public buildings, and for other purposes.

SENATE JOINT RESOLUTION 159

At the request of Mr. WALLOP, the Senator from Colorado (Mr. HASKELL) was added as a cosponsor of Senate Joint Resolution 159, providing for congressional disapproval of implementation of national water resources policies, and for other purposes.

SENATE RESOLUTION 589—SUBMISSION OF A RESOLUTION WAIVING THE CONGRESSIONAL BUDGET ACT

Mr. RANDOLPH submitted the following resolution, which was referred to the Committee on the Budget:

S. RES. 589

Resolved, That, pursuant to section 303(c) of the Congressional Budget Act of 1974, the provisions of section 303(a) of such Act are waived with respect to the consideration of the conference report to accompany H.R. 11733, the Surface Transportation Act of 1978. Such waiver is necessary for the Senate to complete action on legislation which provides spending authority for the Federal-aid highway program, and the Urban Mass Transit Act for fiscal years 1979, 1980, 1981 and 1982. The total new spending authority provided for this period by the conference report is $53,800,000,000. The spending authority for fiscal year 1979 is $9,000,000,000 for Federal-Aid Highways and $3,170,000,000 for Urban Mass Transit Assistance. This new spending authority is sufficient to allow the States to continue highway development at reasonable levels, and is consistent with projected revenues to the Highway Trust Fund.

SENATE RESOLUTION 590—SUBMISSION OF A RESOLUTION PROPOSING A NEW MARSHALL PLAN FOR THE MIDDLE EAST

Mr. JACKSON (for himself, Mr. CHURCH, Mr. JAVITS, Mr. CASE, and Mr. STONE) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 590

Whereas the Camp David Agreements have established a political framework for the construction of a new political relationship between Israel and Egypt which can be a significant step on the road to a stable peace in the middle East;

Whereas a major factor in the tensions that have produced a generation of political instability in the Middle East has been the poverty and desperation that afflicts the great mass of people in the area;

Whereas the potential resources of Egypt and other countries in the region are rich and plentiful and can be developed in peace and in partnership through cooperation and mutual assistance;

Whereas in helping to alleviate poverty in Egypt and elsewhere in the Middle East, there is a great and historic role for the United States, a role we once before filled in the reconstruction of postwar Europe: Now, therefore be it

Resolved, That it is the sense of the Senate that the President of the United States should take the lead in inviting Egypt and Israel to explore with our government and with the governments of other Western industrial nations the opportunity for a New Marshall Plan for the Middle East, leading to a full economic partnership with the Israeli and Egyptian people and all those in the Middle East who are willing to live in peace.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President of the United States.

Mr. JACKSON. Mr. President, I wish to submit on behalf of myself, Senator CHURCH, Senator JAVITS, Senator CASE, and Senator STONE a resolution expressing the sense of the Senate with respect to developing a new Marshall plan for the Middle East.

This resolution affirms the sense of the Senate that the President of the United States should take the lead in inviting Egypt and Israel to explore with our Government and with the governments of other Western industrial nations the opportunity for a new Marshall plan for the Middle East, leading to a full economic partnership with the Israeli and Egyptian people and all those in the Middle East who are willing to live in peace.

Mr. President, the representatives of Israel and Egypt today open their negotiations at Blair House to complete the historic Israeli-Egyptian peace treaty initiated at Camp David.

At this time, the Camp David agreements remain a political framework—a foundation—for the construction of a new political relationship.

The Middle East, with the exception of Israel, and despite vast oil revenues, remains plagued by poverty and instability. While a fourfold increase in the price of oil has enriched a small minority in a few countries, the great mass in the Middle East continue to suffer the burdens of inadequate food and shelter, high unemployment, and a dismal future. A major factor in the tensions that have produced a generation of political instability in the Middle East has been the desperation that afflicts all but a handful of rich and privileged individuals.

For example, the Egyptian people, some 38 million and growing over a million a year, live from hand to mouth. In Cairo, where 6 million people are crowded together, hundreds of thousands of urban poor live, without water, plumbing or electricity, inside the tombs of the ancient cemetery area. Ten percent of the infants born each year die in infancy. In the Upper Nile, and in farming areas generally, the parasitic disease schistosomiasis contributes to Egypt's male life expectancy of 54 years and condemns millions to internal bleeding, debilitation, and suffering. Professionals and skilled workers emigrate in droves—for there is no work for them in Egypt.

This can and must be changed. The potential resources are rich and plentiful. With peace they can be developed, and with peace one can foresee a fruitful partnership of unprecedented proportions between Israel, Egypt, and the United States.

In helping to alleviate poverty in Egypt and elsewhere in the Middle East, there is a great and historic role for the United States, a role we once before filled in the reconstruction of postwar Europe.

As was the case with the Marshall plan, it is essential that any such program for the Middle East be based on a full partnership with the Israelis and Egyptians. They should work with us and with other Western industrial nations for the common development of their countries and, eventually, the region as a whole. Among them, the countries possess all the potential resources: capital, ingenuity, management skills, labor and, with Western nation involvement, technology and markets. Together we can do much to reverse the misery of centuries, to make the deserts bloom.

The resolution we introduce today is intended to encourage President Carter to take the lead by inviting Egypt and Israel to explore with us and with other governments of Western industrial nations the opportunities for a new Marshall plan for the Middle East.

The American Government can and should let all the countries of the Middle East know that there is a path to the realization of their peaceful dreams along which we are willing to accompany them. And at the same time we must make it plain that those who are unwilling to join with us and Israel and Egypt will lose out on the economic and

other benefits of such cooperation and mutual assistance.

The Camp David agreements are, we trust, a significant step on the road to a stable peace in the Middle East. But for the peace to last it must be more than a peace among armies and diplomats, more than an official peace. It must come to occupy a place in the daily lives of Arabs and Israelis alike. There must be movement across once fortified borders that can now become gateways to the development of social, economic, and political relations—first among the Israeli and Egyptian people, and in time among all those in the Arab world who are willing to live in peace.

INCENTIVES FOR PEACE IN THE MIDDLE EAST

Mr. CHURCH. Mr. President, I am happy to cosponsor this resolution, offered by the able Senator from Washington, Mr. JACKSON, calling for the United States to encourage peace in the Middle East through the provision of economic incentives.

With the signing of the Camp David accords, the time has come for the United States to create such incentives for expanding peace in the Middle East. In an address I recently delivered in New York City entitled, "Incentives for Peace in the Middle East—A Call for a New American Policy," I spoke of a new strategy that would reward those countries that work with us to construct and complete the peace, while extracting a price from those that work against us. I ask unanimous consent that this address be inserted in the RECORD at the conclusion of my remarks.

As I said in New York:

The United States has paid dearly for the wars in that region, and our national interest calls out for an end to the conflict there. We should become a partner for an expanded peace, working in tangible ways to strengthen its foundations and to extend its frontiers.

This resolution moves in the proper direction, and I am glad to add my name to it.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

INCENTIVES FOR PEACE IN THE MIDDLE EAST

It is a great honor to receive the Carmel Laureate Award, which takes its name from the legendary Mount Carmel that overlooks the beautiful City of Haifa. I am told that the Prophet Elijah ascended to Heaven from this mountain after having made a fiery political speech in front of a great gathering. If my talk tonight appears to be a bit restrained, I hope you will understand that I see no reason to take unnecessary chances.

The Prophet Elijah is the symbol of the very precepts forming the spiritual cornerstone of the State of Israel—independence, freedom and rejuvenation. The symbol is embellished in the wake of Camp David and on this, the anniversary of the Jewish New Year. For on this Rosh Hashana, I believe the promise of peace has finally come within sight of the people of Israel who have so long yearned for it.

The face of the Middle East, distorted for 30 years by destruction and death, could be vastly transformed in the years ahead. Admittedly, the rapid sequence of events during the past year, since President Sadat's historic trip to Jerusalem, has strained our emotions. Our initial euphoria last November eventually gave way to deep-seated frustration as we witnessed the seeming disintegration of an historic opportunity for a settlement with Egypt. And as the long days and nights at Camp David wore on with increasingly gloomy reports, hope seemed to fade. But the determination of President Carter and the courage and vision of Prime Minister Begin and President Sadat in agreeing upon a framework for peace have renewed our faith.

It is my sincere belief that within a scant two months Israel will be signing a peace treaty with Egypt—removing the most powerful military force in the Arab world from its posture of unremitting hostility toward Israel. An Egypt at peace with Israel changes the whole equation in the Middle East. For, as President Sadat himself has observed: "Without Egypt, there can be no peace, and without Egypt, there can be no war.

It would be a fruitless exercise to try to quantify the concessions made by each side at Camp David, or to determine who came out "ahead." When history is finally written, it will be said that both President Sadat and Prime Minister Begin felt the weight of the past and the responsibility of the future. Neither flinched, despite the heavy pressures upon them, thus bearing out Shakespeare's perception that "courage mounteth with occasion."

President Sadat can now promise his people that within two or three years, Egypt will regain every inch of the Sinai without sacrificing the life of one more Egyptian soldier. He can also honestly claim that he has remained faithful to the larger Pan-Arab concerns by conferring on the Palestinians full autonomy over their own affairs in the immediate future, while furnishing them a framework within which they might peacefully resolve their remaining differences with Israel.

At the same time, Prime Minister Begin can truthfully point out to the Israelis that peace between them and the strongest Arab country is the gateway that can lead to peace throughout the Middle East.

While Sadat and Begin seem irrevocably committed to establish peace between their two countries, it remains to be seen whether the Palestinians, King Hussein, President Assad, and the rulers of Saudi Arabia can be persuaded to cooperate in a common effort to convert a bilateral peace into a regional peace for the whole Middle East.

The United States is attempting to bring the other Arab states into the peace process, as evidenced by Secretary Vance's recent trip to the capitals of these countries. But, thus far, the initial public reactions are not good. President Assad has emphatically endorsed the hard line P.L.O. rejection of the peace accords. King Hussein has negatively characterized the accords as not capable of achieving a just and lasting peace, while the Saudi Government has called the Camp David framework not acceptable.

While relations between Syria and the United States have improved slightly in recent years, we still have limited influence in Damascus. Our leverage over King Hussein, on the other hand, is considerable. Over the years, the United States has been a staunch supporter of the Hashemite Kingdom, and now is the time to bring our full weight to bear upon Jordan to support the Camp David accords. But even in Amman, full account must be taken of another major player in the Middle East drama—Saudi Arabia.

The prospects for peace in the Middle East will be greatly influenced by the decisions taken in Riyadh, the royal capital of Saudi Arabia. Through its massive financial aid to Egypt, Syria and Jordan, Saudia Arabia exerts much leverage over the policies of those three countries. If it withdraws its support for Sadat, Saudi Arabia could make it extremely difficult for the Egyptian President to complete the agreement with Israel while withstanding external opposition from the hard line Arab states. Likewise, by threatening to cut off economic assistance to Hussein, the Saudis might block his participation in further talks with Israel. Finally, there is little doubt that the absence or availability of Saudi funds would also have great impact on the attitudes of West Bank and Gaza Strip Palestinians.

Even a Saudi policy of benign indifference falls immeasurably short of what we, the *de facto* protector of Saudi Arabia, should expect. When this Administration successfully proposed furnishing F-15's to the Saudis, I opposed the sale on the grounds that F-15's were not the answer to oil price moderation, nor the appropriate weapon for Saudi defensive needs.

The Administration justified the sale in terms of the immense importance of Saudi Arabia in promoting a moderate and responsible course, both in Middle East regional development, including peacemaking, and international economic and financial affairs. Tonight, I remind the Administration of its own words. It is imperative that we make clear to the Saudi Government that our strategic concerns are mutual, that our interests are intertwined and, in the last analysis, it is the American security umbrella which shields the kingdom from potential Iraqi and Soviet aggression. In such circumstances, we have every right to expect the full and forthcoming cooperation of Saudi Arabia in our quest for a regional peace!

Ultimately, to be genuine and lasting, such a regional peace cannot rest for long upon treaties or individual leaders. It is all too fresh in Israeli minds that historical opportunities for peace have been quashed before by an assassin's bullet, or simply the fear of one. It will be recalled that in 1950, intensive secret negotiations took place with King Abdulla of Jordan and culminated in the initialling of a non-aggression pact. At the time, it was the most far-reaching document negotiated between Israel and any of its neighbors. But before the agreement was signed, Abdulla broke off uegotiations as a result of violent opposition by the other Arab governments and the threat of expulsion from the Arab league. In 1951, Abdulla was assassinated as he left the Al-Aksa Mosque in Jerusalem.

Even Gamal Abdul Nasser, the self-proclaimed spokesman for all the Arab countries, is reported to have expressed a desire to meet with David Ben-Gurion. According to Golda Meir, Nasser once said to an intermediary, "If Ben-Gurion came to talk to me, he would return home as a conquering hero. But if I went to him, I would be shot when I came back."

At long last, however the mood has changed. Anwar Sadat was greeted in the streets of Cairo as a conquering hero. For the first time, the odds in favor of more war in the Middle East have shifted to odds that favor peace.

But advocacy alone may not keep these odds favorable. Diplomatic talk may not be enough to persuade the other Arab countries to cooperate. New incentives for peace should be created. The United States should begin now to fashion a policy that will plainly demonstrate to the hold-outs that the fruits of peace can be infinitely more attractive than the spoils of war.

Having been a partner in hammering out the accords at Camp David, and having agreed to assume the same role in the upcoming peace treaty negotiations between Israel and Egypt, it is time we began to consider the kind of partnership we are willing to enter, once the treaty has been signed. I believe the United States should then become a partner for an expanded peace, working in tangible ways to strengthen its foundations and to extend its frontiers.

Therefore, I call tonight for a new addition to American policy in the Middle East, one

based upon a strategy that rewards those that work with us to construct and complete the peace, while extracting a price from those who work against us.

Henceforth, the United States should be prepared to invest generously in the furtherance of peace. We have paid dearly for the wars in the Middle East, and our national interest calls out for an end to the conflict there.

Let us begin our new partnership with the initial peacemakers, Israel and Egypt. We can help Sadat with his pressing economic problems. Take, for example, Egypt's dwindling harvests. Israel's advanced irrigation techniques could be of great help to the Egyptians in making their deserts bloom, as the spectacular success of the Negev proves. The opportunities are ample for the creation of joint projects for water desalinization, reclamation, and solar energy.

Similarly, we should declare our willingness to extend the same measure of support to Jordan and Syria, if and when they choose to participate in the building of a regional peace. Once they join in, they can expect our help in alleviating the suffering and in lifting the living standards of their people.

The other side of such a new policy should be made equally clear. If Assad turns his back on the establishment of a "secure and recognized" border on the Golan Heights; if he refuses to withdraw his forces from Lebanon, or to cooperate in the restoration of good order in that tormented land, then I see no reason why the United States should continue to supply him with $90 million a year!

And the same goes for Jordan, where the United States, over the years, has provided King Hussein—and his grandfather before him—with the princely sum of $1.5 billion.

President Sadat has called on Hussein to "shoulder his responsibilities" on the West Bank, within the framework of the Camp David accords. If he now refuses to do this, thus complicating the movement toward a reconciliation with the Palestinians, then let him look elsewhere for his financial support in the future. Why should we continue to pick up the tab!

Let us hope that such a policy is put into effect, and that it proves an effective instrument in widening the boundaries of peace in the Middle East. Still, Israel will be confronted for years to come with those Arab extremists bent upon the destruction of the Jewish state. Unfortunately, savage terrorist attacks by such fanatics will not soon disappear. Thus, it will be necessary for Israel to maintain her preparedness, and for the United States to see to it that her military capabilities remain sufficient.

Let me close with a few words about the institution you support, Haifa University. In a span of eight short years, this university has emerged as a major center of higher learning for the people of northern Israel. It is a unique university, vibrant, young, and bristling with new social experiments. Haifa University has been instrumental in furthering two of the most cherished goals of the Jewish tradition: education and equality. I commend all of you tonight, the American Friends of Haifa University for helping the people of Israel to realize another part of their impossible dream. For the impossible may yet be the attainable. A great Jewish historian, Cecil Roth, looked toward a future for the Middle East which is no longer beyond the reach of our years.

"Again," he wrote, "as in the days of Solomon, the area seemed about to become a bridge between East and West, drawing and giving inspiration in both directions. In the changed world in the second half of the Twentieth Century, this could well be part of Israel's function and mission."

On this joyous occasion marking both the Jewish New Year and the beginning of the road to peace, I would like to extend my heartfelt congratulations to the courageous people of Israel and to Jewry around the world.

On this Rosh Hashana, let us all rejoice in the beginning of a new year, a year that will continue to affirm the Jewish sanctity of peace, the indivisibility of freedom, and the brotherhood of man.

AMENDMENTS SUBMITTED FOR PRINTING

AIRCRAFT AND AIRPORT NOISE REDUCTION ACT—S. 3279

AMENDMENT NO. 4734

(Ordered to be printed and to lie on the table.)

Mr. EAGLETON submitted an amendment intended to be proposed by him to S. 3279, the Aircraft and Airport Noise Reduction Act of 1978.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978—H. R. 50

AMENDMENTS NOS. 4536 THROUGH 4733

(Ordered to be printed and to lie on the table.)

Mr. HATCH submitted 198 amendments intended to be proposed by him to H.R. 50, the Full Employment and Balanced Growth Act of 1978.

ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT—H.R. 39

AMENDMENT NO. 4735

(Ordered to be printed and to lie on table.)

Mr. DURKIN (for himself, Mr. ABOUREZK, Mr. NELSON, Mr. MCINTYRE, Mr. HASKELL, Mr. PELL, Mr. ROTH, Mr. RIEGLE, Mrs. HUMPHREY, Mr. LEAHY, and Mr. EAGLETON) submitted an amendment intended to be proposed by them, jointly, to H.R. 39, the Alaska National Interest Lands Conservation Act.

● Mr. DURKIN. Mr. President, I am submitting an amendment today which I intend to offer to H.R. 39, the "Alaska National Interest Lands Conservation Act," as reported from the Committee on Energy and Natural Resources when it comes before the Senate.

The purpose of this amendment is to expand the area of Federal land proposed for national park status in the committee bill.

Under the committee bill, National Park Service administration would be provided for 11 new areas, and three existing areas in Alaska would be significantly expanded. I believe the lands which are covered by these proposals are desirable and adequate for protection of national park caliber features, but I do not agree with the classifications which the committee has proposed for a number of these areas.

Preservation of national park caliber landscapes and ecosystems is not simply a matter of transferring jurisdiction to the National Park Service. Our national park system today contains a number of subcategories for land classification, and each carries with it a different degree of land protection against inconsistent uses.

DESCRIPTION OF PARK CATEGORIES

NATIONAL PARKS

National parks are established under the highest form of protection we afford to our national treasures of scenic, natural, cultural and historic significance. To protect these values, such areas are specifically off-limits to such uses as mining, logging, mineral leasing, and oil and gas development. In addition, our national parks serve a very vital function as sanctuaries for populations of wildlife and, as such, they are protected from sports hunting.

NATIONAL MONUMENTS

National monuments have the same degree of protection as parks. They generally focus on a single feature, rather than a broad landscape. They are also established for areas of particular cultural and archeological value.

NATIONAL PRESERVES

National preserves are a relatively new category, which the Congress developed in previous actions involving lands in Florida and in Texas. These areas are thoroughly and fully protected against nonconforming development, such as mining or logging, but are open for sport hunting. It is possible to locate a park and a preserve together in a complex which, if its lines are carefully located on the basis of wildlife patterns, results in no damage to wildlife populations, but affords opportunity in the preserve for taking of the huntable surplus of those populations by sports hunters.

NATIONAL RECREATION AREAS

Finally, we have some areas in our national park system which have the classification "national recreation area." These are generally located close to urban population concentrations. They are managed for a high density of recreational use and they also permit a much greater degree of land development, notably mining and mineral leasing.

In addition, it is a much easier process to locate transportation corridors across national recreation areas than it is across national parks, preserves, or monuments, and it is no secret that some of these areas have been situated solely to accommodate new transportation corridors.

REASON FOR MY AMENDMENT

During the markup of the Alaska lands legislation in committee, many of the areas were simply not given the protective status they deserved. For instance, national recreation areas were carved out of the Gates of the Arctic and the Wrangell-St. Elias National Park and Preserve, and we are now faced with the disturbing possibility that mining could take place in these great wilderness parks.

The purpose of my amendment is to correct the most damaging of these misclassifications. This involves significant boundary revisions and reclassifications in five—Gates of the Arctic, Lake Clark National Park and Preserve, Noatak National Preserve, Wrangell-St. Elias National Park and Preserve, and Katmai National Park and Preserve—of the 14 proposed park complexes and some other revisions. I will describe each, and the impacts of the changes which this amendment would accomplish.

1. GATES OF THE ARTIC

The administration recommended and the House passed a single great wilderness national park in the central Brooks Range. This approach is very important, for there is a real need for a major wildlife sanctuary in this area.

Gates of the Arctic should be a unified area with full national park protection in order to assure full protection for the scenic features as well as the wildlife. Under the committee's fragmented approach, a transportation corridor would be mandated across a part of the House-passed national park—even though the bill provides a process for permitting such corridors after a full showing of necessity and a careful review of alternative routes, which has not been done in this case—and mining would be allowed. This last point is especially important. The committee bill proposes two national recreation areas in the Gates of the Arctic. This has little to do with recreation. For these areas would serve none of the kinds of heavy recreational pressures associated with this classification in near-urban areas in the "Lower 48." Rather, the purpose of these two national recreation areas is simply to gain a weaker form of protection, in order to permit mining and mineral leasing.

My amendment proposes to restore the unified Gates of the Arctic National Park across this entire area, as proposed by the Department of the Interior and as already approved by the House.

2. LAKE CLARK NATIONAL PARK AND PRESERVE

The problem in this area is not the classification, for the pattern of park and preserve is basically acceptable. However, the committee determined to revise the boundaries in order to gerrymander out two important areas of State-owned land.

My amendment simply reincorporates this State land into the park boundaries in such a way that future land exchanges can be worked out on a mutually acceptable basis by the Federal and State governments, but the basic park boundary issues will have been resolved once and for all. Those areas of State land, in Chilikadrotna River-Mulchatna River area and in the vicinity of Chakachamna Lake and the Stony River, are of great scenic and recreational importance to the park and provide key access routes. They must be protected from incompatible development, and unified management by the National Park Service, following land exchanges, is essential.

3. NOATAK NATIONAL PRESERVE

The committee bill proposes a part of this area, in the Kelly River drainage, for lesser classification as a national recreation area, leaving open the possibility of approval of transportation corridors across this area without affirmative approval by Congress. The overall Noatak National Preserve has been designated an International Biosphere Reserve precisely because the integrity of the full mountain watershed is still intact.

This totally unspoiled ecosystem is the longest wilderness river valley left unspoiled in all of North America. It is inappropriate to subdivide this natural landscape into artificial fragments and to leave open the discretion to approve disruptive corridors without thorough congressional review. For this reason, my amendment would reincorporate the Kelly River area into the National Preserve, dropping the national recreation area classification. This follows the administration recommendations.

4. WRANGEL-ST. ELIAS NATIONAL PARK AND PRESERVE

This is an area of superlative values, yet here the committee bill restricts the national park to the least accessible high elevation rocks and ice. The establishment of a million and a quarter acre national recreation area simply has the effect of opening the area to mining and mineral leasing, which is highly undesirable. The effect of my amendment is to delete the national recreation area and incorporate the acreage back into the Wrangel-St. Elias National Preserve.

5. KATMAI NATIONAL PARK AND PRESERVE

These protect a particular important wildlife area. This is outstanding brown bear habitat, and the population of bears needs protection in the national park. My amendment revises the committee bill by adopting the preferable House-passed boundaries, using the House-passed map reference.

Mr. President, my amendment makes several other changes. I propose to upgrade the Cape Krusenstern National Preserve to national monument status, and the Kobuk National Preserve to national park status. In the case of Cape Krusenstern, the most significant archeological features in all of Alaska are found in this area, where 108 successive beach ridges are preserved, providing a unique record of settlement and usage.

In the case of the Kobuk Valley unit, my amendment also deletes an undesirable mandate for aircraft landing in a portion of this area, in order to give the National Park Service its ordinary and desirable management flexibility in dealing with this use.

Finally, my amendment deletes undesirable language providing special exceptions in two National Park System units.

In Mount McKinley, the committee bill provides for further study of mining in the Dunkel Mine and the Kantishna Hills area. Furthermore, the committee bill turns this study over to the proposed Alaska Land Use Council. Under my amendment, no such study would be mandated and full jurisdiction over these vital wildlife areas would be securely held by the Secretary of the Interior. In the case of the Yukon-Charley Rivers National Preserve, the committee bill proposes to mandate aircraft landing on the Upper Charley River. Such a statutory limitation on the discretion of the Secretary of the Interior to determine the best made and sites for access into this unit would be in conflict with his mandate to protect the area. The bill provides ample authority to protect access rights, and we should not tie the Secretary's hands in this fashion.

Mr. President, when all is said and done, the decisions we are making in this Alaska lands legislation will represent our response to the last great opportunity to plan and preserve the immense natural values of our Federal lands before patterns of development have made their mark. I believe we must take the time and the care to do this job well, and I believe doing it well requires a significant improvement over the committee bill in the standard of protection we give to new national park system units.

This is the objective of my national park system amendment. I ask unanimous consent that the text of the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 4735

TITLE I

In title I, section 101—"Purposes"—insert a new subsection (d) as follows:

"(d) NATIONAL PARK SYSTEM EXPANSION. The nation's National Park System has been established and expanded to constitute a treasury of the outstanding natural, scenic, cultural and historical areas of the United States and to assure the preservation of these areas for the use and enjoyment of the American people of present and future generations. The natural, scenic, cultural and historical features on federal lands in Alaska are among our most outstanding, but have not been adequately recognized or protected. Establishment of these areas as national parks, national monuments, and national preserves, under established policies for the protection of such classifications, will more than double the acreage of our National Park System and will enhance the preservation of these areas through management by the National Park Service. It is the purpose of this Act, and particularly of title II hereof, to give full national park, national monument, and national preserve status to lands of outstanding scenic, natural, cultural, and historical value in Alaska."

TITLE II

In title II, section 201(a), strike out paragraphs (3) and (4) and insert in lieu thereof the following:

"(3) Cape Krusenstern National Monument, containing approximately five hundred and sixty thousand acres of Federal lands, as generally depicted on map numbered CAKR–90,007, and dated September 1978. The monument shall be managed for the following purposes, among others: To protect and interpret a series of archeological sites depicting every known cultural period in arctic Alaska; to provide for scientific study of the process of human population of the area from the Asian Continent; in cooperation with Native Alaskans, to preserve and interpret evidence of prehistoric and historic cultures; to protect habitat for seals and other marine mammals; to protect habitat and populations of birds, and other wildlife and fish resources; and to protect the viability of subsistence resources. Subsistence uses shall be permitted in the monument in accordance with the provisions of title VIII.

(4) Gates of the Arctic National Park, containing approximately eight million one hundred thousand acres of Federal lands, as generally depicted on map numbered GAAR–90,010–A and dated September 1978. The park shall be managed for the following purposes, among others: To maintain the wild and undeveloped character of the area, including opportunities for visitors to experience solitude, and the natural environment integrity and scenic beauty of the mountains, forest lands, rivers, lakes, and other natural features; to protect habitat for the populations of fish and wildlife, including, but not limited to, caribou, grizzly bear, Dall sheep, moose, wolves, and raptorial birds. Subsist-

ence use shall be permitted in the park in accordance with the provisions of title VIII."

In title II, section 201(a), strike out paragraph (6) and insert in lieu thereof the following:

"(6) Kobuk Valley National Park, containing approximately one million seven hundred and twenty thousand acres of Federal lands, as generally depicted on map numbered KOVA–90,009–A, and dated September 1978. The park shall be managed for the following purposes, among others: To maintain the environmental integrity of the natural features of the Kobuk River Valley, including the Kobuk, Salmon, and other rivers, the boreal forest, and the Great Kobuk Sand Dunes, in its undeveloped state; to protect and interpret, in cooperation with Native Alaskans, archeological sites associated with Native cultures; to protect migration routes for the Arctic caribou herd; to protect habitat for and populations of, fish and wildlife including, but not limited to, caribou, moose, black and grizzly bear, wolves, and waterfowl; and to protect the viability of subsistence resources. Subsistence uses shall be permitted in the park in accordance with the provisions of title VIII."

In title II, section 201(a), strike out paragraphs (7), (9), and (10) and insert in lieu thereof the following:

"(7) Lake Clark National Park, containing approximately two million four hundred thirty-nine thousand acres of Federal lands and Lake Clark National Preserve, containing approximately one million two hundred fourteen thousand acres of Federal lands, as generally depicted on map numbered LACL–90,008–B, and dated October 1978. The park and preserve shall be managed for the following purposes, among others: To protect the watershed necessary for perpetuation of the red salmon fishery in Bristol Bay, to maintain unimpaired the scenic beauty and quality of portions of the Alaska Range and the Aleutian Range, including active volcanoes, glaciers, wild rivers, lakes, waterfalls, and alpine meadows in their natural state; to protect habitat for and populations of fish and wildlife including but not limited to caribou, Dall sheep, brown and grizzly bears, bald eagle, and peregrine falcon. Subsistence use shall be permitted in the park/preserve in accordance with the provisions of title VIII."

(9) Noatak National Preserve, containing approximately five million seven hundred and ninety-nine thousand acres of Federal lands, as generally depicted on map numbered NOAT–90,003–B, and dated October 1978. The preserve shall be managed for the following purposes, among others: To maintain the environmental integrity of the Noatak River and adjacent uplands within the preserve in such a manner as to assure the continuation of geological and biological processes unimpaired by adverse human activity; to protect habitat for and populations of fish and wildlife; including but not limited to caribou, grizzly bear, Dall sheep, moose, wolves, and for waterfowl, raptors, and other species of birds; to protect archeological resources; and in a manner consistent with the foregoing, to provide opportunities for scientific research. The Secretary may establish a board consisting of scientists and other experts in the field of arctic research in order to assist him in the encouragement and administration of research efforts within the preserve. Subsistence use shall be permitted in the preserve in accordance with the provisions of title VIII."

"(10) Wrangell-Saint Elias National Park, containing approximately eight million four hundred and ninety-six thousand acres of Federal lands, and Wrangell-Saint Elias National Preserve, containing approximately three million six hundred and ninety thousand acres of Federal lands, as generally depicted on map numbered WRST–90,006–B, dated October 1978. The park and preserve shall be managed for the following purposes, among others: To maintain unimpaired the scenic beauty and quality of high mountain peaks, foothills, glacial systems, lakes and streams, valleys, and coastal landscapes in their natural state; to protect habitat for and populations of fish and wildlife, including but not limited to caribou, brown and grizzly bears, Dall sheep, moose, wolves, trumpter swans and other waterfowl, and marine mammals. Subsistence use shall be permitted in the park/preserve in accordance with the provisions of title VIII."

In title II, section 201(a), paragraph (11), strike out the final sentence in said paragraph.

In title II, section 202, strike out paragraph (2) and insert in lieu thereof the following:

"(2) Katmai National Monument by the addition of an area containing approximately one million one hundred and thirty thousand acres of public lands. An additional two hundred and ten thousand acres of public land is hereby established as Katmai National Preserve. The monument as expanded and the preserve are as generally depicted on a map entitled 'Katmai National Park and Preserve,' dated March 1978; furthermore, the monument as expanded is hereby redesignated as 'Katmai National Park.' The park and preserve shall be managed for the following purposes, among others: To protect high concentrations of brown and grizzly bears and their denning areas and habitat for other wildlife, to maintain unimpaired the natural water quality and quantity for significant salmon populations; to protect the environmental integrity of the area, including its rivers, lakes, and watersheds; and to provide opportunities in the Alagnak addition for continuation of previously established subsistence uses in accordance with the provisions of title VIII."

In title II, section 202, paragraph (3), strike out the final sentence of said paragraph. Subsistence use shall be permitted in the preserve in accordance with the provisions of title VIII.

NOTICE OF HEARING

COMMITTEE ON RULES AND ADMINISTRATION

● Mr. PELL. Mr. President, on behalf of the Committee on Rules, I wish to announce that a public hearing has been scheduled for Friday, October 13, 1978, at the hour of 10 a.m., in room 305, Russell Building, to consider the nomination of Max L. Friedersdorf to be a member of the Federal Election Commission.●

ADDITIONAL STATEMENTS

IAN SMITH

● Mr. HATCH. Mr. President, the visit of Prime Minister Smith and the Reverend Sithole to the United States has generated wide coverage in the media. One of the most thorough pieces of background reporting has been done by the Washington Weekly and appears in that publication today. I ask unanimous consent that my colleagues may have the benefit of reading it in the RECORD.

The editorial follows:

IAN SMITH—TWILIGHT OF AN ERA

(By Jack Penn)

History abounds with martyrs to a cause. The story of Ian Smith is grand tragedy in its real sense, for in his attempt to build a nation he has been betrayed by his own kit and kin, a disillusionment that only a man of great courage and integrity could tolerate without complete collapse.

I was very proud to know Ian Smith, and have recently created a sculpture of him, which I hope will perpetuate this moment of disillusionment and courage even to stimulate the comparison between his behaviour and those who tried to destroy him.

Ian Smith was a man. During World War II he qualified as a hero. He is essentially a family man and a farmer. He loved the outdoors and was one of the best athletes of his day. Born in a small town in Rhodesia of Scottish pioneer stock, he loved the country of his birth, but also loved Britain as he knew it in his youth. But later found himself only too often, the victim of British liberalism as defined by Malcolm Muggeridge 'anyone who murders a British soldier is a hero, and anyone who is murdered by a British soldier is a martyr. Our enemies are always admirable, our friends (a diminishing band) are despicable.' This type of liberal has sapped Britain's moral strength.

Until World War II life in Rhodesia was similar to that in South Africa, Australia or the Middle West of America. The cream of Rhodesian youth volunteered to fight alongside Britain and America when the call came. Ian Smith was a member of the Rhodesian squadron attached to the RAF. While his squadron was on duty protecting Alexandria, Ian Smith's plane crashed and he was badly injured. The left side of his face was smashed in and apart from fractures of his jaw, his malar-sygomatic complex, which supports his left cheek and eye was irreparably comminuted. Nevertheless, when he recovered he went back to duty and was very active over Italy. However, he was shot down and parachuted out unhurt, but over enemy territory. He was cared for by the local Italians, and the Germans searching for him failed to find him. He joined the Italian partisans for a time and eventually managed to escape into American occupied territory by crossing the Alps. He finally joined his squadron until the end of the war.

To this day he is proud to wear the R.A.F. tie. It is doubtful whether any member of the present British cabinet may do so.

Post war the situation in Rhodesia was extremely confusing. Prime ministers came and went, frustrated and confused. Godfrey Higgins considered that majority black rule would collapse the economy and likened the position of white and black to that of a rider and a horse. However in 1953 when the British suggested a federation with Northern Rhodesia—Nyasaland he undertook the premiership.

Rumblings occurred soon after. In 1956 Chipembere of Nyasaland said 'Moderation will never get us anywhere. The only language which British imperialism can understand is the language of conflict.'

This attitude of mind, which became epidemic in Africa affected the British Prime Minister, Harold MacMillan, culminating in his 'Wind of Change' speech in Ghana in 1960. The wind of change turned into a hurricane and it was not long before Roy Welensky—Premier at the time—was asked to release Northern Rhodesia and Nyasaland towards independence.

Roy Welensky told me personally as follows:

'MacMillan promised that after granting independence to the other two states, independence from Britain would be granted to Southern Rhodesia. He literally had tears in his eyes when making this promise. I believed him. But they were unfortunately crocodile tears.'

The announcement of secession was made in 1962 by the British minister of state—R. A. Butler. MacMillan contrived it—but the butler did it.

Todd Whitehead and Field followed Welensky but independence was never granted.

In 1964 Ian Smith become the Rhodesian prime minister. Although the British and Rhodesians expected an instant unilateral declaration of independence identical in format to the American declaration of independence, Smith made no precipitious decision but indicated his desire to have independence granted in the accepted fashion as occurred in the present Zambia and Malawi. But agreement with Britain was impossible as Smith and Wilson loathed each other and meetings held in London, Salisbury and two battleships only served to aggravate their mutual antipathy.

UDI became inevitable and was pronounced on November 11th, 1965. In view of the relative war records of Smith and Wilson the date was not fortuitous.

From now on it was a battle of survival for Rhodesia. From 1965 until 1978 there were harassments, sanctions and embargoes. Terrorism raised its head with Nkoma in Zambia and Mugabe in Mozambique. They called themselves 'Freedom Fighters' or 'Patriotic Front Soldiers.' Their victims however, were usually innocent civilians, most of them black. Torture and rape were a daily occurrence and there was no doubt that the strain within Rhodesia was being felt.

Eventually by acceding to the Kissinger plan for majority rule an internal settlement controlled by Smith and three black leaders was arranged in order to stop the slaughter of the innocents and release the embargoes as promised in the Kissinger settlement deal.

However, the 'Patriotic Front' has refused to cooperate and the embargoes have not been lifted. David Owen of Britain and Andrew Young of the USA have made demands which if acceded to, mean the elimination of white Rhodesians and control of the country by terrorists.

At the present moment Ian Smith is in the US by the invitation of 27 senators. After an emphatic refusal by Andrew Young and hesitation by the State Department, permission was granted for a visa following the intervention of Vance. The publicity engendered and the power of his own manly and honest personality will undoubtedly put the record straight.

However, Dr. David Owen and the British government, who owe their present existence to people like Ian Smith, have threatened to arrest him if he sets foot in the British Isles, even though Nkoma and Mugabe, self confessed murderers of innocent people, have had free access.

The land of Ian Smith has its back to the wall—but Ian Smith himself has not yet finished his fight for his country. If the next few months spell the end of an era and Smith is physically defeated, the moral victory will nevertheless, for all time, be his.●

PETITION ON EXPORT RESTRAINTS

● Mr. STEVENSON. Mr. President, I invite the attention of the Senate to a petition authored by the heads of 60 of the Nation's largest corporations. These business leaders are responsible for a significant share of America's production of goods and services. The operations of their companies and their suppliers and distributors reach into every State and practically every locality in the country. They also account for a large portion of America's exports. And they are deeply concerned about these exports—so concerned that they have formally petitioned the Government of the United States for, in their words, "full recognition of the damaging impact of export restraints on the American economy." I believe the case they present should receive our closest attention and the close attention of the executive branch of the Government which is also the object of their petition and is now in receipt of it.

I request that the letter and the text of the petition be printed in the RECORD following these remarks:

PFIZER INC.,
New York, N.Y., October 9, 1978.

Hon. ADLAI E. STEVENSON III,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENSON: As chairman of the Emergency Committee for American Trade, I would like to wish you every success in your timely and important inquiry into the "use of export controls and export credits for foreign policy purposes."

I would like you to know how strongly the leaders of more than sixty of the major American companies who are joined together in ECAT agree with you when you proposed your inquiry with the observation that:

"The United States is suffering from escalating trade deficits and a deteriorating dollar; but U.S. exports are being subjected to new restrictions based on unexamined premises."

We are pleased to know that you now plan to examine these premises. The questions you put forward in your statement are the right questions—and finding their answers deserves the high priority you have assigned to the task.

As business leaders whose companies are responsible for a large portion of our nation's exports, we have been also asking the question of why exports should be made to bear the brunt of economic measures taken for "foreign policy purposes." Our answer is put forward in the enclosed petition, which has been sent to President Carter and his advisers. In it, we call upon the Administration to provide detailed and specific information on each and every denial of exports for policy reasons not involving national security.

I hope you will agree that such detailed and specific data on each such occurrence would make easier the larger task which you are undertaking of clarifying the issues and pointing the way to a practical export control policy for our nation.

Sincerely,

EDMUND T. PRATT, Jr.,
Chairman.

PETITION BY THE MEMBERS OF THE EMERGENCY COMMITTEE FOR AMERICAN TRADE TO THE GOVERNMENT OF THE UNITED STATES FOR FULL RECOGNITION OF THE DAMAGING IMPACT OF EXPORT RESTRAINTS ON THE AMERICAN ECONOMY

The United States adverse balance of trade is of near crisis proportions at a time when our nation's dependence on both exports and imports has never been greater. The continuation of this dependence is inescapable. In the case of oil, even under the most ideal circumstances of conservation, exploration, and the development of alternative energy sources, we cannot avoid massive dependence on imports. A long list of other raw materials not produced in sufficient quantities must be imported to sustain our economy. Moreover, imports of other products are important to American consumers.

Exports are the principal means of paying for our imports and are vital to the well-being of much of America's agriculture and its manufacturing and service industries. But competition for world markets has become fierce. Our share in world trade has been declining and our competitiveness in some areas is being eroded by changes in the world economy. Our export growth simply has not kept pace with the steady growth of our imports. In these circumstances, export expansion deserves highest priority by our national leaders in order to narrow the trade gap in a constructive fashion.

Yet, at a time when the need for export expansion has never been greater, our government is taking actions that increasingly inhibit U.S. sales abroad. In some cases, export incentives common to our foreign competitors are denied to Americans. In other cases—and these are becoming increasingly burdensome—American exporters are denied markets for reasons of public policy other than national security. Similarly, efforts have been made to impose on U.S. financial institutions disclosure and lending requirements with respect to their international operations that are unrelated to such traditional banking concerns as credit worthiness, and that are designed to achieve public policy goals.

Americans who depend on the export sector are as concerned as any of our citizens about human rights in other nations, about discrimination against other Americans, about human rights in other nations, about consumer safety, about curbing terrorism and about other such worthwhile goals of American policy. The export sector, however, is becoming more and more the instrument for the pursuit of these goals, thus bearing the burden of adverse domestic economic consequences—which are not being adequately taken into account.

The Emergency Committee for American Trade deplores this trend. We are concerned about the impact export denial has on the domestic economy and on the competitive position of U.S. firms. In nearly all instances our foreign competitors will step in to pick up the business opportunities afforded them through U.S. export restraints.

For example:

The Department of State—presumably for reasons of foreign policy—is holding back the sale to Libya of two Boeing 727's powered by Pratt & Whitney engines. The Libyan airline already operates a number of the same aircraft. The Libyan airline's chairman, while stating a preference for the Boeing aircraft, warns that unless an export license is soon granted, he is prepared to turn to the French-German Airbus to meet his airline's needs. He has also said that, if necessary, consideration will be given to Soviet-made equipment.

Allis-Chalmers Corporation had learned that the Department of State was preventing the export of $268 million of U.S. turbines to Argentina by invoking a provision of the Export-Import Bank Act concerning human rights. John L. Moore, Jr., President of the Bank, wrote Allis-Chalmers' Chairman, David C. Scott, that the project "clearly would qualify on economic or financial grounds for Eximbank financial support." Allis-Chalmers reports that 18 million man-hours of work for Americans are at stake since without U.S. financing, the order would be filled from abroad.

After two years of negotiating an order and an export license to sell a $6.8 million computer system for the Soviet news agency TASS, Sperry Rand Corporation found that its license was being refused because the sale was "inconsistent with the foreign policy of the United States at this time." The negotiations had been conducted under provisions of the Export Administration Act, and Sperry Rand's Chairman, J. Paul Lyet, said that the system "was carefully designed to provide adequate but not excessive capacity" for the 1980 Olympics.

Manufacturers of oil production equipment are threatened with substantial losses of exports to the Soviet Union for foreign policy reasons through a new Presidential directive.

Foreign boycott legislation has prevented Deere & Company from bidding to supply a substantial number of tractors to Iraq from its Dubuque, Iowa factory. The company

had developed the Iraq market for many years. A successful bid could have resulted in U.S. business worth $18 million and 20,000 man-days of work for John Deere's U.S. employees.

These examples taken from ECAT members are only illustrative. Most lost sales are not as dramatic as some just mentioned, and have not come to light. Meanwhile, the reputation of American companies as reliable suppliers is being eroded. The arbitrary and unpredictable nature of recent U.S. government actions can only have a chilling effect on the relations between U.S. exporters and their foreign customers and on future as well as on current exports. This is particularly true when the products affected are readily available from competitors abroad.

The Emergency Committee for American Trade recognizes and supports the need for export controls to protect U.S. national security. American business is willing to forego market opportunities where it is determined that the sale of products or of technology would clearly be detrimental to our national security. We recognize this legitimate national interest, but question the use and effectiveness of export restraints as a means of achieving desired political changes in the internal policies of other nations.

The congruence of public policy restrictions on exports is a phenomenon that was in all likelihood unanticipated by the architects of the various laws and regulations containing authorities to control exports. Yet the result is real. The export sector of our nation has been conscripted into a service from which others are largely exempt—and the casualty list is growing.

Again, probably by coincidence, this casualty list is hidden from public view and even from the view of legislators and Administration leaders. When laws and regulations are enacted that restrict exports, there has been up to now no requirement for analyses of their effects. And even when the adverse consequences were certain, there has been no consideration given to the help needed by the worker who would be unemployed or the farmer without a market or the entrepreneur facing bankruptcy or the shareholder watching equity shrink and dividends dwindle. Large companies may be able to weather the consequences, but small companies may not. While many small to medium-size companies are not direct exporters, they are suppliers to major exporters and thus share the economic loss when their customers' exports are curtailed by the government. One of our best hopes for increasing U.S. exports lies with encouraging smaller companies to export. Instead, they may conclude that it is hazardous to base much of their business on exports.

We, therefore, recommend that when the U.S. government proposes to take action to deny U.S. exports for reasons of public policy other than national security, it issue a public statement detailing the economic consequences in as complete detail as possible. Included, for example, should be identification of the target country and the product involved, the dollar amount of the shipment being curtailed, the supplier or suppliers concerned, and, to the extent available, the number and location of man-hours of work being lost as well as the names of other major countries from whom the product could be purchased. The export-denial statement should specify the specific reason for the denial and an analysis of how the U.S. action will bring about the desired change in the country concerned.

We believe a better appreciation of such adverse consequences should give pause to placing the burden of public policy on the export sector. Therefore, every action bearing on export restriction, whether the denial or delay of credits or of export licenses, or of penalties resulting from the failure to fulfill a contract, should be subject to open study of the potential damage to the export sector and then to periodic review.

We believe that greater awareness of the burdens borne by American workers, farmers, companies, and shareholders would contribute substantially to restraint in the use of trade for public policy purposes.

The members of the Emergency Committee for American Trade stand ready to cooperate with business, worker and farmer groups and with the Congress and the Administration in seeking feasible measures to sustain and to increase U.S. exports, which we believe to be a national necessity.●

DETERRENCE OF AGGRESSION IN KOREA

● Mr. HELMS. Mr. President, I have recently received a letter from the honorable Il Kwon Chung, Speaker of the National Assembly of the Republic of Korea. The speaker graciously expresses his appreciation for congressional action in making mandatory Presidential consultation with Congress in advance of any further withdrawal of U.S. ground forces from Korea. He also expresses appreciation for the $1.167 in military assistance voted by Congress in connection with the withdrawal.

Mr. President, in reading this letter, I was struck by the immediacy of the problem which faces the citizens of South Korea, as compared with the somewhat abstract and theoretical considerations which face the Members of this body when dealing with the problems of Communist aggression. There is a great deal more urgency to such considerations when the Communists are only a few miles away, instead of thousands of miles away.

In the United States, we tend to think of deterrence in terms of strategic missile systems and broad, overall considerations. But in many countries, like Korea, all around the world, if deterrence fails, it means being overrun with ground troops and the imposition of instant tyranny. Thus, deterrence has a human dimension, not merely a technological one. It is human compassion for our fellow human beings that prompts us to maintain a worldwide defense effort, certainly not the desire to construct a huge arsenal.

Mr. President, I responded to the Speaker in such terms, because I think that it is necessary to establish an international dialog. Too often we are looking at the hot spot of the moment, rather than at the protracted struggle that is constantly taking place in every corner of the globe.

Mr. President, I request that my exchange of correspondence with the Speaker of the Korean National Assembly be printed in the RECORD at the conclusion of my remarks.

The two letters follow:

NATIONAL ASSEMBLY,
REPUBLIC OF KOREA,
Seoul, Korea, September 18, 1978.

Hon. JESSE HELMS,
The Senate,
Washington, D.C.

DEAR SENATOR HELMS: First of all, I would like to take this opportunity to express my most profound gratitude for your genuine friendship and staunch support for my country. In particular, I whole-heartedly welcome the wise action of your esteemed Congress of passing unanimously the amendment of making mandatory the presidential consultation with the Congress in advance of any further withdrawal of the United States ground forces from Korea as well as adopting the international security assistance conference report including $1,167 million Korean security aid in conjunction with the withdrawal plan.

I do not doubt that such a proper measure of the Congress could be possible owing to your unusual interest and deep understanding of the situation on the Korean peninsula and of the security in Northeast Asia. I am proud to note that the people of my country are ever more grateful to you for your unreserved endeavor and cooperation.

As you are well aware of, north Korea has incessantly been preparing for another aggression according to its so called 4 major military lines by exerting every possible energy and resource for strengthening its armament. And now, the Communists in the north are claiming openly that they have completed the preparation for any war. Hence, they have persistently refused to accept our peace-oriented proposals for resuming dialogue and reducing tension; namely, to agree upon a mutual non-aggression pact and promote the economic cooperation, while striving to expedite the withdrawal of the United States ground troops from Korea by abusing the atmosphere of international detente and making various false peace propaganda in the international arena. They also try to bring uneasy relations to the traditional friendly ties between the United States and my country.

Furthermore, we are deeply concerned about the fact that the Soviet Union is continuously increasing its military power in the Far East, thereby driving the power balance in the region against the free democratic nations. Not only the governments of my country and all the Asian allies but also the military leaders and specialists of the United States have taken skeptical attitude toward the withdrawal plan of the United States government, as it had been evaluated that the withdrawal of the United States troops from Korea at the present stage—when 4 powers including the United States, Japan, China, and the Soviet Union are confronting each other on the Peninsula—would endanger the power balance in the region and may eventually cause another tragic war.

All in all, the people of my country are encouraged immeasurably by the proper and decisive action of the United States Congress taken in recent days. And I am confident that my country can now contribute to safeguarding democracy which our two countries have fought for, and peace of the free world.

I sincerely hope that you will provide with a continuous support and cooperation for the security of 35 million people of the Republic of Korea and peace on the Korean peninsula.

With my warmest personal regards,

Very sincerely yours,

IL KWON CHUNG,
Speaker.

U.S. SENATE,
Washington, D.C., October 12, 1978.

Hon. IL KWON CHUNG,
Speaker of the National Assembly,
Republic of Korea,
Seoul, Korea

DEAR MR. SPEAKER: I was deeply impressed by your fine letter expressing gratitude for recent Congressional actions affecting Korea. From this distance, so many thousands of miles away, we often have to depend upon abstract strategic considerations in making decisions which inevitably affect the future of the free world.

The Republic of Korea, however, is right on the front line. The Communist armies are

only a few miles away, not thousands of miles away. You are in a position to have direct knowledge of the steps taken by North Korea to prepare for war; and you are in a position to understand that if the Communists are no longer deterred by adequate military forces, backed up by the sure knowledge that such forces will be used to repel aggression, then thousands of your countrymen will die. And if deterrence fails completely, then you face total domination by tyranny. For you, the need for deterrence is no abstract consideration.

Moreover, the Korean situation is inevitably bound up with the entire question of freedom in Asia. If Korea should fall, a Communist offensive would be thrust directly at Japan, and Taiwan and the Philippines would be next. I am not talking about the famous "domino theory"; I am merely pointing out that the free Asian nations constitute a strategic unity, like an arch, which will collapse if any one member is removed.

These over-riding strategic considerations are not affected by the recent unfortunate miscalculations in U.S.-Korean affairs—miscalculations which reflect upon the U.S. Congress as much as upon anyone in Korea. It is important that we keep our eyes upon the fundamental issues of survival, which must not be compromised by sensationalism. You may be assured that I will continue to support what ever measures are necessary for the maintenance of peace.

Sincerely,

JESSE HELMS.●

INNOVATIVE DESIGN OF FEDERAL FURNITURE HELPS HANDICAPPED WORKERS

● Mr. RANDOLPH. Mr. President, Mrs. Vivien P. Woofter, formerly of Clay, W. Va., now interior designer for the Department of Health, Education, and Welfare, was recently instrumental in accomplishing a study concerning the feasible and inventive manner to design furniture to help the physically handicapped in the performance of office and administrative duties. Since the publication of the study many hundreds of private businesses and government agencies have requested copies of the study.

The study could become a standard for new awareness in government as well as in private industry for systems furniture to permit the physically handicapped to function well in office practices where, in the past, they were hampered in the performance of their duties by the office furniture and systems they were forced to use.

As chairman of the Subcommittee on the Handicapped of the Senate Committee on Human Resources, I have sponsored legislation to solve the problems of the handicapped, including their ability to function efficiently in office and administrative positions.

Furniture systems of the type in the study by Mrs. Woofter not only help the handicapped, but the physically able can use the systems as well, if not better, than the furniture systems they are now using.

There have been several articles in national design publications concerning the study by Mrs. Woofter. One of these appeared in the July issue of Contract Interiors magazine. Some of the excerpts from this article follow. I ask that they be printed in the RECORD.

The article excerpts follow:

FEDERAL DESIGN

Within the government, new faces, new design awareness, new humanism, new optimism, new research. Outside the government, some of the old skepticism.

As architect Herb Beckhard, a partner in the firm of Marcel Breuer and Associates, says, "The comforting thing is that the government now has people with real ability and taste. They're not jerks." In the years 1963–68, the Breuer firm's work on the Washington headquarters building for the Department of Housing and Urban Development was, Beckhard says, "an exercise in frustration." But their recent work on the nearby Humphrey Building for the Department of Health, Education, and Welfare has been a different matter. The government (especially, according to Beckhard, in the person of interior designer Vivien Woofter, with GSA until last year, now HEW's own staff designer) was genuinely interested in the architects' opinions and active participation. "There was no jealously, no duplicity—we worked together like true associates," Beckhard says.

Mr. RANDOLPH. Mrs. Woofter was instrumental in the development and the conduction of the following reported study:

SYSTEMS FURNITURE EVALUATION RESULTS

Perhaps the most interesting and encouraging recent activity of the GSA is its study of open plan systems furniture. The immediate goal was to find suitable furniture for the Hubert H. Humphrey building, new headquarters of the Department of Health, Education, and Welfare; another goal was to provide the Federal Supply Service with an evaluation of systems furniture prior to its making such furniture available for other government agencies. HEW, the FSS, and the Public Buildings Service cooperated in the testing of four categories of systems furniture at different locations within the HEW building. Four specific systems were chosen as "surrogates," each representing a category of structurally similar systems by a number of different manufacturers. As reported here in December, 1976, the four surrogates were; Steelcase, InterRoyal, Herman Miller, and Knoll.

A contract for the evaluation of the four installations was won by BOSTI (Buffalo Organization for Social and Technological Innovation, Inc.), the Buffalo, New York, firm headed by architect Mike Brill, who calls himself an "Environmental Diagnostician." Brill's four-month study, with particular emphasis (at HEW's request) on the adaptability of the systems for use by *handicapped* employees, used direct observation, written questionnaires, photographic observation, and interviews with both users and their supervisors to determine a score for each system. GSA, HEW, and Brill all emphasize two points about the results of the study: first, that the scores given relate only to how furniture works in one particular building; completely different results might be produced in another situation; and, second, that the systems studied were each considered only as surrogates for groups of systems. The space planning for the entire building, now in progress, will use furniture of the type rated highest by BOSTI, but not necessarily furniture by the particular manufacturer used in the test. The four categories, their descriptions, their surrogates, and (according to the BOSTI study) their order of rank are:

CATEGORY 1

A system developed from freestanding work and vertical storage assemblies with interlocking spanner panels.

Surrogate tested: Steelcase 9000.

Rank order: third.

CATEGORY 2

A system of interlocking panels combined with suspended work-surface and storage components.

Surrogate tested: Herman Miller Action Office II.

Rank order: first.

CATEGORY 3

A system of freestanding, self-contained work and storage assemblies.

Surrogate tested: Knoll Zapf.

Rank order: second.

CATEGORY 4

A system of modular equipment combined with freestanding or interlocking panels.

Surrogate tested: InterRoyal.

Rank order: fourth.

Although the category represented by Herman Miller was rated a clear first place for this particular building, using BOSTI's particular handicapped-oriented criteria, the other three categories—represented by InterRoyal, Knoll, and Steelcase—were all rated relatively closely together. The results might, therefore, be read as one first place and three seconds. Vivien Woofter of HEW points out, as well, that none of the four categories was rated as perfect by BOSTI.

As it did for the task ambient lighting study, the GSA's Design Action Center has published a number of "lessons learned" from the systems furniture study. They include:

"Pre-move and post-move orientation sessions should be given to all workers who will be located in open-planned areas. A separate orientation session should be provided for all supervisors.

"Researchers observed that the practice of having senior people in private office is a powerful deterrent to worker satisfaction with open planning and systems furniture.

"Several fully private, four-person enclosed spaces should be maintained in open-planned areas for confidential and secure matters.

"In layout and planning there should be no visual access from main corridors to workstations, thus affording freedom from work distractions.

"A place should be designated near storage or entry points for group displays and notices. Most furniture systems include an information kiosk. The use of this component should be explored.

"Careful attention should be given to flexibility of location of telephone and power outlets to accommodate changes and to address the needs of left- and right-hand users.

"Acoustic considerations become paramount in open-office planning. Top-quality acoustic ceilings should be used to ensure the success of open planning.

"Since the use of systems furniture is predicated on its capacity for adaptability, the researchers emphasize that the conversion of a workstation for use by a handicapped worker should be no more than an overnight job. In addition, they state that an adequately flexible furniture system should be able to accommodate organizational changes with ease.

"A user's manual should be developed and given to workers to aid optimum use of the system.

"A graphic identification system should be provided that includes information related to the building floor, office area, and programs. The signage must be carefully located. The furniture system must also provide for the attachment of name and title plates since few status-differentiating devices are available in open-planned areas."●

CONFERENCE ON TAX BILL SHOULD PROTECT THE ACHIEVEMENT OF THE CONGRESS

● Mr. HATCH. Mr. President, an editorial in today's Wall Street Journal

answers all of the criticisms of the Nunn amendment which overwhelmingly passed the Senate. It also points out the strong support in the House for the Holt amendment, the House counterpart to the Nunn amendment. The Nunn amendment clearly has the support of a bipartisan majority of the Congress and the American people.

I submit the editorial for the RECORD.

The editorial follows:

KEMP—WHAT?

Now that the Senate has passed the Nunn version of the Kemp-Roth tax cut, the folks who love big government are scurrying around trying to find a rationale for opposing it. The one on which they seem to be settling, floated in a speech by Sen. Moynihan on Monday night and repeated by President Carter at his press conference Tuesday, is that it is too radical a departure to take on the spur of the moment without extensive debate. Kemp-what? they ask. Never heard of it.

The intensively publicized proposal by Sen. Roth and Congressman Kemp, to be sure, would simply have cut tax rates successively in three steps over three years. It was attacked for ignoring spending and deficits, so Sen. Nunn laid out a five-year schedule of rate reductions but made them contingent on holding the growth of federal spending to the rate of inflation plus one percent. Those who argued that Mr. Roth and Mr. Kemp were irresponsible for ignoring spending now argue that Mr. Nunn is irresponsible for including spending.

As it happens, the idea of linking tax cuts to expenditure restraint has also been extensively debated this year, in the context of the budget process. It is said that the House has not had a chance to consider the Nunn proposal, but in fact for a few moments last May the House had actually passed what is in principle the same proposal. The Republican budget resolution offered by Rep. Marjorie Holt was specifically designed to accommodate the first year of the Kemp-Roth cuts, and was offered in the context of a systematic program tying the tax cuts with the spending restraint of a current-services budget—the same inflation-adjusted concept embodied in the Nunn bill.

As the rollcall ended, Mrs. Holt found herself with 202 votes for and 198 against. But Majority Leader Jim Wright started dragging Congressmen bodily into the well to change their votes, and the Holt amendment finally lost by 203 to 197. Mrs. Holt offered conceptually the same amendment again with the second budget resolution in September, and lost by 206 to 201. Considering the lopsided Democratic majorities and pull of the leadership and party loyalty, there is obviously quite considerable sentiment in the House for the principles now embodied in the Nunn amendment, which incidentally passed the Senate by 65 to 20. House Republicans are now moving to instruct the conferees to accept the Nunn amendment; it will be instructive to observe how the Democratic leadership behaves.

The political support for the principles involved is far more important than the mechanics of the Nunn amendment. In itself no gimmick or procedural device can reform government spending. The Washington Post has the fanciful notion that the Nunn mechanics would tie the hands of future Congresses, preventing them from working their wisdom when antirecession tax cuts or spending increases were needed. Yet there is no way to dictate to future Congresses. And on the record the more likely outcome, we should think, is that they would find some way to distort the Nunn amendment into a pro-spending device, an excuse for not cutting taxes.

What the Nunn mechanics would do, however, is to instill a bit of discipline in the congressional budget process, which itself has been neatly transformed into an engine of high taxes and high spending. No Senator was more effective in opposing tax reduction in this week's debate than budget czar Edmund Muskie, who refused even to let the Senate vote on the provision to repeal deduction of gasoline taxes. On the House side, we find back in May Budget Committee Chairman Giaimo deriding Mrs. Holt's lower totals as an impossible, a "wish-type amendment," though in fact outlays in the final budget resolution ultimately ended up almost exactly what she had proposed in May.

The real effect of the Nunn proposals would be to force the budget committees to take tax reduction seriously as a national goal. At present, tax levels are driven by spending desires; after the budget committees decide how much to spend, the revenue committees decide whether they can afford to cut taxes. With the political support that seems to be building in the country, plus a little luck, this can be reversed. We can decide what level of taxes we want to pay, in particular what levels are healthy for economic growth, and make the budget committees hold down spending accordingly.

This is what the budget process was supposed to have been. It is what the country seems to want. And given the Nunn vote in the Senate and the Holt votes in the House, a majority of the Congress—if given a free choice—would be ready to agree.●

CHAIRMAN TEAGUE RECEIVES NASA'S DISTINGUISHED PUBLIC SERVICE MEDAL

● Mr. STEVENSON. Mr. President, last week Representative OLIN TEAGUE, chairman of the House Committee on Science and Technology, received NASA's Distinguished Public Service Medal. NASA Administrator Robert Frosch made the presentation at NASA headquarters.

As a relative newcomer to space activities in Congress, I can nonetheless recognize the extraordinary contribution that TIGER TEAGUE has made in achieving U.S. leadership in all areas of space activity. He understood from the earliest days of the space program that this new environment had the potential of bringing benefits to Earth and of expanding our knowledge of our planet, solar system, and the universe. Year after year TIGER TEAGUE made sure our Government sustained a program that would take full advantage of these opportunities.

TIGER TEAGUE retires from Congress after more than 30 years of service. He leaves an impressive record of achievement. We salute him. And we also recognize the importance of maintaining U.S. technological leadership in space at a time when it is under increasing challenge by other countries.

Mr. President, I submit Dr. Frosch's remarks and the text of the citation which accompanies NASA's Distinguished Public Service Medal be printed following these remarks in the RECORD:

REMARKS BY HONORABLE ROBERT A. FROSCH

Good morning, ladies and gentlemen, and welcome to these ceremonies in tribute to a man whom we all know and respect and to whom our Nation's whole effort in space is so deeply indebted.

We are here to honor Chairman Teague for his unequalled contributions to the space program of our country, but before we do so, we must also give full credit to his equally significant accomplishments in behalf of the American veterans, of which he is himself an honored peer. For thirty eight years, in nineteen Congresses, as a Member and as Chairman of the Committee on Veterans Affairs, he zealously furthered the cause of these men and women whose needs and problems he understands so well.

For us at NASA, Chairman Teague's most outstanding asset has been his consistent and unswerving faith in the value and virtue of a dynamic and imaginative space program—a faith which he has conveyed to all the elements of the government, industry and university team on which all progress in space depends.

The single episode which best epitomizes Mr. Teague's profound faith in the space effort, was the leadership he demonstrated at the time of the Apollo fire in early 1967. The Space Program was in severe jeopardy because of the tragic deaths of the Apollo crew; many influential Americans questioned the wisdom of proceeding with the lunar landing program; the basic concept of the space effort was challenged; and many potentially disrupting actions were being proposed. The dynamic leadership of Chairman Teague spurred a prompt identification of the issues and a clear-cut course of action to resolve them. Undoubtedly, more than any other single individual, Chairman Teague "saved" the program and redirected our energies in a direction which resulted in the successful lunar landing within the decade of the 60's.

Chairman Teague is unique in the depth of his knowledge of the space program. He believes in and has consistently executed a "hands on" policy in regard to space, routinely and frequently visiting NASA Centers, industrial contractors and laboratories—in some cases, many times a year. He has insisted on firsthand, personal meetings with the organizations and people doing the work. Moreover, he has insisted that all Members of his Committee do the same and, thus, by example, has developed one of the most knowledgeable Committees in the House, especially valuable in view of the highly technical nature of space operations. His mentorship has thus provided a strong, informed, collective leadership for the Nation in space activities.

In space-related international relations, Mr. Teague has always taken a firm position, assuring that the Nation's interests are advanced and its responsibilities met. His support of the cooperative programs with the European Space Agency has been characterized by vision and foresight. His involvement of European decision-makers in our legislative process through visits and testimony has proved an innovative and effective device in the in-depth management of our activities in space.

Nowhere has his consistently optimistic and confident attitude toward the future of our operations in space been more evident or more constructive than in his enlightened and effective advocacy of the Space Shuttle. He fully understands the great potential of the Shuttle, its versatility, flexibility and open-ended promise, and has gone into the lists time after time in its behalf despite his realistic awareness that its debut could not occur "on his watch."

I think we are all aware of the benefits which are accruing to our people as a result of our activities in space. The flow has barely begun. In the years to come it will affect nearly every aspect of our lives, and all the millions of men and women here and around the world whose days are brightened and burdens lightened will owe a debt of grati-

tude to the man we are proud to know with deep affection as "Tiger" Teague.

OLIN E. TEAGUE: CITATION—DISTINGUISHED PUBLIC SERVICE MEDAL

In recognition of his distinguished contributions to the scientific and technological advancement of the Nation by his steadfast advocacy of a strong national space program. In two decades of leadership positions in the House of Representatives, he gained the continuing support of the Congress for the cause of building and maintaining the space-faring capabilities of the United States.●

SAN DIEGO

● Mr. LUGAR. Mr. President, my colleagues in Congress are accustomed to hearing from big-city mayors who paint a very bleak picture of life in our Nation's urban centers. In an effort to justify pleas for additional Federal support, mayors and their representatives in Washington describe desperate fiscal situations and dim prospects for ever again providing basic services and meeting financial obligations without massive new Federal aid programs. And, indeed, a good number of cities are in serious straits.

In a recent article, Mayor Pete Wilson of San Diego paints a very different picture of a city that has met the challenges of inflation and public employee unions, a city that has cut property tax rates significantly and has controlled spending, a city that is fiscally sound today. I am pleased to note that much of what Mayor Wilson says of San Diego could be said of Indianapolis as well, which I served as mayor for 8 years. San Diego is strong, because local leaders are willing to face difficult issues and make tough decisions.

It is time for Congress to pay more attention to winners in urban policy and to encourage other urban centers to follow their lead, rather than aiding them in their failure. I commend Mayor Wilson for his outstanding leadership in San Diego and his excellent article, which I present here to my colleagues for their interest and encouragement.

I ask that Mayor Wilson's article from the Christian Science Monitor be printed in the RECORD.

The article follows:

SAN DIEGO DOES IT—SO CAN YOUR CITY

(By Pete Wilson)

I am a big city mayor. And I am weary of hearing about the "crisis of the cities."

America's cities can never be healthy until America's economy is healthy. So-called inner-city residents and suburbanites alike must have the dignity and earning power that can be conferred only by jobs. The greatest contribution which governments (at all levels, but especially the federal) can make to curing stagflation and putting people to work is to forbear from more taxation and spending, and begin to undo the present levels.

So what can city governments do as their part in curing "the crisis of the cities"?

For years now San Diego has been ranked among the most livable cities in America. Equally important, several independent surveys have also pointed to San Diego as one of the fiscally healthy cities in the nation. San Diego has earned a reputation as a fiscal innovator, consistently working to keep government within the ability of taxpayers to pay.

San Diego has voluntarily reduced its property tax rate to the lowest level since 1910, achieving the lowest tax rate among California cities of 100,000 or above population. When assessed valuation of property soared, we offset that increase by cutting the tax rate some 27 percent over six years, refusing to treat inflated property values as a source of windfall revenues.

Perhaps the best yardstick of San Diego's performance has been its success in keeping down the number of employees on the public payroll. During my seven-year tenure, the ratio of employees-to-population has actually been reduced.

Our budget has grown 6.1 percent less than the figure that would be justified by inflation and growth in population. Today we plan to go an important step further. On the November ballot is a charter change that I proposed to place a permanent lid on city spending. The plan basically limits the growth in general government expenditures to the percent increase in population and offsets only three quarters of the rise in the cost of living.

The measure not only cuts spending, but is distinctly anti-inflationary in its forbearance from escalating our cost in direct proportion to increases in the cost of living. We don't want to keep pace with inflation. We want to fight it.

Even before the mandate of Proposition 13, San Diego had been lean and trim. It promoted spending critic Howard Jarvis, coauthor of Proposition 13, to remark that if all cities had been run as well as San Diego "we wouldn't have needed Proposition 13."

This administration has relied upon some fundamental principles to hold down the cost of government and has never wavered from them.

Because of our growing population, we have embarked on a firm course of residential growth management which, besides being environmentally sensible, squeezes the most effective use out of every tax dollar we receive.

By residential growth management we mean that the city has consciously steered 70 percent of new residential growth in the last six years into the urban areas which were already served by public facilities and city staff. By maximizing the use of existing fire stations, libraries, and parks, and their presently employed staff, we achieve both greater efficiency and substantial savings by not having to build and staff prematurely in remote and sparsely populated parts of the city.

At the same time, this city has been fair but firm at the bargaining table. We have resisted the sometimes outrageous demands of public employee unions, knowing there is a limit to what taxpayers can afford.

We have refused to engage in a sophisticated shell game where union leaders gladly settle for some right of management or lucrative fringe or pension benefits in lieu of higher wage increases. We simply cannot afford to bargain away the future.

We have made it crystal clear that strikes by public servants are illegal and will not be tolerated. At my suggestion, San Diego voters placed in the charter a provision which tells those who walk to keep right on walking. Most importantly, it forbids amnesty and the "sweetening of the pot" to persuade strikers to return.

By being tough, we've experienced labor peace. Equally important, by being firm we've refused to let public employees dictate public policy, which would invite fiscal disaster.

We must demand that in return for providing our public servants fair compensation and security, we receive the kind of productivity and efficiency we as taxpayers deserve.

Four years ago, a productivity team was brought here with an eye on consolidation and cost effectiveness. To date, increased productivity has saved citizens an estimated $5 million a year.

Limited space allows me to illustrate just a few instances of productivity improvements. Where once it took a crew of three to handle trash pickup, with mechanical help today it requires only two. And 28 percent of the routes are handled by a truck with a single operator.

Several government agencies now purchase goods in bulk. We are about to merge communication centers and crime laboratories.

We've begun to make greater use of reserves to handle the routine chores of the Police Department. A new trainee level was created as well. Together with reserves, their activity frees full-fledged police.

The time has come to give more serious consideration to increased involvement by the private sector in the delivery of government services.

The view that the private sector can often do it better has not always endeared me with my fellow big city mayors. Neither has my stand that programs such as the Comprehensive Employment and Training Act (CETA) tend to play into the hands of public employee unions and dry up capital for developing long-term private sector jobs.

In San Diego we have fostered sound private economic development. Every effort has been exerted to protect what is attractive about our city and to continue to attract the new industry we need to bring meaningful employment to our ever-growing population. Without jobs, there can be very little quality of life.

We've learned that low taxes and efficient government bring new business and job opportunities. I am reminded of a comment made by the late President Calvin Coolidge, who said:

"Nothing is easier than spending public money. It does not appear to belong to anybody; the temptation is overwhelming to bestow it on somebody."

We just can't afford to let it happen.●

THE UNTIMELY DEATH OF RALPH H. METCALFE

● Mr. BROOKE. Mr. President, I was shocked and deeply saddened by the news of the untimely and tragic death of my dear friend and colleague in the Congress, RALPH METCALFE. The city of Chicago, the State of Illinois and, indeed, the entire Nation, have suffered a great loss.

RALPH was blessed with many gifts, both as an athlete and in his chosen profession as a public servant. He was always willing to share those considerable gifts with the people of this Nation, a nation he loved so much.

I doubt that there are many Americans of my generation who will ever forget RALPH'S incredible accomplishments as a sprinter in the 1930's. He represented the United States at the 1932 Olympics in Los Angeles and at the 1936 Olympics in Berlin, at a time when Hilter was claiming to lead an Aryan "master race." He and the great Jesse Owens scored magnificent victories against the concept of racial superiority by soundly beating their German opponents. In his Olympic career, this marvelous athlete won a gold medal, two silvers, and a bronze. He thrilled those of us who heard of his exploits on the radio and from the newspapers and made young blacks like myself proud of our race and proud of our Nation.

RALPH METCALFE could have stopped there. He was a celebrity and a star. But he did not stop. He attended Marquette

University and the University of Southern California. He served his Nation in the Army and in the USO during World War II. And then he became the State of Illinois' first black State athletic commissioner.

As an elected public official, beginning in 1955 with his service as an alderman in Chicago, RALPH METCALFE displayed a tremendous sensitivity in dealing with people and their problems. He never lost that ability. He had a strength of character which gave him the moral leverage to command respect when he chose to speak out on important issues. And speak out he did. RALPH METCALFE was a man of conscience and dignity and he was uncompromising in the pursuit of equity and mutual tolerance. He possessed an independent spirit and was not afraid to challenge those who failed to act in the interest of his constituents and the people of Chicago. He was a fighter and he was not afraid to take on tough opponents when he believed his cause to be just.

I am proud to have counted him as a friend. I know I shall miss his energy and his forthright, honest manner. I valued his advice and he was a source of counsel and strength to many. His passing is a tremendous loss not only to his constituents in Chicago's South Side, but also to the Black Congressional Caucus, which he helped found, to his colleagues in the House and, indeed, to all citizens across this land.

To his devoted wife, Fay; his son, Ralph, Jr.; and his host of friends, I extend my deepest sympathy. My prayers are with them. And I know my colleagues in the Senate join with me in extending our deepest regrets to his family. This truly outstanding individual will be missed by all.●

THE PORTLAND VA HOSPITAL

● Mr. MARK O. HATFIELD. Mr. President, as we close the last days of the 95th Congress, we are also completing congressional review of a project which has caused a great deal of furor in my home State: Construction of a new Veterans' Administration hospital. My purpose here is not to again bring up the many issues surrounding this project. Instead, I would like to take a little of my colleagues' time to tell a personal story about this controversey, one which recounts the joys and frustrations we all encounter in political life.

Like so many issues, the proposal to build this VA hospital in Portland has been both a hardship and a healthy exercise for the community. As part of the debate over the size and location of the facility, the public has been exposed to extended discussions of the costs and types of health care our citizens deserve. Many groups studied this project, passed judgment on it, and then told the story in terms which suited their purposes. Public officials, including myself, joined with one side or another and made pronouncements of their own. I had hoped that exposure of the various arguments would help increase public awareness of health care problems, and I am sure to a certain extent this end was served.

At the same time, given our Nation's ability to divide itself into narrow interest groups, I am also aware that many people saw only what they wanted to in this local controversy. Recently, a personal experience has made me understand that the debate may have been as divisive as it was educational for some people.

John Wesley, a valuable friend as well as a helpful adviser on health matters, was intimately involved in the review of the VA proposal. As a hospital planner, he had a particular interest in one site originally considered by the VA for the hospital. Like all taxpayers, he also was concerned about overall costs.

But his point of view was not that simple. As a veteran, he felt keenly the need for a high level of medical care for those who have served in our Nation's defense. Finally, as a friend and adviser to me, John found himself in basic disagreement with my assessment of the proposal. This led to many long discussions, but never a loss of mutual respect.

It was through this last side of John's nature that I was again reminded of the challenges and disappointments which are part of almost all public decisions. John, by careful and thoughtful disagreement, caused me to review the hospital planning time and time again. If strictly personal interests had guided his outlook, I know my stubborn refusal to agree with all of his views would have caused bitterness on his part. In contrast, we maintained strong ties for we couched our talks in terms of overall health care needs, not simply the VA question.

Just as the Congress moved closer to a final decision on the Portland hospital, John was killed in an automobile accident. To many Oregonians, it came as a personal shock. For me, in addition to the tragedy, the accident brought a sudden end to our frank and helpful debates. Too often, as elected officials make controversial decisions, they hear only from those who will tell them what they want to hear. John combining both a personal interest and a genuine care for the public, summoned the courage to continue to argue another point of view with me.

I admired this in him and I know that we would have shared a certain happiness when the debate was ended, no matter what the outcome. We had thought and talked the issue through clearly and carefuly, each making what we felt was our best effort. Gone now, however, is my opportunity to thank him for his efforts. Also lost is my chance to talk with him in general terms about health care problems he was helping me explore.

But there was an even more important oversight on my part. Although I was not aware of it, some people had unfairly accused John of deserting the veterans' cause in his stand. I do not mean to suggest that John was in agreement with many veterans groups, but I believe that John would have been quick to note that his approach aimed at a solution which would help the general public and veteran alike.

He took these comments quietly, never mentioning them to me in any of our talks, but I am sure these charges bothered him greatly. Had I known of these accusations, I would have taken the first opportunity to assure him that I knew of his dedication to quality care for veterans. His approach was different from my own, but our ends were the same.

I am quite sure that more debate will be recorded before the Portland VA Hospital moves from the front pages to construction. Undoubtedly, we will see more strong personal disagreements emerge from this and other public topics. For my own part, however, I could not let this session close without expressing my support and thanks for John's work. In an issue filled with more than a little rancor, he reminded me that there are public spirited citizens who will turn their talents to a question, make their best estimate of the solution and remember to balance the needs of their community as a whole. Without that kind of recollection and many more, there can be little joy in my job.●

VETERANS' APPRECIATION DINNER FOR STROM THURMOND

Mr. STAFFORD. Mr. President, on September 23, 1978, the veterans of South Carolina honored my distinguished colleague, STROM THURMOND, for the work he has done in the area of veterans' affairs. A dinner was held at the South Carolina National Guard Armory where approximately 1,000 South Carolinians from throughout the State attended, many of whom traveled hundreds of miles to pay tribute to our distinguished colleague and join in the festivities. Also attending were representatives of many local posts, barracks, and chapters of the American Legion, Veterans of Foreign Wars, Disabled American Veterans, World War I, AMVETS, women's auxiliary units and others.

Mr. President, there were several excellent speakers at this appreciation dinner, three of whom were past national commanders of veterans organizations. I ask unanimous consent that the remarks of the Honorable Oliver E. Meadows, past national commander, Disabled American Veterans, and the Honorable Robert Charles Smith, past national commander of the American Legion, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF OLIVER E. MEADOWS

Senator and Mrs. Thurmond, Commander Smith of the American Legion, Commander Cothran of the VFW, Sid Wise, Department Commander, DAV, South Carolina, Friends of Senator Thurmond, Ladies and Gentlemen:

I appreciate the opportunity of joining with you in honoring our old and trusted friend, the Senior Senator from South Carolina, Senator Thurmond. Even though I am not from your state and have come from Texas to join you, I want you to know that we appreciate Senator Thurmond in Texas and recognize true leadership, dedication, and patriotism and would be glad to claim him as our own.

I speak for 600,000 DAV members when I express my thanks to Senator Thurmond for his efforts in our behalf. We have made

some major legislative accomplishments this year and had the strong backing and support of Senator Thurmond in our efforts.

We will be receiving a cost of living compensation increase beginning in October. We will receive increased dependency allowances for those disabled veterans in the 30 percent and 40 percent categories. We have improved the housing program and the burial programs for disabled and the changes which Senator Thurmond helped us achieve will benefit not only the veterans of South Carolina but 4 million veterans, widows and orphans across the country. These are major accomplishments for which we are grateful but I would like to bring to your attention two pieces of legislation that I think are indicative of Senator Thurmond's concern and compassion. These two bills affect only a few people. Their cost is not great. They will not draw public acclaim but they are vastly important to those few that have suffered serious hardship. The DAV has worked for years to achieve the passage of these bills and it appears that we have finally succeeded. I want to say without reservation that without Senator Thurmond's special interest, we probably would have failed.

One of the programs I am referring to is the "Paired Extremity" bill. This bill is designed to give extra help to a veteran who has lost an arm or leg from a service connected cause and subsequently losing the other limb from a non-service connected accident. It is obvious that the second loss is catastrophic yet the veteran has received no additional help. With the passage of this legislation the veteran will receive an extra allowance to help him meet his additional problems.

The other bill I refer to is the Presumption of Service Connected death which benefits certain widows. In the past we had many incidents where a woman has lived a lifetime with a 100% service connected veteran. Yet when the veteran died she received no compensation because it was decided that the cause of death was not service connected. An example would be a blind veteran who dies of a heart attack or in an accident. His wife would receive no compensation after his death. This new legislation changes this and gives this widow compensation which she justly deserves. These two pieces of legislation affect not only a few thousand deserving cases. They do not represent a political achievement. They will receive no publicity. Yet, Senator Thurmond because of his sympathy and compassion has devoted his time to their passage and we thank him.

Senator Thurmond has stood by us in other major battles. He helped us restore funds the Administration was trying to cut from veteran hospitals. He helped us preserve veteran's preference in federal employment. He helped us block the attempt to give veterans benefits to draft dodgers and deserters. With this kind of record we do indeed owe our thanks and appreciation.

There is another subject I would like to mention and that is seniority. Seniority in Committee service. The people of South Carolina have had the good sense to keep Senator Thurmond in Washington for 24 years and he has achieved the seniority to make him extremely effective and influential. Senator Thurmond is the senior Republican on the Veterans Affairs Committee. He is the senior Republican on the Judiciary Committee and he is the second Ranking Minority Member on the Armed Services Committee. In these positions, Senator Thurmond can exert a great deal of influence on legislation and national policy. It is no exaggeration to say that it is not likely that any major bill will be reported from those Committees over Senator Thurmond's objection.

South Carolina has a major investment in Senator Thurmond and he is well positioned to look after his state.

We of the DAV feel fortunate to have such a staunch friend in these positions of influence.

This is an appreciation dinner and not a political gathering and I will not presume to give political advice, but if I were to offer any advice I would remind you of the old rural adage.

"You best dance with the one that brung you."

Senator Thurmond, we of the DAV appreciate you. We thank you and we hope we can in some small way return the many kindnesses you have extended to us. Thank you.

REMARKS OF ROBERT CHARLES SMITH

Thank you, Commander Wise, for the opportunity and invitation to appear at this Veterans' testimonial for such a distinguished Statesman and American as Senator Strom Thurmond. Senator Thurmond is an individual who is respected by not only his colleagues but by all Americans throughout this nation as an individual who is a great Statesman. I recently was looking through some pictures which I had and ran across a picture which I am not certain the Senator will remember having taken, but it is a picture of my wife and me along with Dr. Jay Taylor of La. Tech University at a reception held by the Tower Club of that University, prior to a speaking engagement which the Senator had at the University. This was back in 1969 and I know that the people of that part of the country along with the officials of the University have a great respect for Senator Thurmond.

Senator Thurmond, a member of the Senate Veteran's Affairs Committee, the Senate Armed Forces Committee, a Veteran of World War II, and a member of The American Legion, has been a Senator who has fought for the preservation of those benefits which have been given by a grateful nation to the Veterans of this country through its Congress. He has supported, and continues to support, a strong military posture for this nation. The American Legion in 1975 presented to Senator Thurmond our Distinguished Public Service Award for his outstanding service to his Country and to the Nation's Veterans. But Senator Thurmond's service to the veteran community did not diminish, for he has continued to be an active member in the Senate for Veterans, as well as working tirelessly for the military security of this Nation.

He was instrumental in the passage of legislation that established in the Department of Labor the position of a Deputy Assistant Secretary of Labor for Veteran's Employment. He has been a strong advocate for improving the areas of compensation for disabled veterans and their survivors, pension reform, housing and education. Through the tireless efforts of Senator Thurmond, the Senate Committee on Veteran's Affairs was retained during the first session of this Congress. As you well remember, the Administration had attempted to consolidate the functions of this Committee with the Senate Committee on Human Resources. Due primarily to his efforts, the Senate Committee on Veteran's Affairs was retained.

Senator Thurmond has been an individual who has long supported a strong military position of this nation because we are the leading nation of the free world, we must have a military posture second to none. Those who have ideologies different from ours understand negotiating only from a standpoint of strength.

You will recall that just over one year ago, one of the largest federal employee unions announced its intention to poll its members to admit members of the armed forces. Senator Thurmond immediately recognized the danger to the integrity of the military command structure and as a result Senate Bill 274 was introduced to prohibit unionization of the armed forces. Committee hearings were held and, largely due to the Senator's efforts, by a majority vote of 87 to 3, this bill to prohibit the members of the armed forces joining a union was sent to the House for action. The House has deferred action on this but I am certain that when the action is taken in the House that there may be a Conference Committee which will have to be resolved and the Senator will be actively engaged in this.

During my year as National Commander, I don't believe that any other Senator accomplished more to further the programs and goals of The American Legion for the Veteran and for the national security posture of this Nation than did Senator Thurmond. During the Senate deliberations on the Panama Canal Treaties, no Senator was more vocal or presented any more reasonable and cogent arguments against the ratification of these treaties. None was more adept in persuading his colleagues that the treaties were not in the best interest of the United States. No Senator was more effective in representing the desires of his constituents than did your Senator Thurmond. And I would recall for you that at our Washintgon Rally last March when Senator Thurmond and the late Senator James Allen spoke to our American Legion Leaders prior to going to the Hill to see their Senators and Representatives, Senator Thurmond closed his remarks that day with this statement—and I quote, "If it comes down to the point of embarrassing the President or preserving our country, let's preserve our country"—end of quote.

In my final report to our Convention in New Orleans, I reminded our delegates that it was the obligation of each person who participates in our electoral process to know the candidates, to know their background, and to know their position, that each takes on the many issues before each of us before casting our ballot. Non-partisan does not mean you cannot know the candidates, their positions on issues vital to your interests, so that you will be certain of how each stands on those matters which are of paramount interest to each individual.

Certainly I know that I speak for all members of The American Legion when I say "Thank you, Senator Thurmond, for your efforts on our behalf, and more importantly, on behalf of the Veterans of this great Nation. We owe you a debt of gratitude and we will do our best to repay that to you."

Certainly it has been a privilege for me to have the opportunity to be at this testimonial in tribute to a great American, a great Statesman, one who is dedicated to the preservation of benefits and rights of the veterans and one who is dedicated to a strong national defense of this Nation. Thank you.

RALPH METCALFE

Mr. PERCY. Mr. President, together with all of my colleagues who knew him express deep regrets at the untimely death of RALPH H. METCALFE. RALPH METCALFE was a close personal friend and a respected colleague. From the time when he and Jesse Owens shattered Hitler's belief in a master race during the 1936 Olympics to his 8 years in the U.S. Congress, RALPH METCALFE was a fighter for justice and equality.

I most vividly remember RALPH METCALFE's defiance of city hall in Chicago over the issue of police brutality. Some elements of Chicago's Police Department have unfortunately had a reputation for excessive violence. When RALPH METCALFE began the long fight against police

brutality in 1972, statistics showed that Chicago policemen killed twice as many civilians as any police department in the country. By far, the great majority of their victims were poor blacks and Hispanic-Americans. As a result of the movement which he led, Chicagoans are no longer afraid of the police. It was also RALPH METCALFE who exposed the illegal spying on Chicago residents by the Chicago Police Department.

This was just one example of RALPH METCALFE's concern for the rights and well-being of others. During the 1950's, as committeeman for Chicago's Third Ward and later as its alderman, he fought hard for subsidized housing for the city's low-income residents. He was also in the forefront of the fight for equal educational opportunities. And, as a leading sponsor of the Humphrey-Hawkins full employment bill, which, in a timely tribute to him, we are considering on the floor of the Senate today, he fought to get needed jobs for the unemployed.

RALPH METCALFE was also an effective worker behind the scenes. As the chairman of the House Panama Canal Subcommittee, his tireless efforts were helpful in the successful negotiations for and the Senate's passage of the Panama Canal treaties. These treaties have already led to improved relations with our neighbors in Central and South America.

RALPH METCALFE's was a life marked by hard work, dedication, and excellence. The residents of Illinois' First Congressional District have lost a great Congressman, and the city of Chicago has lost a greater leader. Those of us who knew him and had the honor of working with him have lost a great friend. We must all rededicate ourselves to achieving his goals of justice and equality for all.

My deepest sympathy to Mrs. Metcalfe and RALPH's entire family.

SOLAR POWER SATELLITE NEEDS NO FURTHER FUNDING

Mr. PERCY. Mr. President, the Solar Power Satellite (SPS) will receive no further funding by the 95th Congress. A bill to pump an additional $25 million into this highly speculative program recently came before the Senate Energy and Natural Resources Committee. Last Thursday, the committee decided not to schedule a markup session on the bill.

I am happy with this decision. The Federal Government is already financing a $15.6 million, 3-year study of the SPS. It is only fitting that we await the results of this study, to be released in 1980, before spending more taxpayers' money on research which may lead nowhere.

During the past weeks, I have publicly aired my concerns about the SPS. On September 29, in a speech before the Senate, I outlined some of the system's potential liabilities. The SPS is an extremely costly, highly centralized technology which would likely require massive Government regulation and a complex new weapons system to defend it against enemy attack. It also poses a number of serious environmental problems, the foremost being microwave contamination.

On October 2, I sent letters to the seven minority members of the Senate Energy Committee, urging them to oppose the SPS bill. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LETTER FROM SENATOR PERCY TO MINORITY MEMBERS OF SENATE ENERGY COMMITTEE

OCTOBER 2, 1978.

The Senate Energy and Natural Resources Committee currently has before it the Solar Power Satellite Research, Development, and Demonstration Act (S. 2860). If passed, this bill would provide $25 million in additional funding for the Solar Power Satellite (SPS).

It is my strong conviction that further funding for the SPS at this point is ill-advised. Solar Power Satellites are a highly complex technology with many potential problems. Congress has already authorized a $15.6 million, three-year preliminary study to address some of these problems and determine whether further development of the technology is worthwhile. I firmly believe that we should await the results of this study, to be completed in 1980, before pumping another $25 million of the taxpayers' money into the program.

Further funding at this point might allow the SPS program to build a momentum which would hinder objective assessment in a few years' time. There are too many examples of government-funded projects which begin small but soon steamroll past all stopping.

NASA estimates that trial commercialization of the SPS would cost $60 to $70 billion. SPS proponents claim that private investment could provide part of this capital. Past experience, however, would indicate that the Federal government would bear much, if not most, of the financial burden. With so much funding tied up in the SPS, little Federal money would be available for developing other new energy technologies such as coal gasification, oil-shale conversion, and earth-based solar.

The Federal involvement in solar power satellites would not be limited to aid for its development and commercial testing. If the SPS is successful, experts predict that it could generate a third or more of our electrical needs by the year 2025. I find it difficult to foresee private industry running such a huge, complex space program—in all probability, the Federal government would find itself even more deeply involved in the energy business than it is today. Orbital rights of way, safety, fair pricing, and adequate electricity distribution would all be matters of government concern. These many responsibilities would cut further into the Federal budget and add to the already excessive regulation which the private sector endures.

I am also very concerned about the strategic vulnerability of the SPS. Economies of scale require that a single satellite generate a minimum of 2,500 megawatts; the more commonly discussed output per satellite is 10,000 megawatts. Because of each satellite's huge capacity, a hostile government could cripple our nation's economy by knocking out a small number of them. To protect the SPS we would have to develop a whole new weapons system—a task which would consume tax dollars and, more importantly, would pose yet a further threat to human survival.

Environmental hazards posed by the SPS are another cause for concern. Particularly worrisome are the possible effects of microwaves upon human health. Each satellite would transmit energy to earth by directing a microwave beam at a terrestrial receiving antenna. An estimated ten percent of these microwaves would stray from their target because of particles in the earth's atmosphere. Scientists are now exploring the possibility that microwaves can cause cataracts, genetic changes, and cancer in human beings.

As a member of the Energy and Natural Resources Committee, your position on further funding for the SPS is crucial. I urge you to oppose any additional Federal support for this program until we have examined the results of the $15.6 million study already under way.

Sincerely,

CHARLES H. PERCY,
U.S. Senator.

GOVERNOR EDWARDS ENDORSEMENT OF THE NUCLEAR WASTE MANAGEMENT ACT OF 1978

Mr. PERCY. Mr. President, in recent years we have witnessed a dramatic rise in public concern over the issue of nuclear waste disposal. The source of that concern is not hard to identify. Over the past 30 years, thousands of tons of spent nuclear fuel and high level nuclear waste have accumulated in this counrty. During those three decades, the American people trusted the Federal Government to answer the tough social and technical questions surrounding the disposal of that waste. They expected the Government to provide strong leadership which would insure that the problem would be solved both expeditiously and responsibly. Now, they are realizing that their trust has been largely betrayed.

The costs of that betrayal are high. The public is understandably beginning to wonder if the problems of nuclear waste disposal can in fact be solved. Given that doubt, and given the deplorable track record of the Federal Government, we can expect the public to watch future Government efforts with a critical eye. Their patience is reaching its limits. If the Government does not get on the right track soon, the public will lose confidence in its ability to solve the nuclear waste problem.

That loss of public confidence might well result in the demise of nuclear power in this country. I regard such an outcome as unfortunate and unnecessary. While the problems surrounding nuclear waste disposal are difficult, all of the available evidence suggests that they can be solved. But in order to insure that they are solved, strong congressional action must be taken to bring focus and direction to the efforts of the Federal Government.

A number of my colleagues in the Senate are beginning to realize the need for such action. Several major bills on nuclear waste were introduced during this past session, including S. 3343, my Nuclear Waste Management Act of 1978. The Energy, Nuclear Proliferation and Federal Services Subcommittee of the Governmental Affairs Committee held hearings on nuclear waste in July. Still, it is clear that the Senate will not take action on nuclear waste this session.

It is imperative that we act on this issue in the next session of Congress. We must give the Federal Government a mandate to solve the problems which remain, and to construct waste disposal facilities once those problems have been solved. We must identify a set of principles which will guide our Nation's nuclear waste disposal policy. We must establish a strong institutional framework within the Federal Government which will insure that we receive unified,

directed leadership. And finally, we must establish reasonable target dates for addressing the problems of nuclear waste disposal, to insure that the Federal Government does not dawdle any longer.

I have incorporated all of these ideas into S. 3343. In the months since I introduced the bill, I have received comments on it from a wide range of distinguished scientists, Government officials, and industry and environmental leaders. I have been encouraged by the support they have given to the principles contained in S. 3343. I have also benefited greatly from their suggestions for improvement.

The comments I have received have strengthened my conviction that S. 3343 can set us on the road to solving the problem of nuclear waste disposal. I intend to reintroduce the bill in the next session, and to work hard for its passage.

One of the most significant statements of support given to S. 3343 was made by Gov. James Edwards of South Carolina, the chairman of the Nuclear Power Subcommittee of the National Governors' Association. In a letter sent to President Carter, Secretary of Energy Schlesinger, and all of my colleagues in the Congress, Governor Edwards stated his support of the bill, contingent upon my making several modifications in it.

I wish to thank Governor Edwards for his support of S. 3343. I will consider his suggestions carefully before I reintroduce the bill in the next session. I would also like to make brief responses to them now.

First, I agree with Governor Edwards' suggestion that the bill should contain more explicit provisions regarding the participation of appropriate representatives of State and local government on the proposed "Nuclear Waste Review Panel." I will evaluate the various options open in this area, and modify the bill once that evaluation is complete.

Second, Governor Edwards suggested that officials from State and local government should be consulted before rather than upon the selection of sites for waste disposal facilities. That is exactly the intent of section 205 of the bill. I will review the wording of that section and consider making changes to clarify its intent.

Third, Governor Edwards suggested that nuclear waste research and development activities should be funded by the Federal Government. However, it is my belief that such activities should be paid for by the producers of nuclear waste. This is a complex issue, and I will review my position on it during the fall. There may well be a definable middle ground which will best reconcile the wide range of interests involved.

I ask unanimous consent that the text of Governor Edwards' letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TEXT OF LETTER SENT BY GOVERNOR EDWARDS TO PRESIDENT CARTER, SECRETARY SCHLESINGER, AND MEMBERS OF CONGRESS

SEPTEMBER 18, 1978.

In my capacity as Chairman of the National Governors' Association, Nuclear Power Subcommittee, I have had the opportunity to review several pieces of legislation related to nuclear energy. One such bill that I would like to commend to you is Senate Bill 3343, the "Nuclear Waste Management Act of 1978", authored by Senator Charles H. Percy of Illinois.

Senator Percy has kept close touch with the work of the Senate Subcommittee on Energy, Nuclear Proliferation and Federal Services, chaired by Senator John Glenn of Ohio. Senator Percy's bill is very responsive to the testimony presented to Senator Glenn's Subcommittee on nuclear waste management. With the exceptions listed below, I feel Senator Percy's bill represents the issues and policies approved by the nation's governors concerning ways to deal with the nuclear waste management issue.

I have already recommended the following modifications to S–3343 to Senators Percy and Glenn, which, if approved, will reflect the nuclear energy policy positions approved by the governors:

A. The "Nuclear Waste Review Panel" should include the governor who is chairman of the National Governors' Association, Nuclear Power Subcommittee, as well as a similar appropriate representative of local governments. (Section 104). This needs to be clearly stated by statute and not left in the realm of agreements.

B. Involvement of a governor and other state and local government officials should occur before rather than upon making significant decisions or taking definitive action regarding specific waste management or disposal facilities. (Sections 205–d, e and f). These officials should be involved early and help provide the information required to review and analyze specific sites and local technical, social, economic and political conditions.

C. Research and Development funds should not be provided by the user fees. R&D is clearly a national responsibility and should be provided for out of general appropriations.

I would like to personally ask for your wholehearted support for S–3343 with the above modifications. Passage of such an amended bill will achieve a much needed Congressional mandate to move this country along with its vital nuclear waste management and nuclear energy options. Such leadership and such a mandate is essential to this nation's best economic and technology development interest.

Thank you for your support. If I can be of any assistance, please contact me.

With warm personal regards,

JAMES B. EDWARDS.

GROWING OLD IN AMERICA

Mr. PERCY. Mr. President, a few years ago, McGraw-Hill published my book, "Growing Old in the Country of the Young," which I had researched for a number of years, on the many serious problems of senior citizens in our Nation.

On September 24, the Chicago Tribune began publishing a remarkable special report entitled "Growing Old in America." This major series of articles, which ran through October 7, once again focuses our attention on the problems of the elderly. It is of vital importance that this be done. As stated in the opening article of this series:

The aging of America promises to be the most dramatic population trend of the next half century, comparable in its impact to the post-World War II baby boom that helped give the country its current fixation on youth.

This is not an idle statement. Those persons over age 65 comprise the fastest growing segment of our population. Presently, almost 10 percent of our population is age 65 or older. By the year 2025, that figure will be almost 25 percent. As the Chicago Tribune states:

This trend will profoundly affect lifestyles, employment patterns, and the way in which America spends its resources.

The Chicago Tribune is not a newcomer to this issue. It provided major assistance to the Senate Special Committee on Aging when we conducted our investigations into nursing home fraud and abuse several years ago. Those investigations have already led to significant improvements in the operation of nursing homes. Last year, the Medicare-Medicaid Anti-Fraud and Abuse Amendments Act was signed into law. This law will strengthen the capability of both the Federal and State governments to detect, prosecute, and punish instances of fraud and abuse in these programs.

Improvements have also been made in the physical condition of nursing home facilities. Nursing homes are, by and large, cleaner and more sanitary than they were when the committee began its investigations 8 years ago. However, as brought out in the Chicago Tribune series and as also mentioned in a recent investigation by the Better Government Association and WLS–TV in Chicago, abuse of nursing home residents continues.

On August 30, I chaired a hearing of the committee in Chicago to further explore abuse of nursing home residents. I found that better coordination between Federal, State, and local governments in regulating nursing homes is needed. I also found that more emphasis needs to be placed on home care services. Most elderly persons want to stay in their own homes. We should be facilitating this, instead of continuing programs and regulations which force them into unwanted and often unnecessary institutional care. This would not only be better for the individual, but also less costly.

However, nursing home abuses are not the main focus of the Chicago Tribune special report. The main focus is how this country should address the problems of an often forgotten but increasingly populous and vocal segment of our society.

In a recent taping I did for the public television show "Over Easy," I stated that the greatest problem facing senior citizens today is inattention. For example, through mandatory retirement laws, society decides when elderly persons have reached the end of their productive lives. When housing and other social welfare programs are developed, the needs of the elderly are considered almost as an afterthought. This perception of senior citizens as useless members of our society is, thankfully, gradually changing. We are beginning to pay more attention to senior citizens and their problems, not in a patronizing fashion, but in recognition of the many things they continue to contribute to our society.

Two current activities of the Senate Special Committee on Aging illustrate this point. In a series of hearings which we began this summer and will continue next year, the committee is exploring the issues of "retirement, work, and life-

long learning." One issue to be addressed is the role of the older worker in the labor force. Many persons over age 65 are able and willing to work. Congress recognized this when it raised the mandatory retirement from 65 to 70. However, many people believe that older workers deprive younger workers of needed jobs or advancement in their present jobs. This seeming conflict between the needs of younger workers and older workers is a clear example of the complex questions we must consider as we face an increasingly aging society.

The committee is also beginning a series of hearings on "Neighborhoods and Older Americans." A recent report by the National Urban Coalition entitled "Displacement: City Neighborhoods in Transition" names the elderly as "the most often displaced." This series of hearings will focus on the role of senior citizens in our communities. It will also address the problems the elderly face in obtaining housing and needed social services.

Mr. President, the Chicago Tribune's special report on "Growing Old in America" is a superb journalistic and analytic study of a nation in transition. I recently sent a letter to Senators FRANK CHURCH and PETE DOMENICI, chairman and ranking minority member of the Senate Special Committee on Aging, urging that the committee carefully analyze this special report. In the letter, I stated:

The information contained in the articles will be invaluable to the Committee as we continue (our investigations).

I have already mentioned the committee's continuing hearings on "Retirement, Work, and Lifelong Learning" and "Neighborhoods and Older Americans." Other issues which the committee is presently looking into and are also addressed in the special report are the medi-gap insurance problem and the quality of care in nursing homes. The work done by the Chicago Tribune should be well utilized in these areas of committee activity.

In addition, I further requested that the committee continue hearings next year on home health care. This has long been an area of committee concern. In an editorial printed at the conclusion of the special report, the Chicago Tribune points out that:

One theme unifying several stories in the series was having to leave one's own home against one's will—forced out not only by poor health but by inflation, crime, inadequate home-help services . . . The Senate Special Committee on Aging should give particular attention to government-financed home-help services, for many persons a practical alternative to more expensive government-financed institutional care, often in miserable conditions. And all tax-supported services should be on guard against the unscrupulous greedy, who are sure to seize every opportunity given them."

This last point is particularly important. Home care services are a relatively new and growing service area, and governmental involvement is still minimal. However, we are already beginning to hear of cases of fraud and abuse. The committee can provide an invaluable service to the Congress and to the American people by insuring that these services are provided in an efficient and effective manner.

Mr. President, I submit for the RECORD the Chicago Tribune's special report on "Growing Old in America" and the editorial which I have just mentioned. I am sure that my colleagues will find these articles to be highly informative and thought provoking.

I ask unanimous consent that the special report be printed in the RECORD.

There being no objection, the special report was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, Sept. 24, 1978]

GROWING OLD IN AMERICA

(Persons over 65 years old will soon be the fastest-growing segment of the U.S. population, and their fears and problems have increasing importance for all. The Tribune's Task Force conducted a six-month, nationwide investigation—some of it by working undercover—to obtain a comprehensive view of the realities of aging in America. This is the first in a series of articles reported by William Gaines, Ray Moseley, William Recktenwald, and John Gorman and written by Moseley.)

The aging of America promises to be the most dramatic population trend of the next half century, comparable in its impact to the post-World War II baby boom that helped give the country its current fixation on youth.

One of every nine Americans today is 65 years of age or older. The ratio will gradually narrow until by the year 2025, according to some experts, nearly one of every four persons will be in that age group.

This trend will profoundly affect lifestyles, employment patterns, and the way in which America spends its resources.

The Tribune Task Force has spent six months examining the phenomenon of aging and seeking answers to the question of how American society cares for the growing army of its elderly.

Reporters worked undercover in nursing homes, home health care agencies, health insurance companies, and firms that sell retirement properties. They found and documented disturbing evidence of neglect, abuse and exploitation of one of the most vulnerable segments of the population.

But they also found, in interviews around the country with experts on aging, that the outlook for the elderly is increasingly hopeful; in the last two decades, America has made significant strides toward assuring its older generation a secure, happy, and healthful life.

ONE WHO SUFFERED SYSTEM'S INDIGNITY

The life of Mrs. Johnie Horton, filled with disappointment and tragedy, is an extreme example of the vicissitudes that can still afflict the old, the sick, and the helpless in American society.

Mrs. Horton, suffering from a serious heart condition and having lost a leg to amputation, spent the last five years in nursing homes.

For more than a year, the Illinois Department of Public Aid failed to pay the First Church of Deliverance convalescent home, 4316 S. Wabash Av., for her care.

By May, 1977, the bill for Mrs. Horton, a former country schoolteacher, had climbed to $4,179.70.

So the home's administrator, Ralph Goodpasteur, evicted her from the home—in a manner that prompted James D. Williams, public aid supervisor, to comment that Goodpasteur had shown "little or no regard for the health, safety, or welfare of mankind."

Goodpasteur called an ambulance, and Mrs. Horton was carried away on a stretcher as she clutched her only possessions, a purse and a radio.

On Goodpasteur's instructions, the ambulance crew drove to the public aid office and deposited her in the fifth-floor office of Mrs. Leona H. Levin, supervisor of nursing home services.

Mrs. Levin looked down at the stretcher and saw a woman "very upset and confused." She said she was worried that Mrs. Horton might die at any moment.

On her instructions, the ambulance took Mrs. Horton to the Ora G. Morrow nursing home, 5001 S. Michigan Av.

Williams was outraged by Goodpasteur's action and recommended proceedings to revoke his administrator's license.

He said Goodpasteur had not been paid because the Department of Public Aid had mistakenly canceled Mrs. Horton's eligibility for assistance in May, 1976. Goodpasteur had been told on three occasions that payment would be resumed when he signed a necessary form, Williams said, but "for some reason that we do not know, he did not follow the caseworker's instructions."

A state hearing resulted in a warning and reprimand to Goodpasteur, but he was allowed to keep his license.

As Goodpasteur sees it, he is the aggrieved party. He has filed suit against the public aid department, asking $4,700 for Mrs. Horton's care.

Goodpasteur was reluctant to discuss the case with The Tribune, but his attorney, Bernard Allan Fried, said public aid officials had treated Mrs. Horton as "a nonperson" and "we simply couldn't take it anymore."

Mrs. Horton spent three months at the Morrow home. Then she was transferred to the Normandy Terrace nursing home, 820 W. Lawrence Av. A Tribune reporter found her there last July, tied with a bedsheet to her wheelchair, a gash over her right eye from a recent fall.

She said she had no friends at the Normandy home, and "I'm lonely all the time because I don't want to be here." When the reporter took her out in her wheelchair, Mrs. Horton remarked that she had not been outside the home in nine months.

She had nothing to do all day but "just sit in this chair," she said, but she seemed resigned to her fate: "When you're old, poor, and ain't got but one leg, you generally do what they say and go where they tell you."

On Aug. 21, Mrs. Horton's travail came to an end. After a nine-day illness, she died in Thorek Hospital at the age of 89. She was buried a week later at Lincoln Cemetery.—WILLIAM RECHTENWALD.

THE "IMAGE OF INCAPACITY" PERSISTS—WITH TELEVISION'S HELP

Old people are sick, tired, and ugly. They can't do anything but sit and rock, go to church, or be pushed in wheelchairs.

Those are some of the ways that 180 Maryland children, aged 3 to 11, described the elderly in interviews conducted by the University of Maryland's Center on Aging.

"The physical characteristics of age—wrinkles, white hair, false teeth—were viewed with horror by the children," said Prof. Edward Ansello, associate director of the center. "But children also described older persons as being wonderful, kind, and rich."

His overall conclusion: "The children love, pity, and fear older persons."

In another survey, Duke University and Pennsylvania University faculty members expressed the opinion that a majority of elderly live in poverty. The correct proportion: 15 per cent or less.

In America's youth-oriented culture, many old people have to contend not only with the physical and financial difficulties of growing old but with stereotyped images and lack of

understanding that prevail among younger people.

Former Sen. Frank Moss, 67, of Utah, who was a member of the Senate Committee on Aging, once commented: "It is hell to be old in this country. . . We have made old age in this country a wasteland. It is T. S. Eliot's rats walking on broken glass. It's the nowhere in between this life and the great beyond."

Still, no matter how much they may view old age with distaste, many Americans apparently have not lost sight of the fact that their turn will come to be old. A national survey has found a surprisingly high degree of public support for programs to assist the elderly.

Americans older than 75 often face special problems—eyesight may start to dim, hearing to fade, the sense of touch to diminish.

As a result, they may move more slowly—much to the irritation of younger people around them.

Dr. Leon A. Pastalan, a University of Michigan gerontologist, tries to help his students gain a better appreciation of the problems of this group by, in effect, turning them into old people.

He outfits students with what they call "granny glasses"—specially developed spectacles with slightly opaque lenses to create the kind of cloudy view of the world that many elderly experience.

He puts plugs in their ears to simulate loss of hearing and applies two thin coats of a liquid bandage to their hands to cause a loss of tactile sensation.

"Like everybody else, I used to call old people Sunday drivers and tell them to get off the road," said Peter Karamitsanis, 26, a graduate architecture student. "But this program helps you to understand why some old people don't dare go over 20 miles an hour.

"I have come to appreciate them more because they are very alive people. They know a lot and are willing to share it, if people take the trouble to talk to them."

Pastalan developed his program principally to help architecture students become aware of the hazards old people encounter because of their limited vision and hearing.

For example, students learn that the typical supermarket, with its huge windows, presents a particular problem. As the lens of the eye becomes opaque, tiny prisms are formed; every prism picks up light and scatters it, producing starburst effects.

Thus, because of the glare from the windows, old people often are unable to see clearly the merchandise on display.

Medical students, social workers, policemen, bus drivers, and others who have frequent contact with the elderly also have changed their perceptions of old people because of Pastalan's program.

Medical students, for example, learn that a hospital often presents confusing images to old people. Light reflecting on a scrubbed tile floor can produce a sharp glare that makes it difficult for the patient to see even the doctor, particularly one dressed in white.

"The worst thing a doctor can wear is a white coat," Pastalan said.

He contends that industry, which has long been aware of the teen-age market, has been slow to realize the potential of the elderly market. As the proportion of elderly in the population grows, industry may have to adapt product designs, packaging, the size of type used on labels, and its advertising to a different market.

In much TV advertising and programming, old people are either ignored or portrayed in terms of ridicule.

The Gray Panthers, an organization of young and old people that seeks to promote a more positive image of the elderly, has made television a special target of its efforts.

"When old people are portrayed [on TV], we are usually stereotyped," Maggie Kuhn of Philadelphia, founder of the Panthers, told the U.S. House Committee on Aging.

"In appearance, our faces are blank and expressionless, our bodies are bent over, and the senior shuffle is just a step away from the embalming room. Our clothing is frumpy and ill-fitting. Our voices are high-pitched and querulous. . . . We are shown as stubborn, rigid, inflexible, forgetful, and confused."

Two special targets of Gray Panther wrath have been the Carol Burnett Show [no longer a network show] and Johnny Carson's Aunt Blabby.

Claude Pepper, the 77-year-old chairman of the House committee, asked: "Are we so victimized by our own stereotypes that we only recognize as elderly those televised characters who are toothless, sexless, humorless, witless, and constipated?"

In truth, this is the healthiest, best-educated, and most vigorous generation of old people in America's history. And medical studies have concluded that no other age group displays such diverse physical and mental characteristics. But the stereotypes persist.

"When I was younger, I was able to conduct my own business, and people accepted me on my reputation as a businesswoman," said Mary Miller, 71, a member of the Chicago Gray Panthers. "Now suddenly they look at my gray hair, and it closes doors to me.

"Some doctors treat you as if you are so far gone they needn't bother with you. If anything ails you, they just say it's because you are getting old."

When Amydelle Shah, 69, was forced to retire as a head nurse at the University of Illinois hospital last fall, she went out to find another job and was interviewed by a man in his 30s.

"When he found out I was 69, he said, 'Fantastic.' I went out of there feeling awful," she said. "I felt like a bug you put under a microscope."

The company hired her. Now, she says with irony, "they think I'm doing a 'fantastic' job."—RAY MOSELEY.

THE AGED: RISING CHALLENGE TO A NATION

My money runs out at the last of the month. I never go out. I read my prayers at night. I listen to the radio. It's not much.
Mrs. Isabel Hansen, 71, widow.

I am old. As soon as you can say that, you're over the hump. It's not a dirty word. I've earned every one of these gray hairs, and I'm not ashamed of them.
Stella Francis, 74, president, Chicago Gray Panthers.

I buy secondhand clothes; I don't mind. They say these are the Golden Years, but you can't prove it by me.
Caroline Arangelovich, 71, retired waitress.

There are many persons who are retired from a job but who do not wish to retire from life. I'm not satisfied with sitting around looking out the window; that's a great way to deteriorate.
Henry Grant, 70, retired teacher.

They are a mixed chorus, the voices of the elderly in America. Some, bowed by age, declining health, and loss of income, would agree with Ptah-hotep, an Egyptian philosopher, who wrote in 2500 B.C.: "Old age is the worst of misfortunes that can afflict a man."

Others cling fiercely to their pride and self-esteem and see old age as a period not to be endured but savored.

For all, it is a time of sudden and sometimes painful adjustments. They must contend with loss of spouses and friends, loss of income, a gradual loss of physical well-being, and a loss of the sense of belonging in a youth-oriented, highly mobile society.

Most of them, no matter how fortunate their circumstances in old age, are burdened with a degree of fear—of being alone, sick, helpless, abused, disdained, or ignored. Some also are afraid of dying; others, in their despair, long for it.

The Tribune Task Force has spent six months assembling a portrait of the elderly in America today. Reporters worked undercover in nursing homes, boarding homes, home health agencies, insurance companies specializing in health insurance for the elderly, and firms that sell retirement properties.

They interviewed scores of experts on problems of the aged throughout the country and examined the operation of public and private programs designed to benefit the elderly.

The picture that emerged is no more uniform than the voices of the old.

America has made big strides in the last two decades in enabling its growing population of elderly to live out their lives in security and dignity. But the elderly remain particularly vulnerable to the greedy and rapacious, to confidence men and to common criminals. And some government programs for the elderly fall far short of their goals.

A national survey found that the major concerns of the old are crime, poor health, declining income, and loneliness.

Although few old people will experience the personal disasters that they dread, the catalog of troubles they can encounter is substantial, the Task Force learned.

Medicare, the government health insurance program for the aged that was begun in 1966, often covers only a fraction of medical expenses, forcing many of the elderly to make huge out-of-pocket payments. Sometimes it takes months for Medicare to come through with reimbursements.

Salesmen exploit the fears of elderly persons about poor health and high medical costs to sell expensive health insurance, some of it worthless or nearly so.

Sizable numbers of the elderly, financially unable to move out of decaying neighborhoods, are easy victims of muggers, purse-snatchers, and home invaders. Their recourse is to imprison themselves in their homes.

Many nursing and board homes are filthy and short-staffed, provide inadequate services, and keep elderly patients drugged to make them easier to handle. At one home, a reporter working undercover was left alone on the night shift with seriously ill residents, though she had said her only previous work experience was as a waitress.

Control over the homes is divided among a bewildering array of federal, state, and city bureaucracies—with the result that there is little control at all.

Home health care, touted by many government officials as a means of serving the elderly outside nursing homes, is being financially exploited by some private, not-for-profit companies that charge three to five times as much as profit-making ones.

Retired persons who buy property in the Sun Belt, hoping to live out their years in a comfortable climate, sometimes find they have bought uninhabitable patches of barren land, without water or electricity and miles from the nearest town and shopping facilities.

Such problems, if not corrected now, are likely to multiply in the decades ahead, when old people are expected to be the fastest-growing segment of the American population.

In 1900, Americans 65 and older—the usual definition of "elderly"—numbered 3 million, or just 4 percent of the population. Today, numbering 23 million, they constitute nearly 11 percent of the population, and the percentage is rapidly rising: Every day, more than 1,000 people in the United States reach age 65.

By the year 2000, according to most projections, there will be at least 30 million elderly. And by 2025, when the post-World War II "baby boom" generation reaches old age, they will number 45 million, or 14 percent of the population.

Those projections may be too conservative. The Futures Group, a "think tank" organization in Glastonbury, Conn., believes that increases in life expectancy will be so dramatic that 72 million people aged 65 or over will be alive in 2025—roughly 22 percent of the projected population.

Life expectancy at birth has increased by about 25 years since 1900. Then a person could expect to live 47 years; today, the average is 72 years [77 for women, 69 for men]. The average age of Americans, 29.4 today, is expected to be 41 in the year 2000.

The Futures Group predicts that life expectancy at birth will average 86 by 2025.

The trend toward a more elderly population will have profound implications for the American economy and lifestyle. Social Security, pensions, health care costs, the job market, and retirement policies all will be affected.

America's preoccupation with youth will have to be tempered; instead of such films as "Saturday Night Fever," we may in 20 years be deluged with movies about life and romance in a retirement community.

"This trend will affect every institution one can imagine," said Robert C. Benedict, U.S. commissioner on aging.

"It will have an impact on how we teach doctors to practice medicine, architects to design buildings, and community planners to do their job."

As America's population gets older and improvements in health care extend life expectancy, the group that University of Chicago gerontologist Bernice L. Neugarten calls the "old-old"—those 75 and over—is expected to grow fastest of all.

Today the elderly include 14.5 million persons who are 65 to 74, 6.7 million who are 75 to 84, and 2 million who are 85 or older.

The "young-old"—the 65–74 group—are expected to increase by only 39 percent between 1975 and 2010, but the 75–84 group will grow by 52 percent and those 85 and older by 111 percent.

That alone portends a boom for the nursing home industry. Only 5 percent of the elderly—about 1 million persons—are in nursing homes and similar institutions today.

"By the time we get to a doubling of 65-plus population, we will have 2½ to 3 million people in nursing homes," said Dr. Robert N. Butler, director of the National Institute on Aging.

Most old people who enter nursing homes die there; the average stay is 1.1 years.

In an earlier time, most old people lived in the same home as their children, and families bore most of the burden of supporting them and caring for them when illness and disability struck.

That is still largely true in the black and Latino communities. But in an age marked by rapid mobility, it is no longer the case for most whites.

Contrary to popular myth, however, vast numbers of old people have not been deserted by their children or dumped in institutions to put them out of the way.

"Nursing homes are a last choice, not the first," said Dr. Ethel Shanas, a University of Illinois gerontologist whose studies on how families care for their elderly have done much to explode the myth.

Even though old people are less likely now to live with their children, 48 per cent of those living alone have a child within 10 minutes of their home, Shanas found. Three out of four see one of their children at least once a week—more than half do so nearly every day—and only 11 per cent go more than a month at a time without seeing at least one of their children.

But in a modern, urban society, care of the elderly increasingly is seen as a responsibility of the entire society rather than of the family alone. This concept developed in Europe many years ago but is relatively new to the United States.

Just 20 years ago, vast numbers of old people lived in poverty and misery. Social security payments often were inadequate; few people were covered by private pensions, and some who were found that the pensions vanished as firms went bankrupt. The cost of health care turned many into paupers.

Since then, Medicare and Medicaid—the government health insurance program for the indigent—have been enacted, Social Security coverage has been greatly expanded, private pensions have spread with safeguards built into them, and a broad range of new federal, state, and city programs for the elderly have come into being.

The number of elderly living in poverty has declined steadily. Today, according to federal estimates, 15 per cent of the elderly—slightly more than 3 million persons—fall below the official poverty line [$3,417 annually for couples and $2,720 for individuals], compared with 11.8 per cent of the general population who do. The government says another 10 per cent of old people live in "near poverty."

Prof. James H. Schulz of Brandeis University, perhaps the nation's foremost authority on the economics of aging, believes the true figure for the elderly poor is 5 to 12 per cent when non-money income—such as food stamps, Medicare, and Medicaid—is considered.

Whether the figure is 1 million or 3 million, it represents people who have to struggle merely to survive in this affluent society. They bring the median income for all persons 65 and over to just $161 a week for families, $67 for individuals.

At the other end of the scale, nearly 8 million older persons live in households with incomes of $15,000 or more. Many of America's elderly are doing quite well, and the public emphasis on problem areas tends to obscure the fact that this is generally the most prosperous, healthiest, and best-educated older generation in the nation's history.

As noted, 95 per cent of the elderly manage to live outside institutions, and 81 per cent enjoy sufficient health to be able to move about independently. More old people own their own homes than do persons under 65, and 82 per cent of the elderly homeowners have paid off their mortgages.

Although life remains bleak for a miniority of the elderly, University of Chicago gerontologist Robert Havighurst says: "I don't think the elderly are especially poorly treated in this country. The middle-class elderly can take care of themselves. The problem is with people living alone."

Statistical evidence bears that out. Except for minority groups, those facing the most severe problems in income, housing, and health are elderly widows or people who never married, and they constitute only a small segment of the elderly.

"We always talk about gaps in services, and that reflects an assumption that all old people need services," said Jack Ossofsky, executive director of the National Council on Aging in Washington.

"One-third of the elderly need significant help. Largely, they are the older of the old. But as we deal with the vulnerable old and the socially isolated, society thinks we are talking about all old people. This reinforces the negative stereotype of the elderly that prevails in this country."

But even most government programs for the elderly make no distinction as to need, and the costs have become immense.

Joseph Califano, secretary of Health, Education, and Welfare, recently estimated that such programs cost $112 billion a year—5 per cent of the gross national product and 24 per cent of the federal budget.

Several experts on aging have challenged his figures, but even allowing for a margin of exaggeration it is clear that the elderly represent a major cost to the American economy.

Nonetheless, the United States continues to lag behind some European countries—notably the Scandinavian countries, West Germany, and the Netherlands—in the care it gives its old people.

These countries have achieved higher standards of care by taxing themselves at a higher rate than Americans pay. A major question for American society is how much its citizens are willing to pay to assure a decent life for their grandparents, their parents, and ultimately themselves in old age.

Some press reports have forecast a developing "intergenerational warfare," with the shrinking number of younger persons in the work force rebelling at the burden of supporting a growing army of oldsters.

The recent approval by California voters of Proposition 13, which sharply reduced that state's property taxes, has fueled that argument.

But a Louis Harris survey found widespread support among younger people for programs to benefit the elderly, even if it means higher taxes. And most experts on aging discount the reports of "intergenerational warfare."

"The politcal system will work out change with compromise," said Schulz. "The young won't get everything they want, and neither will the old.

"The whole discussion is framed somewhat improperly. We continue to focus on the idea of somebody providing support for somebody else. But economists argue that the correct way to view it is the extent to which you are willing to defer income for your own old age."

Even if there are no major new programs for the elderly, Califai o estimates, the cost of serving them will reach $350 billion by 2010 and, in the 15 years after that, will jump to $635 billion—more than 10 per cent of projected GNP and more than 40 per cent of the federal budget.

Commissioner Benedict agrees that there will be increased costs in serving the elderly in the years ahead—but he sees pluses as well.

"To the extent that the elderly require services, it means jobs," he said. "Just as there was a boom in the electronics industries after World War II, in the next half century a whole new services field for the elderly will start to develop, and it will bring jobs with it."

He predicts a boom not only in the nursing home industry but also in nursing and other services to the elderly in their homes.

At least one expert worries that the elderly may be demanding too much.

"Any day now, the old can be in the same boat with the minorities, finding they have used up their potential for demanding more," said Dr. Wilma Donahue, 77, director of the International Center for Gerontology in Washington.

"It may be that we don't have much choice but to ask the family to provide more services to the old that they can't provide themselves. At the same time, we may have to evaluate more stringently how we determine who must have services so as not to give them to old people who are able to care for themselves."

This selective approach may not be politically acceptable, but it may require consideration in view of the rapid growth in the numbers of the elderly.

As Benedict puts it: "The demographics are alarming. Older people are increasing by 500,000 each year, and 80,000 to 100,000 of these need assistance and care of some kind."

The only alternative to meeting these

needs, Ossofsy said with a touch of hyperbole, "is what once was called the Final Solution. We have to react with greater humanity to people who are vulnerable."

RETIREMENT WELL PLANNED, HE "GOES LIKE 60"

Calvin "Pete" Pfingst goes out at 6:30 every Monday morning to play golf, works a few hours every Tuesday at a North Shore social center, and drives several friends to church every Sunday.

What makes all of that remarkable is that Pfingst is 95.

He typifies the many older Americans who remain vigorous, alert, and active in their retirement years.

Last May 22, Pfingst was one of 50 persons inducted into the Chicago Senior Citizens Hall of Fame by Mayor Bilandic in ceremonies at City Hall.

"He sets an example for persons of advanced years in leading a well-balanced life, which includes physical and mental activity," said the citation from the Mayor's Office for Senior Citizens.

Pfingst, a former principal of William Penn Elementary School and assistant principal of Lane Tech High School, retired in 1948 after more than 28 years of work for the Board of Education. A native of Wolcottville, Ind., he graduated from the University of Chicago and received a master's degree in education from Northwestern University. His first job was a $40-a-month teacher at a school in Indiana.

"I still drive," he says with pride. "I took the test the last time in 1976, and the tester said, 'Is this right? You're 93?' He passed me after seeing how well I could drive. I drive some people to church every Sunday (in Wilmette)."

Pfingst lives at the Presbyterian Home, a retirement home in northwest Evanston. His wife died 10 years ago, and they had no children.

He walks with a quick, sure stride and has no hearing or sight problems.

He attributes his good health and long life partly to heredity—his mother lived to 97 and her parents lived into their 90s. But the rest, he said, is the result of his lifestyle.

"I have avoided being habitual in any way that would be derogatory to my health," he said. "I don't drink. I don't smoke. I also take my time to do what I want to do. I am not in a rush. I take a walk each day.

"On Mondays, I go golfing with a friend (85 years old). We play until we are tired. We usually go out by 6:30 a.m. and play the back nine so we are not rushed."

Pfingst, who does his own cooking, said he also tries to be careful about what he eats. "I try to eat good food—fiber foods, lots of fruits—and I avoid sweets," he said.

On Tuesdays, Pfingst works for a few hours at the North Shore Senior Center, 620 Lincoln Av., Winnetka. Some of his former students from Lane Tech, now retired themselves, show up there and still remember the days when he taught them mathematics. Several have told him they became engineers because they enjoyed his classes so much.

Pfingst handles the biographies of the center's more than 700 senior members. He transcribes them in longhand, he said, because his penmanship is still sure and steady.

Some of his free time is spent reading, generally from the classics or the Bible, and he plays bridge several times a week.

Pfingst said he and his wife, who was also a teacher, planned well for their retirement; when the Presbyterian Home opened for membership in 1961, they were the first in line.

"I have no worries now," he said. "If I become ill, I can go to the infirmary and they will take care of me. It is all taken care of in the monthly fee."

His income, from Social Security and his pension as a teacher, is adequate for his needs, he said.

"What you need the most in later life are friends," he said. "And it's something you have to work at. My friends are my capital, and they create interest. I'm a very wealthy man because I have so many friends.

Last night, I took a girlfriend out to dinner, and we wound up playing bridge with another couple."—JOHN GORMAN.

[From the Chicago Tribune, Sept. 25, 1978]

THE NURSING HOMES—"A PLACE TO WAIT FOR THE END"

(In most countries [the nursing home] is utterly inhuman—no more than a place to wait for the end, a deathbed.) Simone de Beauvoir, "The Coming of Age"

Zeno Carter appeared to be near death when the night-shift nurse's aide looked in on him at the Uptown Shelter Care Home, 4646 N. Beacon St.

Carter, 66, a man of average height, was a wasted, skeletal figure weighing about 80 pounds. He told the aide he was unable to keep any food down, complained of two lumps in his abdomen, and said he was having hot and cold flashes.

He was so weak he could barely lift his head.

In reality, the nurse's aide was Tribune reporter Jane Fritsch, a member of a Task Force team that investigated nursing home conditions as part of a six-month examination of problems of the elderly.

Fritsch had walked in off the street two days before and, although she said her only previous work experience was as a waitress, had been hired on the spot by the administrator, Joan Adams.

Though she was a new employee, Fritsch was left in sole charge at night of the 42 residents of the home, an old, rundown, and dreary converted mansion in a seedy section of Uptown.

She checked the nursing charts and found that Carter had been ill for days. Dr. Mitchell Sokoloff, the physician for the home, had been telephoned about him twice in three days but had not come in to examine Carter, according to the records. The second call had been made earlier that day, when Carter became pale, weak and incontinent.

The records stated: "No PO [physician's order] received. Dr. states he will visit in a.m."

Fritsch immediately phoned Sokoloff, although it was nearly midnight, and told him it was urgent that Carter be hospitalized.

"Can't it wait until morning?" Sokoloff asked.

She insisted that it was urgent.

"Well, what excuse should I use when I call the hospital?" he asked.

Fritsch exploded. "I don't care. Make something up. This man is very sick and should have been put in a hospital long before I got here tonight."

Sokoloff called back minutes later and said hospitalization had been arranged. He told Fritsch to list "extreme weakness" as the reason for admission.

Zeno Carter died 16 days later at Martha Washington Hospital. Whether he would have survived if he had been hospitalized earlier is impossible to say. But at least there was someone on duty to try to save his life that night.

That is not always the case at the Uptown home, Fritsch was told. Aides and patients said that when the scheduled employe does not show up, residents are left alone at night, even though some former mental patients among them have a tendency to wander away.

Sokoloff subsequently declined to discuss his handling of the Zeno Carter case with The Tribune. To do so, he said, would violate "the patient's right to privacy." He also declined to say how long he had been associated with the Uptown home or with similar institutions.

Fritsch was one of several Tribune reporters who worked undercover in nursing and boarding homes in Illinois, Michigan, and Ohio during the investigation.

The reporters found that, although conditions have improved in some homes since a 1971 Tribune investigation uncovered widespread scandals, many can still be categorized as warehouses for the dying.

In the three states, reporters found:

Patients left to sit in their rooms all day and deteriorate, with few activities conducted for them. Typically, a daily schedule of activities was listed, but they never took place.

Patients drugged to make them easier to handle.

Incontinent patients left sitting for hours in their own wastes.

Filthy conditions that attracted hordes of rats, mice, and cockroaches.

The nursing home industry is a $14 billion-a-year business, much of it controlled by private entrepreneurs who in many cases appear to put profit before patient care.

There are more than 1 million patients in 23,000 homes. Dr. Robert N. Butler, director of the National Institute on Aging, told The Tribune that half of them are in third-rate homes.

"If we had a flood that left half a million people homeless, this nation would respond in a humanitarian way and declare a national emergency," he said. "But somehow this doesn't get declared a national emergency."

A U.S. Senate committee report in 1976 said: "Long-term care for older Americans stands today as the most troubled, and troublesome, component of our entire health care system."

Tribune reporters examined federal records and found scores of reports by inspectors citing flagrant violations of regulations, some alleging theft of patients' funds by administrators.

Yet there were few indications that any of the reports were ever acted upon. The reason apparently lies in the diffusion of responsibility for control of nursing homes among at least seven agencies.

With so many authorities involved, reports on violations are often simply passed from one to another, with none taking action, the Task Force found.

Edward C. Stec, director of health standards and quality for the U.S. Department of Health, Education, and Welfare in Chicago, said HEW conducts its own inspections of homes offering skilled nursing care but pays the state to inspect intermediate care homes, which mainly provide custodial care.

He said HEW can decertify homes from participation in Medicare or Medicaid but cannot close them. That responsibility, he said, rests with the state.

Another HEW official said he could not think of an offense short of murder that would result in a closure.

William Irvine, head of long-term care for the Illinois Department of Public Health, said there have been about 150 decertification hearings in the last two years, but only four or five homes have been decertified.

Irvine said homes can be fined for violations only if they have been found guilty in a court. "In seven years, we have never been able to assess a fine," he said.

Citizens For Better Care, a Detroit organization, has suggested there should be alternatives to closure, such as a financial penalty, a ban on admissions until faults are corrected, medical receiverships, and decertification of a portion of beds in a home until standards are met.

Dr. Butler said the task of inspection is too big for the number of inspectors available. He suggested establishment of a voluntary inspection system by a national organization, what he called "a PTA for nursing homes."

"What a difference it makes if a family visits a patient," he said. "The home tidies her up because her daughter is coming. But 50 percent of the patients have no family.

"If a national organization would take this on, the nursing home operators would make improvements. The volunteers could do hair styling and grooming, take patients on trips, and inspect for fire and physical hazards. The homes might even find it attractive."

The Illinois Health Care Association in Springfield, an organization of nursing home operators, told The Tribune that the way to better nursing home standards is more money.

"Seventy per cent of the patients are on Medicaid, and with Medicaid reimbursing only $19 a day, the basic level of care suffers," said Lynn May, an association spokesman.

May was also critical of the diffusion of responsibility for control of nursing homes.

"We did a survey and found there were about 75 offices that had some regulatory powers," he said. "One will say one thing and that will be contradicted by another. We are thinking of pushing a bill that would establish one inspection agency."

Reporter Fritsch worked two nights at the Regent Plaza nursing home, 901 S. Austin Blvd., formerly called the Austin Congress. She described it as "depressing, dirty, understaffed, and poorly maintained."

Again she walked in off the street and was hired, this time after a two-minute interview with nursing supervisor Catherine Wilde.

On Fritsch's first night at work, Mrs. Emogene Gaines, a licensed practical nurse, sat in the entrance lounge and refused to begin work until learning whether anyone else was going to show up.

She said she was fed up with short staffing and had worked too many midnight shifts when she was alone on duty.

"Up till now they've been able to talk me into staying, but my family won't let me do it anymore. It's just too much work," she said. Eventually, three other employes arrived and Mrs. Gaines stayed.

When morning came, Fritsch was told to dress the patients. The men got undershirts, shirts, and pants—no undershorts. The women got T-shirts and dresses—no other underwear. Both got men's socks, which weren't in matching pairs.

One resident said that his daughter used to bring him shirts, but after he wore them once they would be put in a common laundry. "I'd see them on some guy down the hall later," he said. "I've been here for seven years, and I'd rather be dead than spend another seven years here."

Most patients needed baths before dressing, Fritsch said, "but I was told they only get baths once a week."

In many homes where Tribune reporters worked, the non-nursing staff was paid only the federal minimum wage, $2.65 an hour, for what is often back-breaking work. Nationally, nursing homes experience a 75 per cent turnover of staff each year.

Many doctors are evidently reluctant to work in nursing homes, perhaps because of the depressing atmosphere of most such institutions.

The American Medical Association has said: "Sadly, the one individual who can significantly upgrade the quality of patient care . . . and simultaneously improve the morale of both patients and staff absents himself from the scene. That individual is the physician."

More than 65,000 registered nurses are working in the nation's 23,000 nursing homes, but a Senate report says that "unlicensed aides and orderlies with little or no training provide 80 to 90 per cent of the care."

Although some staff members seemed indifferent to patients, Tribune reporters found no instance of outright violence against patients. And they heard some employes express sympathy for patients.

"I've been here two months, and I just don't know about these old folks," a janitor told reporter William Recktenwald when both were working for a chain of five homes in Cincinnati.

"They should have something for them to do. They ain't got nothing to do; they just sit and wait on death to come."

And violent abuse of patients does occur. Administrator Susan Moore, who interviewed Recktenwald for a job with Quality Health Services, Inc., in Cincinnati, told him: "We ha[illegible] had bad luck with orderlies here. The last one we hired raped a patient."

Recktenwald drove a small truck carrying food to the five Quality Health homes. Linen, often soiled with urine and feces, was carried at the same time.

The day after the homes' pharmacist reviewed patient records, dietitian Brenda Sheppard told Recktenwald: "I want every home to get extra orange juice. They need it to give medication."

An aide later explained to him: "It's that magic orange juice. The nurse puts some medicine in it, and the patients go to sleep. They are no trouble after that orange juice."

A Senate committee report in 1975 said tranquilizers and other drugs affecting the central nervous system constitute almost 40 per cent of the medication given in nursing homes. The purpose, it said, is to make patients easier to handle.

Because of a shortage of nurses, drugs often are dispensed by unqualified personnel. A Senate report estimated that 20 to 40 per cent of the medications are given in error.

The average patient gets four to seven kinds of medication a day, some of them more than once. In 1976 the average drug bill for nursing home patients came to $300 a year; for elderly persons who were not institutionalized, the average was $87.

Little concern is shown for patient privacy and dignity in some homes, the Task Force found.

At the Forestview Home in Cincinnati, part of the Quality Health chain, Recktenwald saw an elderly woman sitting naked in a wheelchair, trying in vain to cover herself with her hands as aides dressed her. The door to her room had been left open and the privacy curtains pushed aside.

Reporter John Gorman and photographer Frank Hanes witnessed a similar incident in the Lehrer Home, 4636 N. Beacon St., Chicago.

Still, the conditions in nursing homes appear to be better than those in some boarding homes for the elderly.

The boarding home industry mushroomed several years ago when state governments began transferring thousands of persons out of mental hospitals. This was largely an economy move; the states paid the full bill for hospitals, but care in boarding homes is financed by federal Supplementary Security Income benefits for the indigent.

In New York, Deputy Atty. Gen. Charles J. Hynes investigated boarding homes last year and found many residents living what he called "a drab, barren existence that often sinks to levels that offend basic human dignity."

Harold Gordon of the Maryland Health Department said there are "horrendous" conditions in his state's boarding homes.

"We have seen residents literally stuffed into attics, basements, and, in one case, a barn," he said. "We have seen food being prepared that I would be hesitant to feed my dog. We have had reason to believe that the operators of some of our worst homes were in fact stealing the residents' Social Security funds."

Neither nursing nor boarding homes, of course, are uniformly bad.

Fritsch worked one day in the Lake Shore Nursing Centre, 7200 N. Sheridan Rd., and described it as a clean, well-run facility that appeared to offer good care.

Recktenwald worked at the Maria Parkway nursing home in Cleveland, which had lost its certification earlier because of understaffing and unsanitary conditions. When he worked there, the home was under new ownership, a larger number of nurses and aides had been hired, and the staff was cleaning up the facility.

But reporters also visited homes where inspectors previously had cited violations and found the violations continuing, with no action taken by government authorities.

For example, the last annual inspection report on the Pleasantview nursing home in suburban Niles complained of understaffing, medications distributed by unlicensed personnel, and food equipment, walls, and floors in need of cleaning.

Fritsch worked at Pleasantview one day and reported a smell of urine permeating the facility, incontinent patients left sitting in wet clothes, roaches overrunning the women's shower room, and staffing problems.

A nurse told her that none of her aides had shown up the previous day.

A 1977 report on the Michigan Terrace Nursing Center, 3405 S. Michigan Av., told of staffing hardships due to high absenteeism; a male resident seen using the toilet while a woman was in the room; lack of observation of patients by nurses, resulting in frequent accidents; many patients in need of clean clothing; nine residents without shoes; and a roach in a water pitcher.

Tribune reporters who visited Michigan Terrace this year found an overpowering stench of urine in one room, an incontinent patient sitting in wet pants, and roaches in patients' rooms and food storage rooms.

There are scores of reports on similar violations at other nursing homes throughout the area. Some date back seven or eight years. They are filed in the Chicago HEW offices, and most are gathering dust.

[From the Chicago Tribune, Sept. 25, 1978]

THERE IS NO PRESSURE TO TREAT THE OLD PEOPLE BETTER

Many nursing home residents are left in their rooms with nothing to do all day, "like one more piece in a potato salad" and gradually withdraw into a private world as their self-esteem vanishes.

That description comes from Mrs. Lilo Salmon, who sees hundreds of the elderly in nursing homes in her capacity as program director for the Little Brothers of the Poor, 1658 W. Belmont Ave.

"When we visit these people, we ask them to draw a picture of something they would like to do," she said. "Many of them draw a picture of a house with smoke coming out of the chimney. Because that's where they would like to be—in a house, not a nursing home."

The overwhelming majority of nursing home patients are elderly women, most of them widows.

The median age of the patients is 80. About 96 per cent are white, and 60 to 80 per cent are poor. Seventy-two per cent are widowed or divorced. Only 12 per cent have a living spouse, and 16 per cent never married.

Eighty-five per cent of those who enter a nursing home die there. The average length of stay is 1.1 years.

Although only 5 per cent of the elderly population are in nursing homes at any one time, about 20 per cent of all old people eventually spend some time in one.

"I never met a person in a nursing home who liked the food," Mrs. Salmon said. "Not only is it bad, it isn't enough. They draw pictures of food.

"They sometimes draw pictures of people sitting around a table, friends. Very often all they need is a little hope. Consciously they really think there is nothing left for them but dying."

Mrs. Gisela Mengin, a group worker for the Little Brothers, said nursing home regimes encourage the elderly to become passive and dependent.

"When all their decisions are made for them—when to get up, when to eat, what to eat, when to bathe—this narrows their lives, and after a while they let the nurses make all the decisions for them," she said.

"Then it's disastrous. You see the degeneration as more and more of their decisions are taken away from them. They suffer the loss of self-determination, of self-worth, the loss of being successful in any way."

A survey by the National Center for Health Statistics showed that more than half of nursing home patients are confined to the premises, to their beds, or to chairs.

Twenty percent were thought to be in homes because there was no one to look after them in their own homes; 33 per cent were considered too hard to handle at home; and 44 percent needed permanent care.

About 55 per cent are mentally impaired, according to the survey, 45 per cent are often incontinent, and 59 per cent are unable to manage their income or spending money.

Mrs. Salmon said it takes more than meeting the legal requirements for space, cleanliness, and staffing to make a good nursing home.

"If there is no personal involvement, it can be a terrible place," she said.

When we take them flowers or some candy or take them on an outing, we see the beauty still left in these old people, and they light up, come to life."

Mrs. Mengin agreed. "Very often the people who run the nursing homes are much more concerned with fulfilling the government requirements than with caring for the human needs of the patients," she said.

"They feel the threat of the government to meet the law, but there is no pressure to treat the old people better."

JOHN GORMAN.

[From the Chicago Tribune, Sept. 26, 1978]

OUR "EXTERMINATORS" FIND NURSING HOME FILTH

(You don't find many early or primitive societies that treat old people as badly as civilized societies do.—Anthropologist Margaret Mead.)

"This is cockroach heaven," announced the young administrator of the Stratford Home, a boarding home at 4131 N. Sheridan Rd., as he led the extermination crew into the dining room.

"Behind the milk machine and under the sink in the kitchen there are thousands of them," he said. "When you turn the lights on at night, they're all over the place."

At the Bethune Plaza nursing home, 4537 S. Drexel Blvd., a nurse screamed as a mouse appeared in a doorway, and the mouse fled. "I saw a rat in the laundry basket last week," she said. "It was a big one." Large rat traps were all along the walls.

In Illinois, Ohio, and Michigan, Tribune Task Force reporters conducting an investigation of nursing and boarding homes—part of a six month examination of the problems of the elderly in America—found that thousands of old people are living amid almost indescribable filth in buildings overrun with insects and rodents.

"The Task Force Pest Control Co."—a bogus firm staffed by reporters carrying extermination gear and a photographer with a concealed camera—visited scores of homes to document the findings.

The extermination fluid they used to spray the homes was a harmless deodorizer. It was not completely useless, for many of the homes they visited reeked of urine.

Many nursing and boarding homes in Chicago are in the Uptown area, their squalor often in keeping with that of the surrounding neighborhood's burned-out apartment shells, boarded-up stores, vacant lots cluttered with trash and auto parts, walks and gutters littered with broken glass.

The boarding home industry in particular has thrived since Illinois began removing mental patients from state hospitals several years ago in a budgetary move to make them wards of the federal government rather than the state.

Uptown became a boarding home center because it was a deteriorating area where property could be bought cheaply.

So many former mental patients are jammed into Uptown boarding homes that it has been called a "psychiatric ghetto." The patients often sit on curbs or wander the neighborhoods, asking passers-by for money or cigarettes.

The Task Force Pest Control Co. offered its services to nursing and boarding homes as a free demonstration. Many administrators snapped up the offer eagerly, some saying that they had no regular extermination program—though state regulations require them to keep premises free of infestations of insects and rodents.

The Stratford Home is a four-story, brick-structure on the corner of a decaying Uptown block.

From "cockroach heaven"—the dining room—the Task Force crew made its way to the boiler room.

"When we turn the lights on in here, there are cockroaches and water beetles all over the place," said the administrator, Gary Mellman. "I've killed about six mice in here myself with traps."

Throughout the facility the crew found mouse droppings, open garbage cans, filthy floors, broken windows, bathrooms without toilet paper, and large holes in baseboards.

Several residents told of seeing mice in their rooms.

At Bethune Plaza, a converted old hotel on the South Side, a woman patient told of seeing roaches come through the windows.

"The other night they ran across Molly's bed," she said, referring to her roommate. "I'm afraid they are going to run into her mouth while she's snoring."

In a second-floor dining room there were food particles all over the floor. A nurse said many patients need help with eating, and the staff does not always clean up after them.

"I've got to talk to the administrator about this," she said.

As the Task Force crew stepped into a corridor at Bethune Plaza, reporters saw a young orderly grappling with an elderly patient, his hand in the patient's trouser pocket.

"Come on, gimme that dollar and I'll give you a shave," he said. Then, seeing the visitors, he quickly withdrew his hand and said, "Lend me a dollar, will you?"

A nurse said nothing to the orderly, although patients are not supposed to have to pay to be shaved.

The Regent Plaza nursing home, 901 S. Austin Blvd., was also visited by the "exterminators," and reporter Jane Fritsch worked there as a nurse's aide for two nights.

"The entire building, including the first-floor lobby, reeked of urine," she said. "The floors were dirty, and our shoes stuck to them."

She found cockroaches running through cracks in the walls where the molding had fallen away. Windows were filthy, and drapes were ragged, dirty, or missing.

A bathroom had no toilet paper or towels. The linen closets on all four floors were virtually empty. Floors were flooded from rain that poured through a leaking roof.

"Every time it rains, this place floods," one aide said. No one mopped up the water.

A large elevator had not been working for at least four months, according to a nurse. The lock on the front door was broken and there was no security guard in the building, which is just across the street from where a woman had been murdered several weeks earlier.

When the Task Force "exterminating" crew arrived at Regent Plaza, administrator Martin Baskin told them: "The place can always use a spraying—they [roaches] are all over the place."

On the fifth floor, the crew found a decomposing mouse beside a bed. A nurse said a nearby activities room was overrun with roaches and mice.

"I've caught two mice myself, and I've only been here for two weeks," she said. "But I'm leaving on Friday."

The crew also sprayed the Uptown Shelter Care Home, 4646 N. Beacon St.; the Lehrer home, 4636 N. Beacon; the Michigan Terrace nursing home, 3405 S. Michigan Av.; the Park House nursing home, 2320 S. Lawndale Av.; and the Hearthside nursing home, 1223 W. 87th St.

Conditions at all the homes were similar—filth in the rooms, mouse droppings and dead roaches on the floors. In one darkened room of the Hearthside home, the crew was almost forced back by the overpowering stench of urine.

In some homes, reporters learned, the staff usually knew in advance when an inspection was to take place. At those times, unsanitary conditions suddenly were cleaned up.

In Cincinnati, reporter William Recktenwald worked as a driver and janitor for the five homes in the Quality Health Services chain and found several of them filthy.

At that chain's Forestview home, he said, "We mopped floors that could not have been washed in weeks, if not months. Patients sit in their own wastes as the nurse works on charts."

At the Gardenview home, part of the same chain, there was a strong odor, floors were dirty, and dishes and silverware were unclean, In another home, roaches crawled across the dietitian's desk.

"We have a big cleanup to get ready for the inspectors," a janitor told him. "They hire extra people. You wouldn't recognize the place at inspection time; everything is bright and shining."

Citizens for Better Care, a Detroit citizens group formed in 1969, has been working for legislation to make it a misdemeanor for a state employe to inform a nursing home when an inspection is scheduled.

"However, they know anyway," said Doug Roberts, a staff member. "There is a grapevine going. Because the inspections are scheduled by computer, nursing home operators can get together and closely pinpoint the day of an inspection.

"What's bad about this is that they hire extra people, clean the place up real nicely, and then the state pats them on the back and says they are doing a good job."

Reporter William Gaines worked as a janitor at the Conner Convalescent Center in Detroit, where one woman patient told him she had broken her hip when she slipped in a puddle of urine three months earlier.

A visitor riding an elevator with Gaines complained of the smell in the home and said, "They must keep elephants here."

Gaines observed one man seated in the main hallway near the second-floor dining room with urine staining the floor beneath him. He was still there hours later.

State inspection reports examined by Tribune reporters at the Illinois Department of Public Health offices in Springfield showed numerous sanitary violations, many of them with no indication that any action had been taken.

"Bugs [ants] on stoves . . . poor staffing . . . roaches noted in and about kitchen . . . residents complained of no towels, no washcloths, and no toilet paper," said a report on Hamlin House, 6 N. Hamlin Blvd. The administrator is Julius J. Underwood.

"Staffing inadequate. Patients poorly groomed. No underclothing for women. Progress reports of doctor are minimal. No bedspreads on [some] beds, said a report on the Uptown Shelter Care Home.

"Food service personnel do not practice hygienic food-handling techniques. . . . Cook rinsed hands in sink that chicken was standing in. . . . Facility not implementing procedures for investigating, controlling, and preventing infection, said a report on the Drexel Home, Inc., 61540 S. Drexel Blvd.

In Cincinnati, a federal inspector said "sanitation deficiencies have always been present" during inspections of the Garden of Eden nursing home, and "attempted compliance is never good or complete. He concluded his report: "Condition of regular sanitation—filthy."

On June 8, reporter Fritsch wrote to the Chicago office of the U.S. Department of Health, Education, and Welfare in charge of nursing homes.

Giving only her name and address as identification, she wrote that she had visited the Michigan Terrace nursing home and had noticed the building was infested with cockroaches.

"I saw roaches along the baseboards, behind and in the night stands, and crawling up and down the privacy curtains," she wrote.

Not until almost two months later, on Aug. 2, did she get an answer from HEW. Her letter was forwarded to William A. Irvine, chief of long-term care programs for the state Department of Public Health, and he wrote to her Aug. 10 saying an inspection visit would be made at Michigan Terrace.

An official of HEW later told The Tribune that inspections usually take place within two weeks after receipt of letters such as the one from Fritsch. In this case, the official said, there was a backlog and Fritsch's letter was slow in making its way through the bureaucratic pipeline.

Nationally, many nursing and boarding homes are not only filthy but are firetraps as well.

The National Fire Protection Association in Boston said that in 1975, the latest year for which figures are available, there were 9,300 fires in boarding and nursing homes throughout the country—an average of 26 per day.

The U.S. House Committee on Aging has estimated that half of the nursing homes have no automatic sprinkler system, although the value of such systems has been shown.

Chicago has required sprinkler systems in such buildings since 1977, following the deaths of 23 persons in a nursing home fire. Federal legislation has been introduced to require them in all homes receiving federal money.

The congressional General Accounting Office estimates the cost of adding such protection at $250 million to $400 million.

How To Select a Nursing Home

When a member of your family requires the care of a nursing home, the most difficult problem you face may be to find a good one.

Former Sen. Frank E. Moss, 67, of Utah, who served 12 years as chairman of the Senate Subcommittee on Long Term Care and is co-author of the book "Too Old, Too Sick, Too Bad," offers this advice on how to select a nursing home:

Obtain a list of such homes published by state health departments, and eliminate from consideration those that are too far away to permit regular visits by family and friends.

Visit some of the homes that remain on your list. Make the visit between 7 and 8 a.m., when shifts change and breakfast is being served, or between 11 a.m. and 1 p.m., when you can observe the noon meal. A return visit at night also may be revealing. Be wary of homes that sharply limit visiting hours or refuse to let you see the entire home.

Observe whether the staff treats patients with kindness and respect and whether doors are closed and privacy screens used when patients are given a bath. Are patients' clothes neat and clean? Are the men clean-shaven, and have the women had their hair done?

Look over the physical plant. Is the building well-maintained, brightly painted, and free from odors of urine and feces?

Visit the kitchen. Is it clean, free of insects and rodents? Are those preparing the food wearing hairnets and clean aprons? Does the home have the services of a dietitian? Is the food appetizing and in adequate portions? Are snacks available between meals and at bedtime?

Look for an activities program; without recreation, a day in a nursing home can be unbearable. Is there anything for patients to do besides watch television? Do volunteers provide instruction in arts and crafts?

Some persons may also wish to view the state inspection records of a particular nursing home. To do so contact the state Department of Public Health or your local Social Security office to learn where the records are kept.—William Rectenwald.

[From the Chicago Tribune, Sept. 26, 1978]

More Care a Matter of Cash, Say Homes' Execs

Nursing home operators whose facilities were investigated by The Tribune generally acknowledged that they have some serious problems and said the solution to most of them is more money.

A few operators refused to talk to reporters about findings of The Tribune Task Force that their homes fail to provide adequate patient care or lack proper sanitation.

"Nursing homes are always going to be a problem," said Joan Hayden, administrator of the Conner Convalescent Home in Detroit. "The employes are low-paid and hard-working. They are always criticized; no one ever says, 'You're doing a good job.' "

She said staff pay is low because most patient care is financed by Medicaid, the government health insurance program for the indigent, and "Medicaid doesn't pay enough."

A similar comment came from Jacob Lustig, owner of five Quality Health Services homes in Cincinnati.

"We get patients here from Cincinnati General Hospital," he said. "The hospital gets more than $200 a day per patient, but we are expected to take care of them for $22 per day."

Whether such complaints are justified is a matter of controversy.

A staff study for the U.S. Senate Committee on Aging several years ago showed that most nursing home operators cut corners to maximize profits and that most were doing very well financially.

At that time, nursing home stocks were among the glamor issues of the stock market.

A New York state commission reported in 1976 that a nursing home could easily show a profit of 25 per cent or better each year while complying with federal and state standards.

A 1974 report of the federal Cost of Living Council said, "There is immense profitability in owning and operating nursing homes."

Citizens for Better Care, a Detroit organization, calculated before-tax profits for 147 Michigan homes in 1975 at 40.48 per cent.

The AFL–CIO, which surveyed nursing home conditions last year, found that about 100 private corporations control 20 per cent of nursing home beds. From 1969 to 1972, it said, these companies experienced a growth of 116 per cent in average net income.

Nelson Cruikshank, President Carter's chief adviser on the elderly, told The Tribune: "I don't think the nursing home is an appropriate place for private investment. In a profit situation, it is inevitable that managers will make choices between quality of care and the profit-and-loss account."

The AFL-CIO has recommended a gradual phasing out of private nursing homes operated for profit and their replacement by nonprofit homes, perhaps church-affiliated or government-owned.

Most operators contacted by The Tribune were frank in discussing problems the Task Force uncovered.

Mrs. Hayden acknowledged the accuracy of a report that a woman patient had slipped in a puddle of urine on the floor of the Detroit home and broken her hip.

"That has happened more than once," she said. "These things are going to happen when you let patients move around. We want them to be as independent as possible."

Lustig said he had recently observed some aides leaving the door open while they gave a patient a bath and had reprimanded them. "It can happen, but it is not our policy," he said.

He said that carrying food and dirty linen in the same truck, discovered by a Tribune reporter working for the Cincinnati homes, has been stopped.

Operators whose homes were infested with rats, mice, and roaches all said they have hired exterminators or are planning to do so.

Elliot Pure, owner of the Stratford Home, 4131 N. Sheridan Rd., said the rodent and roach problem has been aggravated by the fact that the city has razed a large number of buildings in the area. He said the city is not doing enough to exterminate pests that flee such buildings.

"The homes I operate are 500 times better than they were nine years ago," he said. "But they're 500 percent from where I'd like them to be."

Pure said his biggest problems are money and finding competent employes. "A home cannot be run on $14.27 a day, which is what the Department of Public Aid pays per patient," he said. "If they took away all the 'brick and mortar' regulations, we could provide more services for the patients."

Joseph Davis, owner of the Pleasantview home in Niles, said the short-staffing found in his home is a problem throughout the industry. "We try, but we can't find good help for that position [aide]," he said.

Asked about incontinent patients seen sitting in their own wastes, he said: "That irritates me. Understaffing is no excuse. You may clean someone up and then two seconds later they are wet again. We are constantly working to improve conditions."

Ralph Scorpio, owner of the Uptown and Lehrer homes in Uptown, blamed "negligence on the part of an aide" for an incident in which a woman in the Lehrer home was given a bath with the door left open.

He denied findings that some windows in the Uptown home were without screens and some windows were broken.

Jerry Morgan, assistant administrator of the Bethune Plaza nursing home, 4537 S. Drexel Blvd., expressed outrage when told that an orderly attempted to take money from a patient's pocket as a "tip" for shaving him.

"That sort of thing is never permitted," he said. "I'd like to know who was involved so action can be taken."

When asked about food scraps found on a dining room floor, Morgan said the kitchen and dining areas are cleaned three times a day. "There could have been a time when it was dirty, but it would have been a short time," he said.

He also said the home has hired an exterminator, adding, "We have problems getting the city to treat public areas nearby."

Ralph Goodpasteur, administrator of the First Church of Deliverance convalescent home, 4316 S. Wabash Av., who was accused in a state audit report of comingling patients' money with his personal funds, told The Tribune he knew nothing about that charge.

He also denied knowing about an order requiring him to refund some Department of Public Aid payments.

Operators who refused to comment were from the Hearthside nursing home, 1223 W. 87th St.; Michigan Terrace, 3405 S. Michigan Av.; and Regent Plaza, 901 S. Austin Blvd. WILLIAM GAINES.

[From the Chicago Tribune, September 27, 1978]

"NONPROFIT" FIRMS GET BIG FEES—THE WASTE IN HOME CARE FOR ELDERLY

(The manner in which a society behaves with its old people unequivocally reveals the truth . . . of its principles and its ends.)—Simone de Beauvoir, "The Coming of Age"

A federal program to provide home health care for the elderly is being abused by some private, not-for-profit companies under government contracts, a Tribune Task Force investigation has disclosed.

Reporters found that large sums of federal money do not go into services for old people, as intended, but are used for lavishly appointed office suites and high salaries and convention trips for executives.

The fees these not-for-profit companies charge the government for nursing services are often three to five times as high as those that companies operated for profit charge their private patients. Companies operated for profit are not permitted to bill the government for home health services.

The not-for-profit companies also charge two to four times as much per patient as do Visiting Nurse Associations, which have operated in the home health fields since 1889.

The not-for-profit firms investigated by The Tribune have all come into being as a result of 1965 legislation that created Medicare and Medicaid, the government health insurance programs for the aged and the indigent.

For these firms, the government is the only source of revenue. Medicare and Medicaid make funds available for home health care—in which a nurse or nurse's aide calls at the home and provides nursing services under a doctor's orders—as an alternative to nursing homes for old people who cannot care for themselves.

Properly administered, the program should cost taxpayers less than nursing home care while offering the elderly the advantages of staying in their own homes.

But the Task Force findings, from a six-month examination of problems of the elderly, raise questions as to whether such a program can operate effectively without better cost controls.

Tribune reporter Jane Fritsch worked as a nurse's aide for three private, not-for-profit companies as part of the investigation, and reporters examined hundreds of Medicare and Medicaid records.

They found that some companies encourage nurse's aides to short-change the elderly on time spent in their homes. One allows aides to squeeze four visits into five hours, and another permits six visits in eight hours. In contrast, the average visit of a Chicago Visiting Nurse Association aide lasts more than three hours.

The reporters also found questionable relationships between jointly owned not-for-profit and for-profit companies.

One administrator, who draws a full-time salary from a not-for-profit company, owns a for-profit firm that operates out of the same office and receives fees for consulting services to not-for-profit companies in various cities.

Another not-for-profit company uses its Medicare-funded facilities to provide services for a sister company operated for profit.

Some of the owners of not-for-profit companies refused to answer questions from Tribune reporters about their operations or were instructed by their attorneys to reply only in writing.

The owners are apparently accustomed to putting things in writing, for one of the primary reasons they give for their higher costs is the amount of paper work required.

Samuel Skinner, attorney for several of these firms and former U.S. attorney for the Northern District of Illinois, said a national study has shown that a home health company has to process 500 pages of documents, plus 600 copies, just to bill the government for $25,000.

In contrast, he said, hospitals need to process only 50 pages of paper for every $60,000 billed to Medicare.

Most of the owners declined to comment on the relationship between their costs and the lavish manner in which some of them operate.

One owner, Timothy Sullivan of Home Med-Care Foundation, 6549 W. North Av., Oak Park, blamed high costs on the paper work and on a lack of controls. "No one is concerned about costs because the sky's the limit," he said.

Nationally, Medicare expenditures for home health care are expected to reach $607 million this year, and the Medicaid program is expected to pay out an additional $164 million. The bills are likely to grow higher in the next few years.

Joseph Califano, U.S. secretary of Health, Education, and Welfare, has said his department will present to Congress next year a set of proposals designed to shift more spending from institutional to home care.

The only lid now imposed on the spending of the home health firms is what is considered "reasonable" by government-designated fiscal intermediaries, usually commercial insurance companies, according to Mildred Tyssowski, acting director of HEW's Medicare Bureau in Washington.

This lack of strict control is reflected in a comparison of 1977 rates charged by the not-for-profit companies, the Visiting Nurse Association, and three for-profit companies checked by The Tribune. A breakdown of the rates:

Skilled nursing: Visiting Nurse Association, $22 to $35 a visit; not-for-profit companies, $29 to $50; for-profit companies, $10.

Nurse's aide: Visiting Nurse Association, $6.26 to $7.70 an hour; not-for-profit companies, $9.41 to $18.14; for-profit companies, $4.50 to $5.25.

The firm at the top of the list in billings to Medicare in Chicago is Home Health Service of Chicago South, which has offices in the IBM Building. The company billed Medicare an average of $43.30 for a visit by a skilled nurse, and its total billings last year were $1.8 million.

Jules Furth, executive director of the firm, listed more than $800,000 in operating expenses in addition to those for salaries and fringe benefits for people in the field, automobile allowances, and medical supplies.

Thus, 44.6 per cent of the charges billed to Medicare went for operating expenses, leaving 55.4 per cent for patient care.

Furth, who also owns four funeral homes, pays himself an annual salary of $39,000 as director of the home health firm.

His records list $29,256 for automobile operating costs in addition to the $85,278 paid as car allowances for visits to patients; $4,836 for travel and conference costs; $2,315 for coffee and soft drinks; and $17,803 for "miscellaneous."

His office rent increased from $50,915 to $81,844 last year, when he moved from one suite in the IBM Building to another, although his volume of business increased only slightly.

Other rents for home health organizations range from $5,694 a year, paid by the Visiting Nurse Association of Evanston, to $42,997, paid by Home Health Service of Chicago North at 301 E. Erie St.

Furth's agency and several others studied by the Task Force are represented by Skinner. In their written replies to questions from The Tribune, the firms said their high costs result from the volume of paper work and from a need to have offices in the high-rent downtown area.

They explained their substantial billings for automobiles by saying the cars are needed to enable them to participate in community affairs and to work with community organizations.

The task force examined records of 11 private, not-for-profit companies for the most recent fiscal year and found that all charged Medicare an average of more than $1,000 a year for each patient served.

The Visiting Nurse Association's highest average per patient was only $424. The difference, the records indicated, was due to higher costs and to a greater number of visits to patients made by the not-for-profit companies.

Reporter Fritsch found that some companies apparently try to use as many as possible of the 200 visits allowed by Medicare for each patient.

At Home Health Agency of Olympia Fields, 2555 W. Lincoln Hwy., where she was hired as a nurse's aide, Fritsch was told that Medicare will cut off the home visits if a patient's condition stabilizes, "so one way is to never say your patient is stable."

Jonathan Geren, assistant administrator, later told The Tribune that the company follows this policy not for its own benefit but to maximize benefits for the patients.

However, The Tribune learned that Blue Cross, the government's fiscal intermediary with several Chicago-area home health organization, bases pay scales for administrators on the number of visits made.

The Olympia Fields agency had per-patient costs that were among the highest of the firms examined: $1,516 per year.

Fritsch also worked for Chicago Home Care, 1808 W. 103d St., a for-profit company that supplies home health workers to five not-for-profit firms on the South Side and in the south suburbs.

Mrs. Patricia Tinder, the owner, dispatches and pays the aides, and the charges for their services are then billed to Medicare by the five companies.

Aides were encouraged by Mrs. Tinder to complete their assignments as quickly as possible and go home early.

"If you are on the road by 8, you can usually be done by 1," she told the reporter. That would mean less than one hour for each of five visits, when travel time is considered.

Fritsch found that Home Med-Care Foundation, Sullivan's not-for-profit firm in Oak Park, assigned aides to as many as six visits a day. She accompanied a nurse who visited six patients in just under six hours.

Home Med-Care operates from expensively furnished offices, but offices of a for-profit company that Sullivan owns consist of little more than a phone in his brother's law firm.

An examination of the charges of the two companies showed that if an aide worked for the profit-making company for eight hours, the patients would be charged a total of $36. If an aide worked for the not-for-profit firm for eight hours, making six calls at Sullivan's average rate to Medicare of $32.32 a visit, the cost to Medicare would be $193.92—more than five times as much.

Elsewhere, The Tribune found offices and administrators of a not-for-profit company apparently serving a for-profit company that has the same ownership.

Fritsch applied for a job with Home Aid Nursing Service, on the third floor of an office building at 3525 W. Peterson Av. Mrs. Hortense Lefkovitz, the supervisor, interviewed her and then offered her a job not with Home Aid but with Healtharama, Inc., a for-profit company on the first floor of the building.

The not-for-profit company had lavishly furnished offices, but the for-profit firm proved to be a phone in the office of Sidney Weinschneider, founder of both firms.

The profit-making company charged a maximum of $5.25 an hour for nurse's aides in 1977; the not-for-profit firm billed Medicaid $13 an hour.

Weinschneider is the former owner of Oak Manor Nursing Home, 66 W. Oak St. He sold it last year, after the state held hearings and issued a license with a 90-day cancellation provision because of repeated violations in operation of the home.

Mrs. Lefkovitz, while representing Home Aid, had before her the file of an elderly Healtharama client and made a copy of it on the Home Aid copying machine. She also gave the reporter an envelope listing Healtharama as being located in the not-for-profit office.

Mingling of the facilities of not-for-profit and profit-making companies has been cited as a violation of Medicare regulations by U.S. Senate and House committees investigating home health agencies.

The committees said that Flora M. Souza of Los Angeles, who operated one of the largest home health services in the nation, had funneled overhead cost of several corporations through her Home Kare firm and hence to Medicare.

Committee investigators also said that Peter Gottheiner, owner of the California-based National Home Health Care, Inc., owed the government $804,655 in unresolved audit exceptions involving excess profits, use of luxury automobiles, excessive salaries, wages paid relatives who did not work, and charges to Medicare for liquor, tobacco and other expenses unrelated to patient care.

The Task Force found instances of franchising of home health companies with the firms paying a consulting or service fee from Medicare funds to the person who helped establish them.

One nationwide consulting firm is operated by John D. Hirn of Chicago. Although Hirn shows himself on records submitted to the government as devoting 100 per cent of his time to a not-for-profit home health company, The Tribune found that he operates the for-profit consulting firm from the same offices.

A study by a Detroit citizens group found that Hirn had helped to establish four large companies there that make regular payments to Hirn's for-profit company.

Hirn, who declined to answer question's about the amount and type of consulting services he provides those companies, is executive director of Home Health Service of Chicago North, Inc. His wife, Doris, is executive director of Suburban Home Health Service, Inc., Des Plaines.

Together they billed Medicare for $2.6 million in 1977 and provided $1.25 million worth of direct patient care. Hirn's bill to Medicare averaged $1,198 per patient, his wife's $1,747 per patient.

Hirn also refused to discuss a $39,265-a-year phone bill and $55,658 for cars that was listed separately from auto allowances paid his field workers.

But he offered a solution to the inefficiency evident in the program:

"Do away with all the regulations and have the patient's doctor determine if the service is sufficient as given; I can cut the bills in half and deliver three times as much service."

Blue Cross, as fiscal intermediary for several Chicago home health agencies, has attempted to bring spending in line by disallowing claims for some consulting fees and advertising. One was a $30,000 claim from Furth's company.

Attorney Skinner has filed suit in U.S. District Court on behalf of the companies, contesting the expense cuts.

Mrs. Tyssowski said the Medicare Bureau is concerned about high administrative costs and the proliferation of agencies, and her office is considering setting upper limits on the costs of certain services.

REPORTER POSES AS TRAINEE—"ON ROUNDS" WITH VISITING NURSE

The patient was a woman in her 60s who had had several minor strokes and now appeared to be suffering from pneumonia.

The nurse called at her home, saw that her condition was not good, and phoned the woman's doctor. An appointment to have a chest X-ray was set up for that afternoon.

The next patient was a bedridden, incontinent woman who was found to have the beginnings of a bed sore. The nurse showed the woman's daughter how to arrange the bed and a rubber tube to relieve pressure and instructed her on how to care for the sore.

The nurse worked for Home Med-Care Foundation, 6549 W. North Av., Oak Park, a private, not-for-profit home health company. Tribune reporter Jane Fritsch, posing as a nurse's aide in training, accompanied her on her rounds as part of an investigation of the operations of home health firms.

The routine Fritsch described gives a glimpse of the variety of tasks performed by nurses working for these companies.

The beneficiaries of their services are old people who are unable to live independent'y and would in most cases be forced to go into nursing homes if they did not receive such help.

Although The Tribune's investigation uncovered evidence that the government-financed home health program is being abused by some companies, Fritsch reported that most nurses and nurse's aides she met are competent and dedicated to their jobs, despite the modest pay they receive.

In one instance, an employee went back to a home after her work day was finished to check on a patient she was concerned about.

Home health care has had a relatively low priority in federal spending, but that may be about to change.

President Carter's 1977 welfare reform program, which is still awaiting congressional action, includes a proposal to create 200,000 public service jobs to provide home services for the elderly.

At present there are only 30,000 homemaker-home health aides in the United States, one-tenth the estimated need. England, with one-fourth the population of the U.S., has 60,000 aides, and Sweden, with a population of only 8 million, has 35,000.

About half of all American communities have no home health service agencies, and 70 to 80 percent of all home health care is provided by families of the patients. Provisions of Medicare, the government health insurance program for the elderly, tend to discourage rather than encourage use of home health services.

For example, an elderly person is not eligible for home health care reimbursements unless he has first stayed at least three days in a hospital.

Dr. Ethel Shanas, a University of Illinois gerontologist, is considered the nation's leading expert in this field. She cautions that an expansion of home care services, although necessary and desirable, is unlikely to greatly reduce the proportion of old people in nursing homes.

The reason, she said, is twofold: The tremendous growth in the population of those 75 and over, and the increase in the number of working women, which makes it impossible for many families to help look after older relatives.

Dr. Shanas described Chicago as one of the more successful cities in providing home services to the elderly.

Through the Mayor's Office for Senior Citizens, 1,125 persons receive home health and housekeeping assistance each year, at a cost of $1.2 million. Home care is one of the most popular programs the office conducts, and demand for the services far exceeds the available funds.

[From the Chicago Tribune, Oct. 27, 1978]

DAY CARE WITH DIGNITY: "TO FEEL YOU'RE NOT ON THE SHELF"

(By Ray Moseley)

Until she suffered a stroke nearly two years ago, Mrs. Karla Hawkinson was a strong, healthy grandmother who enjoyed looking after her 3-year-old grandson for her working daughter.

After the stroke Mrs. Hawkinson, 73, was worried that she might have to go into a nursing home. But a social worker at the Chicago Rehabilitation Institute told her about another possibility—the Accom-O-Day Center, a day-care facility for the elderly, at 7358 N. Greenview Av.

For the last 18 months, Mrs. Hawkinson has been a "member" at Accom-O-Day [the center shuns the word "patient"]. Five days a week, a car from the center picks up her up at her daughter's home and takes her to the center, where she spends the day getting physical therapy, chatting with other members, playing games, listening to lectures, and going on outings to such diverse places as the Chicago Public Library and Wrigley Field.

Mrs. Hawkinson arrived at Accom-O-Day in a wheelchair. Today she gets around with a cane and said she uses the wheelchair "only when I go bowling."

"I just love this place," she said. "To feel you are still active, and not on the shelf, is a wonderful thing. It's a great help when you are not a burden, and it's nice to be able to go home at night to my own furniture and my own family.

"When you get older, you need to be with your own things. It means so much. It's a lot better than being in a nursing home."

Accom-O-Day is one of only 11 day-care centers for the elderly in Illinois, four of them in the Chicago area. Many gerontologists believe that thousands of old people could be spared the indignities of nursing homes and could have happier, healthier lives if there were more such centers, which originated in England and are a relatively new concept here.

For taxpayers, a network of day care centers could mean savings of millions of dollars, inasmuch as they can be operated for much less than nursing homes.

"There are many people in nursing homes who don't need to be there," said Mrs. Suzanne Deiss, the 34-year-old director of Accom-O-Day. "There is no reason why we cannot provide for old people a community for living instead of their having to fight to survive."

Accom-O-Day opened nearly three years ago as a private venture charging $2 an hour or a maximum of $16 a day. Mrs. Weiss said the center has operated at less cost than similar not-for-profit operations but failed to make maney and has been threatened with closure.

However, the Illinois Department on Aging has tentatively promised a grant of federal funds, which would make the service free

for the elderly. Mrs. Weiss said she hopes to be able to expand membership from 22 to 55 with the grant funds and eventually get it up to 75.

All the members are persons who are unable to care for themselves alone because of either strokes or neurological disorders.

A day's program may include gourmet cooking, current events, a movie, creative writing, table games, and exercises. Members are taken on outings once or twice a week.

"This goal is to keep them as active as possible, to provide a stimulating environment, and to allow their dignity to remain intact," Mrs. Weiss said.

The other day-care centers for the elderly in Illinois:

The Berwyn-Cicero Day Care Center, 1447 S. 50th St., Cicero; the Chicago Department of Human Services center, 841 E. 63d St.; the Council for Jewish Elderly center, 1015 Howard St., Evanston; Brightside Adult Day Care Center, 920 Third Ave., Rockford; Day Care Program of Champaign County Nursing Home, 1701 E. Main St., Urbana; Day Care Center of Mennonite Hospital, 807 N. Main St., Bloomington; the Elders, 695 S. State St. Elgin; Geriatric Day Care Program of the Zeller Zone Center, 5407 N. University St., Peoria; St. John's Hospital Day Care Center, Springfield; and the Family Services and Visiting Nurse Association center, Alton.

[From the Chicago Tribune, Sept. 28, 1978]

GAPS IN MEDICARE TRAP THE ELDERLY

(Oh that I may meet Fate and death when I am 60, without disease and without sorrow.) Mimnermus, Greek priest, 630 B.C.

Before Mrs. Fannie Helman died at age 85 last May in a Niles nursing home, she ran up bills of $6,000. Her family had been assured that Medicare would relieve them of part of that burden.

But when the bills were submitted, Medicare ruled that Mrs. Helman had been placed in the wrong bed in the nursing home and so was not covered. The family had to pay the entire bill.

Mrs. Cecilia Page, 68, went into an Oak Lawn hospital for a gall bladder operation last year and came out with a bill for $2,116, including $1,500 for the surgeon.

Medicare sent her a check for $880, leaving $1,236 to be paid from her own pocket.

If you think these examples indicate that something is wrong with the nation's health care for its elderly, you are right.

In a six-month examination of problems of the elderly, The Tribune's Task Force found experts generally in agreement that the health care system is in serious need of an overhaul.

Although it has had a significant effect in reducing the proportion of income that the elderly must spend on health care, it has failed spectacularly to relieve the possibility that sickness in old age will bring financial disaster.

"A person going into retirement doesn't realize what a precarious position he is in," said 77-year-old Rep. Claude Pepper [D., Fla.], chairman of the U.S. House Committee on Aging.

"He may own his home and have $25,000 in the bank. If he has a heart attack and his wife has an illness, he may have to take out a second mortgage on the home, and his savings will be used up. Middle-class people don't realize how near to disaster they are. A few thousand in savings will go in a year."

With Americans living longer than ever before, disease and physical deterioration are common problems in later years.

The elderly account for more than 25 per cent of the nation's annual $140 billion health care expenditure. Eighty-six per cent of them eventually have chronic health problems, such as arthritis, hearing impairment, poor eyesight, hypertension, heart disease, or diabetes.

Almost 40 per cent of the elderly—9 million persons—are limited in their activities to some extent because of chronic conditions.

Heart disease, strokes, and cancer are the major killers of the old, accounting for 65 per cent of death in the 65-and-over category. Heart disease kills 1½ times as many as cancer and strokes together.

The average hospital stay for old people is 11.6 days, compared with 7.7 days for the general population, and they use 25 per cent of all the drugs prescribed in the United States.

One survey has shown that drug costs ranging from $200 to $1,000 a year are not uncommon among old people.

All of this would be burden enough, but many elderly people complain that in addition they are confronted by medical indifference. Many doctors apparently take less satisfaction in treating old people than in treating the young, whose ailments generally are cured more readily.

In parts of Western Europe, particularly Britain and Scandinavia, geriatric medicine—treatment of the illnesses of the elderly—is a well-developed specialty. In the United States, no medical school offers it as a specialty, and only a relative handful of doctors identify themselves as geriatric specialists.

Medicare and Medicaid, started in 1966, were supposed to relieve the elderly of most of their financial worries about health care. But the worries persist, and dissatisfaction with these programs is widespread.

"We have a confusing and expensive patchwork of financing systems that spawns an even more inadequate delivery system," said Joseph Califano, secretary of Health, Education, and Welfare, whose department administers the system.

Medicare is a health insurance program that provides hospital and medical coverage under Social Security for persons 65 and over. Medicaid, financed mainly by the federal government but administered by the states, covers medical bills of low-income families, and 40 per cent of its clients are elderly.

Costs of both programs have risen astronomically since they were initiated, and the programs are blamed for fueling inflation in health care costs generally.

Last year Medicare and Medicaid cost the nation $36.9 billion, and this year the costs are expected to reach $42.6 billion. The estimate for 1979 is $48.9 billion.

Between 1978 and 2025, according to Califano, the expenses of these programs are expected to increase in real terms more than 10 times—twice as fast as the increases in Social Security.

Despite the amounts being spent by government, however, the out-of-pocket health care expenses of the elderly are averaging more than $400 a year, higher than they were before the system was adopted in 1966.

And Medicare covers only 38 per cent of the health costs of the elderly, according to Sen. Lawton Chiles (D., Fla.), a member of the Senate's Committee on Aging.

The elderly are spending more than $500 million annually on private health insurance to supplement Medicare. Nearly 60 per cent of the nation's old people are covered by some type of private insurance, but some of the coverage is worthless—and few of the private policies provide coverage in areas that Medicare itself does not cover.

Medicare has significant gaps in areas of concern to the elderly. It doesn't cover prescription drugs given outside hospitals, hearing aids, glasses, dental care, and routine foot care. Nor does Medicare cover long-term illness.

"The people who made Medicare knew nothing about gerontology," said Robert N. Butler, director of the National Institute on Aging. "It's not what we need, but it's an important step."

Medicaid fills some of the gaps in Medicare but, as Pepper says, "You have to be broke to get Medicaid. What kind of insurance is that?"

To qualify for Medicaid, a person cannot have assets of more than $1,500. Many people, especially elderly widows, are forced onto Medicaid after spending their meager savings on health care not covered by Medicare.

"The Medicaid spend-down is anti-family, anti-woman, pro-poverty, and destructive of human dignity," Butler said.

Medicare presents another problem for the elderly. Its intricate regulations are hard to understand and often beguile them into thinking they have more coverage than they do. And most elderly persons never find out how much of their expenses Medicare will reimburse until after they have paid a doctor and submitted the bills, though there are ways to determine the costs before undergoing an operation or other major medical procedure.

An elderly patient can get the information by following these steps: Ask Medicare who the government-designated carrier is for your medical insurance [in Chicago, it is Blue Cross]. Then write to the carrier, give the name of your doctor and the service he is to perform, and, citing the Freedom of Information Act, request the prevailing and customary charges for that service.

The prevailing charge is the average of what all doctors in a given area are charging for a particular service; the customary charge is the fee that your doctor charges other patients he serves.

With that information, you can determine how much Medicare will reimburse you. It will be 80 per cent of the customary, prevailing, or actual charge, whichever is lowest.

Whether anyone has ever gone through this procedure is open to question. A Tribune reporter who telephoned Blue Cross and asked how much Medicare would reimburse for a gall bladder operation was told the information was not available, and he was not informed that he could obtain this information by writing a letter.

An example of how the unwary can be confused by Medicare provisions is the case of Mrs. Helman, who bequeathed her family a bill for $6,000.

Mrs. Helman, who had cancer of the tongue, was admitted to the Bethany Terrace nursing home, 8425 N. Waukegan Rd., Niles, after she suffered a brain concussion in a fall last January.

Her daughters, Mrs. Rosalyn Zelkin and Mrs. Anne Stein, believed she was covered by Medicare in the nursing home. They said the doctor who treated her for the concussion and a hospital social worker both had told them her condition was such that she would qualify for Medicare.

But Mrs. Zelkin learned otherwise in mid-March, when she submitted several thousand dollars' worth of nursing home bills to Blue Cross.

She found that her mother was not covered because she had been placed in an intermediate care bed, which essentially means custodial care. Medicare does not cover intermediate care; it pays for only those nursing home patients who require around-the-clock skilled nursing care.

"We were never told the difference between a Medicare bed and a non-Medicare bed," Mrs. Zelkin said. "I simply assumed it was a Medicare bed. All the indications were that she needed skilled nursing care. She couldn't even press the nursing button."

The average health-care bill for an elderly person is more than $1,360 a year, compared with $475 for the general population, and hospital and nursing home costs account for 70 per cent of that.

Under Medicare there is no premium for hospital insurance, but the patient pays the first $144 of hospitalization costs in a 60-day period ($160 after Jan. 1). In the unlikely event that hospitalization should last more than 60 days, the patient must pay $36 a day for the next 30 days.

Beyond that, he has a lifetime reserve of 60 additional benefit days in a hospital, but less than 3 per cent of Medicare recipients use their reserve days, for which the patient pays $72 a day.

The hospital insurance is financed by contributions from employers, employes, and the self-employed, and it is likely that contributions will have to be increased soon. Current projections indicate that the program will run out of money in 1988.

Robert Samuel, legislative assistant for the National Council of Senior Citizens, said doctors often are blamed for prescribing hospitalization so they can benefit financially.

This does happen, he said, but the reverse is also true: The doctor may put a patient in the hospital to save the patient money. This happens in cases in which the patient has only hospital coverage under Medicare and thus cannot get reimbursement for his doctor's bills unless he is in a hospital.

Margaret Person, a spokeswoman for the Chicago Metro Seniors in Action, said the lack of coverage under Medicare for out-of-hospital drugs also prompts some unnecessary hospitalization.

"If the doctor has any compassion at all, he lets a patient on Medicare stay in the hospital," she said.

Califano has estimated that as many as 100,000 elderly persons are in hospitals who don't belong in them, their care costing $2.6 billion annually.

Sen. Frank Church [D., Idaho], chairman of the Senate Committee on Aging, has said that amount would be enough to cover the cost of prescription drugs, glasses, hearing aids, and physical checkup for the elderly.

The medical coverage provisions of Medicare can be even more bewildering than those for hospital and nursing home care. An elderly person pays $8.20 a month for medical coverage [these premiums have gone up each year] plus the first $60 of his medical costs each year.

Once the deductible amount is paid, he is covered under Medicare for 80 per cent of all "reasonable charges" he may incur.

Many doctors agree to accept as their fee whatever Medicare decides to pay. But about half do not, and in those cases, the catch is in what constitutes a "reasonable" charge.

Many people mistakenly assume that 80 per cent of their doctor bills will be covered in every case. In practice, the reimbursement often is well below that, because Medicare defines a reasonable charge as the lowest of the three rates mentioned earlier—the prevailing, customary, and actual charges.

Cecilia Page had never been seriously ill before her gall bladder operation, so she did not know that the $1,500 charged by the surgeon was far out of line. Medicare allowed her only $667.50 for the surgeon's bill.

"I was shocked when I received the bill, but not really floored until I found out what Medicare allowed me," she said. "I didn't know anyone who had a gall bladder operation, so I didn't ask around."

Susan Phillips, public affairs officer for the U.S. Health Care Financing Administration office in Chicago, said patients should forget the old taboos about discussing money with a physician and should get a second opinion if surgery is recommended.

Medicare will pay for this second opinion and has embarked on a program to publicize that fact, she said.

To the elderly person who falls sick, Medicare officials may seem unduly stringent in what they allow, thus putting the financial pinch on him instead of on the public purse or the providers of health care.

"By cutting the amount they will pay, Medicare is not controlling rates. They are only regulating half of the industry, the consumer," said Tim Hughes, director of the Senior Legal Aid project of the Chicago-Kent College of Law.

Paul Riff, 66, a retired mailman who lives in Niles, is paralyzed from the chest down as a result of a fall in March, 1977.

Because the first floor of his home is 30 inches above ground level, he at first had to call the Niles Fire Department to help get him and his wheelchair inside the house. Two months after his accident, he had a lift installed in his garage to solve the problem.

"Before I had the lift installed, I called the Medicare people and asked if this would be reimbursable," he said. "And the girl there told me to send in the bill after it had been installed, not to worry about it."

Medicare, however, eventually rejected the entire $2,061.25 claim on grounds that the lift was a "personal comfort" item.

Riff argued that it was necessary to enable him to get in and out of his house, but Medicare said that "access to daily living is not a necessity" under its regulations.

Mrs. Irene Pinkos, 67, a West Side resident, said she visited or phoned 15 dealers to find a wheelchair at the lowest possible price for her invalid brother, Joseph Szczesny, 78.

She finally bought a demonstrator model for $468.30. With the addition of two special seats, plus a doctor's bill the claim she submitted to Medicare totaled $579.18.

Medicare paid a total of $88.64 in installments over an eight-month period, then sent her an additional $130.20 when she protested and provided information that had been lacking in her original claim.

Mrs. Pinkos still does not understand why she did not get back 80 per cent of the cost, inasmuch as the wheelchair she bought was more than $100 cheaper than any other model she priced.

Many critics of Medicare fault the program for concentrating on acute care and ignoring the prevention of illness. Regular physical examinations, for example, are not covered.

In his book "Why Survive?" Dr. Butler said that only 4 percent of annual health care expenditures in the United States go for prevention.

Preventive testing, he said, would save money, reduce disabilities, and prolong life. He noted, for example, that 3,500 Americans are blinded by glaucoma each year and said 3,000 of these could be spared if tested periodically.

Many see the answer to the shortcomings of Medicare in adoption of a health insurance program for the entire population.

President Carter promised to announce such a program this year, then postponed action until next year because of continuing disputes over it within his administration.

Nelson Cruikshank, the President's chief adviser on the elderly, predicted that Carter's program will include some negotiated fee schedules for doctors, who now can charge as they please.

Whatever its details, the program will be costly. Federal budget officials have estimated it may total $110 billion a year. Not all of that would be new expenditures, however.

"We are already spending $140 billion a year for health care," Cruikshank said. "It would be distributed differently, but it would come out of the same pockets. The opposition has convinced people it will be an additional $110 billion, which is not true."

FEW DOCTORS ATTRACTED TO GERIATRICS SPECIALTY

(By Ray Moseley)

The United States has devoted increasing attention in recent years to problems of the elderly, but it still is far behind many other industrialized nations in numbers of doctors who are specialists in the ills of old people.

None of the more than 100 U.S. medical schools offers a specialty in geriatrics, the treatment of the elderly.

"In many medical schools, geriatrics medicine is an elective course for the junior or senior student. But few are interested enough to choose it," said Dr. Charles R. Beber of Miami, president of the American Geriatrics Society.

"Physicians who stand up and identify themselves as geriatrics specialists are really just a handful."

To some degree, this may reflect a lack of interest in treating the elderly on the part of many doctors. They may get more satisfaction from treating younger people because they can usually see more immediate results.

"We don't put much value in people without a future," Berber said. "Doctors are people. They live with the same prejudices and myths that their brethren do."

Medical schools also contend there is not room in the curriculum for more specialties. It took a long time before pediatrics was accepted as a specialty, and geriatrics faces the same resistance today.

But in the long run, Beber predicts, medical schools will not be able to avoid it. "The perception of the population around us is that people want geriatrics," he said.

This is likely to be increasingly true as the percentage of elderly grows. Sir Ferguson Anderson of Glasgow, Scotland, a world-renowned geriatrics specialist, has said:

"If a young man wants to take up medicine, then he must ask himself . . . if he is interested in the elderly. If he is not, then he would be well advised not to become a doctor, because the numbers of old people are going to be such that most of his patients will be elderly."

In Europe, which has had a high proportion of aged in its population far longer than has the United States, geriatrics is well developed, especially in Britain and Scandinavia.

Scotland alone has more doctors who call themselves geriatrics specialists than does the entire United States, according to Robert C. Benedict, commissioner of the U.S. Administration on Aging.

Beber thinks that may be misleading. "In this country, a lot of old people are dealt with satisfactorily by people identifying themselves as internists," he said. "Doctors who are interested in the aged train as internists."

There is no credentials board to certify anyone as a geriatrics specialist in the United States. So how does a doctor become one?

"I guess you go out in the desert, put your hand on a rock, look up at the stars, and say, 'I am a geriatrist,'" Beber said.

He sees the geriatrics specialty developing around nursing homes and other chronic care facilities, with practices in these facilities changing radically as a result.

"Nursing homes have to reduplicate the community," he said. "They have to give patients the socialization, privacy, and peer group relationships they have in the open community. Medical and nursing care has to be in place, but it has to be in the background.

"The focus has to be that this is where people live, and what kind of neighborhood do you want them to live in?"

DISCOUNTS FOR THE ELDERLY AND WHO TO CONTACT FOR ADDITIONAL ASSISTANCE

FEDERAL TAXES

Besides the regular $750 exemption allowed a taxpayer, a husband and wife who are 65 or older on the last day of the year are entitled to an additional $750 exemption.

A further credit may be claimed if the taxpayer is retired under a public retirement system. This credit reduces taxes as much as $375 for single persons and $562.50 for married persons filing jointly.

A taxpayer who sells his home and doesn't replace it may exclude from gross income part or, under certain circumstances, all of the gain of the sale if he was 65 before the date of the sale and owned and occupied the property for the last 5 of the 8 preceding years.

If the adjusted selling price was $35,000 or less, the gain is not taxed. If over $35,000, the percentage of the gain that is tax free is determined by dividing $35,000 by the adjusted sale price.

Internal Revenue Service, 230 S. Dearborn St. Telephone: 435–1040.

(The IRS has a limited amount of financing for assistance to elderly taxpayers in the preparation of their returns.)

PROPERTY TAXES

Persons 65 or older in Illinois and who have incomes of less than $10,000 a year are eligible for property tax relief.

Illinois Revenue Department, 160 N. La Salle St. Telephone: 793–2990 or 641–2150, or the statewide toll-free number. 800–252–8972.

An additional exemption, called the Homestead Exemption, is available to residents who live in the house they own. Equalized assessed valuation is reduced by $1,500.

Cook County Assessor's Office, Homestead Department, 118 N. Clark St. Telephone: 443–6151.

STATE INCOME TAXES

Persons 65 and over who are required to file state tax returns receive an extra $1,000 exemption. Also, recognized retirement pensions are exempt from state income tax.

Lt. Gov. Dave O'Neil, Senior Action Center, 160 N. La Salle St. Telephone: 793–3333. Or, Illinois Revenue Department, 160 N. La Salle St. Telephone: 793:2990 or 641–2150 or statewide toll-free number, 800–252–8972.

RENT SUBSIDY

Some federal rent subsidies for persons 62 and older are available. Income requirements vary according to family size, and there is a long waiting list.

Chicago Housing Authority, 22 W. Madison St. Telephone: 791–8500. Cook County Housing Authority, 407 S. Dearborn St. Telephone, 663–5447.

HEALTH SERVICES

Some free health testing and immunization services are available through the Chicago Board of Health. Other health services are available on a sliding scale payment basis.

Chicago Board of Health, Richard J. Daley Center, 100 N. Dearborn St. Telephone: 744–4340.

CITY VEHICLE STICKER AND DOG LICENSE

Persons 65 and over in Chicago pay half price.

City Clerk's Office, 121 N. La Salle St. Telephone 744-6875.

BUILDING PERMITS

Persons 65 and over in Chicago pay half price.

City Building Department, 121 N. La Salle St. Telephone: 744-3420.

SIDEWALK REPAIRS

Persons 65 and over in Chicago get a 75 percent discount.

Bureau of Streets and Sanitation, 121 N. La Salle St. Telephone: 744-4537.

STREETS ASSESSMENTS

Persons 65 and over in Chicago who have been notified that they will be given new street assessments pay half the assessment.

Richard Chelotti, Bureau of Streets and Sanitation, 121 N. La Salle St. Telephone: 744-7350.

GOLF COURSES

Persons 65 and over may play at all Chicago Park District golf courses for half price between 5 a.m. and 5 p.m. weekdays and after 4 p.m. on weekends and holidays. Permits cost 50 cents.

Chicago Park District, 425 E. McFetridge Dr. Telephone: 294–2493.

The eight Cook County Forest Preserve courses offer a half price discount to persons 65 or older after they pay a $1 lifetime registration fee. Seniors may use the discount at any of the courses from 6 a.m. to 3 p.m. Monday through Friday.

Cook County Forest Preserve office, 536 N. Harlem Ave., River Forest. Telephone: 366-6383.

BUS, TRAIN, AND SUBWAY FARES

Persons 65 and over are charged half fare for all Regional Transportation Authority facilities. Passes are issued at 270 locations in the Chicago area. Photos needed for passes can be obtained for 50 cents at the Mayor's Office for Senior Citizens, 180 N. La Salle St.

Regional Transportation Authority. Telephone: 836-7000 or 836-4000. Suburbanites may call toll-free 800-972-7000.

AIR FARES

Congress has authorized reduced fares on a space-available basis for persons 60 and over who are retired and for all persons 65 and over.

Contact airlines and travel agents to find out which airlines offer reduced rates.

NATIONAL PARKS AND FEDERAL FACILITIES

A Golden Age Passport is available for lifetime use to persons 62 and over upon entry into any federal park. The pass admits the bearer and others accompanying him in a single, private, noncommercial vehicle.

Army Corps of Engineers, Room 564, 219 S. Dearborn St., Chicago 60604. Telephone: 353-6405.

STATE PARKS

For persons 65 and over, there is no charge for hunting and fishing licenses or for camping. Proof of age must be shown upon entering parks.

Department of Conservation, 160 N. La Salle St. Telephone: 793-2070.

MUSEUMS

All museums in Chicago are either free or have discounts for the elderly.

Contact individual museums.

RETAIL PURCHASES

A booklet, "The Pride Discount Guide," lists hundreds of retail stores that offer discounts on purchases to the elderly. It is printed and distributed by Bell Federal Savings.

The Chicago Metropolitan Area Senior Citizens, Senate, 721 N. La Salle St. Telephone 649-9080.

[From the Chicago Tribune, Sept. 28, 1978]

CHICAGO'S HELPING HANDS

(By William Recktenwald)

Chicago was the first city in the nation to establish an agency to assist the elderly: the Mayor's Office for Senior Citizens [MOSC]. Now in its 22d year, it offers the widest range of services of such city agencies in the United States.

The Department of Human Services, the city Board of Health, and the City Colleges of Chicago also offer special services to the elderly.

The major programs of the agencies are:

Nutrition—The MOSC operates 87 food service sites in the city, and more than 5,000 low-income elderly persons receive hot lunches daily through the program. Another 1,200 get home-delivered "meals on wheels." Recipients who are able to do so are asked to help offset the cost of the meals, but those who cannot pay receive them free. Telephone 744–3221.

Home Help—The MOSC provides assistance in housekeeping, light repair work, shopping, some meal preparation, and other household tasks for elderly persons who are unable to perform such duties. Recipients of the services are asked to share in the cost to the degree they can afford. Telephone 744–4016.

Friendly Visitors—The MOSC arranges for visitors to help homebound elderly persons in writing letters, placing phone calls, and other social activities. A special corps of nursing home visitors provides companionship and information to persons living in those facilities, where the visitors also observe standards of care and report on problems. Telephone 744–4016.

Elder Artisans—This program, funded by the MOSC, encourages persons 55 and older to use and upgrade their handicraft skills to earn added income. Their products are sold to the public and the proceeds returned to the artisans. Telephone 744–5734.

Foster Grandparents—Through this program, also funded by the MOSC, elderly persons provide care and attention to children in hospitals, day-care centers, and residential facilities for the handicapped. The program provides part-time employment for low-income persons 60 and older. Telephone 744–7300.

Legal Services—Law interns from Chicago-Kent College of Law provide legal counseling to the elderly on such subjects as preparation of wills, estate planning, consumer protection, the Illinois Crime Victim's Compensation Act, employment, housing, Social Security, and food stamps. Fees are on a sliding scale and are waived for those unable to pay. The MOSC funds the program. Telephone 744–4016.

Health Services—Some free health testing and immunization services are available to the elderly through the Board of Health; other health services are available from that agency on a sliding-scale fee schedule. The Department of Human Services gives assistance to those 55 and older in the purchase of wheelchairs, safety rails, walkers, and other prosthetic and assistive devices; eligibility is limited to those living in 14 community service areas, generally in low-income neighborhoods. Telephone Board of Health, 744–4340; Department of Human Services, 744–7396.

Home Maintenance—The Department of Human Services provides funds in the same 14 community service areas for building ramps, widening doorways, lowering cabinets, repairing gutters, painting windows, and installing door locks, window bars, and smoke detectors. Telephone 744–6717.

Shelter—Emergency shelter for persons 60 and older who are unable to find lodging because of physical, emotional, or financial problems is available citywide through the Department of Human Services. Also provided are food, personal articles, and moving and storage of belongings. Telephone 744–7396.

Education—Persons 65 and over who register at the City Colleges of Chicago on the late registration date may sign up free for classes that have room for them, if they have the necessary qualifications. They are also eligible for free adult education classes offering up to 5 hours of credit. Telephone 269–8233.

[From the Chicago Tribune, Sept. 29, 1978]

INSURANCE FIRMS THAT FEAST ON FEARS OF THE AGED

(Old age has no fixed term, and one may fitly live in it so long as he can observe and discharge the duties of his station.—Cicero, "On Old Age")

The car bounced along a rutted dirt road in eastern Tennessee, lurching past primitive log cabins and wooden shanties, set amid mountainside farmland and green valleys.

Harry Maddox, 55, crack salesman for Associated Doctors, Inc., an insurance company in Nashville, was out beating the bushes for elderly customers. Maddox was unaware that

the "trainee" salesman beside him was actually a Tribune reporter, William Gaines.

The territory seemed unpromising. But the mountains of eastern Tennessee are filled with old people, many of them worried about health costs and easily persuaded that they can buy protection for expenses not covered by Medicare, the government health insurance program for the elderly.

Before the day ended, Maddox would sell a health insurance policy to an aged backwoodsman so poor that he had no need for it—he already had 100 per cent coverage through Medicaid, the government insurance program for the indigent.

"I never say contract: I say it's an application," Maddox explained. "And I don't say I'm here to talk about your insurance. I say I'm here to talk about your Medicare and enroll you in our program.

"The other day, I was back in the hills and I went to this old woman's house and said, 'I'm here to enroll you.' She said, 'Praise the Lord. Praise the Lord.' "

Other people voice a less ecstatic reaction to this type of sales pitch.

Wisconsin's insurance commissioner, Harold R. Wilde, says that many salesmen are engaged in a "medi-scare" insurance racket, seeking to exploit the fears of old persons who suffer from poor health and have limited incomes.

"Countrywide, these problems add up to a multimillion-dollar ripoff of our senior citizens," he said. "They are nothing less than a national disgrace."

Robert A. Beck, chairman and chief executive officer of the Prudential Insurance Co. of America, said some companies are offering policies to supplement Medicare coverage that have unreasonably small benefits in relation to premium costs.

"Those few companies give a bad name to the whole industry," he said. "We have been lax, as an industry, in policing our fellow companies. . . . We should criticize them."

Few states have acted to curb the abuses. State insurance departments frequently are headed by former industry representatives, and consumer groups charge that many of them act more as protective associations for the industry than as guardian of the public interest.

The Tribune Task Force investigated "Medicare supplement" sales practices as part of a six-month examination of problems of the elderly.

Reporter Gaines worked as a trainee with the Tennessee firm and with Pioneer Life Insurance Co. in Illinois. He examined records showing that some insurance companies are paying less than 30 cents of every premium dollar in benefits for health insurance—compared with 63.6 cents paid by Prudential Insurance Co. and 55.6 cents by Mutual of Omaha under their policies for individuals. [The benefit return is higher in group plans, but most of the elderly do not qualify for such coverage.]

He found insurance salesmen masquerading as representatives of a senior citizens association to begin their pitch to prospective customers. And he watched as some salesmen persuaded old people to get rid of existing policies and buy policies they were selling.

Supplemental coverage has become a huge business in the 12 years since the enactment of Medicare, and it's the principal source of income for some insurance companies. The reason for its popularity is that gaps in Medicare coverage can leave elderly persons with large out-of-pocket expenses for medical care.

The U.S. Senate Committee on Aging estimates that 63 per cent of the elderly—nearly 14 million persons—have some private health coverage for hospital care alone, and up to 55 per cent, or 12 million, have supplemental coverage for doctors' bills.

"Some [insurance salesmen] have represented themselves as federal employees of Medicare and suggested that Medicare will cover a lot less than is actually the case," said Sen. Lawton Chiles [D., Fla.], a committee member.

But sales can also be made without pretending to be a government worker, as Harry Maddox showed.

After manuevering his car up a rocky creek bed and onto a dirt road, he saw an old man in his yard. Maddox slowed the car and waved.

"I'm Harry Maddox from Associated Doctors," he said. "Dr. Garber sent me to ask you about your Medicare. Do you have your Medicare?"

The old man, who gave his age as 72, said he had Medicare and Medicaid.

"Let's go inside and I'll explain what Dr. Garber has approved for you," Maddox said.

Dr. James Garber was the founder of Associated Doctors. Although his name presumably meant nothing to most prospective customers, Maddox invoked it routinely. [Dr. Garber died Aug. 20, about four months after Gaines toured the Tennessee backwoods with Maddox.]

When Maddox talks with prospective customers, he does not mention that Associated Doctors is an insurance company. Louis "Buddy" Fortune, his boss in Nashville, had told Gaines earlier about the magic appeal of the name.

"It's like the doctors at the hospital are offering this thing," he said. "It removes the idea that some outside organization is involved."

Once seated in the old man's tumbledown shanty, Maddox acknowledged that the man had 100 per cent coverage under Medicaid. But Dr. Garber's plan, he explained, does not pay money to hospitals or doctors; it would provide "living expenses" if the man had to go into a hospital.

The old man's eyes lit up as Maddox dangled before him the prospect of "earning" $15 for every day spent in a hospital.

Soon he was hooked as surely as the dried worms on two fishing poles in a corner of the cluttered room; he agreed to buy a policy and to pay $43 for the first three months.

Later, at the home of a 78-year-old widow down the road, Maddox learned that she already had coverage with Pyramid Life Insurance Co. He tried to persuade her to get rid of that policy and buy his—a sales tactic barred by Tennessee law—but she refused.

It was not the best of days for Harry Maddox. He tried to find three old people who had answered a mail brochure offering free place mats—an inducement used by Associated Doctors to find prospects—but gave up after crossing a muddy field and tripping over an electrically charged wire.

"They just wanted the free place mats," he muttered, "I never give anybody the place mats. If they ask what happened I say, 'Why, didn't yours come in the mail?' "

"Buddy Fortune, his boss, doesn't have to rely on place mats. "When I'm out of leads, I look through the phone book for old names," he said. "You know, like Lulu and Ella."

The elderly people who buy Associated Doctors policies apparently do not have a clear idea of what they are getting.

Records in the Tennessee Insurance Department show that only 22.7 cents of each dollar a person in that state pays for accident and health insurance is returned in benefits by the company. Nationally, Associated Doctors policyholders get back 32.3 cents on the dollar.

Associated Doctors advertises that it pays up to $300 per operation. But a look at the policy's fine print showed that the only way anyone can collect this much is by having cranial brain surgery—an operation that could cost more than $1,500.

Associated doctors also says its basic plan covers hospital charges not covered by Medicare. But a person would have to be in a hospital more than 60 days to collect for any charges beyond the $144 Medicare deductible [$160 after Jan. 1], and the average hospital stay for a person over 65 is 11 days.

Salesmen push a provision that prescription drugs are covered, but the policy limits drug payments to $50 and calls for a $10 deductible.

After completing his work as a trainee, Gaines identified himself to Associated Doctors officials as a Tribune reporter and asked about the firm's sales tactics.

Thomas Campbell, assistant executive officer, said the company has never had a complaint about any of its salesmen using unethical practices.

He said he would not condone attempts to persuade old people to give up existing policies and buy Associated Doctors policies.

When asked why the company pays only $300 for brain surgery, Campbell said, "That is the price our actuaries set, and we have no control over what a doctor will charge."

Health insurance policies have become the most frequent subject of complaints received by many state insurance departments.

New Jersey recently charged 71 companies with selling policies carrying unreasonably small benefits in relation to premiums. Several years ago, Florida recalled more than 50,000 such policies, and only 18,000 qualified for reissue.

Insurance departments have listed these major problems with private health coverage: duplication of coverage; policies specifying flat dollar amounts of payment, without regard to rising costs; long waiting periods before protection begins; refusal to pay claims on grounds that the claimant suffered from a "pre-existing condition" when the policy was bought; and misleading advertising.

In Peoria, Gaines took a trainee position with the Ted Wurschmidt and Associates Agency, which represents Pioneer Life.

Wurschmidt, a former magazine sales crew chief, and his agents travel from town to town in rural Illinois, working out of motels. He explained that they get their leads on prospective customers through the Illinois Association of Senior Citizens, a not-for-profit corporation with 30,000 members that operates from a basement office in Peoria.

The relationship between Pioneer Life and the association is mentioned in the company's sales brochures, which explain that Pioneer pays the association for advertising space and solicits members for the association. Pioneer has a similar arrangement with a senior citizens association in Arizona.

The American Association of Retired Persons has much the same kind of tie-in with the Colonial Penn insurance company, a relationship that has inspired controversy on a national level. Some AARP members and a former officer have charged that AARP is only a "front" for Colonial Penn in selling its policies.

While posing as a trainee with Pioneer, Gaines sat in on a session in which Wurschmidt instructed his new salesmen in their work.

Wurschmidt told them to make use of the fact that prospects have joined the Illinois Association of Senior Citizens to help the salesmen "get in the door."

"It's the best possible presentation," Bill Taylor, one of his salesmen, said later. "I say I'm working with the senior citizens association. I ask to see their policies, then I get rid of those and sign them up for ours."

Taylor said there is no limit on how much he can sign. "I signed one man and his wife for a $3,400-a-year premium," he said. "When

I tell them I've got information direct from Medicare, that's when they start listening."

Wurschmidt said old people are easy to sell because they are lonely and like having someone to talk with. "They trust us. It doesn't matter what policy you are writing; if they like you, you could sell them Hong Kong Mutual," he said.

Gaines went out with salesman Lynn Syrdale to see how the pitch worked as Syrdale called on a retired Caterpillar Tractor Co. employe and his wife in Bloomington.

"Hi! I'm Lynn Syrdale. I'm working with the senior citizens association, and I have this membership application you sent in," he began.

Syrdale did not identify himself as a Pioneer salesman; he talked about the association and then said: "We also have some health benefits. We have a plan that will pay 100 per cent of the actual charges. There is no limit." [Insurance experts say no private plan fills all of the gaps in Medicare.]

The Bloomington couple had a Metropolitan Life policy obtained through Caterpillar. The wife said her husband had had some serious illnesses for which all of the bills had been paid by insurance, but Syrdale convinced her she could use more coverage.

After leaving the house, Syrdale told Gaines: "Most other guys would have given up when they found out he had Caterpillar. It's the best insurance around, and they probably won't need more insurance than that. But he's been sick, and she's worried."

Later, back at the motel, he boasted of his accomplishment. "How'd you like that presentation?" he asked. "Did you see how well it worked? They don't know what's happening until we slam it to them and then it's too late."

Last year, Pioneer paid more in commissions to salesmen than in benefits to policyholders, according to Illinois Department of Insurance records: 37.1 cents on the dollar to policyholders, 38.2 cents to salesmen.

When Gaines identified himself as a Tribune reporter to Pioneer's president, Peter Nauert, and asked about those figures, Nauert said they were misleading.

He said that many of the firm's policies were new, and thus a greater payout could be expected in subsequent years.

When asked about Wurschmidt's advice to trainees to use the association to "get in the door," he said that such a practice is against company policy.

Although Wurschmidt was sending out salesmen with names of prospective customers obtained through solicitation of membership in the association, Nauert said that practice had been forbidden.

He acknowledged, however, that salesmen were allowed to explain the benefits of the association and sign up new members as they solicited sales.

Clarence Reardon, founder and president of the association, said the organization has had few complaints about Pioneer.

Wurschmidt said his salesmen do not claim to work "for" the Illinois Association of Senior Citizens but say they work "with" the association. "That was the approach approved by the state Department of Insurance," he told The Tribune.

But Philip O'Connor, assistant to the Illinois insurance commissioner, said no such approval had been given Pioneer. "We are concerned about that kind of sales approach," he said.

In Atlanta, Gaines sought employment with Bankers Life and Casualty Co. agent Dwight DeLaPerriere, who told him there are more elderly prospects in the area than his company can handle.

"We give them the mirror test. Do you know what the mirror test is?" DeLaPerriere asked. "We put a mirror up to their nose, and if they are breathing we sign them."

Mrs. Lucille W. Lowry, 76, a widow who lives in the Otterbein Home, a Methodist retirement home near Lebanon, Ohio, has had much experience in dealing with Bankers Life salesmen.

They started calling on her in mid-1975. They talked with her, she said, showed her photos of their families, and drank Kool-Aid and coffee with her.

Sometimes three men would visit her together. From mid-1975 until April, 1977, they sold Mrs. Lowry 16 policies—eight for health and eight for life insurance.

She already had two life policies, bought in 1959 from another firm and each carrying an annual premium of $1,776. Her new policies brought her premiums to $12,790 a year. Her annual income was $13,428.

"I just didn't realize what was happening," Mrs. Lowry told a Tribune reporter. "They were such nice boys. . . . I'm just so embarrassed by this whole thing."

Fortunately for Mrs. Lowry, one of her sons found out about the policies and filed complains with state insurance authorities and the Senate Committee on Aging.

Bankers Life, expressing regret, apologized to Mrs. Lowry and her son, refunded the premiums, canceled the policies, and said it had dismissed an agent who forged the signatures of both Mrs. Lowry's sons on an application.

How to Buy "Medi-Gap" Coverage

(By William Gaines)

The elderly are presented with a bewildering array of health insurance plans purporting to fill the gaps in Medicare coverage.

There are many pitfalls in buying such insurance. Here are some tips from experts on what to watch for:

Make sure the policy does not exclude from coverage the same things Medicare will not cover—out-of-hospital prescription drugs, most nursing home care, routine physical examinations, eyeglasses, hearing aids, and dental care. Most so-called "Medi-gap" policies do not cover these expenses, warns Elizabeth Hanford Dole, a member of the Federal Trade Commission.

Don't buy insurance for protection from the initial deductible amounts you are required to pay under Medicare. It's a better investment to protect yourself against catastrophic illness, Dole said.

Check the policy's waiting period. Some policies will cover new illnesses after just 80 days, but others have waiting periods of as long as six months before certain diseases are covered, according to Herbert S. Denenberg, former Pennsylvania insurance commissioner.

Equally important is the exclusion for an illness that existed before the insurance was bought. If the exclusion runs for more than one year, don't buy the policy, Denenberg advises.

If you have Medicaid, the government health care program for low-income people, you do not need any private health insurance, said Harold Wilde, Wisconsin insurance commissioner.

Don't replace an existing insurance policy with another because you think it is "out of date." Switching policies may subject you to new waiting periods and new exclusions.

Shop for insurance from various companies and buy the most complete coverage from one, rather than buying numerous policies that may give duplicate coverage.

Judge a policy on its worth and on your need, not on the approach of the salesman or the endorsement of a club or association.

The "Brothers"—A Last Resort For Aged Poor

(By John Gorman)

The Rev. Aaron Montgomery sat on his front porch in a rundown section of the West Garfield neighborhood, wondering where his next meal would come from.

He had last eaten three days earlier.

Although he owns the two-flat building in which he lives, the Rev. Mr. Montgomery was deeply in debt as a result of deadbeat tenants, mounting utility bills, and property taxes. At 75, he was down and out; he began praying.

"I didn't know what to do, so I turned to the Lord," said the semi-retired Baptist minister. "And Lord Almighty, He answered me."

Without advance notice came a visit from a young man who brought a box of food—not just bread and butter, but delicacies: imported ham, shrimp, small boxes of cheese.

The young man was a worker for the Little Brothers of the Poor.

Year after year, similar scenes take place throughout the Chicago area. In scores of cases, the Little Brothers are the last resort for the elderly poor. Often they make their visits on the recommendation of an anonymous neighbor, which was how they had learned of the Rev. Mr. Montgomery's troubles.

The Little Brothers, a not-for-profit organization, are not affiliated with any church. Operating out of a modest storefront at 1658 W. Belmont Ave., they are financed through donations, bequests, and an antique sale held every other year.

They receive no government money and answer to no one but those they serve, providing food, transportation, homemaking services, and companionship for the elderly poor without charge.

At two resorts—one on a farm near Rochelle, in western Illinois, the other at Lake Delavan, Wis.—the Little Brothers also provide vacations in the country for hundreds of old people who otherwise might be shut in all year in dismal Uptown transient hotels, squalid Englewood apartments, or depressing nursing homes.

For most of the year, Mrs. Ada Rodgers, 82, lives in a one-bedroom apartment at a Chicago Housing Authority project on the West Side. For two weeks this year, she was a guest at the Rochelle resort. As she relaxed on a lawn chair and watched other elderly guests playing with a Frisbee, Mrs. Rodgers said of her hosts:

"They are so nice to us. It's hard to believe. They never complain about anything, never get mad at anything. Always bringing you something nice. There's no one like them."

[From the Chicago Tribune, Sept. 30, 1978]

Cell Processes Under Study: Scientists Eye "Vaccine" Against Aging

(Every man desires to live long, but no man would be old.—Jonathan Swift)

Baltimore.—Some day scientists may put together an "aging cocktail," a vaccination against getting old that will allow people to live about 200 years.

And some day, if the scientists come to understand the mystery of why human cells age, they may find a key not only to extending the lifespan but to curing cancer, reducing hip fractures in the elderly, and starving off senility.

. In no other country is so much effort being devoted to unraveling the secrets of aging, and most of the U.S. research is being done in the National Institute of Aging's laboratories here.

The average number of years a person can expect to live has increased dramatically in the last 200 years. At the founding of the American republic, 20 per cent of the population lived to be 65 or older; today, 80 per cent live that long.

But, as Dr. Robert N. Butler, director of the institute, notes, "In all human history we haven't changed the lifespan"—that is, the maximum term of life. It remains somewhere around 100 years, although there are people who live longer.

The institute is looking into possibilities of extending the lifespan, but its primary

emphasis is on finding ways to extend the healthy middle years of life.

It is spending $37 million this fiscal year for research on aging, and it has a long way to go before it comes up with definite answers. "We are where the National Cancer Institute was 25 years ago—just at the beginning," said one research specialist.

Even in its infancy, however, the program is dealing with some fascinating possibilities.

Dr. Richard G. Cutler heads a group trying to find out whether there is some underlying cell process that causes the body to age.

"If you can cure heart disease and the other major killers, you will succeed only in increasing life expectancy," he said. "You will extend old age, but you won't extend youth.

"To significantly extend health, you have to slow down the whole aging process. The only hope for that is to find the underlying process. If we can find it, it probably will mean an increase in the lifespan."

Cutler believes the aging process is a by-product of interference with the genetic apparatus of cells by unstable molecules called "free radicals." He suspects that the free radicals can cause cells to lose their original properties, thus producing aging.

There is an enzyme, or protein substance, in cells that can rid them of free radicals. There is also a mechanism that can repair damage to the cells' genetic material.

Thus the key to slowing or preventing cell aging may lie in increasing the enzyme and genetic repair levels, Cutler said.

"We are working on the idea that you may be able to fool the organism in the same way that a vaccine fools it into thinking it has an infection," he said. "Thus it might be possible to inject into the body some age components that will fool the organism so the enzymes are turned on. In effect, you would put together an 'aging cocktail' and have a vaccine against old age."

Cutler said he doubts that it would be possible to extend life indefinitely, but "doubling the lifespan potential is a reasonable objective from what we know."

Man begins to deteriorate at about age 30, he said, and it is realistic to think this could be delayed to 40 or even 50."

But Cutler views the possibility of a considerably longer lifespan with some apprehension. "I'm worried that if you have 150-year-old individuals you will run into health problems never faced before," he said.

The subject is fraught with controversy. As Cutler's boss, Dr. Butler, put it: "Many policy-makers are horrified at the thought of extending life. Others clearly would love to live longer."

Already, Butler noted, increased life expectancy has led to "numerous . . . dislocations that have left many elderly in poor health, with little money, and with low social status."

University of Chicago gerontologist Robert Havighurst and Gerontology Society President George A. Sacher have forecast that an extension of the lifespan probably would result in an increased need for health care and services.

The healthy early and middle years of life would be extended, but so would the period of declining health. Havighurst and Sacher believe that arthritis, rheumatism, and failing eyesight, among other ailments, might increase as people live longer.

But the research on aging could also lead to treatment of a more serious disease, according to Butler.

"If we can understand how a cell ages enough to extract the chemical related to it we might be able to apply it to cancer," he said. "We don't want to kill all cells, only the cancer cells. If we could find ways of reaching the solid tumors—we have had less success with these than with other forms of cancer—we could selectively age the cancer cells."

Cutler contends the incidence of cancer could be reduced if aging could be controlled, inasmuch as people become more susceptible to cancer with age.

Other research being done at the institute on problems of old age, such as broken hips and senility, could save billions of dollars in health costs if successful, Butler said.

He estimates that senile dementia afflicts about half the people in nursing homes, where the cost of maintaining them is about $6 billion a year. If spared the affliction, he said, most of them could remain in their own homes.

Butler also said there are 200,000 hip fractures among the elderly each year, resulting in medical bills running to $2 billion.

Dr. Edward L. Schneider of the institute is working on cell model systems that he hopes will lead to solutions to such problems.

He has taken bone from a young animal and treated it to turn it to powder. The powder is put into another young animal, and in two weeks it is converted to new bone.

Schneider is beginning to try the experiment with older animals to see if the same process occurs. The results could be useful in finding a solution to osteoporosis—the gradual loss of bone that occurs in women as the age, making them especially susceptible to fractures.

Schneider also is attempting to learn, with the use of cell models, why enlargement of the prostate occurs in almost all men by age 65.

Another subject he is investigating is Downes syndrome, or mongoloidism, which occurs mainly in children born to older mothers.

Each year 8,000 children are born in the United States with Downes syndrome, and they live an average of 30 years. It costs $3 billion a year to care for them.

When the mother is as young as 14, there is only a 1 in 2,000 chance of producing a child with Downes syndrome. For a woman of 45, the observed risk is 1 in 20.

"It was long thought to be due to maternal age," Schneider said. "Now there seems to be a possibility that it is due to the age of the father as well."

Schneider is working with mice to study Downes syndrome, and he is looking at abnormalities in human sperm to determine if these could be a factor.

"A lot of money is spent on prenatal diagnosis, but that is not a cure for the problem," he said. "The end result of our research will be prevention. For example, if we find that Downes syndrome is caused by a virus in the sperm, there could be a vaccine against it."

Dr. Reubin Andres, clinical director of the institute laboratories, is approaching the study of aging from another direction.

Twenty years ago, a group of retired scientists living in an area called Scientists Cliffs on Chesapeake Bay, not far from Baltimore, offered themselves as subjects for a study. They also recruited relatives and friends, and now there are 650 participants, ranging in age from 29 to 90.

They enroll for a lifetime and come to the laboratories every year or two for an exhaustive series of physical and mental tests.

"We are not studying older people and their diseases. Our emphasis is on understanding the nature of the whole process of getting old," Andres said.

"If you had a group of people all 70, it would represent an enormous diversity of biological age. Some would be in great shape—intellectually sound, physically healthy and active. Others would be already on the waste pile, essentially—physical wrecks, intellectually ruined, lonely, and sick.

"We would like to know if these things are predictable when a person is age 20 or age 60."

One tentative finding: Medical tables on desirable body weight may be inaccurate, especially for old people.

"If you are hypertense, diabetic, or have coronary disease, pulmonary disease, or osteoarthritis, you probably shouldn't be excessively overweight," Andres said. "But if you don't have those and you creep up 25 percent on those tables, there is no evidence that this will shorten your life."

Researchers also have found that old people resemble diabetics in results of blood sugar tests. "Are they becoming diabetic, or is it a different process?" Andres said. "The evidence seems to be that there is a difference between the mechanism of aging and that of diabetes."

Some conclusions from the study should become available in the next two years, he said, but the study is likely to go on indefinitely.

He wants to explore the reasons why whites live longer than blacks, why white-collar workers live longer than blue-collar workers, and why women outlive men.

"On risk factors, women do worse than men," he said. "They are fatter. Their lipid [blood fat] levels are higher. Their glucose [blood sugar] level is higher. They don't smoke as much, but they are catching up. They are starting to approach men in lifestyle. Yet the difference in longevity is increasing rather than decreasing."

A few years ago, University of Chicago gerontologist Bernice L. Neugarten conducted an inquiry among leading biological researchers and found that the overwhelming majority did not expect dramatic changes in the lifespan in the next few decades.

Instead, they forecast breakthroughs in disease treatment that will produce a slow but steady increase in life expectancy.

But even a small increase in life expectancy can have dramatic effects. For example, a 2 percent reduction in mortality would increase the elderly population at the turn of the century by 34 percent over present expectations.

Achieving such a reduction in mortality, Neugarten said, will depend on improved health practices, including reductions of atmospheric pollution, cigarette smoking, and consumption of foods likely to cause heart disease.

The major killers of the elderly are cardiovascular disease and cancer. If these diseases were cured, Stanford University gerontologist Leonard Hayflick estimates, up to 20 years of additional life expectancy could be attained.

Butler is more conservative. He said a cure for heart disease theoretically would add 11 years to life expectancy, but "this increase is only theoretical because the elimination of one disease would leave people vulnerable to others."

A more realistic estimate, he thinks, is that eradication of heart disease would add four years to life expectancy.

Hayflick mentions one novel way in which humans could increase life expectancy, but it is not likely to win much acceptance.

That is to reduce caloric intake to such a level that undernutrition—but not malnutrition—occurs. Longevity can be increased by as much as 50 percent in animals placed on such a diet, he said.

"But no human has ever undertaken it," he said. "For most people, the quality of life is more important than its quantity."

RETIRED AT 95, INSPIRING AT 105

(By Ray Moseley)

Morris Weisman has lost most of his sight, but he still walks to a synagog every Saturday for services.

His step may not be as steady as it once was, but, he says proudly, "I walk with no cane, and no help."

Blurred vision does not stop him from doing intricate handicraft work in the workshop at the Council for Jewish Elderly's Park View Home, 1401 N. California Av., where he has lived for eight years.

Weisman, who owned and operated a lug-

gage business in Chicago until he was 95, celebrated his 105th birthday on Sept. 20. A short, lively man with a ready smile, he said his health is "sometimes good, sometimes bad," but "my mind is strong."

Mrs. Sally Afable, activities director at the home, said Weisman is an inspiration to staff members. "Whenever I feel a bit down, I go and talk to him, and he cheers me up," she said.

"He functions independently. I was here three months before I realized he was virtually blind.

"He is one of the few men in the home who can conduct the religious services. He does it by memory, and he leads services every day."

Weisman's daughter, Mrs. Dina Rosen, 67, said: "His mental attitude is the key to his long life. He has always had enthusiasm, vigor, and an outgoing personality. He gave me a healthy attitude toward life."

Poland was a province of Russia when Weisman was born near the city of Lodz in 1873. As a teen-ager, he served in the Russian army. After working in Warsaw and Berlin at various jobs, he came to Chicago in 1912.

"My wife's sister sent me a ticket, so I came here," he said. "William Howard Taft was President then."

Weisman's wife died nine years ago at age 90, and a son, Jack, died in 1976. In addition to his daughter, he has two living sons, Abraham, 71, of Portland, Ore., and Nathan, 57, of Chicago. He also has six grandchildren and six great-grandchildren.

"Doing everything in moderation," he said, is part of the reason he has lived so long. Heredity may have been a factor, too; his mother died at 97 as she and her remaining family in Poland tried to flee before the Nazi invasion in 1939.

Weisman said three precepts have guided his life. He rattled them off in Hebrew, then in English:

"Love your friend like yourself.

"Be satisfied with what you have.

"Don't have arguments with anyone. If anyone tries to start an argument, don't answer; in time he will apologize to you. If you let yourself get aggravated, you will have a short life."

NUTRITIONAL MYTHS DEBUNKED

(By Ray Moseley)

Millions of old people are lured into wasting money on so-called health foods and vitamin supplements by "false promises of youthful vigor or longer life," according to one of America's leading nutritionists.

Dr. Frederick J. Stare, 68, founder of the Department of Nutrition at the Harvard School of Public Health in Boston, said that, so far as is known, food requirements vary little with age except that old people need fewer calories than the young.

He said most old people need only make sure they eat a variety of foods, not expensive "health" foods or nutritional supplements.

"The older you get, the more aches and pains you will have," he said in an interview. "Many old people will latch onto anything they think might help. Health and fad-food stores are just milking old people of what little money they have left."

He scoffed at such nostrums as sea salts, seaweed, and patent medicines promoted by some stores. "They will not do you any harm, but they will not do you any good," he said.

Nutrition is a major concern among the elderly, and many are unable to afford a balanced diet because of meager incomes.

In 1968, the Mayor's Office for Senior Citizens in Chicago pioneered what became a national nutritional program, financed largely by the federal government, for low-income elderly people.

Today more than 5,000 people in Chicago receive hot lunches through this program, and another 1,200 get home-delivered "meals on wheels." Nationally, 480,000 elderly persons are served by the federal nutrition program. Legislation now before the Senate would raise that to slightly more than a million persons.

In Britain, a country with one-fourth the population of the United States, nearly 13 million persons take part in a meals-on-wheels program.

Not all of the elderly are poor, of course, and Stare said a common problem among many of them, as among other Americans, is overnutrition. A person of age 70 needs 25 percent fewer calories than were needed at 25, he said.

To guard against too many calories, he recommends trimming the size of servings, cutting out most sweets, and reducing the amount of fat in the diet.

"Overnutrition is the most serious nutritional problem we have in our country, for all people," he said.

That view is not universally shared. Dr. Robert N. Butler, director of the National Institute on Aging, said a study of a group of elderly persons in Baltimore over the last 20 years shows that mild or moderate obesity has no effect on life expectancy.

Obesity, he said, apparently carries with it not only risks but "counter-balancing survival benefits" that deserve further study.

For many old people, eating is not the joy it was in earlier years. And having poor teeth or no teeth may be just a part of the problem.

"The flow of saliva may decrease, making food less palatable because of greater difficulty in swallowing." Stare said: "Reduced sensitivity of taste buds and olfactory receptor cells [the sense of smell] also decrease flavor sensation."

Digestion also may become impaired, as a result of reduction in the secretion of bile and of digestive enzymes, he said.

There isn't much a person can do about these problems, but Stare suggested that those with poor or no teeth eat ground meat, fish, cheese, and meats that are cooked until they are tender or that have been treated with a tenderizer.

For all old people, he recommends drinking one or two glasses of milk daily, preferably the nonfat or lowfat kind. "Some older people view milk strictly as a food for children and haven't formed the habit of drinking it as adults," he said.

To avoid constipation, a frequent problem with the elderly, he recommends 6 to 8 glasses of liquid daily—such as hot bouillon, coffee, tea, fruit juice, or vegetable juice—whole-grain breads and cereals, and fruits with edible skins.

Stare said there is some problem of iron deficiency anemia among the elderly, possibly because many cannot afford to eat meat as often as they should.

"Heart and kidney are less expensive than other cuts of meat, and they are excellent sources of iron, superior to other meat in this respect," he said.

There have been frequent reports that many elderly persons are so poor they are reduced to buying processed dog food.

"I have never seen any authentic information that anyone is eating dog food," Stare said. "I don't think there are many. But there would be nothing wrong with it nutritionally. It's a perfect food for a dog, and it would be for man."

Stare and Butler offered these additional health tips for the elderly:

Stop smoking; it's never too late. "The aggravating effect of smoking on cardiovascular disease appreciably disappears 30 to 40 days after a person stops smoking," Stare said. Butler added: "No one can say that because he's 70 and has smoked two packs a day for years that there is no point in stopping. There are recoveries, or near recoveries, in lung function if you stop smoking." The chances of developing emphysema also are health tips for the elderly:

Get more exercise. Stare said elderly persons, even those 75 or older, should walk at least a mile a day, then "as they get in shape make it a bit brisker." He said walking improves circulation and lessens the chances of forming blood clots.

Get sufficient rest. "Get in the habit of lying down for an hour in the afternoon and relaxing," Stare said. "Go to bed when you feel like it, but not too late."

[Chicago Tribune, Oct. 1, 1978]

CRIME—THE NO. 1 FEAR AMONG AGED

(Verily, old age, if thou bringest with thee no other bane, this one is enough: By living long one sees much he likes not.) Caecilius Statius, Roman poet.

Nathan Colman, who turned 101 last July 17, stepped into the elevator of his apartment building, departing for a visit to his wife, Mary, 89, who was dying in a nursing home.

There are security guards at the Flannery Building of the Chicago Housing Authority, where Colman has lived for 12 years, but they apparently had not noticed a man in his 30s who shared the elevator with him.

"When the door closed, he socked me on the side of the head," Colman said later. "He took $4.90 and my wife's wedding ring. I wanted to show it to her before she died."

Colman cried as he recalled the incident. His wife had died the next day, without having seen him that final time.

"They need to have a policeman here day and night to keep these punks out of here," Colman said. "I can't hit them hard enough to raise ashes off of them."

The locales change, but the scenario is a familiar one. In cities across the nation, the elderly find themselves particularly vulnerable to criminal attack, usually from teen-agers.

Frequently, youths wait nearby as old people cash their Social Security checks, then rob them of the only money some have to live on for a month.

Dr. Booker T. Yelder, Jr. of the National Center on the Black Aged said that the day Social Security checks arrive in the black community each month is considered "ripoff day."

"One has only to visualize the process as the wolf coming upon a herd of sheep," he said. "He has only to attack; there will be no fight."

The Tribune Task Force, in a six-month examination of problems of the elderly found a mixed pattern in the incidence of crime against old people.

In New York, the police department formed special senior citizen crime units in 1976, with undercover policewomen disguising themselves as aged to attract muggers. Since then, reported muggings and other categories of robbery against the elderly have dropped 25.4 per cent.

In Chicago, where there is no such unit, reported robberies of persons 60 and over rose 4.9 per cent last year—while robberies of all other persons were declining by 4.5 per cent.

In the first 7½ months of this year, robberies of the elderly have dropped 15.9 per cent in Chicago and those against the general population have fallen 11 per cent. But in both periods, strong-arm robberies (muggings) have increased against those over 69—by 11.1 per cent in 1977 and by 13.6 per cent for the first seven months of this year.

Raymond Clark, chief of Chicago's investigation division, said the department sees no need to adopt the "extreme measure" of organizing a special unit on crimes against the elderly.

"If there is a crime pattern in an area, we will use the tactical units and the special operations group, along with the criminal investigations units, to combat the problem," he said.

Noting that the chief predators of the elderly are boys, Clark said: "It probably would be popular to take a stance for harsher penalties, but what can you do with a 10- or 12-year-old? We identify them and try to channel them to a more useful area. They are children—sometimes they are destructive and dangerous, but they are still children."

No one knows how often crimes against the elderly occur nationally, because most police departments do not keep records on victims by age.

But some authorities think there may be more crime against the elderly than is generally supposed; more than half the elderly victims interviewed in one survey said they did not report the crimes against them because they thought the police couldn't do anything or because they feared retaliation.

Whatever the statistical truth, crime against the elderly is especially poignant because the victims are often more vulnerable, physically and financially, than younger persons.

A young person knocked to the ground will usually recover quickly, but some elderly persons treated no more roughly might never walk again. A street mugging could quickly turn a healthy, active retiree into a helpless invalid for the remainder of his life.

Mrs. Blanche LaValle, 73, was walking from the Howard Street elevated station to her home in Evanston when she was suddenly knocked down, breaking her hip. Her purse was ripped from her hands as she fell.

"It happened so fast, all I saw as I was going down was this little boy running," said Mrs. LaValle, a widow and retired bookkeeper.

A passerby caught the boy and his companion—one 12 years old, the other 14—and returned the purse with the $8 it contained.

Mrs. LaValle spent three weeks in a hospital and three months after that confined to her home. She still walks with a cane more than a year after the incident, a permanent victim of a fleeting moment of terror.

After she made several trips to court, each exceedingly difficult, the state's attorney's office dropped charges against the boys when a witness for Mrs. LaValle failed to appear.

Many elderly crime victims have chosen to imprison themselves in their homes, even at the cost of isolating themselves from friends and becoming desperately lonely.

Sometimes even these precautions serve no purpose. A study by the U. S. Law Enforcement Assistance Administration found that household burgarly and larceny against the elderly occur even more frequently than street muggings.

The elderly also are especially vulnerable to confidence games. Hundreds have lost all their savings to smooth-talking men and women who make a profession of bilking old people.

"Psychologically, financially, and physically, no group of citizens suffers more painful losses than our nation's elderly do at the hands of America's criminal predators," said former FBI Director Clarence M. Kelley.

A Louis Harris survey found that fear of crime is the No. 1 concern of America's elderly, ranking ahead of worries about health and income. A survey in Chicago produced the same finding.

Some victims are eventually driven from their homes by repeated home invasions and muggings.

Mrs. Marie O'Brien, 81, who now lives with the Little Sisters of the Poor at 2358 N. Sheffield Av., left her Near North Side home shortly after a 15-year-old boy threatened her with a nail-studded club, then took her wedding and engagement rings and other jewelry.

"He took my glasses off and stepped on them," she said. "Then he grabbed me and threw me to the floor. He wanted my money. Then he grabbed my arm and started twisting it."

That was just the latest of several attacks on Mrs. O'Brien. Once, a group of youths grabbed her on the street and beat her. They did not attempt to rob her; they apparently wanted only to inflict pain.

"After all this trouble, I didn't have a cent to my name, so I came here," said Mrs. O'Brien, referring to the Little Sisters home. She has tried to sell her own home, but because it is so rundown the best offer so far has been $5,000.

Although Chicago has not confronted crime against the elderly in the same way as New York, it has joined New York, Washington, New Orleans, Milwaukee, and Los Angeles in a two-year pilot project to assist elderly crime victim and to educate the elderly for their protection.

Funded by the federal government, the program involves 15 retired policemen and 5 retired firemen, whose activities include helping elderly crime victims to replace stolen documents; advising the elderly on locks or other security measures they need in their homes; and speaking to senior citizens groups on how to avoid muggings, burglaries, confidence games, and home-repair frauds.

"We don't think this program will eliminate crime against the elderly, but we expect it to have some impact in reducing crime," said David Strong of the Mayor's Office for Senior Citizens, which is in charge of the program here.

Getting elderly crime victims to testify against assailants is a major problem. Many are apt to be bewildered by the criminal-justice system and afraid to go to court; others may simply lack the transportation to get there.

The pilot program does not provide transportation to court, but a separate program of the city's Department of Human Services offers such assistance to residents of five police districts—Belmont, Foster, and Town Hall on the North Side and Gresham and Englewood on the South Side.

Authorities frequently say that eldely crime victims make poor witnesses because many of them suffer from poor eyesight, which makes identification doubtful, and they seldom get a good look at their assailants in any case.

But Chris Zaglifa, North Side field supervisor for the Department of Human Services, said: "It's a faulty generalization to say the elderly don't make good witnesses. It depends on the individual."

He cited the case of a 77-year-old man who recently went to court with department assistance, gave a good description of his assailant, and was able to identify him. The defendant was convicted.

One obstacle in trying to reduce crime against the elderly is that many insist on having their Social Security and other benefit checks mailed to them rather than arranging for direct deposits in a bank.

As Dr. Yelder noted, street-wise youths in some areas know when the checks are mailed and lie in wait for their victims. One morning, eight purses were snatched outside an Uptown supermarket where elderly women cash their Social Security checks.

"The way most old people cash their checks, they might as well hang a sign on them saying, 'I've got money and I'm robbable,'" Zaglifa said.

The majority of elderly crime victims live in low-income areas of the inner city. Many of them grew up in these areas or moved there years ago, when they were more prosperous neighborhoods. Trapped by low retirement incomes, they have been unable to move out as the neighborhoods deteriorated.

Mrs. Augusta Goldschmidt, 83, has lived in the same house in a changing neighborhood in Old Town for 50 years. She has experienced six home invasions in two years.

"They're cowards. They even stole my garbage can," she said. "They keep breaking in the windows. What's the good of getting them fixed if they're going to be broken the next day?

"It was a good neighborhood and you didn't have to be afraid 20 years ago. I always liked to walk, but you have to be careful now."

Lt. Lawrence Forberg, commander of the South Chicago District tactical unit, said: "Many of the people who are getting jumped are from the South Shore area. The neighborhood changed, but they never left. They stayed, and now they're old. They're easy marks."

In other parts of the nation as in New York City, police and community leaders have had some success in reducing crime against the elderly.

In Wilmington, Del., a sewing machine manufacturer designed a pattern for a pocket in which elderly women could hide their valuables and thus not have to carry purses. Police encouraged good samaritans to escort the elderly and urged old people not to walk the streets alone.

In the first nine months after the program started, street crime against the elderly decreased 22 per cent.

In Rochester, N.Y., the state has provided money to purchase 102 citizens band radios for elderly citizens and 25 mobile units to be used by local police in a model program to combat crime.

California, the District of Columbia, New York, and Connecticut are considering or have passed laws providing tougher sentences for crimes against the aged.

In Chicago and other cities, the police make special efforts to alert the elderly to confidence games that are directed at them, and the techniques of these crimes are regularly publicized in newspapers.

Still, many old people are taken unaware when confronted by con artists.

"You hear about this kind of thing, but you never think it's going to happen to you," said one victim. "I don't know how they spotted me. I'm so embarrassed; don't use my name."

This person lost $15,000 in an elaborate version of what police call the "pigeon drop." It is perhaps the most common of the confidence ruses.

The victim, a Southwest Side widow, was shopping near 51st Street and Damen Avenue when a young woman asked directions to a bank.

While they talked, another woman arrived and said she had found a bag containing $31,000 and wondered what to do with it.

The first woman said she worked for a lawyer nearby and would ask his advice. A few minutes later, she returned and said her boss had advised her that they could share the money if no one claimed it in 10 days.

But each woman would have to put up at least $8,000, she said, to be held in a bank as a sign of good faith if the owner of the money did claim it.

The victim of this scheme eventually was persuaded to give the women $5,000 from a strongbox at her home and to withdraw another $5,000 from the bank.

"The teller questioned me, but I told him I needed the money to lend to my son," she said. However, it seemed the teller delayed her just long enough to make the other two women nervous: When the victim came out of the bank with the money, they had disappeared with the earlier payment.

"I was too ashamed to go to the police. I didn't know what to do," she said.

Two days later, two men came to the door, identified themselves as policemen, and said they had arrested the two women who fleeced her.

The "policemen" said the bank teller was involved in the scheme, and they asked her cooperation in catching him. They took her to the bank and instructed her to withdraw $10,000.

The woman did as she was told and brought the money out in an envelope. The men took it and said they would check for fingerprints. Then they, like their female accomplices, vanished.

Police officials say that old people fall victim to con games such as this because they are lonely and easily led astray by people willing to show an interest in them.

"The elderly see a chance to enhance their savings and be independent of their families," said Investigator Frank McVeagh of the Brighton Park general assignment unit. "So they take a chance."

SOME SAFETY TIPS FOR THE VULNERABLE

The aged are more vulnerable to crime than younger people, but there are precautions that can reduce the chances of being victimized.

James Kujawa, a Chicago policeman working with the Mayor's Office for Senior Citizens, offers these suggestions:

Have your Social Security and other benefit checks mailed for deposit directly into your bank account instead of receiving them at home. Muggers know when checks are mailed and lie in wait for victims.

If you have to cash checks, arrange to have someone accompany you, and don't take shortcuts through alleys or vacant lots. Chris Zaglifa of the city's Department of Human Services also advises the elderly to avoid currency exchanges if possible, because muggers may stake them out.

When shopping or cashing a check, don't display your money so others can see how much you have.

Don't carry a purse if you can avoid it. Don't hold a purse by the handle and let it dangle at your side; it presents too tempting a target. Don't hang it over your shoulder either. Elderly women often suffer dislocated shoulders or broken wrists when purses are wrested from them. Hold the purse firmly under your arm. If someone grabs it, don't resist.

If you carry a purse, keep valuables in it to a minimum. Conceal cash, credit cards, or house keys on your person.

If you are a victim of a crime and incur expenses as a result of physical injury, you may be reimbursed for those in excess of $200 under the Illinois Crime Victims Compensation Act, provided such expenses are not covered by Medicare or other insurance.

For assistance in filing claims under the act, or for help in obtaining food, money, or medical aid after a crime, contact the Mayor's Office for Senior Citizens, 180 N. La Salle St., telephone 744-6798.

If you live in the Belmont, Foster, or Town Hall police districts on the North Side or the Gresham or Englewood districts on the South Side, you may obtain similar help as well as assistance in getting to court by contacting the city's Department of Human Services. The phone number for North Side residents is 348-1828, for South Side residents 783-4500.

HOW NEW YORK'S DECOYS HELP COLLAR THE THUGS

NEW YORK.—An ordinary-looking van makes its way through the busy traffic on Fordham Road in the Bronx, a racial melting pot not unlike Chicago's Uptown.

Three men are in the front of the van. Behind them a trim, 35-year-old blond woman puts on sneakers, baggy skirt and jacket, and a gray wig. She ties a blue kerchief around the wig, and suddenly she appears to be 70.

Mary Glatzle is about to be mugged for perhaps the 500th time.

She is a decoy for the New York Police Department's Senior Citizen Robbery Unit [SCRU], which has gained a reputation as one of the nation's most effective forces in combating crime against the elderly.

New York City has 1.4 million people over 60—and about 250,000 delinquent youths, many of whom prey on old people, according to Lt. Austin Kelly, police coordinator for the fight against senior citizen crime.

The first SCRU unit was formed in 1974, in response to a huge rise in crime against the elderly in the Bronx. The program was so successful that it was extended to other parts of the city.

Last year, muggings and robberies with a weapon against the elderly dropped 25.4 per cent in New York, significantly more than the 18.5 per cent decrease for the city's entire population.

The decoy units are part of a wide-ranging effort that also involves interviewing victims at home, where they are shown mug shots of suspects, and providing transportation to and from court if necessary.

But the decoys are playing an increasingly important role. Last year they made 493 arrests; in the first five months of 1978, they made 400.

In the back of the van on Fordham Road, Mary Glatzle is ready for her daily performance.

"There's always just a little bit of anxiety," she says.

Mary gets out of the van on a side street, and officers Lee Collier and James Miller follow a moment later.

She saunters up and down a crowded two-block stretch of Fordham. Behind her, the bearded Collier finds a box of hair-restorer handbills in a trash can and begins passing them out, keeping his eye on her.

Ahead, Miller stands outside a shop, to all appearances a clerk getting a breath of air.

"You can't afford to take your eyes off the decoy for a second," says officer James O'Brien, driving the van and keeping Mary in view. "If you're not watching, it's over with, and then you're in trouble."

On the street, two husky teen-agers are displaying more than normal interest in the old woman.

They walk past her, then turn around and walk past again, crowding her this time. Apparently they are trying to see if a threatening gesture will bring a plainclothes policeman down on them.

They keep walking, then return a second time as she pauses to look at handbags in a window.

One of the teen-agers stops in front of Mary to block her from view. The other dips his hand into her purse, removes her wallet, and drops it into a plastic school bag.

The teen-agers start to walk away, but Collier and Miller move in fast and collar them. O'Brien draws the van up to the curb, and the youths are quickly put inside.

Mary is grinning. "They passed me, and I saw them in the store window. Then they came back again, and bingo."

In more than two years on the job, she has been bruised, shoved, and pushed around, but never seriously injured.

Detective Gerald Keegan, another member of the Senior Citizens Robbery Unit, said the typical teen-ager who mugs old people assumes he will get away with it. He figures the victim probably will not be able to identify him, according to Keegan, and believes that even if identified he is unlikely to be convicted.

Keegan said youths steal from the elderly to buy clothes or to take out their girlfriends and play the "big shot" on the block.

"When they run out of money, they rob another elderly person," he said.

Irma Kramer, director of a Bronx senior citizens center, said one elderly woman had foiled an attempted purse-snatching by grabbing the criminal, a 9-year-old boy. He began to cry, and she asked why.

"This was my first job, and I failed," the child responded.

HOME-REPAIR PROBE: FURNACE OK, 3 FIND 'FLAWS'

(Old age is respectable so long as it asserts itself, maintains its right, is subservient to no one, and retains its sway to the last breath.) Cicero, "On Old Age"

One after another, servicemen from three heating companies came to the house and looked at the gas furnace, and in each case the verdict was bad.

The first one said he'd found a leak and told the nervous homeowner, "This could be your last year for this furnance."

The second also talked of a leak and said, "It will build up and spread out looking for a flame, like maybe in your water heater, and then the whole place can blow up."

The third diagnosed a faulty pump and said, "You're lucky we caught this thing before it damages something else."

The three repairmen didn't know it, but the worried-looking, elderly homeowner to whom they addressed their warnings was Tribune reporter Thomas Powers.

Just 24 hours earlier, at the Tribune's request, two servicemen for Peoples Gas Co. had thoroughly inspected the same furnace and had found only a minor problem, a poor mixture of gas and air.

They adjusted that and pronounced the furnace in fine working order.

Hoodwinking the elderly, sometimes charging them several thousand dollars for needless repairs, is a major business among some unscrupulous heating contractors in Chicago and other parts of the country. The same is true in the roofing industry.

The Tribune Task Force investigated frauds in home repair as part of a six-month examination of problems of the elderly.

Gene King, vice president for public affairs of the national Better Business Bureau, considers home-repair frauds a major national problem.

"Any of these fly-by-night outfits prey on the elderly," he said. "They use scare tactics to pressure them. We tell people to deal with reputable contractors. Check their references—find out from neighbors who did their repairs and how they liked them."

Donald Mulack, former chief of the consumer fraud division in the Illinois attorney general's office, said the two principal consumer frauds perpetrated on the elderly involve heating and roofing repairs.

"Elderly persons are especially susceptible because, oftentimes, their home is their only possession," he said. "They are fearful that something will happen to it."

The contractors often advertise discounts for the aged, then use scare tactics to sell them unneeded work at inflated prices. In many instances, they demand immediate payment and will even drive an elderly customer to the bank to get the money.

The first repairman called by Powers was from Cook County Heating and Cooling Co., a firm then operating at 4440 W. Montrose Ave. (The company has since been sued by the attorney general's office, and its officers have closed the business and disappeared.)

The repairman walked behind the furnace, took a quick glance, and said, "Look at this; you've got leakage here."

He said that two gallons of a solution of sodium silicate, more commonly known as "waterglass," would be needed to repair the leak. The cost would be $31 a gallon, plus $34 for the service call.

Powers said that before making a decision he would have to consult a son-in-law who was a plumber.

"What you really need to do is to put in a new boiler," the repairman said, estimating the cost at about $1,000.

Next came John Stein, a serviceman for Commonwealth Climatrol, Inc., 4635 N. Milwaukee Ave., a company that advertises discounts for senior citizens.

After a quick inspection, he said: "Your boiler's leaking. All wet on the inside. The whole bottom, it's all water. Ain't much you can do about it but take it apart and try to rebuild it."

He said the situation was "dangerous" because the leak could knock out the pilot light and cause an explosion. "This is a big job," he said. "Five sections are opening up and splitting on you. It's rusty."

Stein phoned David Baumol, the company manager, who arrived about 20 minutes later to look at the furnace.

"That's quite an old boiler," he said. "It's a little too small for the house, so it has to work twice as hard to provide the heat. It has kept the house warm, but it's worn out."

Baumol quoted prices for three new models, ranging from $2,200 to $2,700: "The whole inner works are shot," he said. Powers said he would have to think it over.

The third serviceman, from J&B Heating and Cooling Co., 5778 N. Elston Av., reported a defective pump.

"It's going to stop working. It's just a matter of time," he said. He quoted a price of $260 for a new pump, and Powers again said he would talk with his son-in-law.

The two representatives of Peoples Gas then returned for a second look at the furnace. They found that a wire controlling the thermostat switch on the gas valve had been disconnected. It had been connected when they first inspected the furnace.

"With that disconnected, the furnace won't work," one of them said. "You won't get any gas." They reaffirmed that the pump was working properly and that there was no leak in the boiler.

Later, Tribune reporters went to the firms whose servicemen had found the furnace faulty to seek explanations from the owners.

John Mehrholz, president of Commonwealth Climatrol, and Robert White, president of J&B, both defended the servicemen's findings.

Mehrholz said his men had told him the furnace was old and needed replacement, and "safety comes before everything." He quoted a price of $1,400 for a new furnace, $800 less than Baumol had quoted in the home.

White said the man who had inspected the furnace for J&B was a subcontractor who worked for him when he was too busy to handle calls. He said, incorrectly, that Powers had told the serviceman of a grinding noise in the furnace, which could only mean a new pump was needed.

He said $260 was a good price for a pump, adding, "If the man was out to cheat you, he would have charged you for a new boiler."

Reporters were unable to locate William McAteer, the owner of Cook County Heating and Cooling Co. His neighbors said that McAteer, his employees, and the company's equipment disappeared last May and that a procession of people who said they had bought furnaces but never got them had been looking for him since.

The Illinois attorney general's office filed suit against McAteer on March 9, charging that Cook County Heating and Cooling Co. and another McAteer firm, Air Temperature Heating and Air Conditioning Co., had engaged in fraudulent and deceptive practices.

Sheriff's deputies who attempted to serve a subpoena on McAteer could not find him.

J&B and its owner, White, were charged last year with bilking an elderly widow, Esther Neproszatis, of $25,089 over a three-month period.

The attorney general's office filed suit against J&B, alleging that Mrs. Neproszatis was incompetent to conduct her own affairs and that on several occasions White had accompanied her to a bank "and swindled, deceived, and misled her into giving him large sums of money for few, if any, legitimate services."

J&B was ordered to refund $25,000 to Mrs. Neproszatis. The company has appealed the verdict.

In December, 1976, Peter Dale Levang, a former serviceman for McAteer's Air Temperature company, gave the attorney general's office a deposition saying that the company's employees had often taken advantage of the elderly.

Levang said the company sent cards to new homeowners, stating that Air Temperature had installed a part on their furnaces and promising that if they called within 30 days the warranty would be transferred to them.

This, he said, was a device for getting into homes and then trying to convince the owners that there was something wrong with their furnaces.

Levang said that Air Temperature servicemen, on McAteer's orders, would tell a homeowner his furnace was leaking and offer to repair it with a sodium silicate solution.

Sodium silicate is worthless for sealing cracks, he said, and "many times we'd use just plain water. I always used either plain water or took some water and poured coffee in it to color it."

Levang said one practice was to "take a regular lead pencil, reach up inside of the heat exchanger, and draw a line." To the homeowner, he said, the pencil line would appear to be a crack in the heat exchanger.

"You tell the customer that he does have a defective heat exchanger, the seal did not hold, and that the unit is defective and can cause death," his deposition said.

In homes with boilers, he said, the technique was to place ice on top of the casing and fire up the boiler. The steady drip of water from the melted ice would convince the homeowner that the boiler was defective.

Levang said the cost of a new furnace would be about $200 but Air Temperature would charge $2,000.

He also said he knew nothing about repairing furnaces; if repairs were needed, one of Air Temperature's installers would have to be called in.

"That was the standard kind of joke around the office, that none of the 'front men' or 'down men' could repair much of anything," he said.

In the home repair business, unscrupulous contractors are known as "chimney shakers" because they go up on the roof and shake the chimney until they jar something loose.

Casimir Michalski, 77, and his wife, Angeline, 74, know all about that now.

On Jan. 25, 1977, Michalski was approached by a man who said he had noticed loose tar paper around Michalski's chimney. The man said he could repair it for $6.

"I thought that sounded like a pretty good deal," said Michalski, a retired painter.

The man returned with three assistants. After they had clambered onto the roof, he said the job would cost $90 because concrete at the base of the chimney was loose.

"Then he goes into the attic, and then I heard a crack," Michalski said. "He came down and said there was a crack at the base of the chimney."

The man, who identified himself as Alfonso Bartollo, said the job would now cost $2,500, adding that if the chimney were not repaired it would blow down soon. He demanded cash payment.

Michalski withdrew $1,400 from his bank and gave it to the man. The next morning the repair crew demanded the rest of the money, but Michalski, having second thoughts, balked. The crew knocked $500 off the price, and Michalski paid the $600 balance.

"Later we had a repairman here who said the job would have cost $690 to do right," he said. "I still don't know how I let that man into my home."

The repair crew was from Seal-Tab Roofing Co., formerly of 3942 N. Central Ave. The Illinois attorney general's office tried to sue Seal-Tab on behalf of Michalski and seven other elderly persons but was unable to locate the owners, Jerry Crowe and Peter Grech.

Francis Hindes, 80, a widower who lives on the North Side, reported a similar experience with Novak Roofing Co., 3733 N. Kimball Ave., which charged him $3,000 to re-roof two buildings he owns.

Hindes said Stan Novak demanded cash payment and "even promised me a bottle of scotch whisky when they were through if I paid them that day." He said the Novak crew drove him to the bank to withdraw money from his savings account.

"On my other building, he went up on the roof and shook loose a few bricks and told me the chimney might fall down, so I let them put up a new one," he said.

Hindes said Novak advertised discounts of 10 to 20 per cent for senior citizens, but his contract listed only a $45 discount on a $3,000 bill.

Worse yet, he said, the crew left before the job was finished, and both roofs have severe leaks. "The stairs in one building are like Niagara Falls when it rains," he said.

Novak Roofing Co. has no connection with Novak and Co., a roofing firm at 1928 W. Fullerton Ave. Tom Novak, owner of Novak and Co., said his firm has been in business since 1908 and the other company is damaging "the good reputation that my family has worked hard to make."

"It's in my lawyer's hands now, to try to get them to stop doing business in my name," he said.

Four months after the work on Hindes' roof was to be completed and after The Tribune had questioned Novak, a repair crew returned to Hindes' roofs and finished the job.

"I'd never give him another job, though," Hindes said. "I'll just have to wait and see if it lasts through the winter."

Tim Hughes, director of Senior Legal Aid at the Chicago-Kent College of Law, said there should be a law requiring all contractors to register with an address at which they can be served with legal papers.

He said some "fly-by-night" contractors have as an address only a place where they pick up mail. They often refuse a registered or certified letter, especially if it is from a court, he said.

Another ruse used to victimize the elderly involves people purporting to be from the water department, the gas company, or another utility.

Mrs. Ruth Johnson, 74, who gets about with the aid of a walker, was at home alone when a bogus meter reader came to her back door.

"He said he had to check the water pipes," she said. "He went to the kitchen and had me pound on the pipe with a spoon."

Another man arrived to assist the "meter reader," and they told her to stay in the kitchen and keep pounding on the pipes.

After about 40 minutes they left. Then she discovered that her bedroom had been ransacked and $1,200 that had been hidden in a dresser drawer was missing.

"When I found the money gone, I got the biggest shock of my life," she said. "How could they do that to an old person?"

Mrs. Minnie Lightfoot, 88, who lives on the South Side, said two men came to her home

on the pretext of cleaning a catch basin and broke into a bedroom safe, taking $1,100.

A month later, she said, a man offered to fix the siding on her house for $10. But when the work was done, he demanded $150. Frightened by his threatening manner, she paid him $150.

Later, a bogus electrical inspector kept Mrs. Lightfoot busy turning lights on and off while he took $170 from her bedroom and $180 from her tenant's room.

"They've come about 10 other times in the last year and a half," Mrs. Lightfoot said. "They use different stories, anything to get me out of the house or them inside.

"Now I'm a nervous wreck. I'm afraid to meet anyone at the door. When they steal from me, they're taking my grocery money. How can they do this to old people?"

ONE REPAIRMAN WHO'S ALWAYS WELCOME

Frequently the Council for Jewish Elderly in Chicago gets a phone call from an old person who says, "Send me Mr. Fix-It."

Within a short time, Justin Wetzler, 71, is on his way.

Wetzler, who fled Nazi Germany in 1937, retired five years ago as a consulting engineer and volunteered to work with the council as a visitor.

But sitting around and chatting with old people wasn't enough for him. Wetzler soon found he could help them more by fixing small appliances that had broken down.

It's an important service, helping old people to meet the high cost of remaining in their homes and apartments by avoiding the exorbitant rates that some unscrupulous repairmen charge. Wetzler now has two other retired men helping him, and he's looking for some younger people to teach as volunteer repairmen.

"Most of the people we serve don't own their own homes; they are in apartments where they have to tip the janitor for a favor, and they are not able to do that," said Wetzler, a robust, energetic man who lives in Evanston with his wife.

"It becomes a real problem. We clean out the pilot light on the stove, put up curtain rods and shelves, things like that."

He is busy at his volunteer job most of the week. The elderly bring some broken appliances to senior centers, but the large ones, such as television sets, require a house call.

"If a TV is on the blink, it is something serious," Wetzler said. "We keep a tube tester and some spare parts. When we take in a set that can't be repaired, we use it for parts."

Wetzler said he charges his customers according to their ability to pay.

"Old people don't want something for nothing. It is important to their dignity," he said.

Wetzler's talents are not limited to repairing appliances. He holds several patents for motorized equipment that he invented.

One invention is a motorized lift for hospital beds, another is a hospital bed with a built-in chemical bedpan. He also has a patent for motorized library shelves.

There are few government programs to help the elderly with repair jobs.

Last Saturday, the Beverly-Morgan Park Senior Service Program of the Lutheran Welfare Services of Illinois completed a one-year "mini-grant" program in which workmen charged $7 an hour to do large and small jobs in the homes of elderly residents. The work was inspected to make sure it was done properly and at a fair price.

Mrs. Shirley Twickler, coordinator for the program, said that more than 600 services were provided during the year it was in operation.

The workmen installed locks, replaced window panes, cleaned gutters, repaired furnaces, and did minor plumbing work.

"It was a vital program because it maintained their dignity and safety," Mrs. Twickler said of the project's elderly clients. But the funding for the program, which had been provided as a special grant from the Mayor's Office for Senior Citizens, ran out.

[From the Chicago Tribune, Oct. 3, 1978]

PENSIONS—TOO LITTLE TO LIVE?

(Not even to a philosopher could old age be easy in the depths of poverty, nor could a fool find it anything but burdensome even amid ample wealth.) Cicero, "On Old Age".

In the United States, the wealthiest nation on earth, a worker at retirement can expect to receive 30 to 46 per cent of his former income in Social Security benefits.

In several European countries—principally Sweden, West Germany, Austria, France, and Italy—workers can count on having 60 to 65 per cent of their earlier income in retirement. In Communist states, where the wages are lower, the figure is 75 per cent.

"We still have not been successful in creating the kind of just and equitable society for our elders that we should want," said Dr. Robert N. Butler, director of the National Institution on Aging.

Jack Ossofsky, executive director of the National Council on Aging, agreed. "There just ain't much gold in those golden years," he said. "Income remains the major problem of the elderly."

The spread of private pensions has supplemented Social Security income for many Americans and brought the average replacement income at retirement to 50 per cent or more for some. But well over half the working force still has no private pension coverage.

Among the elderly, one out of 12 couples and one of every four single or widowed persons live almost exclusively on Social Security. The system keeps more than 12 million of the nation's 22 million elderly above the poverty level.

But an estimated 15 per cent of American elderly live on incomes below the official poverty level [$3,417 for couples over 65, $2,720 for individuals]. Another 10 per cent are classified as "near poor."

Although some economists believe the level of poverty among the old is overstated, none disputes that old age, for many Americans, requires a significant degree of belt-tightening.

And for the poorest of the elderly poor, the situation is often desperate and degrading.

"With the amount the government gives these people, they get too much to die but not enough to live," said Mrs. Lilo Salmon of the Little Brothers of the Poor, which provides assistance to many elderly poor in Chicago.

"We find people in these one-room apartments and they say, 'If only I could die.' They don't get enough to live on decently. The last three days of the month it's probably peanut butter and jelly. They may get enough to eat, to live, but their human needs are not met at all."

Many of the elderly poor have been poor all their lives. But for some, like Mrs. Marie Grieg, 71, a Melrose Park widow, poverty begins with old age.

Her husband has a management position at a plant in Melrose Park, and she worked 6¼ years as a clerk in Cook County Court and at a state hospital.

They lived comfortably, raising and educating three children.

But Mrs. Grieg's husband was forced to retire early because of emphysema, which caused his death a few years later. He received a Social Security disability pension but no pension from his employer.

Mrs. Grieg retired at 65—and found out later that if she had stayed on for another 16 months she would have been eligible for a pension.

She now lives on $69.23 a week from Social Security in an apartment over a single-family home. Her rent alone absorbs $39.23 a week of her meager income.

Because she has diabetes, medical expenses account for much of what is left.

"The Social Security doesn't keep up with the costs at all," she said. "You work real hard all your life, earn a lot of money and pay a lot of taxes, and you get nothing out of it."

Earlier this year, she said, the gas in her apartment was cut off because she could not pay a $30 bill.

At the time, the federal government was providing help to the poor and elderly in meeting home heating bills through the Emergency Energy Assistance Program. Mrs. Grieg applied for the federal subsidy but was turned down. Official ruled she was not eligible because she uses gas only to cook and to heat water, not for room heating, and because her income was not low enough.

The senior Legal Aid Project in Maywood has filed a class-action suit in federal court on behalf of Mrs. Grieg and others like her, contending that she was unjustly denied assistance because of overly restrictive regulations.

The suit says that $30 million of the money available nationwide for utility bill relief was not spent, more than $1 million of it earmarked for Chicago and $750,000 for the suburbs.

[Richard M. Saul, chief of the energy section of the Community Services Administration in Washington, said, "The latest figures that we have available indicate that the EEAP will return just over $40 million it did not disburse."]

Senior Legal Aid got Mrs. Grieg's gas service restored, but meanwhile her unpaid bill has risen to $80. Until her gas was turned on, she cooked on a small electric sandwich maker.

Her landlady allowed her to get hot water from a basement laundry room while the gas was cut off, and she had to carry it up two flights of stairs in a bucket.

Mrs. Grieg and many others who receive no private pension, Social Security clearly is inadequate, despite huge increases in benefits in recent years.

From 1959 to 1975, the number of the elderly categorized as living in poverty dropped drastically—from 66 to 31 per cent for individuals and from 30 to 8.9 per cent for families. This was a sharper drop than for the population as a whole, and it was largely due to increases in Social Security benefits.

The increased benefits, combined with high unemployment, put such a financial strain on the Social Security system that Congress was forced earlier this year to raise Social Security taxes.

But Dr. James H. Schulz of Brandeis University, a leading authority on the economics of aging, argues that the increases in Social Security benefits have not been sufficient to ansure the nation's elderly a decent standard of living.

By government estimates, Social Security replaces 46 percent of the average person's working income.

Schulz argues that this estimate does not take into account reduced benefits from early retirement and other factors affecting income. He says the true wage-replacement rate under Social Security is only 30 to 40 per cent.

"We should expand Social Security moderately and get the replacement rate up to 55 per cent for the average worker," he said. "Then he will not have to worry if he is not covered by a pension plan or is covered by one that is bad."

Robert M. Ball, former Social Security administrator, has urged improvements in the benefits of nonmarried retired workers and elderly widows living alone or with nonrelatives. One of every three persons in these

categories lives below the poverty level despite Social Security, he said.

Schulz noted that after World War II, European nations had a high proportion of aged in their populations and made the commitment to provide for them.

"They had to pay 15 to 20 per cent of their earnings to support them, and they did it," he said. "It can be done. The question is whether we have the will to do it."

University of Chicago gerontologist Robert Havighurst said: "There is greater economic security for the elderly in the northern European countries. People who are working pay to support the elderly because they know their turn will come.

"But it's questionable how far we can go [in emulating the Europeans]. This tends to be socialistic."

In Europe, Social Security benefits go up when the cost of living rises. Most countries further increase benefits when national productivity goes up.

Since 1975, U.S. Social Security benefits have been tied to increases in the cost of living, but many elderly persons complain that when their benefits go up, the cost of food stamps and other expenses rise too.

"Landlords adjust rents to increases in Social Security automatically," said Mary Miller, 71, a member of the Chicago Gray Panthers. "They know about our increases before we do."

More than 34 million persons receive Social Security, 22 million of them 65 or older. The total payout in 1977 was $81.7 billion.

Since its inception in the 1930s, Social Security has been financed entirely out of contributions by employes and employers. There is fairly strong sentiment in Congress for changing this method, with many suggesting that part of the funding should come from general tax revenues.

But this could mean higher taxes, a higher deficit, or a reordering of priorities to reduce spending in other areas.

Social Security benefits are exempt from taxes, and Joseph Califano, Secretary of Health, Education, and Welfare, has mentioned one possible reform in this area.

"It seems at least open to discussion," he said, "Whether a wealthy lawyer, doctor, or business executive with a $50,000 pension should receive Social Security benefits free from any obligation to pay taxes."

In addition to Social Security, 2.1 million elderly living in "dire poverty" [assets of $1,500 or less for individuals, $2,250 or less for couples] receive Supplementary Security Income payments.

Blind and disabled persons below age 65 also qualify for these payments, and last year they totaled $5 billion from the federal government and $1.5 billion from the states.

The guaranteed minimum under SSI is $189.40 a month for individuals and $284.10 for couples.

"It can be predicted with relative assurance that dire poverty among the elderly will be practically eliminated before the year 2000," Havighurst said. He sees SSI as a major step in this direction and expects more generous payments in the future.

Mrs. Isabel Hansen, 71, a North Side widow, may never see that day. She gets $51.52 a week from Social Security, another $1.09 a week from the Illinois Department of Public Aid, and she barely gets by.

Her fixed expenses, including $27 a month for food stamps, run about $40 a week.

"My food with the food stamps usually lasts for about three weeks," she said. "There are months when I don't have anything to eat at the end of the month. I can't buy clothes or shoes or nothing on what I have left."

Mrs. Hansen has a heart ailment, Parkinson's disease, and diabetes. She also suffers from frequent dizzy spells.

"The relief people over there at Humboldt Park—they treat you like a dog," she said. "They want me to go into a [nursing] home, but I don't want to go into one of those. I have seen people who go in there, dying in those homes. I get so disgusted, I feel like turning on the gas."

About 2.4 per cent of elderly men and 0.2 per cent of elderly women have annual incomes in excess of $25,000. In general, the elderly have income levels about half those of the younger population. One in five younger people had an income of more than $12,000 in 1975, but only one in 20 elderly people did.

As a rule, older people need less money than the young because they have fewer expenses. Most have paid off mortgages on their homes and have raised and educated their children. They no longer have the expenses for clothing and transportation needed to go to work.

But economists contend that living expenses of the elderly do not drop by 50 per cent or more upon retirement, as their income generally does. In some areas, such as medical care, their expenses usually increase.

Charlie Zahr, 76, owned and ran a doll hospital in Chicago for more than 30 years. He said there were days during the Christmas season when he would earn $100.

"And that's when that was big money," he said. "But that's all gone. Now I get three checks a month to keep me going, just barely."

Zahr gets Social Security, SSI, and public aid payments that total $48 a week. But he pays $125 a month for his one-bedroom apartment and said his fixed expenses run nearly $50 a week. How does he live with expenses exceeding income?

"Well, I still got a few dollars put away," he said. "If I didn't have that, the best thing to do would be to get a gun and blow my brains out."

In recent years, the elderly have become the beneficiaries of a wide range of discounts on taxes, transportation fees, and other costs. But few of the people who work with the elderly consider these an adequate substitute for a decent retirement income.

"I'm willing to trade every discount system in the nation for a better retirement income," said Robert Ahrens, director of the Mayor's Office for Senior Citizens in Chicago.

Ball, the former Social Security administrator, said, "Our goal should be for the elderly to have reasonably adequate retirement incomes so that they can pay their own way."

Special tax treatment and subsidized prices, he said, "tend to undermine independence and to make older people appear to be objects of charity, both to themselves and to others."

Even with tax breaks, there is strong resistance among many elderly to payment of constantly rising property taxes. In some communities where the elderly predominate, proposed property tax increases to finance educational improvements have been repeatedly voted down.

In places where property taxes have gone up and where there is no tax relief for the elderly, as there is in Illinois, some old people find they cannot afford the higher payments and are forced to sell their homes.

Though Pensions Insured, "Future Debts" Go Unfunded

Until a few years ago, American workers could find themselves out in the cold when their company pension plans ran out of money or the firms went bankrupt.

That hasn't happened since 1974, when Congress passed the Employment Retirement Income Security Act [ERISA]. The law insures workers against loss of their pensions, up to $937.50 a month.

But the law did not address the deeper financial problems of pension plans, and these have persisted.

Indeed, the growth in pension plans in recent years and the steady increase in pension benefits that unions have won for their members have outstripped the ability of goverment units and private corporations to finance them.

Ultimately, pension financing problems may mean higher rates of taxation at all levels of government—and lower dividend returns for stockholders in private corporations.

Under ERISA, the insurance that protects workers' pensions is provided through employer contributions to a government-managed plan. If one company is unable to meet its pension obligations, all other firms contributing to the plan pick up the tab.

As Fortune magazine pointed out in an article last December, any defaults will have to come out of stock dividends, not only for the firm that defaults but for all others participating in the insurance plan.

In government, where pension financing problems are likely to be most severe in coming years—and where the ERISA protections do not apply—experts say the solution will have to be found either in higher taxes or in tightening of pension benefits.

Joseph Califano, the secretary of Health, Education, and Welfare, has estimated that federal, state, and municipal government plans, along with private plans, have unfunded liabilities that may exceed the national debt, more than $600 billion.

A survey conducted for Fortune found that 10 of the nation's largest corporations have unfunded pension liabilities equal to one-third or more of their net worth. The corporations: Chrysler, Westinghouse Electric, International Harvester, Bethlehem Steel, LTV, Lockheed Aircraft, National Steel, Republic Steel, American Motors, and Uniroyal.

Some smaller firms were found to be in even worse trouble. Wheeling-Pittsburgh Steel had unfunded vested liabilities that came to more than seven times the recent market value of its common stock.

Fortune estimated that total unfunded liabilities of American industry may reach several hundred billion dollars.

Some of the most serious pension funding problems are in multiemployer plans, generally concentrated in the construction, mining, transportation, and entertainment industries.

The Pension Benefit Guaranty Corp., which was created by ERISA, warned last July that multiemployer plans covering 1.3 million persons could fold in the next 10 years. It said the total liabilities of these plans is $3.5 billion.

"There is a limit to which public and private pensions can go on providing what Americans define as decent retirement income," said Harold L. Sheppard of the American Institutes of Research, co-author of "The Graying of Working America."

Califano said unfunded pension liabilities in the federal system are between $243 billion and $425 billion—which means the federal budget deficit is much larger than reported figures show.

The number of employes covered by more than 50 federal pension plans tripled in 16 years to 2.5 million in 1976. Unlike most private pensions, the federal benefits go up with increases in the consumer price index, and an increase of just 1 per cent can cost the government $800 million.

Such benefits usually are available at age 55 with 30 years' service. Many federal employes retire after 30 years, then take a job in the private sector and qualify for an additional Social Security pension.

This is especially true for the military, where only 20 years' service is required. The current unfunded liabilities in the military pension system reached $172 billion in 1976, and 25 per cent of the Pentagon payroll goes to retirees.

The number of public employes in state and local government has jumped from 3.5

million in 1950 to 12 million today. These employes are covered by 2,500 pension systems, many of them actuarially unsound.

For example, Sheppard noted, the New York City firemen's pension fund uses 1941 tables of life expectancy to calculate pension benefits. These tables are completely outdated in view of increases in life expectancy that have occurred since then.

"The firemen are not dying when they are supposed to," Sheppard said, and the result is a huge pension liability for the city. New York's five pension plans have unfunded liabilities of $6 billion, a major cause of the city's fiscal crisis.

In the District of Columbia, pension payments for police and firemen represent 43 per cent of the city payroll and could reach 110 per cent by the year 2020.

In nine Chicago and Cook County public pension funds, total unfunded liabilities are $2.5 billion, according to William J. McGlone, director of development for the Civic Federation, a Chicago taxpayers research organization.

The Chicago teachers fund has the largest unfunded liability, $53.8 million. Unfunded liabilities total $1.8 billion for Downstate teachers and $667 million for state employes, McGlone said.—WILLIAM GAINES.

THE POOREST OF THE ELDERLY POOR

The French writer Simone de Beauvoir, in her book "The Coming of Age," wrote that "old" is almost synonymous with "poor." That is an exaggeration—but not for some groups of elderly citizens.

The poorest of the elderly in America are women, blacks, Latinos, American Indians, and those who live in rural areas.

Probably the most shockingly poor are black elderly women living alone. Two out of every three of them have incomes below the poverty line [$2,720 annually for individuals], and 78 per cent are "near poor" at best, by government definition.

In contrast, the government classifies 15 per cent of all old people as poor and an additional 10 per cent as "near poor."

Perhaps the most disturbing fact is that elderly women constitute a steadily growing proportion of old people, inasmuch as more of them than men end their lives in poverty, loneliness, or nursing homes.

Women live 77 years on the average, men 69. Today there are 100 women over age 65 to every 69 men that old, and above the age of 75 there are nearly two women for every man. The 85-plus group, fastest-growing segment of the elderly population, consists mostly of women.

"It will be perfectly horrible when we have a society of only old ladies," said Dr. Wilma Donahue, 77, director of the International Center for Gerontology in Washington.

Most old women are widows. Only 39 per cent of women 65 and over are still married; 79 per cent of the men are. Of elderly persons with incomes below the poverty line, the overwhelming percentage are widows.

The anomaly for elderly women in America is that they live longer than men but have fewer benefits in the retirement years. Lower salaries for working women, lower pension benefits, and inadequate survivor benefits all contribute to placing many elderly widows in a grinding state of poverty.

In Illinois, there are 642,289 women 65 and over—three for every two men that old.

The Illinois Department of Aging estimates that more than half of all husbands do not make wills and thus may leave their widows at an additional disadvantage. Under state law, a widow with children receives only one-third of her husband's estate if he does not leave a will.

Economist Juanita Kreps, now secretary of the U.S. Department of Commerce, has said: "The older woman is the poorest in society today."

The median income of elderly blacks, both male and female, is roughly two-thirds that of elderly whites. About half of elderly blacks have incomes of less than $2,000 a year, and the percentage living in poverty is twice that of aged whites.

But black families tend to be more closely knit than white families. A large proportion of elderly blacks live with their children or other relatives, and only 6 per cent of the patients in nursing homes are black.

Although the average life expectancy of the general population has been rising steadily in recent decades, that of black males declined by a year between 1930 and 1970.

The life expectancy of black men is 60. For Mexican-American men it is 57, and for American Indian men it is 44. Blacks constitute 11 per cent of the general population but only 7.8 per cent of the elderly.

Louise Gerrard, executive director of the West Virginia Commission on Aging, calls the rural elderly "the most disadvantaged" of America's elderly population.

"They are more likely to live in poverty, to have substandard housing, to find it difficult to get needed services, and to lack mobility to get from homes to health clinics, food stamp offices, and senior centers," she said.

More than 20 percent of the rural elderly live in home without complete plumbing, and frequently the housing is ramshackle. On the average, rural housing is valued at 50 per cent of urban housing. In addition, 30 per cent of the rural elderly have no automobile available to them.—RAY MOSELEY.

FOR FUN—AND PREVENTION OF "RUST"

The present older generation is healthier than any that preceded it, and many of the elderly are trying to stay that way by participating in organized physical fitness programs.

The City Colleges of Chicago, the YMCA and YWCA, and the Chicago Park District all offer such programs for the elderly.

Forty fitness classes involving persons 60 to 92 years old have been held so far this year under sponsorship of the city colleges. Many of those enrolling also took part in the Fitness Festival, a regional meet held in Chicago, and the Senior Olympics, held last month in Springfield.

"People's bodies don't always wear out; they can rust out," said Susan Willis, a specialist in aging at the Mayor's Office for Senior Citizens

Any group of 30 or more senior citizens is eligible to have an instructor from Chicago City Colleges come to their meeting place and conduct fitness classes. Telephone 977-2520.

Those who are not part of a group may call the Adult and Continuing Education Department of the colleges to learn if fitness classes are to be held nearby. Telephone 977-2517.

The classes usually start with lessons in proper breathing and stretching, then advance to mild exercise and games.

The YWCA has an exercise class from 5:30 to 6:30 p.m. Mondays in the Loop Center, 37 S. Wabash Ave. The class, called Rhythmics, is open to men and women and starts with mild exercise done to music. Telephone 372-6600 for information.

The YMCA of Metropolitan Chicago has senior physical fitness or "gym and swim" classes for men and women at 18 Chicago and suburban locations.

The Chicago Park District holds fitness classes at various parks. The program also includes yoga classes and swimming.

Starting in January, the park district will offer indoor golf lessons free to senior citizens. (Others pay a $5 fee.)

[From the Chicago Tribune, Oct. 4 ,1978]

EARLY RETIREMENT BECOMING AN "ENDANGERED LUXURY"

(Nothing is more usual than the sight of old people who yearn for retirement; and nothing is so rare as those who have retired and do not regret it.) Charles Saint-Evremond, 1680

For a people supposedly devoted to the work ethic, Americans show an unusual relish for getting out of the labor force as early as possible. Many retire by age 62, some as early as their 50s.

But early retirement, that cherished part of the American dream, may not be with us for many more years.

Millions of working people who are now in their middle years or younger may find that they have to stay on the job well beyond 65 to help pay the soaring costs of old age in America, according to experts surveyed by the Tribune's Task Force in a six-month examination of problems of the elderly.

The reason can be found in population statistics: The number of elderly is rising at a phenomenal rate and the birth rate has dropped percipitously.

Today there are 23 million Americans 65 and over. By the turn of the century, there will be 30.6 million even if there is no increase in average life expectancy.

The Futures Group, a Glastonbury, Conn., "think tank" organization, predicts that life expectancy will rise dramatically and that the numbers will swell to 40 million by the year 2000.

Moreover, the fastest-growing group of the elderly is people 75 and older, and the cost of providing services to them is much higher than for the 65–75 group.

The population figures mean that a shrinking number of younger workers will be supporting an ever-growing number of older retired persons. "The problem boils down to how many nonproducers the producers can carry on their backs," says Nelson Cruikshank, President Carter's chief adviser on the elderly.

The ratio of active workers to retired citizens is 6 to 1 today. If current trends continue, it will be 3 to 1 by the year 2030.

Harold L. Sheppard of the American Institutes for Research, a former staff director of the U.S. Senate Committee on Aging, is one of the most prominent advocates of a change in retirement policies to keep more older workers on the job.

"If the trend toward early retirement continues, the cost of supporting retirement will become prohibitive," he said.

Already the nation's Social Security and pension systems have come under serious financial strain because of the burgeoning number of old people and the tendency to retire early.

Sheppard expects early retirement to remain the practice for a number of years but says that ultimately the elderly will have incentives to stay in the work force.

One incentive is inflation, which makes it more difficult to get by on pensions not geared to cost-of-living increases. Another is that more people reaching retirement age will have parents still living whom they must help support, he said.

Prof. James H. Schulz, a Brandeis University economist and expert on aging, predicts that companies will develop inducements to keep workers on the job longer when the supply of younger workers diminishes.

"This happened during the Korean War," he said. "Now companies have developed incentives all the other way."

University of Chicago gerontologist Robert Havighurst contends that rising energy costs, if nothing else, will force an increase in the usual retirement age in the next 20 years. By the turn of the century, he said, most Americans will wait until 70 to retire.

"We have a petroleum-intensive economy," he said. "As costs for fuel go up, we will have a more labor-intensive economy. We already are seeing this in agribusiness. People will be working longer—and they will be happier."

Indeed, many of those who have retired early are now disillusioned and bored; they

have found that endless fishing and golf have limited appeal.

Economic experts predict that, as business and industry become more dependent on older workers, new work patterns will develop to accommodate them: more part-time work, flexible schedules, and creation of less-demanding jobs for some elderly workers.

Some of that is happening already.

When David Dougherty, 66, of Schaumburg was nearing retirement at the First National Bank of Chicago as planning assistant to the vice president for personnel, he decided to create a position for himself.

He persuaded the bank to let him become a 40-hour-a-week "temporary" employee, serving as trust procedures administrator.

That way the bank doesn't have to pay him the fringe benefits that a regular employee gets. But, as Dougherty notes, it also means "they could fire me at any time." He said he is looking for a full-time job.

"I don't want to ride around the golf course every day. I want to be productive," he said. "I'm not decrepit, so there's no reason I should stop working."

A federal law taking effect next Jan. 1 will ban mandatory retirement for workers in the private sector before age 70 and eliminate mandatory retirement for federal employees.

The Labor Department predicts that only about 200,000 workers will take advantage of this law in its first year, but the numbers are expected to grow in succeeding years.

"The new law will have only a very, very minor impact on the trend toward early retirement," Sheppard said. "For a long time, the current trend will continue."

Most workers are in jobs in which there is no mandatory retirement, yet a majority elect to retire before 65. This is especially true in industries where many workers have boring, repetitive jobs: The average retirement age at General Motors is 59, and in the steel industry it is 61.

Shepard said that keeping older workers in the labor force will require not only more job opportunities but a change in the system that gives people incentives to retire early.

Federal law on the subject is contradictory. On one hand, Social Security law encourages workers to retire early by enabling them to begin drawing reduced benefits at age 62—three years earlier than the age for full benefits.

On the other, a new Social Security law raises benefits by 3 per cent for every year up to age 72 that a worker stays in the labor force beyond 65.

Social security law also reduces benefits by $1 for every $2 more than $4,000 a year that a retired person earns.

In contrast, many other industrialized nations encourage the elderly to stay in the work force. An elderly person may earn an unlimited amount and still draw his full Social Security pension in France, West Germany, the Netherlands, Switzerland, and Luxembourg.

Norway and Ireland have had a standard retirement age of 70 for years, and Norway raises Social Security benefits by 10 per cent for those who continue working past retirement age.

In many European countries, it is illegal to discharge a worker when he begins to draw a pension if he wishes to continue working.

In this country, the greatest barrier to employment of old persons is the "stereotyped image" that many personnel managers have, according to Shirley Brussell, executive director of Chicago's Operation ABLE [Ability Based on Long Experience], a coordinating agency for employment of the elderly.

"The personnel managers see old people as having health problems and being troublesome and frequently absent," she said.

Numerous studies have disproved these myths. They have shown that older workers, when they fall ill, may be out for longer periods than younger workers, but that their overall absenteeism is lower.

The studies also show that older workers generally have greater stability and a steadier rate of production than the young.

Bankers Life and Casualty Co., which has a policy of hiring older workers, said that in a six-month period, 27 per cent of the elderly had perfect attendance, a record achieved by only 10 per cent of those under 65.

Continental Illinois Bank and Trust Co. of Chicago has employed workers 65 and older on a part-time basis for about 10 years. Other major firms that make a practice of hiring the elderly are U.S. Steel, Polaroid, Prentice-Hall Publishing Co., Pitney-Bowes, and Texas Refinery.

"The greatest loss in the older years is not loss of physical ability or mental acuity," said Jack Ossofsky, executive director of the National Council on Aging. "It is the loss of options. We are mowing down the roses along with the weeds.

"We must bring to the attention of decision-makers in industry and the unions what we in gerontology have long known: Chronological age is a poor determinant of capacity. The only thing you know about an individual when you know his age is how many candles to buy for his birthday cake."

At the start of this century, it was common for people to continue working until they died. Today, only one in five men and one in 12 women still work at 65.

There are 2.8 million persons 65 and over who are employed—many of them part-time workers or self-employed—and another 145,000 are officially listed as unemployed and looking for work.

But economists say many thousands more who would like to work are not listed as unemployed because they have become discouraged and stopped looking for jobs. A Louis Harris survey found that as many as 4 million of the 23 million people older than 65 want to work.

The Burger King hamburger chain, like most other fast-food businesses, mainly employs teen-agers. But in the Chicago area, some Burger King managers have begun hiring senior citizens, and they are pleased with the result.

Agnes Stoeckel, 83, of Oak Park, grandmother of 14 and great-grandmother of 24, has worked at a Burger King in Berwyn for six months as a hostess.

"It was so lonesome staying home all the time," she said. "I wanted to get a job where I could meet people. I didn't think I was going to get the job because of my age, but I lied to them, told them I was 80."

George Thomas, 73, of Bellwood has worked as a host for Burger King in Maywood since January. He started in the kitchen but was made host when the manager noticed his knack for getting along with people.

"I like to talk to people, and I think that helps keep the business," said Thomas, who was formerly employed by a clothing company. "The job keeps me active, and I can use the money to pay the taxes on my home."

But the older people who are looking for jobs are many more than those who have found them.

Lilo Salmon, director of the Little Brothers of the Poor in Chicago, tells a typical experience of older people:

"You go to an unemployment office and you ask for work. And they laugh in your face. They say, 'Look, there are hundreds of thousands of people unemployed who are 40 and 50. Don't even come back here.' "

The U.S. Civil Rights Commission, in a report earlier this year, said there is widespread discrimination against the elderly in employment in federally financed programs.

"People over 65 are not placed . . . because administrators don't think they can find jobs for them, believe government will get a better return on its money serving younger people, or because of negative staff attitudes toward the old," the report said.

A vocational rehabilitation counselor in one city said that older clients often were referred to by staff members as the 4-H's—for hemorrhoids, hernias, hysterectomies, and hearing aids.

Under the Older Americans Act, the federal government has been providing funds through state employment services for several years to encourage the hiring of the elderly, mainly in nonprofit or public institutions such as libraries and schools.

"This is probably one of the most successful programs administered by the Labor Department," said Thomas Bradley, a labor expert at the National Council on Aging, which is one of the contractors working with state employment bureaus. "We have had a placement rate of 40 per cent."

The Illinois Bureau of Employment Security employs 18 persons, all over 55, as specialists in the employment of older workers.

"Most of them had retired, and they are doing a tremendous job with older workers," said Mary Alice Krakos, a bureau employment specialist. In a recent six-month period, she said, 5,009 elderly persons applied for jobs and 535 were placed.

There are more than 100 nonprofit senior employment centers around the country.

In Chicago, Operation ABLE, 36 S. Wabash Av., was set up last year with funding from several foundations to coordinate activities of such centers in this area.

"As far as I know, there is no other agency like this in the country," said Brussell, its director. At a recent White House conference on unemployment, Operation ABLE was cited as a model for other cities.

"The main reason that older people want to work is financial," Brussell said. "Their pensions may have been planned in a noninflationary time. A second reasons is that, after they retire, they get removed from the mainstream and they become bored.

"I have seen alcoholic or depressed people for whom getting back to work cures the problem."

Senior Action Services, Inc., 828 Davis St., Evanston, is an employment center that works with Operation ABLE. It helped Howard Kellerman, 65, a retired insurance salesman, find work with the State National Bank of Evanston.

"I work about 20 hours a week and don't exceed the $4,000 income that would reduce my Social Security," Kellerman said. "I wanted to keep physically and mentally active and supplement my income, and this job has done both for me."

Another agency, TASK, placed Richard Murphy, 64, of Homewood with a religious social center in the south suburbs as business manager.

"I wasn't prepared for retirement," said Murphy, formerly a claims manager for an insurance company. "It was an overnight decision, and I had made no plans. Right after I retired, I painted everything in the house that didn't move. I didn't know what to do with myself."

Although it meant a reduction in his Social Security benefits, Murphy said, "I went ahead and made $8,000 because the work was more important to me than the money."

He quit his job when summer came so he could spend more time outdoors, and now he hopes to find a part-time job.

The federal Comprehensive Employment and Training Act [CETA] program, designed to assist the poor in job training and placement, has been widely criticized for its failure to do more for older workers. Less than 4 per cent of CETA funds nationally have gone to the elderly.

"Chicago has led the country in providing more CETA funds for the elderly than any other city," said Tom Bradley of the National Council on Aging.

Such funding in Chicago is handled primarily through the Mayor's Office for Senior Citizens, which has placed 575 persons 62 and over in part-time jobs and 240 in full-time jobs.

Another 575 are in part-time work through a CETA program administered by the city's Department of Human Services.

EDUCATION AT 80: FOR ENJOYMENT, HIS FIRST REAL SCHOOLING

James A. Martin, 81, was born in a Mississippi halmlet and had no formal schooling as a child. But he dreamed all his life of getting an education.

When he married he sent his wife, Ada Alice, now 72, through high school and college. She became a social worker for the Cook County Welfare Department and later a caseworker and supervisor for the family division of the State of Washington; he worked as a Pullman Co. porter for 45 years.

Last year, Martin realized his dream. He entered Chicago Vocational High School's evening classes in American history and has just completed a summer course in the same subject.

"I thought I'd be embarrassed, but I wasn't, he said. "It's rough, because I really don't qualify for a high school course. But I'm not doing it for an education to make a living; I'm doing it for the enjoyment."

Only a relative handful of Americans are turning from the job market to the classroom after the reach 65. But, with the elderly population increasingly well-educated, experts predict that the number wanting to continue learning in old age will mushroom in the next few years.

"The public school system could be the vehicle for extensive pre-retirement training and for preparing families to care for the elderly in their own homes," said Robert C. Benedict, the U.S. commissioner on aging.

"There is also the question of whether public education is taking full advantage of older people as teachers and educators. They represent an enormously rich resource that could be called on to help educate young people."

The average urban resident over 65 in the United States has eight years of formal education. About 8 per cent of the 23 million elderly are college graduates, and 10 per cent are considered functionally illiterate.

Presently, only 2 per cent of those over 65—about 400,000 persons—and 4.5 per cent of those 55 to 65 are enrolled in educational programs. But surveys indicate that as many as half the elderly want to continue their education.

The Chicago Community Trust, which makes grants of $5.5 million a year to various programs, is funding the newly established Educational Network for Older Adults to help Chicago-area seniors get back in the educational swim.

"One reason that so few elderly are enrolled in education is not a lack of interest in learning but a lack of knowledge of what's there, and a lack of self-esteem," said Walter Buchmann, executive director of the Educational Network.

"Old people buy the stereotype about old people. They see themselves as inactive. They are also resistant because they don't want to sit in class with 20-year-olds and be gaped at. But they don't have to."

Buchmann said the elderly can enter college degree programs without taking regular courses, or they can sign up for special courses that have only older students.

He noted that some churches and synagogs also run educational programs for the elderly. Temple Shalom, 3480 N. Lake Shore Dr., has an open university for the elderly, with retired professors teaching the classes.

In the City Colleges of Chicago, persons 65 and over who register on the late registration date may attend classes that have room for them without charge if they have the proper qualifications.

They are also eligible for free adult education classes that earn up to five hours of credit.

Buchmann said that about 20 Chicago-area colleges and universities are cooperating with the Educational Network program.

The Educational Network can be reached by telephoning 782-8967.

Another educational possibility for the elderly is the Elderhostel, which offers a week of college-level courses to persons 60 or older [spouses under 60 are also eligible]. No college credit is given.

More than 100 American colleges are now participating in the Elderhostel program.

For information on courses at schools near Chicago, write Elderhostel, Wisconsin Region, University of Wisconsin Extension, Programs on Aging, Marietta House, 3270 N. Marietta Av., Milwaukee, Wis. 53201. Other listings are available from William Berkeley, national executive director, 55 Chapel St., Rm. 301, Newton, Mass. 02160.—WILLIAM GAINES.

WHERE ELDERLY CAN GET HELP IN RESUMING WORK

A number of agencies specialize in finding employment for older workers in the Chicago area. Following is a list of the principal ones:

North and Northwest—Du Page, Elmhurst YMCA Senior Employment Program, 211 W. 1st St., Elmhurst, telephone 833-7515; Highland Park Senior Center, 54 Laurel Av., Highland Park, 432-4110; Jewish Vocational Services and Suburban Satellites, 120 W. Eastman St., Arlington Heights, 255-4410, and 210 Skokie Valley Rd., Highland Park, 831-5630; Job Bound Center, Oak Mill Mall, Niles, 966-0016; Job Services, 901 W. Montrose Av., Chicago, 327-9350; Senior Action Services, Inc., 828 Davis St., Evanston, 864-7274; Senior Citizens Employment Center, 2020 W. Devon Av., Chicago, 761-9000; Senior Employment Opportunities, 1791 W. Howard St., Chicago, 274-4950; and Suburban Cook County Area Agency on Aging, 1396 Thacker St., Des Plaines, 827-8662.

South and Southwest—Jewish Vocational Services and Suburban Satellites, 18161 Morris St., Homewood, 799-6555; Job Services, 9231 S. Houston St., 374-8410, 9320 S. Ashland Av., 881-0700, and 1935 S. Halsted St., Chicago, 243-8350; South Suburban Council on Aging, TASK, and Project Re-entry, 15325 S. Page St., Harvey, 333-4988; Suburban Cook County Area Agency on Aging, 3518 W. 139th St., Robbins, 389-1910 or 333-6310.

West—Berwyn-Cicero Council on Aging, 5817 W. Cermak Rd., Cicero, 863-3553, and Suburban Cook County Area Agency on Aging, 931 Lake St., Oak Park, 386-8101.

Central—Catholic Charities, 721 N. La Salle St., 266-6100; Jewish Vocational Services, 1 S. Franklin St., 346-6700; Job Services, 40 W. Adams St., 793-4870; Mayor's Office for Senior Citizens, 180 N. La Salle St., 744-6798 or 744-5777; and Suburban Cook County Area Agency on Aging, 223 W. Jackson Blvd., 341-1400.

WHY MANY "DON'T GET AROUND MUCH"

When they retire, elderly Americans can escape the rush-hour hassles that afflict those still in the work force. But transportation remains a major problem.

Nearly 40 per cent of all elderly heads of households do not own an automobile. And many who do own cars are taken off the roads—unfairly, according to the National Council on Aging—because of difficulties in getting insurance.

The lack of a car makes many of the elderly heavily dependent on public transportation, which is seldom geared to their special needs.

For example, most public transport is designed to get people to work and home again; routes radiate like spokes on a wheel from the central city.

But the elderly often need to go crosstown, rather than downtown, to visit doctors, senior citizens centers, or friends. And few public transit routes are designed to get them there.

As they grow infirm, many persons also have difficulty climbing in and out of public vehicles. Fear of falling is thought to be a major factor limiting their use of public transport.

"Transportation is the means to any kind of social life for many old people, but public transportation is notoriously bad," said Nelson Cruikshank, President Carter's chief adviser on problems of the elderly.

The problem has not received as much attention as many of the elderly would like, but help is on the way.

Transportation Secretary Brock Adams announced last year that all new public buses bought with his department's assistance must meet specifications designed to aid the elderly and handicapped.

The buses must have floors no more than 22 inches above the ground and be capable of "kneeling" to 18 inches at stops. They also must be equipped with a ramp for boarding.

The "transbus," as the vehicle will be known, is not expected to be operating in most communities until about 1990.

The U. S. House Committee on Aging has recommended that persons serving as volunteer drivers for the elderly be given tax deductions and that companies providing non-profit transportation for the elderly receive tax exemptions.

In Chicago, the Mayor's Office for Senior Citizens [MOSC] provides limited transportation for elderly persons whose mobility is impaired.

The MOSC contracts with a private firm that provides five vans with lifts, one without a lift, and 12 sedans and station wagons. These vehicles transport 210 people a day.

Most use the vehicles to get to nutrition sites, where low-cost or free meals are available, or to do their shopping. About 85 a day use the vehicles to get to work or to doctors' offices.

"We do not come anywhere near meeting the demand for this service," a spokesman for the mayor's office said, noting that $610,000 in federal funds, plus $30,000 in income from elderly riders who contribute to the cost, is all that's available for the program.

Elderly persons who need the service are advised to call the MOSC transportation coordinator [telephone 744-4016] two or three weeks in advance. There is always a long waiting list.

The MOSC also sponsors a bus program to help senior citizens groups take recreational, educational, and cultural trips within Cook County. Costs are shared 50-50 with the group.

Chicago is one of about 150 cities that offer reduced public transport fares to the elderly, but Chicago Metro Seniors in Action, an umbrella group for various senior organizations, wants to go beyond that.

The Metro Seniors have proposed no-fare transportation for seniors. Free transport has been adopted by a number of cities across the nation, and the Metro Seniors say that businessmen in those cities have noted a rise in sales because old people travel more frequently.

[From the Chicago Tribune, Oct. 5, 1978]

POLITICS IN HOUSING FOR AGED

(Grow old along with me! The best is yet to be, The last of life, for which the first was made.)—Robert Browning.

State Rep. Daniel P. O'Brien, the Democratic committeeman for the 43d Ward, on Chicago's Near North Side, listens attentively when constituents file into his storefront headquarters at 1143 W. Webster Av. to discuss their problems.

According to Joe Starr, one of his precinct captains, "O'Brien's always looking out for his people. He's the kind of man you need to help you in the neighborhood."

One evening in early August, a man came to O'Brien to ask for help in getting an apartment for his mother in one of the Chicago Housing Authority projects for the elderly.

By law, political parties have no role in the assignment of apartments in federally subsidized housing projects; admission is supposed to be determined impartially on a first-come, first-served basis.

The man visiting O'Brien had been told the list of applicants was so long that, unless he used political influence, his mother might have to wait three years or more to get into a CHA apartment.

The committeeman didn't know it, but his visitor was Tribune reporter William Gaines, a member of a Task Force team investigating problems of the elderly. The "problem" he'd brought to O'Brien was fictional, arranged as part of the investigation.

O'Brien immediately promised Gaines that he would help get his mother into a housing project. Over the next six weeks, however, O'Brien's lieutenants made it clear that he does not dispense favors without getting something in return.

In this case, the terms of the "return favor" were that Gaines was to contribute $200 to the 43d Ward organization's campaign fund and to serve as an unpaid campaign worker on weekends.

Tribune reporters who talked with residents of housing projects for the elderly in various parts of the city had been told that such practices are common. Invariably, reporters were advised that they stood a better chance of getting an elderly parent into a project if they sought political help.

"They [the housing authority] will advise you it's a five-year wait, but if you know any politicians it will help," said an elderly woman working at the reception desk in one building. "Some of them ask for money under the table, but I don't believe in doing it that way."

An elderly man at another building said: "Talk to your precinct captain. Politics has a lot to do with this."

Acting on this advice, Gaines met with O'Brien briefly and was told that something could be done—but first Gaines would have to register to vote, then see his precinct captain, Joe Starr.

Starr, who seems to conduct most of his business over coffee in a restaurant at Wells Street and Lincoln Avenue, explained to Gaines how such matters are handled.

"If you do some work for O'Brien, he'll work a little harder for you," he said. Pointing out that the committeeman is seeking re-election in November as a state representative, he invited Gaines to spend some of his weekends canvassing the precinct for the candidate.

Too many people in the ward, Starr complained, "come around and want favors but they don't want to do anything." Then he got down to specifics:

"Here's what I want you to do. We've got these tickets for O'Brien. They're $50 each. I want you to go tell O'Brien you can sell four of them."

Gaines was then taken to ward headquarters and told to wait while Starr conferred with O'Brien. Next Gaines was ushered into an office where two of the committeeman's aides, George Alexander and Carl A. Honig, listened to the story about his mother.

Honig, the ward treasurer, told Gaines to get an application form for a CHA apartment and said, "We can attach a letter to it."

"We'd like for you to help us, too," he said. "We need some campaign support. We've got tickets to a party that cost $50 apiece, and we want you to buy four of them. That's how you can help us."

Gaines agreed, and Honig smiled as he handed over the tickets. "Check with me about the senior citizens home," he said. "I'll take care of that for you."

When contacted later by The Tribune, O'Brien denied that ticket sales are ever solicited as a condition for getting his help.

"I'm sure he [Honig] didn't imply that," he said, "I don't operate that way, and the organization doesn't operate that way."

O'Brien acknowledged that he tries to help people get into the CHA homes in his ward and said he keeps files of his letters to the CHA requesting such help. He added that his attempts have not been very successful.

"I don't know what it takes," he said. "But these are my constituents, and I try to help them out."

In 1976, the congressional General Accounting Office found that federal regulations governing admission to public housing projects have been violated more than once in Chicago.

The GAO reviewed the placement files of 174 tenants and found that 35 of them had been housed 8 to 59 months earlier than would have been the case if they had waited their turn on the application list.

A year earlier, federal officials had concluded that the CHA was using a tenant selection plan that violated the intent of antidiscrimination provisions of the Civil Rights Act of 1964. The officials found that separate waiting lists were being compiled for each project for the elderly, in addition to the required combined list for all projects.

In March, 1976, the federal Department of Housing and Urban Development's regional office in Chicago recommended rejection of a revised tenant selection plan submitted by the housing authority. The HUD office contended that the plan would reinforce racial and ethnic segregation in Chicago. But no action has been taken to resolve the matter, and The Tribune found that separate waiting lists are still in use.

In its six-month examination of problems of the elderly, the Task Force found that such evidence of political favoritism and racial discrimination is just a part of the difficulties that old people face in obtaining housing.

Across the nation, public housing for the elderly is in desperately short supply, and thousands of old people with low incomes are crowded into shabby hotels where they may be victimized by criminals or unscrupulous managers. More than 6,300 elderly persons are awaiting public housing in Chicago.

Housing costs are generally disproportionate to income. On the average, more than one-third of the budget of an elderly person goes for housing; for those 75 and older, the figure is 48 per cent—despite the fact that 70 per cent of the elderly occupying private housing own their property and 82 per cent of this group have paid off their mortgages.

For renters and homeowners alike, housing is often of poor quality. A Senate committee estimated in 1976 that at least 30 per cent of the nation's 23 million elderly live in substandard, deteriorating, or dilapidated housing.

Floyd Hyde, a former undersecretary of HUD and now a member of the staff of the National Council on Aging, said no public housing for the elderly has been started in the nation this year.

Although such housing programs have been highly successful, Hyde said, problems in connection with public housing for younger families have given the entire program a bad name and resulted in a loss of funding.

"With typical American impatience, we see problems in a program like that, and instead of solving the problems we discard the program," he said.

Another HUD program, under which loans are provided to private developers to build housing for the elderly, has been scaled back to provide for construction of only 16,000 apartment units this year and a like number next year, down from 40,000 annually in previous years.

Hyde said the nation needs 120,000 new units a year.

Among major cities, Chicago leads the country in availability of federally funded public housing for the elderly—270 units for every 100,000 persons. For New York City, the figure is 155 units.

In Chicago, 17,799 persons, most of them widows, live in the 15,331 public housing apartments designated for the elderly, paying an average of $50 a month in rent. Many of the apartments have special design features to meet the needs of the elderly.

Reporter William Recktenwald visited the Lincoln Sheffield homes at 2640 N. Sheffield Av., one of the CHA projects, and found contented residents in a pleasant setting.

"For the rent we pay, we should thank God every day," said Mrs. Frances Grundler, 76. She pays $62 a month for her apartment.

On the door of every apartment was a sign reading "OK." Residents display the blank side of the signs when they go to bed at night. If they fail to turn the signs over in the morning to display the "OK," it alerts floor captains who check each apartment daily to see if anyone needs help.

To ease the financial burden on persons unable to get into CHA projects, HUD subsidizies rents for 2,640 elderly persons. The tenants pay about 25 per cent of their income for rent, HUD paying the balance.

The Illinois Housing Development Authority, a state agency, financies private housing for low-income persons, including the elderly, that is generally superior to public housing.

The authority sells bonds and uses the proceeds to make low-interest loans to private developers to build the housing. Rents are subsidized by HUD, and the average renter pays $50 to $75 a month.

Since being established in 1967, the Housing Development Authority has financed construction of 16,847 apartments, 6,400 of them designated for the elderly and located close to shopping facilities and hospitals.

Joan Maas, marketing manager supervisor for the program, said most residents are elderly women living alone on Social Security benefits.

"There are three times as many applicants as there are units," she said. "The response we get is amazing. By the time the contractor is topping the roof, the building is usually filled."

Hyde, the former HUD undersecretary, has some reservations about the value of such a program.

"A lot of the elderly can work, but if we stash them in these projects, it's less likely," he said. "Their chance of working may depend on neighborhood ties, and there is a disruption from the neighborhood in this program. It's a good program, but limited in what it can do."

Whatever the limitations, Mrs. Gertrude Crevoisier, 68, would welcome an opportunity to live in one of the Housing Development Authority buildings.

Until she moved recently, she paid $140 a month for a one-room furnished apartment in the Lakeland House, 4541 N. Sheridan Rd., a poorly maintained building that caters to elderly persons on low incomes.

Her bathroom sink leaked and she had to use a hammer to turn off the kitchen faucets, she said, adding that there were large holes in the plaster, the furniture was old

and dirty, the rug was soiled, and the bathroom window would not close.

Mrs. Crevoisier, who receives $219 a month from Social Security, said she has applied to live in a public housing project. "But my God, by the time my number comes up, I'll be dead," she said.

Bennie Brennan, 78, and his wife, Caroline Arangelovich, 71, lived for four months in a small apartment in the Lakeland House. They complained that there was standing water from a broken pipe near the refrigerator and that the management had refused to do anything about it.

"I was afraid I was going to get electrocuted because there was a loose wire sticking out from the refrigerator," Arangelovich said.

The Lakeland House is owned by Our Home Co., 4401 N. Racine Ave.

Henry Lewis, the general manager, told The Tribune that the company acquired the building only a few months ago and has listed it for sale. "We have no building violations here," he said.

Reporters advised the city Building Department of conditions in the place. Inspectors then cited the building for 19 building code violations, including rotted window frames and sashes, cracked and falling plaster, leaks in several bathrooms, presence of cockroaches, and unsanitary conditions throughout the building.

Even more desperate, in many cases, is the plight of old people forced to live in what is known as single-room occupancy [SRO] housing in second- and third-rate residential hotels.

A staff report for the U.S. Senate Committee on Aging last June said that peeling paint, bad plumbing, infestation of insects, and filth are common in these facilities.

In the worst of them, it said, there is drug traffic and other criminal activities.

Residents often must surrender some of their freedoms to the manager of the hotel, according to the report. It said the managers may control whom the residents see, the hours of visits, and the residents' mail.

SRO tenants are excluded from the benefits of federal loans to rehabilitate old residential buildings. Such loans may be used only for "self-contained units," meaning units with private baths and providing kitchens or congregate dining.

In the SROs, residents use common bath and toilet facilities, and their single rooms often serve as both bedroom and kitchen. Rehabilitation of SRO buildings to meet federal standards would mean loss of half the units and a huge increase in rents, which many residents could not afford, the Senate report said.

Likewise, the SRO buildings do not qualify for the federal rent subsidy program.

Tribune reporter Thomas Powers checked into an SRO hotel at 55–57 W. Ontario St. and later described his room as "the filthiest I have ever seen."

He said the walls, ceiling, and floors were dirty, there were ratholes in the floor, a washstand was caked with dirt, and the mattress was stained with urine, blood, and vomit.

In the stairwell leading up to the room, Powers reported, paint was peeling from the walls, the carpet on the stairs was torn and dirty, and there was a mixture of strong, offensive odors.

Later, two other Tribune reporters went to the building and identified themselves. A woman on duty refused to answer questions but referred them to the caretaker.

When asked about building code violations, the caretaker said: "We have all kinds of violations here. Every building does in this area."

But there is no trouble with building inspectors, according to the caretaker. "They have too much to do. Besides, I don't let the city officials in, on orders of the owner," he said.

City Building Department records show that an inspection was attempted last April 14 at the Ontario Street buildings, but inspectors did not get inside. From external examination, they cited such violations as rotted wood, a missing section of a rear porch, broken and missing window panes, and open mortar joints.

John Power, director of the records section of the Building Department, told The Tribune that inspectors cannot enter a nonpublic building against the owner's wishes without a court order. And to get a court order, they must show "probable cause" to believe that violations exist inside, he said.

SOME UNREST IN THE LAND OF 'LIFE CARE'

(By John Gorman)

LEE'S SUMMIT, Mo.—To Al Laybourn, 78, a prosperous Missouri businessman, John Knox Village seemed an appealing concept in retirement living when he moved here in 1976 with his wife, Peg, 73.

The Laybourns paid an initial endowment fee of $43,950 and are assessed a monthly maintenance fee of $351.95.

For that they were promised a quiet life in a pleasant residential community with wide, well-paved streets, lovely landscaping, quaint footbridges, a golf course, swimming pools, and a fishing lake.

If they become ill, there is a nursing home and a clinic on the premises, and a 120-bed hospital was scheduled to open this fall.

The concept is called life care. John Knox Village—named for the 16th Century Scotsman who played a leading role in the establishment of the Presbyterian Church—was the first and is still the largest of 62 life-care centers in the nation that were founded by the Rev. Kenneth Berg.

"This is a delightful place—there's no doubt about it," said Laybourn.

But a quiet retirement haven it is not. In the last year, Laybourn has become a leader of a group of disillusioned residents directing an insurrection against Berg, charging that he has mismanaged their money.

The dispute has led to a lawsuit by the group and an investigation of sales practices at John Knox Village by the Missouri attorney general's office. The outcome could have repercussions for the operation of other John Knox Villages around the country, including one that is scheduled to open in about 15 months in the Chicago suburb of Orland Park.

Trouble in John Knox Village arose when the monthly maintenance fees for some residents started going up last year. Laybourn and other residents who asked to inspect financial records said they were rebuffed by Berg, a 55-year-old Presbyterian minister.

The group then filed a class-action suit charging that Berg has used the village's assets to make "highly speculative" investments with "grossly inadequate returns" and to buy property at "prices grossly in excess" of its value. Berg has filed an answer denying the charges.

The suit asks that a receiver and a new board of directors be appointed and that residents be repaid for losses they have suffered and awarded $6 million in punitive damages.

The residents who filed the suit say they have at least 1,000 supporters among the 2,800 residents. They contend that management has attempted to limit their support by making veiled threats to expel those involved in the case.

Berg built John Knox Village with a multimillion-dollar loan from the Prudential Insurance Co. of America and originally operated it as a for-profit company. In 1974, he turned it into a not-for-profit corporation. Then a for-profit company called Christian Services International, owned by Berg, was hired to manage the village and to hold the mortgage on it.

Berg also owns Group Communications which handles the advertising for the village and publishes its newsletter, and Environmental Design Associates, which does architectural and engineering work.

Residents must be at least 62. They pay an initial endowment of $9,950 to $43,950 plus a monthly service fee, the amounts depending on the size of the unit in which they live.

When a resident dies, his unit reverts to the village and is resold.

The Rev. William Perkins, 87, and his wife, Ethel, moved to the village in the winter of 1975–76. They paid an initial endowment of $19,710, and in slightly more than two years their service fee rose from $223 to $305 a month.

"We asked the salesgirl if there would be increases in the fees." Mrs. Perkins said. "She said they might have to face an increase, but that it would only be as high as the Social Security payments increase."

Mrs. Perkins said the fee increases were as much as 16 per cent in less than a year, and were accompanied by a 10 per cent reduction in services.

Another complaint of the dissidents is that those who become sick and are placed in the Med Center, [nursing home] have to relinquish their residences after a time.

"A friend whom I've known for 60 years has been in the Med Center for the last couple of years," said Carl D. Coffelt, 76, a retired electronics engineer.

"They took her apartment, sold it again, and upped her service fee."

Other complaints of the dissident group charged that bus and ambulance service was poor, clinic fees were exorbitant, and care in the nursing home was deficient. A Missouri Health Department inspector visited the nursing home May 1 and reported several shortcomings.

The dissidents also expressed fear that their money was being used to build the new hospital. Berg said Christian Services International bought the hospital in August to try to end that controversy.

Berg denied all the principal allegations against him in a 90-minute interview with The Tribune.

"No money has gone outside this project to speculative ventures in other cities," he said. He also said his books were open for inspection by any resident who wanted to see them.

"We are not ashamed of what has happened in this village," he said.

Fees have gone up because the cost of living has risen, he said, and not to have raised them would have been bad business.

The Tribune obtained a copy of the 1976 income-tax return for John Knox Village. Despite the rise in costs, it showed a profit of nearly $3 million, and Berg's figures for 1977 showed a profit of more than $4 million.

Berg said a cash reserve is necessary to cover future expenses. "We have to maintain reserves for stability," he said.

One demand of the dissidents was that the board of directors, which they described as hand-picked by Berg, be replaced by a board of residents.

Berg said that would be unworkable "because residents won't fairly vote themselves increases."

Nc decision has been reached in the suit brought by the residents. Some are convinced they will be expelled if they lose in court.

When asked about that, Berg acknowledged that residents can be asked to leave "if they create a situation that destroys the happy lodging or peaceful occupancy of others."

[From the Chicago Tribune, Oct. 6, 1978]

"A PLACE IN THE SUN" MAY OFFER LITTLE BUT DISCOMFORT

(Do not go gentle into that good night,
Old age should burn and rave at close of day;
Rage, rage, against the dying of the light.)—
Dylan Thomas.

NAVAJO, ARIZ.—John Plummer, 60, remembers the idyllic promises made in the brochures for Big Valley Ranches: abundant water, recreation, a town nearby for convenient shopping, swimming pools, and "just wonderful living."

Life in the Big Valley hasn't exactly been like that for Plummer, a retired engineer from Ft. Wayne, Ind., and his wife, Opal, since they bought land here five years ago.

The Plummers live in a mobile home on scrub land that is scorched by blistering heat in summer and raked by freezing winds in winter.

There is no town nearby, "and there probably never will be," Plummer said. Their nearest neighbor is five miles away, and they travel 150 miles to Gallup, N.M., to shop because it's less expensive there than anywhere closer.

Lots of water, the brochure said. Plummer said he drilled two wells and spent $19,091.84 before he found water.

The brochure mentioned electric power and other utilities. "After we moved in and there was still no power, we went to the power company and the man said he didn't know anything about it," Plummer said. "He figured it would cost about $870 a month to get electricity out here."

Plummer has his own generator, powered by a gas engine. He runs it intermittently because running it 24 hours a day would cost $9,000 a year.

The brochure spoke of "rich, fertile alluvial soil" that would grow almost anything "when touched with the magic of water." Plummer said he planted a garden and watered it from April to August, but nothing came up. He believes the soil is too sandy.

Plummer, who had not seen the land when he bought it, paid $14,400 for his 80-acre retirement retreat in the back of nowhere, and he can hardly believe what happened to him.

"It knocked the socks right off me. I saved all my life and now we're down to nothing. If I had it to do over again, I'd have stayed in Ft. Wayne."

A lot of other landowners—mostly elderly people who came to this area to retire and to escape the hard Northern winters—also wish they had it to do over again.

There are 250 families on 65,000 acres in Big Valley, and thousands more in other land developments across the Sun Belt who have found that reality falls short of the glowing brouchures, the fascinating sales spiels, and the bright dreams nurtured in their pre-retirement years.

Land fraud was among the problems investigated by The Tribune's Task Force as part of a six-month examination of the problems of the nation's elderly.

The 11-million-member American Association of Retired Persons and the National Retired Teachers Association have said that "faud and deception in the land sales industry are two of the more serious consumer problems facing our members."

The land developments in question are concentrated in New Mexico, Arizona, Colorado, Florida, Texas, and California.

Many people buy such land as an investment, often taking it sight unseen. When they try to sell it several years later, they find in many cases that the land is worth less than they paid for it.

Typically, the developer show them brouchures with pictures of happy people having drinks beside a swimming pool, lovely homes with expensive lawns, and handsome tennis courts and golf courses.

What the buyers do not realize is that the amenities pictured are usually confined to a small core area. Beyond that there may be only barren, windblown range land, miles from paved roads, utility lines, and shopping.

Testimony before the House Banking, Finance, and Urban Affairs Subcommittee in 1977 indicated that some of the land already sold is subject to earthquakes, landslides, or floods.

Harold Berliner, a California attorney who specializes in class-action suits involving land fraud, said that most buyers "do not have the faintest idea of the difference between a lot in New Mexico and an apartment in Baltimore."

"There is a myth widely believed by Easterners that the Lord placed natural gas, piped water, and telephone lines in all our land when he made it," Berliner told a congressional committee. "The reality . . . is a bleak desert scene . . . no roads, no water, no power, no phone."

The Federal and state governments have begun cracking down on developers using fraudulent promises to peddle such land at wildly inflated prices, and some of the elderly victims have banded together to bring lawsuits. But many of them may be unable to recover their money.

The Arizona attorney general's office is trying to close down the Big Valley Land Co. and obtain restitution for victims like the Plummers. The company's assets have been frozen, and it has been prohibited from selling land pending the outcome of the state's suit.

According to Thomas McClory, an assistant attorney general, Big Valley bought 60,000 acres from two ranchers in 1971 for $100 an acre and sold most of it before further sales were blocked.

Royden Brown, 57, a small, sun-wrinkled man, is the board chairman of Big Valley. He denied in an interview in his Scottsdale office that he had promised water, electricity, and other amenities to buyers. Those who say he did are liars, Brown said.

As for the promised town, he said it "went to hell" because an investor withdrew his money.

"We said there was going to be a future town built there," he said. "We didn't say we were going to build it. You know these people shape the truth to their situations, and soon they begin to believe it."

In 1973, Pasquale Mategrano, a retired Chicago baker, was visited by a nephew who was accompanied by a salesman for Big Valley. After a short sales presentation, Mategrano bought a 40-acre plot for $9,000.

A year later, a second salesman called on Mategrano to describe the glories of Big Valley.

Mategrano bought a second plot, for $26,000. He said that Ron Kaghan, the second salesman, told him the land would be worth a lot more in a few years.

"He gave us the big pitch," said Mategrano, now 71. "He said this was a prime piece of property. He said it was up in the mountains, where the air would be cool."

There are no mountains in the Big Valley development. Mategrano is still paying for his land in monthly installments, but he has no plans to live there.

"I have one son, and I thought maybe this could be for him to go to Arizona some day," he said.

Kaghan is now district sales manager in suburban Park Ridge for Palm Coast, Inc., a subsidiary of the International Telephone and Telegraph Corp. that sells land in Florida.

When questioned by a Tribune reporter, he said he could not remember selling land to the Mategranos, though he received a $2,000-plus commission on the deal.

Another Arizona company Consolidated Mortgage Co., was placed in receivership by the courts. It had three land ventures: Chino Valley Estates, Verde Lakes, and Castle Lakes.

David Quintieri, a Scottsdale lawyer who was named receiver, said the chances are "little or none" that people who bought land from Consolidated will get their money back.

"The best they can hope for, after all the court proceedings are through, is that they will have clear title to the land," he said.

Quintieri said the company bought lots for $200 and sold them for $3,000 to $4,000, plus interest.

"These people made payments for years and years and years to become proud owners of a piece of crap," he said. He described Consolidated as "a company without shareholders, a ship without sails, a complete mess."

Ned Warren Sr., the self-proclaimed "godfather" of Arizona land promotions, headed the company, which was sued by the Arizona attorney general in 1974 for fraudulent sale of land.

Warren is now serving a 62-year prison sentence. His four top aides were indicted but acquitted. Fifteen others, including Ned Warren Jr., are awaiting trial.

Actor Cesar Romero lent his name to Consolidated's operation and later testified that he was paid $1,000 a month for his promotional effort. His picture appeared on the cover of Consolidated's brochure.

"When we got here, we saw how so many of the lots flooded out," said Mrs. Audrey Mathivet, 66, who moved to Verde Lakes with her husband, Norman, in 1973.

"We saw one family watch as their trailer sank into the creek as it swelled."

She said she and her husband paid $3,500 for their land. "I haven't sold it so far because I wouldn't want to sell someone a piece of property the way Consolidated did," she said.

More than 8,600 people have bought land at Cochiti Lake, a development near Santa Fe, N.M., that was promoted by Great Western Cities, Inc., a subsidiary of Great Western United Corp.

In January, 1977, the Federal Trade Commission ordered the corporation to refund $4 million to persons who bought land there and in two other developments.

In addition, the company signed an agreement to spend $8 million on capital improvements by 1980 and another $8 million by 1985 to build roads, provide gas and sewage facilities, and construct recreational facilities.

The FTC also ordered the company to include this statement in all its advertising: "You should consider the value of our land to be uncertain. Do not count on an increase in value."

Justus C. Gilfillan, the company's board chairman, told The Tribune that Great Western has mailed reimbursement checks to 15,000 purchasers since the FTC order was issued.

Great Western is also facing a class action lawsuit brought on behalf of all those who bought land at Cochiti Lake.

Harold Breen, one of the attorneys who brought the suit, estimated that the company received about $40 million from Cochiti Lake land sales. The suit asks $45 million in damages.

Kenneth Myers, 67, a retired radio-TV repairman from De Kalb, bought a lot at Cochiti Lake in 1971. Four years later, when he retired to move there, he traded the lot in on another one on which a house had been built.

"They promised free access to the lake, but it costs $25 a year to put a boat on the lake, or $1 each time," he said. "We were told there would be a shopping center, but it wound up being just a convenience center."

"The plumbing is poorly insulated. The first winter the plumbing froze a couple of times, but that's fixed now. We're not miserable, but it's a hassle."

Alex Mashko, 62, of 6425 N. Damen Av., bought a Cochiti Lake lot in 1972 while honeymooning in New Mexico with his wife, Frieda, now 59. They later built a $27,500 retirement home there.

"If they followed through on those claims of a shopping center, hospital, a regular community in itself, the place could still take off like a skyrocket," said Mashko, who retired from the Postal Service about 2 years ago.

"But it's been a disaster. Right now, who the hell wants to buy out there? We rented

the place for a while, but for the last year and a half there's been no one living there. That damn lot isn't worth $100."

His wife has breast cancer, Mashko said, and Cochiti Lake is 50 miles from the nearest medical center. "That's just too far to go," he said.

Tom Neal, who worked as a salesman for Cochiti Lake lots, said that most of the salesmen believed in the development they were selling.

"I did; I bought a lot for $4,400," he said. "But it all ended when the salesmen started seeing the truth become fiction."

Rio Rancho Estates is another New Mexico development, near Albuquerque. The American Realty and Petroleum Corp. sold 77,000 homesites there to 45,000 persons for about $170 million.

In January, 1977, four executives of the company were convicted in U.S. District Court in New York on land-fraud charges and were sentenced to six months in jail. The company was fined $5,000.

According to the government, the company bought the land for $178 an acre and sold it for up to $11,800 an acre. Prosecutors said that three of the executives drew salaries of $90,000 to $135,000 annually and made killings on company stock, buying shares for 2 cents each and selling them for $60 when the stock peaked in 1969.

The core area of Rio Rancho consists of ranch houses on well-manicured lawns, a few parks, and a swimming pool. Beyond that are some cheap-looking frame houses and, farther out, nothing but barren, overgrazed land.

John Fanning, 60, bought two lots in the "outback" of Rio Ranchio, sight unseen, at a promotional dinner in New Jersey in 1971.

"I bought as an investment for my retirement," he said. "At the dinner, they showed you the green grass and the golf course and swimming pool. They give you the idea that's the way the whole area is going to look."

Fanning later bought a resale home in the core area for $27,500, but he has been unable to sell the two distant lots.

"They talked about the investment value of the land," he said. "Well, I think the cash value of the land I paid $6,200 for is about $1,800. I'm getting by, but I sure could use that money."

Rio Rancho officials declined to answer questions from The Tribune about the land sales.

Joseph Canepa, an assistant attorney general for New Mexico, said some people paid $15,000 for land from another company that the firm had bought for $12 an acre.

"They were told the area was mushrooming and it was a good investment," he said. "But they will be long gone before that land ever increases in value. We have an expert who is going to testify in one suit that the land won't be developed until the year 3000 if it continues at the same rate."

REPORTER LEARNS PITCH WITH A LAND SALES FIRM

Howard Goldstone, an official of Palm Coast, Inc., was instructing the trainee salesman in Park Ridge on the do's and don't's of selling land in Florida for the company.

"Stay away from the word investment," he said. "In fact, don't use it."

Palm Coast, a subsidiary of the International Telephone and Telegraph Corp., has special reason to be leery of the word.

In 1976, the company signed a consent order agreeing to discontinue several sales tactics that the Federal Trade Commission said Palm Coast salesmen had been using to mislead the public. Among them was the suggestion that purchase of Palm Coast land was a good investment.

The Palm Coast development is halfway between Daytona Beach and St. Augustine and just inland from Florida's east coast. Several inland waterways and small lakes are part of the development, which has 2,000 homesites and is scheduled for completion in 1983.

The "trainee," Tribune reporter John Gorman, learned during five days of work with the company that the policy stated by Goldstone doesn't necessarily correspond with the tactics of the firm's salesmen.

One day Gorman heard salesman Sidney Adelson tell a customer over the phone: "As more and more people move in, the value of the land, of course, increases, and with a big company like this [ITT] backing it, it encourages people to move in."

The FTC order forbids any representation that ITT is legally responsible for the debts of Palm Coast.

Later in the training a sales manager, Marshall Kerman, instructed Gorman on what to say to customers. As his pen glided across the map of Palm Coast, Kerman said, as though addressing a prospect: "See this waterfront property here? That property was going for $5,000 five years ago; now that goes for $25,000."

Later, Gorman identified himself as a Tribune reporter and asked Palm Coast officials about the salesmen's tactics.

Larry Kaghan, regional sales manager [his brother, Ron, is district manager], acknowledged that the language used by Adelson and Kerman would constitute a violation of the FTC order.

While working as a trainee, Gorman accompanied Kerman as he tried unsuccessfully to sell land to an elderly couple in Wheeling. Although the FTC order requires that salesmen show prospective customers copies of property reports from the State of Illinois or the U.S. Department of Housing and Urban Development, Kerman did not produce such reports.

When asked about this later, Kaghan said each salesman chooses his own time for introducing the reports. If the Wheeling couple had agreed to buy, he said, the property reports would have been produced before they signed a contract.

HOW TO COMPLAIN

A person who believes he is the victim of a land-fraud scheme can address his complaint to offices in both the state and federal governments in an effort to obtain redress.

At the state level, complaints should be sent to the attorney general's office. [The Chicago address is 160 N. La Salle St., Chicago 60601.] The federal agency that handles such complaints is the Office of Interstate Land Sales Registration, Department of Housing and Urban Development, Washington, D.C. 20411.

EXECS WHO STAY AROUND—AND IN HARNESS

(By Ray Moseley)

Some of the biggest names in Chicago business have embarked on new careers after leaving their corporate office suites.

Sidelined by retirement, the former executives have signed up for a voluntary effort to help some of the city's charitable agencies through the newly formed Executive Service Corps of Chicago.

The corps was formally organized in August with Robert Brooker, 73, retired chief executive officer of Marcor, Inc., as chairman. It has offices at 208 S. La Salle St.

The corps represents a growing trend in America. Thousands of persons who have retired from work and do not need a paying job are volunteering services to their communities.

Not all are high-powered executives, either. A lot of ordinary people give their time to a variety of efforts, from child care to visiting patients in nursing homes.

A national survey has shown that about 22 per cent of older Americans—4.8 million people—are involved in volunteer service and another 10 per cent are interested in joining in. In the last year, volunteer service by the elderly in Chicago-area organizations has increased 86 per cent.

"We decided to establish the Executive Service Corps because we have so many projects in the city that go begging for help," Brooker said in an interview.

The Chicago effort is an outgrowth of the International Executive Corps, which sends retired American executives to Third World countries to make their expertise available to businesses.

A year ago, the Edna McConnell Clark Foundation of New York financed establishment of a National Executive Service Corps patterned on the international program.

The National Corps enlisted Brooker's help in finding projects in Chicago. A steering committee was set up to review the prospects and then decided to form an independent corps here, with financial support from the Chicago Community Trust.

"This program will demonstrate to the community the tremendous resource we have in the older population," said Norma Wisor, assistant director of the trust.

Among the people working with Brooker are Joseph Block, former chairman of Inland Steel; Joann Rasmussen, wife of Arthur Rasmussen, former chairman of Household Finance Corp.; Clinton E. Frank, former owner of an advertising agency; and Kenneth V. Zwiener, retired chairman of Harris Bank and Trust Co. and past chairman of the Northwestern University board of trustees.

The Executive Service Corps should help to answer a criticism frequently directed at charitable agencies—that they attract many public-spirited people but few with managerial ability.

"The agencies don't have the kind of talent we think we can get," Brooker said. "It is not our intention to run any of these charities. The services we will provide are consulting and advisory."

For example, Goodwill Industries has no program to train its workers to repair items that are donated to the organization. The Service Corps intends to set up such a training program.

Metro HELP, an organization that serves as a conduit between runaways and their families, has a problem retrieving information to pass on to runaways when they call. The Service Corps has data-processing technicians who will try to help.

Each project the corps undertakes is expected to last 60 to 90 days. Volunteers will be reimbursed for their expenses in some cases but will receive no other compensation.

Brooker said he hopes to attract 600 to 900 retired executives as volunteers and to keep 30 to 40 busy at a time. A similar group started recently in Indianapolis, called the Society of Retired Executives, has almost 300 volunteers.

"We need specialists—people in data processing, industrial engineering, personnel, some legal talent, credit people," Brooker said.

"There is a tremendous amount of talent out there. I don't think anyone knows how much. Most of them don't have much to do but play golf."

Brooker, who worked with the International Executive Corps in Taiwan and Indonesia after his retirement in 1970, said volunteer efforts can give retirees a sense of achievement, "a spark of life."

"That's my theory of retirement—keep busy," he said. "It keeps the juices going. But I get a little static at home from time to time about keeping too busy."

[From the Chicago Tribune, Oct. 7, 1978]

IN INCOMPETENCY HEARINGS, YOU NEEDN'T BE THERE TO LOSE

Nature abhors the old, and old age seems the only disease; all others run into this one.—Ralph Waldo Emerson.

In the 4th century B.C., the sons of the Greek dramatist Sophocles decided the old man had become dotty because he insisted on writing plays instead of tending to business matters.

The sons went to court in an attempt to have him declared an imbecile and to have the management of his property transferred to them.

Sophocles appeared before the jury, read his latest work, "Oedipus at Colonus," and asked whether it seemed the work of an imbecile. The jury found in his favor.

In the United States, he might never have had the chance to appear in court. The laws of most states permit a court to declare an elderly person mentally incompetent without his being present or even represented by an attorney.

Once such a judgment is issued, the elderly person loses his power to sue, to charge a purchase, to sign a contract, to deed property, to marry or divorce, to open a bank account, and to vote.

His house can be sold by a court-appointed guardian or conservator without his knowledge or consent.

"The penalty can be much more severe than the penalty for murder," said Dean Jost, an attorney in Chicago's Uptown neighborhood for the Legal Assistance Foundation of Chicago, who has dealt with many cases in which elderly persons have been declared incompetent.

The Tribune Task Force examined the problems of elderly persons with mental illness as part of a six-month investigation of old age in America.

The laws under which people can be found incompetent represent just one example of the discrimination and hardship that society imposes on the elderly who are mentally ill.

Medicare's laws also discriminate against those suffering from mental illness, and in recent years state governments have taken thousands of mental patients out of state hospitals and put them in nursing and boarding homes to shift the cost of their care to the federal government.

Other old persons may suffer because some doctors mistakenly diagnose a variety of health problems as senility and fail to give them proper treatment.

Experts estimate that 3 million to 4 million of America's 23 million old people have significant mental problems. According to this estimate, two of every three persons who have such problems are not receiving any mental health care.

The likelihood of mental illness tends to increase with age because of the psychological strains that may come with retirement from productive work, loss of income, loss of spouse, departure of children, and increased physical impairments.

The elderly account for 25 per cent of the suicides in the United States, although they constitute only 11 per cent of the population. The highest suicide rates occur among white males in their 80s.

In seeking to protect the mentally incompetent, state laws provide for appointment of guardians, who have responsibility for personal welfare of the individual, or of conservators, whose responsibility is for person's finances.

Such laws are considered necessary to help mentally impaired old people to make decisions in personal matters and to avoid their being victimized by the unscrupulous.

But many legal authorities believe the laws are too sweeping and do not provide enough safeguards of individual rights

"The protective service law is a two-headed creature, part Santa Claus and part ogre," two legal experts wrote in a study prepared last year for the Senate Committee on Aging.

Illinois recently reformed its laws to give greater protection to the rights of the mentally ill.

Under bills signed by Gov. Thompson on Sept. 5, a person cannot be found incompetent by a court until the judge has first appointed a temporary guardian to look into the case.

The temporary guaradian must present recommendations on whether the person should retain all control over his affairs, partial control, or none.

"This will allow the person to retain his dignity as well as have his rights protected," said Jerome Goldberg, who served as executive director of the Governor's Commission for Revision of the Mental Health Code.

But it remains to be seen, he said, whether the temporary guardian "will be a real guardian or one in name only."

Illinois is one of only eight states that have enacted such reform legislation, according to a spokesman for the American Bar Association. The others are California, Idaho, Kentucky, Maine, North Carolina, Texas, and Washington.

In most other states, the proceedings in such cases are usually a mere formality. Often, the family of the old person initiates the action by asking the family doctor to certify that the person is mentally incompetent.

The person whose competence is questioned may be given as little as three days' notice of the legal proceedings and often does not appear in court or have legal representation, according to John Lamb, co-director of the Mental Disability Legal Resource Center of the bar association.

The Doctor who has pronounced someone incompetent does not have to appear in court. In most cases, only those seeking to have an old person ruled legally incompetent are present, and the judge enters a judgment in default.

The bar association is preparing model legislation designed to put safeguards in such proceedings.

"People tend to be overprotective of old people," said Karen Lewis, a paralegal aide with the Senior Legal Air project at the University of Southern California.

"They want to put them in a nursing home and take away all of their rights just because they may not be able to totally handle all of their affairs."

Lewis told of an elderly woman in California who had gone into a nursing home after a fall in a bathtub. Then her daughter died, and the elderly woman lapsed into depression.

A state guardian was appointed. After a few years, the woman recovered. She was running errands for the nursing home and helping with other patients, but still she was without any legal rights.

The state guardian agreed to go to court with Legal Aid on her behalf, and her rights were restored.

In another California case, a young woman had been appointed guardian of her father. The state welfare department charged she was siphoning off his money through such devices as billing the estate for $100 worth of groceries and delivering only $30 worth to her father.

Legal Aid went to court and got the guardianship switched to a niece, but it took six months to get a hearing.

"Many times, the person involved dies before a problem gets a hearing," said Gary Rowse, project director of the Senior Citizens Legal Service at the University of Southern California. "It is bad for everyone, and the confusion and strain on the elderly person are probably harmful."

Prof. John J. Regan of the University of Maryland Law School and Georgia Springer, staff attorney for the National Council of Senior Citizens, have proposed changes in the laws on guardianship and civil commitment to give more protection to old people.

Except in emergencies, they suggest, courts should be required to order that the elderly person be screened by a psychiatrist and social worker to determine the most appropriate kind of assistance.

They also recommend that the elderly person be assured the right to be present in court, to be represented by a lawyer, and to cross-examine witnesses.

Another problem area for the old who are mentally ill involves Medicare, the federal health insurance program for the elderly.

An elderly person may receive hospital care for physical ailments as often as necessary, provided there is a 60-day break between hospital stays. But there is a lifetime limit of 190 days of coverage for treatment in a psychiatric hospital.

An old person with a physical ailment pays an initial deductible fee on doctor's bills, and Medicare covers 80 per cent of reasonable bills after that. But a mental patient, after paying the deductible, gets coverage for only 50 per cent of his bills, up to a limit of only $250.

"This is blatant discrimination against the mentally ill, and it was written into law by the U.S. Congress," said Hilda Robbins, president of the National Association for Mental Health.

The U.S. Civil Rights Commission, in a report on discrimination against the elderly in federally supported programs, said, "The area of mental health services represents one of the most glaring examples of discrimination on the basis of age."

The commission studied 328 community health centers. It found that people over 65 constituted 9.9 per cent of the populations served by the centers but only 4.1 per cent of the patients.

An additional finding was the that centers devoted only 5 per cent of staff hours to consultation with agencies that serve older persons.

"One result is that older persons do not have an opportunity to learn what preventive measures they can take to maintain good mental health," the commission said.

A further problem for the elderly mentally ill has been the "dumping" of patients from state hospitals into nursing and boarding homes, where psychiatric services are rarely available.

The reason is financial: It costs about $21,000 a year in state money to keep a patient in a mental hospital. In nursing and boarding homes, the federal government picks up the bill for the elderly under the Supplementary Security Income program, at an average cost of about $2,000 a year.

The number of patients in state hospitals has dropped more than 62 per cent in the last nine years. In Illinois, the percentage of elderly in state hospitals has declined 87 per cent, with an estimated 13,000 residents having been moved into Chicago's Uptown area, where nursing and boarding homes proliferate.

Dr. Jack Weinberg, director of the Illinois State Psychiatric Institute and past president of the American Psychiatric Association, said the dumping of mental patients into nursing homes is "devastating," both for them and for the mentally healthy patients already in the homes.

"In mental hospitals, we didn't provide enough money, so they became snake pits," he said. "Then we send the mentally ill into the community, and again we do not provide enough money. The guilt is all of ours."

Weinberg said one of the strains that may help induce mental illness in the elderly is that they are "a people without a future."

"It's subversive to the American way of life," he said. "In our society, we value the future more than anything else. The elderly can't enjoy retirement because they are planning for the future, and it's bleak. The hope for a better tomorrow is a mirage in the twilight of life."

Society must get away from "the stereotype that the elderly are useless," Weinberg said, and the elderly individual must do a

great deal himself to maintain his mental health.

"The secret of mental health is to have a multiplicity of sources of gratification—work, an interest in the community, recreation, education, church, and the family," he said.

Another problem of the elderly was highlighted recently by a group of medical experts who spoke at a National Institute of Health conference on treatable diseases of the elderly.

They said that 300,000 to 600,000 elderly persons who show symptoms of brain failure have been mistakenly labeled "senile" and often go untreated in nursing homes and mental hospitals.

These experts said a number of treatable physical diseases are often undiagnosed and can cause temporary brain dysfunction, giving the appearance of senility.

Such ailments include heart disease, strokes, certain infections, anemia, nerve disease, brain tumors, kidney or liver failure, diabetes, nutritional deficiencies, reactions to tranquilizers and other drugs, and alcoholism.

"The failure to treat and diagnose reversible brain syndromes is widespread," said Dr. Robert N. Butler, director of the National Institute on Aging.

President Carter's Commission on Mental Health has estimated that 20 to 30 per cent of those diagnosed as senile have conditions that are preventable or reversible if treated early.

WHERE ELDERLY CAN GET INVOLVED

When an elderly person suddenly finds himself widowed or retired, time may begin to drag and loneliness to set in. A number of agencies have devised programs to relieve the tedium. Following is a list of some of the agencies in the Chicago area that have volunteer programs for the elderly to join:

Bensenville Home Society Retired Senior Volunteer Program [RSVP], 331 S. York Rd., Bensenville 60106 [766–5800]; contact Rose Cummings. The Bensenville Home offers seniors a wide range of programs including community health, museum projects, and day-care services.

Community Development and Economic Development Association of Cook County, 600 S. Michigan Ave., Chicago 60605 [922 9158]. Offers foster grandparent and senior nutrition programs, among others.

Executive Service Corps, 208 S. La Salle St., Chicago 60604 [372–3356]. An organization of retired executives offering advice to charitable and nonprofit agencies.

Hull House RSVP, 3179 N. Broadway, Chicago 60657 [348–8330]. Offers seniors involvement in a wide range of neighborhood, community health, daycare, and other programs of public service.

SCORE [Service Corps of Retired Executives], a branch of the Small Business Administration, 219 S. Dearborn St., Chicago 60604. A group of retired executives who offer advice and counsel to fledging businessmen. Other offices in Illinois include Granite City, Peoria, Marion, Decatur, and [soon] in Rock Island County.

Senior Companions, 223 W. Jackson Blvd., Chicago 60606 [341–1400]. Offers a two-week course to train suburban elderly poor to visit shut-ins in the Chicago suburbs. There is a small salary for these positions.

Volunteer programs also exist at most hospitals, where the elderly can provide patient services including reading, writing letters, running errands, and making phone calls.

[From the Chicago Tribune, Oct. 11, 1978]

GROWING OLD IN AMERICA

Our 14-day Task Force series captioned "Growing Old in America," is concluded, but not forgotten. Sen. Percy [R. Ill.], for example, has urged Sen. Frank Church [D., Idaho], chairman of the Senate Special Committee on Aging, to conduct Senate hearings on topics developed in the Tribune series. "I urge the committee to carefully analyze the Chicago Tribune series," Sen. Percy said. "The information contained in the articles will be invaluable to the committee as we continue to investigate these issues."

"Growing old in America" has been one of the most ambitious projects of our Task Force. Reporters worked on it over a period of many months, and we reserved page-one space for the series throughout two weeks, no matter how weighty or numerous were the major stories competing for front page attention. Our team dug into many dimensions of being old here and now, from life in nursing homes to real estate deals in the Sun Belt. Those of our readers who were not in a position to recognize some of their own problems knew that they were reading about what they may be facing in the future. The project constituted a great opportunity for stimulating and satisfying reader interest, and our Task Force improved the opportunity most ably.

One theme unifying several stories in the series was having to leave one's own home against one's will—forced out not only by poor health but by inflation, crime, inadequate home-help services. Even predatory home repair men contribute to shortening people's ability to remain in their own homes. The old saying "Be it ever so humble, there's no place like home" is especially applicable to the elderly, who are almost always happier in their own familiar quarters than they can be anywhere else.

Of course physical and mental debility requires many aged people to end their days in institutions. Nursing homes meet an essential need. Excellent ones meet it very well—if also at a very high price. But the callous indifference of many nursing home managements towards their residents is a perennial scandal. The Tribune has told this story before now, and probably will be telling it again.

It is most important to structure services so that goodwill and money reenforce each other. When altruism and profit compete, profit often wins.

The Senate Special Committee on Aging should give particular attention to government-financed home-help services, for many persons a practical alternative to more expensive government-financed institutional care, often in miserable conditions. And all tax-supported services should be on guard against the unscrupulous greedy, who are sure to seize every opportunity given them.

People who are or who hope to be elderly [that is, just about everyone] should remember some of the lessons of our "Growing old in America" series. Healthful living and a prudent attitude towards salesmen can spare many of us vast avoidable trouble and grief.

O'HARE AREA RESIDENTS NEED THE AIRPORT NOISE REDUCTION ACT OF 1978

Mr. PERCY. Mr. President, I fully support S. 3279, the Aircraft and Airport Noise Reduction Act of 1978. Airplane noise is the No. 1 issue to tens of thousands of my constituents. Those constituents live with the once-every-60-seconds din of jet aircraft arriving and departing Chicago's O'Hare International Airport, the world's businest commercial airport. The bulk of these constituents spend less than 10 hours per year in an airplane. But they spend every waking hour and many restless sleeping hours the whine of jet engines.

No one can say for certain how deleterious the short and long range health effects of excessive noise are. But no one can deny that jet noise is annoying, obnoxious, and at times, painful.

Of course, the only airplane noise the vast majority of my constituents hears is the whisper of a jet already halfway across the sky. For some of my colleagues, almost all their constituents fall into this category. But citizens all across my State and every other State use the air transport system. The aircraft noise problem therefore belongs to all of us. It is up to all of us to take steps to solve it.

The biggest step was the one taken by the Federal Aviation Agency last year to mandate fleetwide compliance with airplane noise standards by 1985. Quieting noise from the source is a very effective way to ameliorate noise problems.

This bill takes some steps to help the airlines comply with these noise regulations. Cutting the ticket tax by 2 percent leaves airlines the option of raising air fare by 2 percent—thereby keeping ticket prices steady, and using this extra revenue to finance noise abatement improvements. However, I am hopeful that airlines will reduce their fares by 2 percent and use the increased profits generated by lower fares to finance quieter aircraft.

The 2 percent tax reduction has merit in its own right, as well as in its effect on noise abatement. If it does indeed result in lower air fares, it will be anti-inflationary, and it will make transportation available to some people who may not have been able to afford it before.

There are other important parts of the bill on which I base my support.

Title I provides funds for planning and implementing programs to improve compatibility between airplane noise and the uses of land around airports. These funds are only available to airports and airport area towns who volunteer to get together and commit themselves to solving their noise problems.

Once the commitment is made, though, funds are available to study and implement a whole range of noise control projects ranging from preferential runway systems to soundproofing buildings, to actual acquisition of noise-impacted property. With the funds as an incentive, I look to the implementation of aggressive noise compatibility programs across the country.

Title I also instructs the Secretary of Transportation to establish a sorely needed uniform system of measuring noise and noise impact. The kind of confusion that now characterizes noise control programs should cease.

Mr. President, the millions of Americans whose lives have been disrupted and hearing impaired by aircraft noise need this bill. I support the Aircraft and Airport Noise Reduction Act of 1978, and I hope we can pass it, confer on it, and get it into law before we go home.

S. 3279, THE AIRCRAFT AND AIRPORT NOISE REDUCTION ACT

Mr. PERCY. Mr. President, I am offering four amendments to the Aircraft and Airport Noise Reduction Act of 1978. I

urge my colleagues to support these amendments.

Section 102 of this bill gives to the Secretary of Transportation the responsibility to "identify land uses which are normally compatible with various impacts of noise on individuals." Section 304 gives to the same Secretary the authority to grant extensions and waivers from airplane noise regulations "as he determines reasonable." Both these sections conflict with earlier legislation giving this kind of responsibility and authority to the administrator of the Environmental Protection Agency.

The Noise Control Act of 1972 gives the EPA the responsibility to determine "levels of environmental noise in defined areas requisite to protect the public health and welfare." The same bill also amended the Federal Aviation Act of 1958 such that the FAA may not grant exemptions from noise regulations without first consulting the EPA.

The reasons we vested such authority in the EPA are as valid today as they were in 1972. EPA's primary function is to protect the public health and welfare from pollution, including noise pollution. The characteristics of airplane noise are not all that different from other kinds of noise. If the EPA has found that specified levels of noise at places where specified activities occur are dangerous, then those levels should apply to airplane noise. Public health and welfare should be the first word in airplane noise standards.

Therefore, I am offering this first amendment to guarantee the EPA its proper role in the setting and enforcing of airplane noise standards. The first part of this amendment directs the FAA to give presumption to EPA noise standards when it, the FAA, establishes noise compatibility levels. The second part of the amendment instructs the Secretary of Transportation to consult with the administrator of the EPA before granting any waivers.

It should be noted that this amendment does not give primary responsibility for setting and enforcing airplane noise standards to the EPA. Safety and other considerations dictate that the Secretary of Transportation have the final word on noise compatibility standards and on waivers. But he should not have sole authority. Under this amendment, he must start with EPA standards and consult with them on waivers. The final decisions, though, are up to him.

The second amendment is intended to guarantee that airports and airport area towns consider the option of using the grant money included in this bill to soundproof individual residences and apartment buildings. Too often, Federal money only goes for big projects. I would like to see some of this money going to the homeowner whose walls shake and windows rattle every time a plane goes over. Without explicit statement, I am afraid these grants would never filter down to the homeowner or apartment dweller. Therefore I suggest that number three in the list of projects qualifying for grant money in section 104(a) be amended to read "the construction of barriers and acoustical shielding, including the soundproofing of single-family residences, apartment buildings, and other buildings."

The third amendment deletes section 107. That section prohibits a new property owner from recovering for noise damages unless that person can prove to the court that noise got significantly worse after he purchased his property. In the first place, I do not believe it is the business of the Federal Government to legislate who can or cannot sue in civil court. I believe this section is unconstitutional and will be thrown out by the courts later if we do not delete it now.

This section was intended to protect airports from time-consuming and expensive lawsuits by people who, some contend, should have known better than to move in, in the first place. But many new property owners do not know better. Real estate agents have been known to investigate airport operations and show houses under one landing pattern only when another one is in use. Examples of other deceptive and borderline fraudulent practices are on file. The Federal Government should not deny the new property owner thus abused his right to protect himself. The lawsuit remedy is difficult enough as it is. Section 107 should be deleted.

The fourth amendment substitutes a study with broader dimensions for the study that is now called for in section 108. The Federal Interagency Aviation Noise Research Panel recommended in March of this year, the following:

If the postulated near-term and longer-range national aviation noise abatement goals are to be achieved circa 1985 and 2000, respectively, they will not likely be achieved merely by projected individual aircraft compliance with FAR 36 Stage 2 and Stage 3 levels, nor by additional improvements in source noise reductions affecting only a limited number of aircraft making up the total fleet. Instead, noise goal achievement will require the exercise of all four noise control options (source, path, airport operations and compatible land use), ideally in an optimal systems sense, so that maximum benefits can be achieved soonest with lowest costs. Systems studies are strongly endorsed, since these can explore the nature of optimal solutions considering a range of scenarios and variables. Such studies are important for future agency planning of noise abatement RT & D as well as future regulatory and implementation requirements, and to place the relative roles and importance of the four noise control options in better perspective.

This fourth amendment calls for such a study.

It instructs the Secretary of Transportation to look at all the factors involved in increasing compatibility between airport noise and land use around airports. It directs the Secretary to look toward a goal of full compatibility by January 1, 2000. And it asks him to weigh all these factors, and determine the combination that will bring us as close to the goal as is feasible, at the minimum cost to the whole system.

Since that minimum cost will entail some cost, this amendment also asks the Secretary of Transportation to determine the most efficient and effective means for obtaining the funds necessary to achieve maximum feasible compatibility.

Based on these determinations, the Secretary will make recommendations to the Congress. As the Interagency Noise Panel said, these recommendations will me invaluable in plotting the course of future airplane noise control actions.

In order to keep this study from turning out over-general this amendment requests the Secretary to report back by July with the dimensions of the study. In that way, we will see what we are getting. If it seems unfocused, we can ask the Secretary to direct the study toward more specific questions.

I urge the floor managers of this bill, and the rest of my colleagues, to accept these amendments.

Mr. President, I ask unanimous consent that the text of these amendments be printed in the RECORD at this point.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

On page 2, after line 25, insert the following:

Such regulations shall be compatible with the standards established by such Administrator for measuring and rating the impact of environmental noises in general, except in cases where the Secretary determines that safety issues or other special characteristics of aircraft noise require measurement or rating in a different manner.

On page 16, line 15, after the word "Secretary," insert the following: ", after consulting with the Administrator,."

On page 6, line 20, after the word "of", insert the following: "single family residences, apartment buildings, and other".

On page 11, beginning with line 20, delete all through line 7 on page 12.

On page 12, line 8, strike out all in such line through line 20, and insert in lieu thereof, the following:

SEC. 108. (a) The Secretary shall study the means available for achieving maximum feasible airport noise—land use compatibility, as defined in section 102(3), toward a goal of full compatibility by January 1, 2000, including, but not limited to—

(1) reductions in airport noise impact as a result of more stringent aircraft noise regulations and aircraft operating procedures; night time and early morning curfews; airport design and airport instrumentation changes; diversion of traffic from primary to secondary and satellite airports; accelerated development of more efficient and quieter aircraft powerplants; and

(2) changes in land use by means of acoustic insulation of buildings, changes in the zoning of undeveloped land, changes in the use of developed land, or by any other acceptable means.

Such study shall determine the combination of means which will achieve maximum feasible compatibility at minimum cost.

(b) The Secretary shall also determine the most efficient and effective means for obtaining funds for achieving such maximum feasible compatibility.

(c) Not later than July 1, 1979, the Secretary shall submit to Congress an interim progress memorandum detailing how such study will be carried out.

(d) Not later than January 1, 1980, the Secretary shall submit to Congress a report setting forth the determinations made pursuant to such study together with recommendations for legislation required to implement programs designed to achieve maximum feasible compatibility toward a goal of full compatibility by January 1, 2000.

HEW DEFIES CONGRESS IN PROPOSED WELFARE GIVEAWAY TO ILLEGAL ALIENS

Mr. PERCY. Mr. President, on February 23, 1978, I introduced an amendment to H.R. 7200—a bill which has not been scheduled for floor action—to reduce welfare abuses by newly arrived aliens. Reports from across the country indicate that it is not uncommon for aliens to begin collecting welfare payments after being in the country for only 30 days. I remain very concerned about this practice, which last year cost taxpayers nearly $80 million.

Now, a proposal which presents an even greater opportunity for abuse of our welfare system has been offered by the Department of Health, Education, and Welfare. The May 6, 1978 Federal Register contains notification of a proposed rulemaking by HEW's Social Security Administration. The regulation provides that "aliens who have continuously resided in the United States since before January 1, 1970, will be presumed to be permanently residing in the United States under color of law."

This new regulation would effectively allow illegal aliens to collect Supplemental Security Income (SSI) benefits—payments intended for the aged, blind, and disabled.

The notification of proposed rulemaking goes on to note that this regulation constitutes a change in policy. In fact, it is much more than that. This rule change amounts to a reversal in policy in blatant disregard of congressional intent.

Congress has been clear in stating its definition of the term "under color of law": the applicable Senate Finance Committee report states clearly that this term applies to aliens who entered the United States before July 1948, not January 1970 (Senate Report No. 92–1230, p. 466). At no time has Congress, through legislation or in committee reports, indicated any intention of modifying this stand. In fact, Congress this year declined to take action to change this date by not taking action on S. 2252, President Carter's proposal to grant permanent resident status to those who have entered the country before 1970.

Therefore, in proposing these regulations, it appears that HEW is attempting to provide welfare benefits by administrative flat. Congress has been unwilling to pass legislation on the broader question of whether persons who entered the United States illegally in the past ought not to be deemed legal and thus eligible for all kinds of privileges and benefits, among them SSI benefits. Yet HEW is trying the "backdoor" approach to implement policies contrary to the intent of Congress as previously expressed, and to what would appear to be Congress present intent in declining to take up the highly controversial—and in my view highly unwise—Carter proposal.

I believe the proposed rule change is contrary to the public interest, and yet another "rip off" of American taxpayers, already the victims of widespread welfare abuse. For that reason, together with my highly distinguished colleague Senator EASTLAND, the chairman of the Judiciary Committee which oversees immigration matters, I have written a letter to HEW Secretary Joseph Califano protesting this proposed rule. Both Senator EASTLAND and I feel that this issue is for Congress to decide, and that by proposing the new rule, HEW has once again overstepped its bounds—this time in a manner that flies in the face of policy that Congress set down years ago.

I ask unanimous consent to submit for the RECORD the letter Senator EASTLAND and I sent to Secretary Califano on this subject, along with a copy of the review done for me by the American Law Division of the Library of Congress on the interpretation of the key phrase determining eligibility, namely "under color of law". That memo concludes:

DHEW's proposed modification of these regulations would appear, in light of the above legislative history, to be overinclusive; that is, it would make presumptively eligible not only those who entered the U.S. prior to July 1948, and who have been given certificates of lawful admission but also those who can demonstrate continuous residence in the U.S. since before January 1, 1970. There would appear to be no warrant in the legislative history of the phrase in question to include the latter category.

In addition, I would like to submit a letter from the General Accounting Office to the then-Acting Commissioner of the Social Security Administration, which reaches the same conclusion.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 20, 1978.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR SECRETARY CALIFANO: On May 16 the Department of Health, Education, and Welfare proposed an amendment to its regulations to allow illegal aliens who entered this country before 1970 to collect welfare benefits under the Supplemental Security Income (SSI) program.

The law creating SSI specifies that its benefits may go to aliens "permanently residing in the United States under color of law." HEW proposes to interpret this phrase to include aliens—even *illegal* aliens—who have lived in this country since January 1, 1970. We are disappointed that HEW is attempting to act without regard to Congressional intent. The phrase "under color of law," on the face of it, makes it clear that the program excludes *illegal* aliens.

The legislative history of the SSI legislation makes it even more clear that Congress intended to exclude illegal aliens. The Senate Finance Committee report notes that benefits would be paid only to people who are "United States citizens or aliens *lawfully admitted* for permanent residence" (Senate Report No. 92–1230, p. 385, emphasis added). The report defines the phrase "under color of law" to cover aliens who entered the United States before July 1948, *not* January 1970 (p. 466).

At roughly the same time, the House of Representatives debated H.R. 16188 (*Congressional Record*, 12 September 1972, pp. 30173–30179). Congressman Pickle introduced an amendment designed to curb welfare benefits from going to illegal aliens. In the debate on the amendment, Congressman McKevitt noted:

"If this amendment does anything it may express the clear intent of this Congress that we think that we should not have HEW requiring the States to pay welfare benefits to illegal aliens."

Congressman Randall agreed, adding:

"Let us adopt this amendment and see whether the people of HEW can continue to go their own way without paying attention to the mandates of Congress."

Congressman Mayne also concurred, saying:

"I am convinced that was not the intent of Congress when it passed the social security law. We did not intend to be providing social security benefits to illegal aliens."

Congressman Pickle himself said:

"Obviously we are all in agreement that we should not pay these benefits to illegal aliens."

The Pickle Amendment and the bill as a whole were adopted by the House.

We are attaching advisory opinions on your proposed regulation, furnished by the American Law Division of the Library of Congress, and by the Human Resources Division of the General Accounting Office. The Library of Congress opinion concludes:

"DHEW's proposed modification of these regulations would appear, in light of the above legislative history, to be overinclusive; that is, it would make presumptively eligible not only those who entered the U.S. prior to July, 1948, and who have been given certificates of lawful admission but also those who can demonstrate continuous residence in the U.S. since before January 1, 1970. There would appear to be no warrant in the legislative history of the phrase in question to include the latter category."

A similar conclusion is reached by the General Accounting Office.

The intent of the 92nd Congress, which enacted the SSI program, thus could not be more self-evident. As for the intent of Congress now, we note that last fall the Administration introduced S. 2252, the "Alien Adjustment and Employment Act." This bill would grant amnesty to illegal aliens who entered the United States before 1970, and have lived here since. These illegal aliens would then be eligible for, among other things, SSI benefits. Congress has so far chosen not to act on this legislation, and there is practically no possibility of its being considered during the remaining months of this Congress.

HEW's proposed regulation notes that the Department will notify the Immigration and Naturalization Service of the illegal aliens' presence in the country for "whatever action it deems necessary." Since the Administration has proposed total amnesty for these aliens, it is hardly likely that INS will "deem necessary" any corrective action at all.

We are especially dismayed that HEW thus appears to be acting in blatant disregard of the intent of Congress. Our Constitutional system requires that policy decisions such as this be decided by Congress, not by bureaucratic decree that flies in the face of what Congress has decided.

HEW's proposal is even more disturbing in view of the fact that the Social Security Administration appears to be engaged in a continuing practice of ignoring Congressional mandates. In April 1977, the Senate Finance Committee released a staff report on the SSI program which found a "pattern of disregard for the law" (p. 74). The report describes six specific policies that are contrary to Congressional intent.

We are also disappointed in the way in which the current proposal was promulgated. The INS estimates that 765,000 aliens would be added to the pool of eligible recipients if they otherwise qualify. Why then was no Economic Impact Statement prepared, in compliance with Executive Orders 11821 and 11949?

When Congress is ready to provide SSI

benefits to illegal aliens, we will do so. In the meantime, HEW's proposal is best rejected.

Sincerely,

JAMES O. EASTLAND,
CHARLES H. PERCY.

THE LIBRARY OF CONGRESS,
Washington, D.C., June 14, 1978.

To: Hon. Charles Percy, Senate Committee on Governmental Affairs.
Attn: Barry Breen.
From: American Law Division.
Subject: Whether DHEW reinterpretation of "Under Color of Law" Is in Accordance with Congressional Intent in SSI Program

This is in response to your inquiry concerning whether the reinterpretation of "under color of law" in the Supplemental Security Income (SSI) program, as proposed by the Department of Health, Education, and Welfare in regulations offered for public comment on May 16, 1978, is in accord with Congressional intent.

The SSI program extends eligibility to any individual who is aged, blind, or disabled, and who

is a resident of the United States, and is either (i) a citizen or (ii) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 1153(a)(7) or section 1182(d)(5) of Title 8). 42 USC 1382c(a)(1)(B).

With respect to how an individual can demonstrate permanent residence in the U.S. "under color of law," regulations presently in effect [1] provide as follows:

§ 416.204 Evidence of permanent residence in the United States under color of law.

(a) *Type of evidence to be submitted.* Evidence that an applicant has been residing permanently under color of law in the United States, as defined in § 416.120 for the purposes of establishing eligibility for supplemental security income payments, shall be of the following character:

(1) INS Form I-94 (Arrival-Departure Record) endorsed "REFUGEE—CONDITIONAL ENTRY," or

(2) INS Form I-94 endorsed to show bearer has been paroled for an indefinite period pursuant to section 212(d)(5) of the Immigration and Nationality Act, or

(3) Documentation in the form of correspondence from the Immigration and Naturalization Service stating the applicant has been granted *indefinite voluntary departure* or an *indefinite stay of deportation.*

(b) *Evidence not available.* If the evidence described in paragraph (a) of this section is not available, the applicant shall state the reason therefor and submit other evidence of probative value.

[39 FR 28627, Aug. 9, 1974]

DHEW now proposes to amend these regulations to include within the category of those permanently resident in the U.S. under color of law those persons who can demonstrate continuous residence in the U.S. since before January 1, 1970. The proposed regulation would add the following as subparagraph (a)(4) of 20 CFR Part 416.204:

(3) . . ., or

(4) Evidence which establishes that the applicant has continuously resided in the United States since before January 1, 1970. Where the applicant establishes permanent residence in the United States under color of law as provided for in this subparagraph (4), and where the applicant meets all other eligibility requirements, the Social Security Administration will notify the Immigration and Naturalization Service of the presence of the applicant in this country. 43 Fed. Reg. 21013 (May 16, 1978)

Footnotes at end of article.

The question is whether this proposed administrative extension of coverage with respect to who is considered to be permanently residing in the U.S. under color of law is consistent with Congressional intent.

The phrase "or otherwise permanently residing in the United States under color of law" was contained in neither the House committee version, the House-passed version, nor the Senate committee version of the bill which authorized the SSI program (H.R. 1). Each of these versions required, as a condition of eligibility for SSI benefits, that individuals be either resident citizens or aliens "lawfully admitted for permanent residence." [2] The above phrase was added by a floor amendment offered by Sen. Chiles and accepted by voice vote during the last day of Senate debate on H.R. 1.[3] A companion amendment offered and accepted simultaneously provided the following definition of the above phrase:

At the end of Part A, Title 5 of the bill, add the following new section:

SEC. —. Meaning of "permanently residing in the United States under color of law"; for the purposes of this act and any provision of the Social Security Act amended by this Act, the term "alien permanently residing in the United States under color of law" shall include an alien refugee who is lawfully present in the United States as a result of the application of the provisions of section 203(a)(7) or section 212(d)(5) of the Immigration and Nationality Act.[4]

In the House-Senate conference on the bill, however, this definitional section was deleted and its operative language included as a parenthetical expression after "or otherwise permanently residing in the United States under color of law" in section 1614(a)(1)(B).[5]

Because no objection was offered to Sen. Chiles' amendments on the Senate floor, the only comments that might be illustrative of the amendments' intent were those in support of the amendments by Sen. Chiles and his fellow Senator from Florida, Sen. Gurney. Both Senators articulated the reason as being to assure that Cuban refugees accepted into the United States as political refugees be eligible for SSI benefits and not be inadvertently excluded. Their comments were as follows: [6]

Mr. CHILES. Mr. President, I introduce these two amendments on behalf of my colleague, Mr. GURNEY, and myself. They simply make clear in the bill that it would not detract from the right to benefits of Cuban refugees, of which 12,000 reside in Florida. They are receiving benefits presently under the existing system, but there has been some question as to whether, under this bill, they would be eligible. These amendments would make clear that they are eligible.

The staffs of the distinguished chairman and the ranking minority member of the committee have seen these amendments. If there is no objection, I should like to have them agreed to.

Mr. GURNEY. Mr. President, these amendments which we are introducing at this time are designed to prevent a great and unintended economic hardship being placed upon the people of Dade County, Fla.

I know that the Finance Committee and its distinguished chairman did not intend this result, however, the effect of the limiting language concerning aliens which appears in the next to the last paragraph on page 466 of the committee report does just that.

Florida has about 12,000 refugees from Communist Cuba within its borders who are either over 65 years of age, blind, or disabled. At my request, HEW has provided an estimate that the payments for these individuals are about $18 million per year.

Mr. President, the Cuban refugee program is one of Federal responsibility and the State of Florida should not be required to bear the cost of that commitment alone. The categories of eligibility must, in all fairness, be amended to include these political refugees.

It was the Federal Government that established, under four successive administrations, the policy of opening this country's doors to refugees from Castro's tyranny. This policy was formalized during the preceeding administration by President Johnson's personal actions and by international agreement.

Moreover, under international protocols of general application, the United States has agreed to accord refugees staying in its territory equal treatment. If these amendments are not approved, the State of Florida, and Dade County will be forced to pay for programs which ought to be supported by the Federal Government. I am sure that this is not what the Members of this body want.

It is clear where the responsibility for these individuals lies and I urge my colleagues to support these two amendments.

Mr. LONG. Mr. President, we have no objection to the Senator's amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc of the Senator from Florida (Mr. CHILES).

The amendments were agreed to en bloc.

Some further illumination can be gleaned by reference to page 466 of the report of the Senate Finance Committee,[6a] to which the remarks of Sen. Gurney make reference. The version of H.R. 1 reported by the House Ways and Means Committee and adopted by the House would have replaced the existing program of Aid to Families with Dependent Children (AFDC) with a new Family Assistance Plan (FAP). As with the Ways and Means Committee and House-passed versions of the SSI program, eligibility for the FAP program would have been limited to U.S. residents who were either citizens or aliens "lawfully admitted for permanent residence." [7] The Senate Finance Committee substituted for the proposed FAP program a Work Opportunity program and a revised AFDC program. Included in the committee's AFDC revisions was a provision limiting eligibility to individuals who were citizens or aliens "lawfully admitted for permanent residence (or otherwise permanently residing in the United States under color of law.)" [8] The committee report explained this provision as being a reaction to a Supreme Court decision [9] holding that the states could not, in light of the absence of any explicit reference to aliens in the Social Security Act, disqualify or otherwise limit the eligibility of aliens for AFDC. According to the committee report, the Court made clear that although Congress has broad power over the terms and conditions of aliens' residence in the U.S., it cannot delegate that power to the individual states. Thus, the committee report explains the above language as an exercise of that power, and describes its intent as follows:

"Under the committee bill . . ., States would be mandated in Federal law to require as a condition of eligibility for the AFDC welfare program under the Social Security Act . . . that an individual be a resident of the United States and either a citizen or alien lawfully admitted for permanent residence or a person who is a permanent resident under color of law (that is, a person who entered the United States before July 1948 and who may be eligible for admission for permanent residence at the discretion of the Attorney General under section 1259 of title 8 of the United States Code).[10]

This is the language to which Sen. Gurney referred as potentially excluding Cuban refugees and which he and Sen. Chiles sought to correct by addition of their amendments.

Thus, it is clear that as proposed for the AFDC program by the Senate Finance Committee, the language "or otherwise perma-

nently residing in the United States under color of law" had a very restrictive meaning, including only those persons who entered the United States before July 1948 and who may be eligible for admission for permanent residence at the discretion of the Attorney General under section 1259 of title 8 of the United States Code.[11]

It is further clear that as amended by the Chiles amendment the phrase took on a broader meaning to include not only the aforementioned category but also political refugees from Cuba, i.e., "any alien lawfully present in the United States as a result of the application of the provisions of section 1153(a)(7) or section 1182(d)(5) of Title 8." Indeed, reference to sections 1153(a)(7) and 1182(d)(5) of Title 8 makes the phrase even more inclusive than Cuban refugees. Section 1153(a)(7), as in effect in 1972, gives the Attorney General authority to issue conditional entries to persons who are fleeing racial, religious, or political persecution in Communist or Communist-dominated countries or in the Middle East, or who have been uprooted by a natural catastrophe. Section 1182(d)(5) gives the Attorney General discretionary authority to temporarily parole into the U.S. aliens who are applying for admission, for "emergent reasons or for reasons deemed strictly in the public interest." Although both of these categories could include Cuban refugees, such refugees would not necessarily be the exclusive beneficiaries.

The Chiles amendment indicates no intent to eliminate from the coverage of the phrase "or otherwise permanently residing in the United States under color of law" the category specified in the Senate Finance Committee report, that is, those who entered the U.S. prior to July, 1948, and who, at the discretion of the Attorney General, have been issued certificates of lawful admission. Neither, on the other hand, do the amendments indicate any intent to broaden the coverage of the phrase beyond the categories specified by reference to Title 8, that is refugees from political, religious, or racial persecution and temporary parolees. Thus, it would appear that the coverage of the phrase "or otherwise permanently residing in the United States under color of law" was intended to be threefold: (1) aliens who entered the U.S. prior to July, 1948, and have been issued certificates of lawful admission by the Attorney General, (2) aliens who have been admitted as refugees from political, religious, or racial persecution, or from natural catastrophes, and (3) aliens who have been temporarily paroled into the U.S.[12]

Consequently, it would appear that DHEW's present regulations interpreting this phraseology (see p. 2) may be underinclusive: that is, they do not appear to presumptively include those who entered the U.S. prior to July, 1948, and who have been given certificates of lawful admission by the Attorney General.[13] On the other hand, DHEW's proposed modification of these regulations would appear, in light of the above legislative history, to be overinclusive; that is, it would make presumptively eligible not only those who entered the U.S. prior to July, 1948, and who have been given certificates of lawful admission but also those who can demonstrate continuous residence in the U.S. since before January 1, 1970. There would appear to be no warrant in the legislative history of the phrase in question to include the latter category. It could, of course, be argued that the language in the Senate Finance Committee report evidences an intent that coverage be extended to those who have long resided in, and have developed extensive ties with, the U.S. That has been said to be the purpose of 8 USC 1259 giving the Attorney General discretionary authority to give certificates of lawful admission to those who entered the U.S. prior to July, 1948.[14] But the specific reference by the Senate Finance Committee to the statute governing the certification of the lawful admission of such aliens would seem to make the extension of that ameliorative category to aliens resident in the U.S. since before January 1, 1970, a matter for legislative action rather than administrative decree.

We hope the above is responsive to your request. If we may be of additional assistance, please call on us.

DAVID M. ACKERMAN,
Legislative Attorney.

[8] House of Representatives Bills, 92nd Congress (1971-72), Vol. 2, p. 735.

[9] *Graham* v. *Richardson*, 403 U.S. 365 (1971).

[10] S. Rept. 92-1230 (Sept. 26, 1972), p. 466.

[11] *Id.*, Section 1259 of Title 8 provides the Attorney General discretionary authority to grant a certificate of lawful admission to aliens who entered the U.S. prior to June 30, 1948, who are otherwise not ineligible to citizenship, and who cannot otherwise establish lawful admission.

[12] This conclusion would seem correct notwithstanding that the Senate Finance Committee's proposed revisions of the AFDC program, in which it first included the phraseology in question and in the report on which it gave the phaseology a restrictive meaning, did not survive the House-Senate conference on H.R. 1. The identical language was added by the first Chiles amendment to the SSI program in full awareness, as made clear in Sen. Gurney's comments, of the restrictive meaning given it by the Senate Finance Committee, and the second Chiles amendment then broadened its meaning in both the AFDC and the SSI programs by reference to two additional categories of aliens. Thus, the subsequent deletion of the pertinent phrase from the AFDC revisions would not seem to affect its meaning in the SSI program.

[13] Subparagraph (b) of 20 CFR Part 416.204 could be taken as covering this category, but given the generality of the language this cannot be certain. They may also be covered as aliens "lawfully admitted for permanent residence."

[14] *Sit Jay Sing.* v. *Nice*, 182 F. Supp. 292 (D.C. Cal., 1960), *aff'd* 287 F. 2nd 561 (9th Cir., 1961).

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., July 31, 1978.

Mr. DONALD I. WORTMAN,
Acting Commissioner of Social Security, Department of Health, Education, and Welfare

DEAR MR. WORTMAN: We have reviewed your notice of proposed rulemaking, Federal Register Volume 43, number 95, Tuesday, May 16, 1978, which liberalizes Supplemental Security Income eligibility requirements for illegal (undocumented) aliens. We believe that the proposed rule is not consistent with congressional intent regarding aliens' eligibility for Supplemental Security Income. Moreover, we believe that any change to the eligibility criteria should be accomplished through legislation rather than the rulemaking process. Therefore, in our opinion, the proposed rule should be withdrawn. Our comments on these matters follow.

ALIENS' ELIGIBILITY FOR SUPPLEMENTAL SECURITY INCOME CURRENTLY AND UNDER PROPOSED RULE

Section 1614(a) of the Social Security Act as amended (42 U.S.C. 1382c(a)(1)(B)) provides that aliens may be eligible for Supplemental Security Income if they are lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law. Aliens admitted for permanent residence are immigrants who are authorized to stay in the United States indefinitely. Aliens permanently residing in the United States under color of law include those aliens who can prove continuous residence in the United States since before June 30, 1948, and refugees.

The proposed rule would make it easier for undocumented aliens to prove their eligibility for Supplemental Security Income. The rule does this by requiring these aliens to prove continuous residence in the United States since before January 1, 1970, instead of June 30, 1948.

The Social Security Administration indicates that the rule is needed to enable some aliens who are long-term residents of the United States to be eligible for Supplemental Security Income. For example, a number of aliens who were converted from State welfare rolls to the Supplemental Security Income program were subsequently determined ineligible for benefits. They were removed from the rolls because they could not prove they were lawfully admitted or residing in the United States since before June 30, 1948.

PROPOSED RULE PREMATURE IN VIEW OF CURRENT CONGRESSIONAL CONSIDERATION OF ALIEN STATUS

In October 1977, a bill entitled the Alien Adjustment and Employment Act of 1977 (H.R. 9531) was introduced. The bill contained a series of actions "to help markedly reduce the increasing flow of undocumented aliens in this country and to regulate the presence of millions of undocumented aliens already here."

One element of the proposed legislation would, like the proposed rule, enable undocumented aliens who have been in the United States continuously since before January 1, 1970, to be eligible for Supplemental Security Income. The proposed legislation would amend the Immigration and Nationality Act (8 U.S.C. 1259) to authorize granting permanent resident status to undocumented aliens who have resided continuously in the United States since before January 1, 1970. Currently, the Immigration and Nationality Act (8 U.S.C. 1259) authorizes granting of permanent residence to undocumented aliens who have continuously resided in the United States since before June 30, 1948. Aliens who are granted permanent resident status are eligible for federally funded health and welfare benefits.

PROPOSED RULE NOT IN AGREEMENT WITH INTENT OF CONGRESS REGARDING COLOR OF LAW

Based on our review of legislative history as it relates to Supplemental Security Income eligibility, we have concluded that Congress intended color of law to include refugees and undocumented aliens who arrived in the United States before 1948. We believe current Social Security Administration regulations correctly reflect that meaning; and that legislation rather than rulemaking would be needed to include for Supplementary Security Income eligibility purposes under color of law undocumented aliens who arrived as recently as January 1, 1970.

According to section 1614(a) of the Social Security Act the term color of law includes aliens who are lawfully present in the United States as a result of the application of the provisions of section 203(a)(7) (8 U.S.C. 1153(a)(7)) or section 212(d)(5) (8 U.S.C. 1182(d)(5)) of the Immigration and Nationality Act. Section 203(a)(7) includes aliens who enter the United States conditionally as refugees from political or religious persecution in communist or middle east countries. Section 212(d)(5) provides for persons paroled into the United States for an indefinite temporary period of time by the Attorney General in the public interest. Indochinese refugees entered the United States under this section.

Legislative history of H.R. 1 (92d Congress) which amended the Social Security Act to create the Supplemental Security Income program gives further meaning to the phrase color of law. On page 466 of the Senate Finance Committee's report accompanying H.R. 1 (Senate Report No. 92–1230) the Committee defines a person who is a permanent resident under color of law as "a person who entered the United States before July 1948 and who may be eligible for admission for permanent residence at the discretion of the Attorney General under section 1259 of title 8 of the United States Code." In effect, the Committee interprets a person who is a permanent resident under color of law to mean a person who meets the requirements of section 1259.

While this definition was used in discussion of the Aid to Families with Dependent Children program in the Committee report, it appears that the Congress intended this meaning of "color of law" to apply to the Supplemental Security Income program. During Senate floor action on H.R. 1, it was pointed out that the language in the bill "permanently residing in the United States under color of law" could operate to exclude Cuban refugees from Supplemental Security Income benefits. Consequently, on October 5, 1972, two amendments were introduced to insure that Cuban refugees would be eligible for Supplemental Security Income. The amendments added under the term color of law alien refugees who are lawfully present in the United States as a result of the application of the provisions of section 203(a)(7) or section 212(d)(5) of the Immigration and Nationality Act. We could find no legislative history to indicate that Congress wanted to broaden the category of aliens included under the Committee report definition of color of law; other than to add refugees.

Social Security presently recognizes the Senate Finance Committee report definition of color of law in determining eligibility for Supplemental Security Income. Section 2156 of the Social Security Claims Manual discusses presumption of lawful admission for permanent residence.

Section 2156 of the Social Security Claims Manual states that:

"Based on satisfactory proof of an individual's presence in the United States before June 30, 1948, as defined in the Immigration and Nationality Act and his continuous residence from such entry, presume for purposes of SSI eligibility that he is lawfully admitted for permanent residence unless available evidence negates such a presumption: * * *."

Evidence acceptable as proof of presence in the United States before June 30, 1948, include school records, marriage licenses, drivers licenses, social security cards issued prior to 1948, or statements from two persons attesting to the fact that the claimant was present in the United States prior to June 30, 1948.

Section 2157 takes note of the Senate Finance Committee report stating that:

"The Senate Finance Committee in its report on the 1972 Amendments characterized 'an individual permanently residing under color of law' as a person who entered the United States before July 1948 and may be eligible for admission for permanent residence at the discretion of the Attorney General under section 1259 of title 8 of the United States Code."

The section goes on to state that:

"This is the section which gave rise to the presumption referred to in section 2156 above and which Immigration and Naturalization Service approved for limited use for purposes of the Social Security Act."

CONCLUSION

The proposed rule parallels a more liberal immigration policy currently being considered by Congress. The present regulations regarding alien eligibility for Supplemental Security Income are in agreement with alien eligibility under color of law as presently defined by the Congress. We believe that any redefinition of the eligibility criteria should be accomplished through legislation rather than through the rulemaking process.

We appreciate the opportunity to comment on your notice of proposed rulemaking and would like to be advised of any consideration given to our comments.

Sincerely yours,

GREGORY J. AHART,
Director.

NELSON HOSPITAL COST CONTAINMENT AMENDMENT

Mr. MELCHER. Mr. President, the Montana Hospital Association has diligently promoted a program among Montana hospitals to hold down cost increases for patients. The association and the individual hospitals have voluntarily cooperated to keep the costs for patients as low as possible without sacrificing quality care for patients.

There are substantial results that are documented that illustrate that the Montana hospital program, which is voluntary, has succeeded far better than what is the case nationally.

The Montana Hospital Association has provided me with that documentation which I find to be a very compelling argument against further regimentation by more Federal requirements and reporting surely to be implemented by the pending amendment of the distinguished Senator from Wisconsin (Mr. NELSON).

I ask unanimous consent to have the material printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MONTANA HOSPITAL ASSOCIATION,
Helena, Mont., August 16, 1978.

Senator JOHN MELCHER,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR MELCHER: On August 3, 1978 the Senate Finance Committee voted to report out the Talmadge Bill, S. 1470. At the same time the committee rejected an amendment offered by Senator Gaylord Nelson which would have expanded the Talmadge Bill's coverage beyond Medicare and Medicaid to include all payers and all inpatient revenues as well as set up standby controls to be triggered if the Voluntary Effort fails. It should be noted that the Senate Finance Committee approved the Talmadge Bill by a 12–1 vote and that it now has been tacked onto a House passed minor tariff bill (H.R. 5285).

The position of the Montana Hospital Association, its 60 member hospitals and over 8,000 employees is in support of the Talmadge Bill as reported out of the committee. We have taken this position because we are generally in agreement with the significant changes and improvements offered in the proposal particularly as they relate to reimbursement for Medicare and Medicaid. We are unalterably opposed to any approach made by Senators Kennedy or Nelson to further amend the bill on the floor of the Senate when it comes up for debate.

The Nelson amendment, which will be offered to the Talmadge Bill reported by the Senate Finance Committee as H.R. 5285, has many basic and serious defects which we in Montana feel will create many fundamental problems for hospitals. For instance, it would establish wage and price controls, on a standby basis, which by themselves are inflationary because they lead to protective, anticipatory increases. This in effect would undermine and destroy the Voluntary Effort which is currently underway nationally and in Montana to contain health care costs. Montana hospitals have an extremely good record in containing costs primarily due to the hospital industry in our state recognizing in 1969 that the public, the insurers and hospital administrators working together could hold down costs much better than any governmental agency either at the federal or state level. In fact, it was the Montana Hospital Association that in 1970 created the Montana Hospitals Rate Review System, secured a Kellog Foundation grant for the establishment of the system and then made certain it was an independent voluntary rate review organization with no domination from the hospitals or from their Association.

The establishment and operations of the Montana Hospitals Rate Review System over the past seven years has proven to be a vital voluntary method which currently operates on a budget of $80,000 per year in comparison to the state mandated rate review system in the state of Washington which currently has an operating budget in excess of $300,000 per year. We have proven in this state, as have other states with voluntary rate review systems, that the voluntary approach to cost containment is much more effective and efficient and achieves the goals of cost containment because of the cooperation of the industry subjecting itself to independent review.

The Nelson amendment would destroy not only the successful Voluntary Effort nationally but also our own Montana Hospitals Rate Review System by forcing it into a state mandated mechanism financed by the taxpayers rather than the users of the system.

The Nelson amendment would also mandate that the operation of the control structure be *Federal* thus resulting in a massive new bureaucracy complete with multitudes of regulations which is clearly contrary to the Carter Administration's avowed principle of decreasing the regulatory controls governing the nation. Although a "cap" is a simplistic response to a complex problem, the federal mechanism for its implementation would be extremely complicated and would require the development of elaborate and costly methods based upon data and indices that do not presently exist.

The Nelson amendment promises wage increases to nonsupervisory personnel, but the wage increase pass-through would not include important elements of hospital wages such as shift differentials, overtime and other fringe benefits. Thus, this promise could lead employees to expect wage increases which hospitals could not afford. It is far better for hospitals to either negotiate wages with their employees through recognized collective bargaining processes or to continue in a competitive fashion as they have over the past many years in upgrading wages and fringe benefits based upon merit

and the value of the hospital employee to the patients we serve.

The amendment would impose a flat "cap" on all hospitals, thus ignoring the legitimate differences among institutions and their needs. As you know, Montana is a state consisting primarily of small rural hospitals. In fact, 49 of our 60 hospitals could be classified as small rural hospitals when using as a criteria the federally defined level of fewer than 4,000 admissions per year. I would point out, however, that although the 49 small rural hospitals may be exempted from the cap under the Nelson amendment, the act would still apply to the 11 larger hospitals in our major Montana cities which served fully 63% of Montana's 1977 admissions. In 1977 these 11 hospitals had a total of 82,371 admissions out of a total statewide of 131,552 admissions. This is a crucial point for it is these 11 hospitals located in the most populous parts of our state that provide to Montanans the wide range of specialized services that cannot be provided in small rural hospitals. These hospitals with a need for greater numbers of employees and more expensive equipment naturally incur higher costs and have a greater need to generate revenues to maintain and improve their services.

It is a recognized fact in our state that the small rural hospitals do act as referral centers to the larger facilities, not so much because of lack of services in the smaller communities, but because of the location of the medical specialists in the larger cities. The adoption of the Nelson amendment could see the erosion of the development of full services in larger communities where, as you know, most of the people of our state reside.

We feel the present Talmadge Bill without the Nelson amendment fairly and adequately provides for both the survival of the small rural hospital with the allowance for the swing bed reimbursement mechanism and also protects the larger hospitals and their ability to generate revenue in a reasonable fashion. I would again point out that in Montana the survival of the Montana Hospitals Rate Review System on a voluntary basis is a key element to our cost containment efforts.

I am enclosing a copy of a press release which was recently mailed to the media in our state as an expression of Montana's efforts on cost containment for many years. The data in this press release is accurate and can be documented from records on file with the Montana Hospital Association. It shows conclusively that Montana hospitals are efficiently operated and are still providing a high quality of services for a most reasonable cost.

On behalf of our Montana hospitals, their voluntary Boards of Trustees, and the 8,000 employees I implore your strong efforts to defeat the Nelson amendment to H.R. 5285 and likewise any approach that would be made by Senator Kennedy to substitute his bill (S. 1391) for the current Talmadge Bill reported out of the Senate Finance Committee on a very strong 12–1 vote.

Sincerely,

WILLIAM E. LEARY,
Executive Vice President.

PRESS RELEASE, AUGUST 16, 1978

Data from the Montana Hospital Association (MHA) and the American Hospital Association (AHA) show that in 1977 Montana's average expenses per hospital admission remained significantly lower than the national average. The data shows further that the rate of increase in Montana's total hospital expenditures continues to be less than the national rate of increase.

MHA data on Montana's 60 community hospitals showed 1977 average expenses per admission of $830.54, $481.00 lower than the national figure of $1,311.63 as reported by the AHA. As regards the rate of increase in hospital expenses, Montana showed an average increase of 14.4% from 1976 to 1977, down 2.8 percentage points from the 17.2% increase from 1975 to 1976. The equivalent average increases nationwide were 19.1% from 1975 to 1976 and 15.6% from 1976 to 1977.

Despite the fact that Montana's hospital expenses are among the lowest in the nation, Montana hospitals are actively participating in a voluntary cost containment effort. The Montana Hospital Association Board of Trustees has voted to fully support the cost containment goals developed by the recently formed Montana Voluntary Cost Containment Steering Committee. In addition the MHA, in conjunction with the Montana Hospitals Rate Review System, will be monitoring hospital cost increases on a quarterly basis. All hospitals have been urged to attempt to reduce the rate of increase in their expenses by 2 percentage points in 1978. It is hoped that these efforts will insure that hospital care in Montana continues to be among the least expensive in the nation.

Among the other interesting facts shown by MHA and AHA data are the following:

The average length of stay in Montana hospitals was 5.2 days in 1977 down from 5.5 days in 1976; the average length of stay for all U.S. hospitals was 7.2 days in 1977 down from 7.4 days in 1976.

The average number of beds in Montana hospitals is 57; the average number for the U.S. is 164; only Alaska with an average of 56 beds per hospital has fewer beds per hospital than Montana.

The average number of admissions per hospital in Montana for 1977 was 2,193; the equivalent average for the entire U.S.A. was 5,800. There were 39 admissions per bed in Montana while the U.S. average showed 36 admissions per bed.

Montana hospitals lost over $10,600,000 in revenue in 1977 as a result of charity, bad debts and Medicare and Medicaid discounts; this is the equivalent of approximately $80 per admission and represents a 46.7% increase over the previous year.

Montana hospitals employed more than 8,000 persons in 1977 at a cost of over $71,000,000 in salaries and fringe benefits; this represents more than 57% of total hospital expenses for 1977.

Outpatient revenue represented 9.8% of total patient revenue in 1975, 10.6% in 1976 and 11.5% in 1977.

Outpatient visits increased from 425,265 in 1975 to 465,612 in 1977, a 9.5% increase, while inpatient days decreased from 728,214 in 1975 to 688,149 in 1977, a 5.5% decrease.

SPECIAL ORDERS

Mr. ROBERT C. BYRD. Mr. President, are there any orders for recognition of Senators tomorrow?

The PRESIDING OFFICER. There are none.

Mr. ROBERT C. BYRD. I ask unanimous consent that after the two leaders are recognized under the standing order tomorrow morning, the Senator from Wisconsin (Mr. PROXMIRE) be recognized for not to exceed 5 minutes, the Senator from New York (Mr. MOYNIHAN) for not to exceed 15 minutes, and the Senator from West Virginia (Mr. ROBERT C. BYRD) for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING TIME FOR VOTE ON CLOTURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote on the motion to invoke cloture on the Humphrey-Hawkins bill occur tomorrow morning at 11 o'clock, and that no quorum call as required by the rule be in order at that point.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will come in at 9 o'clock tomorrow morning. After the two leaders have been recognized and the orders for the recognization of Senators have been consummated, at 10 o'clock a.m. the 1 hour under the rule will begin running and the motion to invoke cloture will be voted on at 11 o'clock a.m. That will be a rollcall vote, and tomorrow will be another long day.

Mr. President, I thank all Senators for their patience and for good work they have done.

Mr. THURMOND. Mr. President, could I make an inquiry of the distinguished majority leader?

Mr. ROBERT C. BYRD. Certainly.

Mr. THURMOND. Will any motions be made before 9:30, or could they be made between 9 and 9:30 concerning legislation that Members may desire to bring up?

Mr. ROBERT C. BYRD. I anticipate that the distinguished minority leader and I will probably do a good many housekeeping measures—I do not think they should be referred to in that manner.

There should be several measures which are noncontroversial that the distinguished minority leader and I will probably dispose of before the hour begins to run on cloture. There may be some conference reports.

But I think the Senator could be assured that there would be no rollcall votes before 10 o'clock, unless it is a procedural vote to help get a quorum.

Mr. THURMOND. For instance, I am speaking of the Illinois brick decision, in which I am interested, and will impose a time limit.

Would that be apt to come up before 9:30?

Mr. BAKER. If the Senator will yield to me, I will be happy on his behalf to interpose an objection, if he wishes.

Mr. THURMOND. Would that extend to 9:30 or 10?

Mr. BAKER. Whichever the Senator says.

Mr. ROBERT C. BYRD. It is not anticipated that will happen before 10 or before 11.

Mr. THURMOND. I thank the Senator.

Mr. ROBERT C. BYRD. But I anticipate at some point between now and adjournment sine die, a Senator will offer an amendment to a vehicle dealing with that matter, but it will not be tomorrow morning, if the minority leader and I can prevent it.

Mr. THURMOND. A vehicle would have a time limit and which would bind the amendment, if it were offered.

Mr. ROBERT C. BYRD. I doubt that it will be, I would say.

Mr. THURMOND. Yes, but to put on a

time limit on anything on the Illinois Brick decision offered to the amendment, and bound by the time limit.

Mr. ROBERT C. BYRD. I think appropriate questions will be asked concerning time agreements that would alert Senators as to the contents of amendments that would be offered in the case of time agreements and the Senator would have his usual rights in such an instance.

Mr. THURMOND. I thank the Senator.

Mr. BAKER. Mr. President, if the Senate will yield for just one moment, I would reiterate my assurance to the Senator that during the time between convening in the morning and the time we turn to the consideration of the Humphrey-Hawkins bill, under the rule, the hour before the cloture vote, that I will do my best to see no unanimous-consent requests in that respect are entered into.

Mr. THURMOND. The Illinois Brick decision is a very complicated question that will take maybe days or probably weeks when it does come up.

So I want to be present to object to any time limit.

RECESS TO 9 A.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9 o'clock this morning.

The motion was agreed to; and at 1:10 a.m., the Senate recessed until Friday, October 13, 1978, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate October 12, 1978:

FEDERAL ELECTION COMMISSION

Max L. Friedersdorf, of Indiana, to be a member of the Federal Election Commission for a term expiring April 30, 1983, vice William L. Springer, term expired.

NATIONAL SCIENCE FOUNDATION

The following-named persons to be members of the National Science Board, National Science Foundation, for terms expiring May 10, 1984:

Lewis M. Branscomb, of New York, vice Russell D. O'Neal, term expired.

Eugene H. Cota-Robles, of California, vice William H. Meckling, term expired.

Ernestine Friedl, of North Carolina, vice Wesley G. Campbell, term expired.

Walter Eugene Massey, of Rhode Island, vice T. Marshall Hahn, Jr., term expired.

David V. Ragone, of Michigan, vice Joseph M. Reynolds, term expired.

Edwin Ernest Salpeter, of New York, vice William A. Nierenberg, term expired.

Charles Pence Slichter, of Illinois (reappointment).

HOUSE OF REPRESENTATIVES—*Thursday, October 12, 1978*

The House met at 10 a.m.

Rev. Dr. C. V. Jones, pastor, Tabernacle Baptist Church, Tioga, Pa., offered the following prayer:

Our precious Saviour, accept our thanks for the privilege to live in a nation where the phrase in the salute to our flag, "one nation under God," reminds us that Thou are still on the throne, regardless of all today's sinfulness.

We also thank Thee for the inscription upon our money, "In God We Trust," reminding us of our need to forsake our wickedness, even our own self-righteousness, by simply trusting in Thee only.

We pray that Thou will bless today, causing us to seek Thee first, by right now, from the depth of our hearts, trusting our personal lives and the life of our Nation into Thy hands, resulting with inward peace and outward obedience to Thy Holy Word. For Christ's sake. Amen.

CALL OF THE HOUSE

Mr. BAUMAN. Mr. Speaker, under clause 1, rule I, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

PARLIAMENTARY INQUIRY

Mr. BAUMAN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. BAUMAN. Mr. Speaker, apparently the electronic device was not functioning at the beginning of this call. A number of Members who inserted their cards, myself included, were not recorded. I wonder how those Members could be notified of that fact.

The SPEAKER. Those Members' names are in the machine and will be recorded.

Mr. BAUMAN. All of those who responded?

The SPEAKER. Yes.

Mr. BAUMAN. I thank the Speaker.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 891]

Ambro	Gore	Pettis
Ammerman	Green	Pike
Andrews, N.C.	Hanley	Pritchard
Archer	Harrington	Quayle
Armstrong	Harsha	Quie
Beard, R.I.	Heckler	Quillen
Bellenson	Hefner	Rahall
Blouin	Heftel	Rhodes
Bonior	Hillis	Risenhoover
Bonker	Holtzman	Santini
Breckinridge	Hyde	Sarasin
Brown, Mich.	Ichord	Satterfield
Broyhill	Jacobs	Sawyer
Burke, Calif.	Kasten	Scheuer
Burton, John	Kastenmeier	Shipley
Caputo	Keys	Shuster
Carr	Krueger	Sisk
Cavanaugh	LaFalce	Skubitz
Chappell	Latta	Solarz
Chisholm	Le Fante	Spellman
Cochran	Leach	Spence
Conyers	Lederer	Stangeland
Cornwell	Leggett	Stark
Coughlin	Luken	Teague
Crane	Lundine	Tsongas
Dellums	McCloskey	Tucker
Dent	McDonald	Ullman
Derrick	McEwen	Vander Jagt
Diggs	Markey	Waggonner
Drinan	Martin	Walsh
Edwards, Okla.	Mazzoli	Weiss
Evans, Ind.	Meeds	White
Fithian	Meyner	Whitehurst
Flynt	Mikva	Whitley
Ford, Mich.	Miller, Calif.	Wiggins
Ford, Tenn.	Minish	Wright
Garcia	Mitchell, N.Y.	Wydler
Giaimo	Moffett	Wylie
Gibbons	Mottl	Young, Alaska
Gilman	Nichols	Young, Tex.
Goldwater	Oakar	
Gonzalez	Pease	

The SPEAKER. On this rollcall, 306 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill and concurrent resolutions of the House of the following titles:

H.R. 13418. An act to amend the Small Business Act by transferring thereto those provisions of the Domestic Volunteer Service Act of 1973 affecting the operation of volunteer programs to assist small business, to increase the maximum allowable compensation and travel expenses for experts and consultants, and for other purposes;

H. Con. Res. 730. Concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 12255;

H. Con. Res. 739. Concurrent resolution to correct an error in the enrollment of H.R. 11318, a bill to amend the Small Business Investment Act of 1958; and

H. Con. Res. 740. Concurrent resolution authorizing corrections in the enrolled bill H.R. 10587.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10587) entitled "An act to improve the range conditions of the public grazing lands."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 11445) entitled "An act to amend the Small Business Act and the Small Business Investment Act of 1958."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3447) entitled "An act to strengthen the economy of the United States through increased sales abroad of American agricultural products."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 12509. An act to amend the Immigration and Nationality Act to exclude from admission into, and to deport from, the United States all aliens who persecuted any person on the basis of race, religion, national origin, or political opinion, under the direction of the Nazi government of Germany, and for other purposes;

H.R. 12874. An act to provide for an accelerated program of research, development, and demonstration of solar photovoltaic energy technologies leading to early competitive commercial applicability of such technologies to be carried out by the Department of Energy, with the support of the National Aeronautics and Space Administration, the National Bureau of Standards, the General Services Administration, and other Federal agencies; and

H.R. 13511. An act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 13511) entitled "An act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes," disagreed to by the House; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG, Mr. TALMADGE, Mr. RIBICOFF, Mr. HARRY F. BYRD, JR., Mr. NELSON, Mr. GRAVEL, Mr. BENTSEN, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. CURTIS, Mr. HANSEN, Mr. DOLE, Mr. PACKWOOD, and Mr. ROTH to be the conferees on the part of the Senate.

The message also announced that the Senate had passed concurent resolutions of the following titles, in which the concurrence of the House is requested:

S. Con. Res. 111. Concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 11445; and

S. Con. Res. 112. Concurrent resolution directing the Secretary of the Senate to make corrections in the enrollment of S. 555.

REV. DR. C. V. JONES

(Mr. McDADE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDADE. Mr. Speaker, it is my great privilege today to have offering the morning prayer the Reverend Dr. Charles V. Jones from my congressional district. It is both a personal and an official privilege to have such a distinguished member of the clergy open the proceedings of the House of Representatives today.

Rev. Dr. Jones was born in Sayre, Pa., and grew up in Rome, Pa. He now lives in Tioga, Pa., where he is pastor of the Tabernacle Baptist Church.

He was accompanied today by his lovely wife, Joanna, and two children, Nathan and Becky.

Rev. Dr. Jones was graduated from the Baptist Bible College in Missouri, in 1966, and for 21 years he has crisscrossed this Nation as an evangelist, bringing the word of God to the people of the Nation. That service was recognized when he was given an honorary doctor of divinity degree by the Baptist Christian University of Shreveport, La. That honorary doctor of divinity reads:

In recognition of outstanding scholarship, eminent leadership in the field of Christian education and in the field of Christian service.

Rev. Dr. Jones, we are very privileged to have you with us today, and we thank you for your inspiring words.

THE LATE HONORABLE GOODLOE E. BYRON

(Mr. LONG of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LONG of Maryland. Mr. Speaker, I have the sad duty to make the formal announcement of what many of the Members have already heard, the death of our beloved colleague, GOODLOE BYRON, from the Sixth Congressional District of western Maryland, who died suddenly last night at the age of 49.

Our deepest sympathy goes to his wife, Beverly and to their children, Goodloe, Jr., Barton Kimball, and Mary McComas.

GOODLOE, a Democrat, was serving his fourth term in the House from the Sixth District. He had previously served in the Maryland House of Delegates and in the Maryland State Senate. He comes from a very distinguished Maryland family. His grandfather was a U.S. Senator from Maryland, and his mother and father both served in the House of Representatives from the same district, the Sixth District. This did not mean that GOODLOE inherited that district. He had to struggle to win it. Throughout his 8 years, he fought hard on behalf of his constituents.

The funeral service will be held on Saturday. The precise place is not yet known, but it is understood that he requested to be buried in Antietam. He had a fine military record, and he wished at the site of the famous Civil War battle. We shall know later the exact time and place. I shall be asking for a special order for those Members who wish to contribute to his eulogy at a later date.

At this time, I submit the reports of GOODLOE'S untimely death provided in the Washington Post and Baltimore Sun this morning:

[From the Washington Post, Oct. 12, 1978]

WEST MARYLAND REPRESENTATIVE GOODLOE BYRON

(By Donald P. Baker)

Rep. Goodloe E. Byron (D-Md.) a long-distance runner who had competed in six runnings of the Boston Marathon, collapsed and died of a heart attack last night while jogging along the Chesapeake & Ohio Canal towpath near the Western Maryland town of Williamsport, where he was born.

Rep. Byron, 49, had won renomination last month and was considered a shoo-in for election to his fifth term as representative of the 6th District of Maryland.

The Democratic State Central Committee, which meets today, is expected to name a replacement to face the Republican nominee, a lightly regarded perennial office-seeker named Melvin Perkins, in the Nov. 7 general election.

Bob Atkinson, Rep. Byron's press secretary, said the congressman and a young aide who also was a marathon runner, Brinton Ayer, had run about 12½ miles when Rep. Byron stumbled and collapsed about 5:45 p.m.

Ayer tried to give mouth-to-mouth resuscitation, but his efforts to revive Rep. Byron failed. He flagged down a passing motorist, who called a rescue squad, which drove them to Washington County Hospital in Hagerstown. Rep. Byron was pronounced dead on arrival.

Dr. Francisco G. Japzon, the county medical examiner, said Byron's heart attack was caused by hardening of the arteries in the heart muscle. There were signs of previous heart attacks, he said.

Rep. Byron's father, William D. Byron, and mother Katherine E. Byron, both represented the same district in Congress four decades ago, and his grandfather was a U.S. senator from Maryland.

Last month, Rep. Byron won renomination, defeating Dan Rupli, 35, of Burkittsville, 8,641 to 6,680.

After Rupli nearly beat him in the 1976 primary, Rep. Byron acknowledged that the youthful lawyer's vigorous campaign "caught me by surprise."

This year, Rep. Byron was prepared, and despite another hard-fought challenge, he handily defeated Rupli.

Part of the difference, both Rupli and Rep. Byron agreed, was that the congressman from Frederick had changed his voting record more nearly to reflect his changing district.

After his first two terms, Rep. Byron was characterized by one Congress-watcher as "the most conservative congressional Democrat from outside the South."

But as he perceived a shift in the attitude of voters in his district, which sprawls from Appalachia in westernmost Garrett and Alleghany counties to liberal, suburban-chic Columbia in the east, Rep. Byron's voting pattern also shifted.

While Rupli attempted to portray Rep. Byron's shift to the center of the political spectrum as the actions of an incumbent running scared, voters in the 6th District apparently perceived the change as a rare act of a politician who seeks and then bows to the wishes of his constituents.

That was how Rep. Byron saw it, although he also was the first to admit that he was a practical politician who believed that "you can't do anything if you can't get elected."

Voting in behalf of his constituents, instead of forcing his personal philosophy on them, Rep. Byron said in an interview earlier this year, was something he learned from his father, who served in Congress from 1939 until he was killed in an airplane crash in 1941. (His mother served the remainder of her husband's second term, but did not seek re-election.)

Rep. Byron also was frank to admit that he got himself taken off the Commerce Committee after being tagged one of the "Dirty Dozen" House members targeted for defeat two years ago by Environmental Action, a lobbying group.

He said he felt trapped by the competing interests in his district, typified by clean-air

activists in Columbia and employers and workers in coal-dependent industries in Western Maryland, where unemployment already was far above the national average.

"So I went to the leadership and told them I wanted off," Rep. Byron admitted. "It was a no-win situation."

Rep. Byron also had conflicting feelings about clean-air legislation from a firsthand view.

A tannery owned by his family since 1832 was forced into receivership three years ago when it had to convert from coal to oil and install a sewage treatment plant to reduce wastewater runoff into the Potomac.

Yet as an active outdoorsman, Rep. Byron had a strong personal interest in a clean environment.

In addition to running, Rep. Byron was an energetic hiker, and had sponsored legislation that enlarged the Appalachian Trail, which snakes through his district on its way from Georgia to Maine.

He led expeditions to Alaska and numerous national parks, accompanied by his wife, the former Beverly Butcher, and their children, Goodloe, Jr., 24; Kimball, 23, and Mary, 12.

The family was featured on the cover of a recent issue of Backpacker Magazine, which lauded Rep. Byron's sponsorship of the trail bill, signed by President Carter in March, that will permit its completion.

CONGRESSMAN BYRON DIES OF APPARENT HEART ATTACK

SHARPSBURG, MD. (Special).—Representative Goodloe E. Byron (D. Md.) died unexpectedly last night, apparently of a heart attack, while running near here.

Mr. Byron collapsed about 6 P.M. on the C. & O. Canal towpath 8 miles from Williamsport, Md., where he was born and raised. He was running with an aide, Brenton Ayer, according to Dr. Francisco G. Japson, deputy medical examiner of Washington county.

An experienced marathon runner, Mr. Byron had completed 12½ miles of a planned 15-mile run when he was stricken.

Mr. Ayer tried desperately to revive the 49-year-old congressman, police said. But Mr. Byron was dead on arrival at Washington county hospital at 7:19 P.M. despite the efforts of a doctor in a specially equipped ambulance.

Dr. Japzon said there were plans last night to perform an autopsy to determine the exact cause of death.

The four-term congressman was running for re-election in the November 7 election against Melvin C. Perkins, the Republican nominee. Mr. Perkins was released yesterday after spending 10 days in the Baltimore County Jail pending trial on a charge of assaulting an MTA bus driver. He was fined $100 and court costs on that charge yesterday after being found guilty of assaulting Beverly Berry, a Mass Transit Administration bus driver.

Mr. Perkins, who called The Star last night after learning of Mr. Byron's death, said, "I'm going back on the campaign trail as if he never died."

George Nilson, a deputy state attorney general, last night said the Democratic State Central Committee can nominate a candidate to take Mr. Byron's place on the ballot. The committee was previously scheduled to meet today.

He said there is no requirement in law that the Democrats pick someone from the Sixth district, which stretches from southwest Baltimore County and Howard and Carroll Counties through the western part of the state. The district also includes a portion of Montgomery county.

But several sources suggested last night that Dan Rupli, who had challenged Mr. Byron in the past two primaries, would be a serious candidate.

Mr. Byron was described last night as a congressman who focused on serving his constituents. He rarely played an active role either in congressional committees or on the House floor, according to reporters who covered his career.

During his early years in Congress, Mr. Byron's voting record was very conservative. Before the 1976 primary, Environmental Action, a lobbying organization, named him to its "Dirty Dozen" list of congressmen who "have ridden roughshod over the nation's environmental interests."

But after that close contest with Mr. Rupli, Mr. Byron modified some of his stands, particularly those on environmental questions.

At the beginning of the current session he switched from the Interstate and Foreign Commerce Committee, where some consumer and environmental groups considered him as obstructionist, in the Armed Services Committee, where his role was less controversial.

In addition, in his work on the Interior and Insular Affairs Committee he had recently become increasingly supportive of conservation measures and proposals to expand national park space.

Despite these shifts, he remained until his death a firm member of the conservative minority in the Maryland delegation, which has also included Representative Robert E. Bauman (R., 1st) and Representative Marjorie S. Holt (R., 4th).

First elected to the House of Representatives in 1970 by the slim margin of 4,000 votes, Mr. Byron was seeking a fifth term until his death last night.

His political career began with his election in 1962 to the House of Delegates, where he served only one term before running a successful campaign for the state Senate in 1966.

Mr. Byron first attempted to win a seat in the United States Congress in 1968, running against the incumbent, J. Glenn Beall, Jr., currently the Republican nominee for governor.

Although he lost that election, he repeated his effort in 1970 when Mr. Beall sought the U.S. Senate seat held by Democratic Senator Joseph D. Tydings.

In seeking a seat in Congress, Mr. Byron was following in the steps of his father, William D. Byron, who was elected to the House in 1938 and 1940. The senior Mr. Byron died in 1941, and Mr. Byron's mother, Katherine, replaced him after winning a special election.

Commenting on Mr. Byron's ambition, an associate said in 1975: "All Goodloe ever wanted to do was to be what his father was, a congressman, and nothing more."

Representative Parren J. Mitchell (D., 7th), who was first elected to Congress the same year as Mr. Byron, said, "Goodloe Byron and I did not always agree, but I respected him for the zeal with which he fought for that which he believed in.

"All of us are shocked and hurt by his sudden death," Mr. Mitchell added.

Speaking on the Senate floor just before the close of the session last night, Senator Charles McC. Mathias, Jr. (R. Md.) said Mr. Byron "was a very strong force in our Maryland delegation."

Senator Paul S. Sarbanes (D., Md.), who spoke after Mr. Mathias, said Mr. Byron "reflected his family's tradition of distinguished service . . . he was one of our finest members. His loss is a great loss to the people of the state."

Representative Barbara A. Mikulski (D., 3d) said Mr. Byron went out of his way to help her when she was first elected in 1976. "He was very good with constituent services. He helped me get off the ground," she said.

A Republican colleague, Representative Newton I. Steers, Jr. (8th), said, "I was extremely fond of Goodloe. I think his death is a loss to Maryland and to the nation."

Representative Gladys Noon Spellman (D., 5th) noted that she is far more liberal than Mr. Byron, but added, "These things didn't matter. He was just a delightful person to work with."

After Mr. Sarbanes and Mr. Mathias spoke on the Senate floor, Senator Jacob K. Javits (R., N.Y.), who shared with Mr. Byron a strong interest in physical fitness, said Mr. Byron was "thorough-going, delightful gentleman, a high-spirited, patriotic gentleman."

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to my colleague from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, I thank the gentleman for yielding.

Congressman BYRON, throughout the length and breadth of Maryland, had earned the reputation of being the congressman who devoted just tremendous amounts of time to the individual problems of his constituents. He kept long office hours, and many, many Saturdays and Sundays were devoted to constituent work.

Quite apart from his legislative accomplishments, I think that he will be best known for that kind of fine attention to detail and service that he gave to his constituents.

I share the sense of loss of my colleague in the well. I think all of us do. I take this opportunity to convey my feeling of deep sympathy and compassion to his family.

Mr. LONG of Maryland. I thank the gentleman. Let me add by saying that I have known GOODLOE personally for many years. Being the senior member of the Maryland delegation, I have had a long and continuing relationship with him. In addition to the fine record of service to his constituents, he was a man of his word. We all know here in Congress how that is valued, how difficult it often is to live up to one's word in the practical hurley-burley of politics. When GOODLOE BYRON said he would do something, you could count on it. He was a prince of a man.

Ms. MIKULSKI. Mr. Speaker, when I learned of GOODLOE BYRON's death this morning, I was greatly saddened and shocked by the suddeness of such a tragic loss. Representative BYRON followed a family legacy of involvement in Maryland politics. His parents, William and Katherine Byron, both represented the same district in Congress, and his grandfather was a U.S. Senator from Maryland.

Representative BYRON worked to serve the best interests of Maryland and was an active member of the Maryland delegation; he worked as a teammate on issues of mutual concern. He was also of vital importance in expanding the economic base of the Port of Baltimore.

When I first arrived as a Member of the House of Representatives, I learned a great deal from GOODLOE. Even though

we very often differed philosophically on certain issues, his compassion for people and his ability to serve the individual needs of his constituents were inspirational to me.

I think I learned from Representative BYRON not to become caught up in political puffery as we go about our business, but instead to concentrate on the true needs of the people. I feel that I was a better Member of Congress because of my association with him. I mourn his loss and extend my sympathies to his family.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I came to the Congress with GOODLOE BYRON and have known him ever since. We served together on the Interior Committee. He and I have hiked and camped in Alaska together, floated down rivers together and appeared together in his district. My wife and I became very fond of GOODLOE and his family. My heart goes out to his wife, Beverly, and his children.

While GOODLOE and I did not agree on every issue, he was, as the gentleman from Maryland said, a man of his word, a man of integrity, and a man who had the capacity to change his views when he was persuaded that there was a basis for doing so. He was an invaluable member of the Interior Committee, and the Subcommittee on Alaska Lands, which I chaired. His courageous support on many of the most crucial issues was unflagging. Without him, the committee could not have produced as sound a bill on Alaska, and indeed on many other matters.

Those of us who have known him as a colleague will miss him, and we will also miss him as a friend. But we will also remember his gallant spirit, his openness and his dedication.

Mrs. HOLT. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Speaker, I thank the gentleman for yielding.

We are certainly saddened and shocked by the untimely death of GOODLOE BYRON.

I think the quality in GOODLOE that I cherished as a close personal friend—we served on the Armed Services Committee together—was his great compassion and his great concern about being a good Representative for the people of his district. He worked at it constantly. It was a matter of great concern to him.

He was a man of integrity and a devoted family man.

My love and prayers go out to Beverley and his children.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I add my condolences to the family of our late colleague on this most shocking occurrence.

I was talking to GOODLOE only last Friday, discussing his constant devotion to jogging and physical fitness. It certainly comes as a total surprise that a man who appeared to be in excellent health should fall at this point in his distinguished career.

I have no doubt that he would have been reelected by his constituents, whom he served so well. In a political arena where many differ, it is sometimes difficult to make friendships, but GOODLOE BYRON was a close friend, both as a Maryland colleague and a fellow member of the Interior Committee.

It will be very difficult for the citizens of Maryland to replace him.

Mr. EVANS of Delaware. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Delaware.

Mr. EVANS of Delaware. Mr. Speaker, I rise this morning with a heavy heart as one who has been a friend of GOODLOE BYRON since our days together at the University of Virginia.

GOODLOE BYRON was a man of integrity, he was a man of honor, and he was a man who did keep his word, and a man who really cared about people.

There are lots of ways I guess to judge an individual's worth here on Earth. Some might say it is eloquence on the stump that might be a big factor. I say the character and integrity and concern and love for one's fellow man is much more important, and GOODLOE BYRON led that type of life. He loved his family, he loved his friends, he loved his country.

We will miss him very, very deeply.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I was shocked and dismayed to hear of GOODLOE BYRON'S most untimely death.

Although we came from opposite ends of the country, we shared many enjoyable experiences such as hiking together. I had occasion to visit him in his district and he had also been in my district, on his many visits with his in-laws. I counted GOODLOE BYRON as a personal friend.

I want to express my sorrow and condolences to his wife and the children, and to the Butcher family in Santa Barbara.

Mr. PHILLIP BURTON. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from California.

Mr. PHILLIP BURTON. Mr. Speaker, I want to join in offering condolences to GOODLOE'S children and to his wife Beverly. He served with us on the Interior Committee. He was a most faithful and hard-working Member. I think it will long be remembered that because of his leadership we were able earlier in this Congress to establish a meaningful Appalachian Trail system. I know that this remarkable feat was very close to his heart.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Speaker, I thank the gentleman from Maryland for yielding. Like other Members of Congress who knew and loved GOODLOE BYRON of Maryland, I was shocked to learn of his untimely demise. We were close personal friends and I will remember always the mountains we climbed together in Alaska, backpacking along the Appalachian Trail and running side by side in the Boston Marathon. He was a competitor and an adventurer in the American tradition. Next year we had planned to hike and camp out in the Swiss Alps and climb the Matterhorn.

GOODLOE BYRON was a prince of a man, gentlemanly in his treatment of others, reverent to God; loyal and devoted to his family whom he loved so much.

During the times that we worked and played together he spoke often about his family, country, western Maryland, the changing values in our society and the environment.

He worked hard for his native State of Maryland, serving the numerous needs of his constituents and oftentimes talked about the virtues of loyalty, truth, honesty, and fidelity. He believed in the work ethic and felt that many of the problems we have in our society today stem from idleness of mind to which he referred as the "devil's workshop."

He loved outdoor life. He appreciated the majesty of the wilderness and valued the glory of nature. I remember that while backpacking with him in the Lake Clark region of Alaska during the summer of 1975, he persuaded me to support the Alaskan wilderness bill and cosponsor his amendment to create a wilderness area in the Lake Clark region. Our discussions of the conflicts between production of food and energy and the preservation of the environment gave me insight which I believe has helped me to reconcile the contradictions with which we are confronted today. GOODLOE understood how people on this Earth live in harmony with nature and demonstrated this unity in his own life. He believed that an experience with nature provided a common bond for families and friends which relieved the tensions of an industrial society and permitted people to know and understand one another better.

GOODLOE was proud of his work to improve the Appalachian Trail and the C. & O. Canal. When we hiked the trail he would outline his ideas for improvement to popularize the experience of hiking so that others could enjoy communing with nature. I know that every American ciitzen appreciates his contribution to the enhancement of our environment and the improvement of these great national landmarks. While others talked about the environment, GOODLOE worked to improve it. His accomplishments were recently cited in Backpacker magazine which lauded his workship for the trail bill. I think that recognition is deserving of the attention of all my colleagues and I would like to insert at this

point into the RECORD the text of this tribute to GOODLOE.

GOODLOE BYRON: HIKER ON THE HILL

(By Jack Burger)

(How a congressman, the author of the Appalachian Trail Bill, goes backpacking to get away from the phone and to make an investment in his family.)

Backpackers have friends in high places other than mountaintops. One of them is in the U.S. Congress: Representative Goodloe E. Byron, Democrat from Maryland. And he climbs more hills than Capitol Hill. He's a backpacker who enjoys the rarified air of the Appalachians and Grand Tetons as much as the heady atmosphere of Congress.

Being interested in both backpacking and politics makes Byron a leader in the movement to protect the existing trails and wildlands and to establish more trails where they are needed. A recent accomplishment was successfully sponsoring the bill that will complete protection of the Appalachian Trail corridor. H.R. 8803 provides $90 million for land purchases and was passed by Congress on March 7, 1978. President Carter signed the bill into law on March 21, 1978.

Byron's political career began in 1958 when he was elected county attorney in Maryland. From there he went to the state House of Delegates in 1962. In 1966, after one term, he was elected to the state Senate, and in 1970 he successfully ran for the U.S. Congress from Maryland's Sixth Congressional District.

Byron's hiking and camping career began in the 1940s as a Boy Scout in Williamsport, Maryland. On troop overnighters he first became acquainted with the Appalachian Trail, which crosses 39 miles of Maryland. From then on, the AT was an important part of his life.

In 1969 Colonel Lester Holmes, the executive director of the Appalachian Trail Conference, approached Byron, then a state senator, with an idea for a bill that would protect the entire length of the AT in Maryland. Byron agreed to help and sponsored a bill making Maryland the first state of provide such protection for the AT.

Rep. Byron's devotion to hiking and trails was one of the main reasons he chose to become one of the first directors of the American Hiking Society.

Byron's home in Frederick is only ten miles away from the Appalachian Trail. It was there that he and his family first began backpacking. Like most family hikers, their first forays were day hikes, soon supplemented by overnights. Next came New York's Adirondacks and the Rockies.

Since Byron has been a congressman, even a simple weekend outing to the AT must be planned almost two months in advance. "This job sure doesn't give you much time with your family," he said recently. "I guess that is why we like backpacking so much. It is one thing we can do totally as a family."

The Byrons' first trip to Glacier National Park was particularly important to him for this reason. "My oldest son, Geb (Goodloe E. Byron, Jr.), was 18, right out of school, and very impressionable," Byron said. "A parent is not usually able to relate easily to an 18-year-old; it's usually them against us. By going on that hike, we set up a common bond. It really was an investment in our family. We never could have accomplished this by going to a beach resort or a national park lodge."

The Byron family was especially intrigued by the wildlife in Glacier. "We even had a mountain goat pose with us just as if we were tourists," he recalled.

An equally important reason for Byron's backpacking is to escape the pressures of political life—constantly ringing telephones and a hectic schedule that rarely lets up. "Backpacking gives you a chance to touch base with nature, get your hands dirty, feel a little uncomfortable, take a few physical chances, and have a common experience with your family," he explained.

The daily routine of Congressman Byron is enough to make a layman scream for Saturday. He rises at 6:30 and if the weather permits, goes for a three- or four-mile run. (He gets in about 30 miles a week.) Then comes a quick breakfast and the 50-mile ride to the office, during which he reviews legislation, prepares for morning committee meetings, and reads letters from his constituents.

If Congress is in session, he has committee meetings all morning. A brief lunch lets him go over legislative briefings. During the afternoon the House of Representatives meets until five or six, except on Wednesday, a traditionally long day. Then he doesn't get out until eight or nine.

Byron's office receives an average of 250 letters a day. Each must be answered and signed, a task his 18 staff members in Washington and Maryland assist in. Byron himself must respond to more than 30 telephone calls daily. "People expect to talk to me personally," he said. "I find myself following up on legislation, trying to get assistance for a sewer project in my district, looking for funding for a national parks bill, helping people with social security problems."

Byron believes that the letters congressmen receive are among the most effective means for understanding the needs of their constituents. "People have to write. If they don't, we have no idea what they are thinking. I even noticed a recent letter to the editor in BACKPACKER from Susan Tremaine, a woman in my district. I don't know her, but from reading her letter I do get an idea of her special interest in the outdoors and hiking."

The trip home to Frederick in the evening is used much as the morning commute—reading mail, signing letters, reviewing legislation. But Byron's day doesn't end once he's home. Because his district is so close to Washington, he spends many evenings with his constituents, attending banquets, giving speeches, keeping in touch. In a normal week he attends four or five evening programs. The pace gets worse as an election nears.

In nonelection years Byron manages to squeeze in 25 to 30 days of hiking and backpacking during weekends and the legislative recess in August. One election year's backpacking trip was doubly welcome, though. In August, 1974, he, his wife Beverely, daughter Mary, younger son Kim—and their good friends, Clater and Peggy Smith—went to Grand Teton National Park to visit Geb, who had a summer job there on a trail crew. The Washington they left behind was tense and tumultuous. It was the summer in which the Watergate scandal came to a head—the Senate Judiciary Hearings, the impeachment proceedings and the resignation of President Richard M. Nixon. Byron found the Tetons a particularly soothing antidote to the stress of the Watergate situation. The Byrons stayed for nearly two weeks in the backcountry, packing through the Alaska Basin and near Marion Lake.

Byron thinks the Grand Teton National Park is "the most beautiful park in the country. There is no way you can begin to see the beauty of the park until you get into the backcountry."

Another summer Byron and his two sons went to Alaska. They backpacked in the Lake Clark area and for the first time were confronted by elements of risk that are unique to hiking in the Alaskan wilderness. Most mountain areas have unstable weather patterns, but Alaskan weather is made more treacherous by arctic winds of such velocity that a tent can be ripped to shreds in minutes.

Byron considers the Alaska trip an important one in his development as a backpacker. "It dramatically showed us that we should be prepared, with everything planned down to the last detail, and that equipment must be top-notch. We had the right clothes [the Byrons prefer woolens for cold weather]. Our tent held up fabulously, and our general preparation for possible problems was excellent. We could have used less expensive equipment, but I would not want to be at the mercy of the elements because my gear had broken down."

Moreover, Byron's experiences in Alaska are now bearing legislative fruit. The Alaska National Interest Lands Conservation Act, H.R. 39, is being debated this year in the House. Because of his first-hand knowledge of the area, Byron helped push through an amendment to the bill that would protect all the Lake Clark region. "Having backpacked there, I feel I have more of an understanding of the proper usage for the land," Byron said. "With H.R. 39," he added, "Congress can guarantee future generations the ability to see some of the most spectacular wilderness in the world. Seldom since I have been in Congress have we had a chance to provide something of this magnitude."

Following their Alaskan excursion Byron and his sons returned to their favorite park, the Tetons, where they were joined by his wife and daughter. This time they hiked into the Lake Solitude and Surprise Lake areas.

The weather, however, disrupted their plans. While the family was camping at 9,000 feet, rain started at 3 P.M. and quickly turned to snow. By morning several groups of backpackers were already coming down from the high country. The Byrons were "pretty darn cold" and not really equipped for winter weather. They did the prudent thing and hiked out.

On a trip in the summer of 1976, the family combined backpacking with a river run. They hiked from the South Rim of the Grand Canyon down to Phantom Ranch. There they rode a raft on a five-day run through the rapids of the Colorado River.

The Byrons were accompanied by the park superintendent, a ranger, and a park naturalist. Byron and the park superintendent had spirited discussions about how to allocate recreational uses of the river.

"As a hiker I've gotten a different perspective on recreational uses of all of our national parks," Byron said later. Although he can see other recreational users' points of view, he still sides with the hikers. "We watched some kayakers glide down the river, and I thought that they should have the unencumbered use of the river and the canyon. But they too produce waste and garbage. The backpacker causes the least number of problems with the land. I'll stick by the hiker."

Like most backpackers, Byron has certain habits he refuses to give up when on the trail. For instance, he shaves every morning. "It's my one concession to civilization. The children always kid me about it, but I like to shave. I've got this little can of shaving soap no more than two inches high and a tiny razor. I tuck them in my backpack along with my toothbrush and toothpaste."

His kids also tease him about the larger than normal first-aid kit he carries even on weekend overnight hikes. It includes antibiotics, pain relievers, and cold tablets, among much else. "The kids are always saying I could probably perform open heart surgery."

Byron is active in other sports. Long-distance running is one of his favorites. He has run in the Boston Marathon six times, with

a qualifying time of 3:27:00 set in 1974, and he is now training for this year's marathon. He has also completed the JFK 50-mile hike-and-run seven times. His son Kim has completed that race ten times—a record.

But Byron's biggest passion is hiking and backpacking. His favorite spot near home is Old Rag, a mountain next to the AT in Virginia. That's where Virginia's late Senator Harry F. Byrd used to go hiking every weekend he could.

Perhaps someday Byron will make the switch from House to Senate—as Byrd did—and climb the steps to the other side of the Capitol. That is, when he isn't climbing mountains.

GOODLOE BYRON was a well-known athlete, having run in many marathons, six at Boston. Many people have been inspired by his picturesque good health and athletic lifestyle. Members of Congress, like millions of other Americans, have recently begun to take exercise seriously. Running and jogging is a favorite form of exercise. With his death, those who knew him well have asked me, "It happened to GOODLOE, why make the effort?"

Those who have been discouraged by this event will be interested in the Capitol Physician's observations. When Dr. Freeman Carey, U.S. Capitol Physician, was confronted with this question he said:

Congressman BYRON's life was prolonged as a direct result of exercise. Had he not exercised regularly, he would not have lived as long as he did.

I ran with GOODLOE as late as last week. He knew he had a history of heart disease and discussed it frequently. He felt running helped him as he would say "Running has helped me live a longer, fuller life."

Congressman BYRON would frequently lament the thousands of Americans who are confined in nursing homes. He would say:

If more Americans would exercise regularly, we could close up 90 percent of the convalescent homes.

It is interesting to observe that one physician had advised him not to exercise, but he could not bear the thought of living without it. He said:

We all must go some day and it's far better to leave this earth doing those things you enjoy doing most living a full day each and every day.

It seems fitting that when he left this life that he was running on the towpath of the C. & O. Canal. I talked a few minutes ago with his charming and loyal wife, Bev, who was his partner in politics as well, who stood by his side and worked each day for the State of Maryland. She said that if he could have had it his own way that was the way he would have chosen.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I appreciate the gentleman from Maryland (Mr. LONG) yielding to me.

I still cannot believe that GOODLOE is not with us this morning and that he is not behind the rail on the floor listening, greeting friends, and being a part of the House proceedings.

I had the privilege of serving with him on the House Committee on Armed Services. The gentleman in the well, Mr. LONG of Maryland, mentioned that GOODLOE BYRON told his wife, I believe, that he would like to be buried in a certain Civil War cemetery in his district. I have just checked with the Veterans' Committee. I do not think that jurisdiction comes under the Committees on Veterans' Affairs but that it might come under the Committee on Interior and Insular Affairs. I certainly would hope that his request could be followed, I still cannot believe he will not walk in the Chamber and greet us in his easy wonderful manner.

Mr. LONG of Maryland. Mr. Speaker, I would say to the gentleman from Mississippi (Mr. MONTGOMERY) that I would certainly give the members of the Committee on Interior and Insular Affairs and the appropriate subcommittee, every support that I can in this matter in order to carry out the wishes of our colleague.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Wyoming.

Mr. RONCALIO. Mr. Speaker, I had the privilege of serving with GOODLOE on the Committee on Interior and Insular Affairs. He had a relative in the State of Wyoming, my friend Richard Ford Pew of Jackson Hole, and GOODLOE BYRON were cousins. GOODLOE was particularly fond of the Jackson Hole country, and climbed the Tetons often.

He was a fine member of the Committee on Interior and Insular Affairs. His death is a shock to us all.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I too rise with a heavy heart in joining my colleagues in offering condolences to the family of GOODLOE BYRON on his sudden death.

I first came to know GOODLOE when I came to the Congress in 1973. In my first few weeks in the House, GOODLOE extended a helping hand of advice and assistance. Throughout my years in the Congress, GOODLOE took advantage of every opportunity he could find to utter an encouraging word and to stress the importance of committing ourselves to a strong defense of our Nation.

His shocking death comes at a time when the 95th Congress was drawing to a long awaited close. It was a Congress in which GOODLOE BYRON made significant strides.

There is always a sense of apprehension during the waning hours of the legislative life of a congressional session. We are all scurrying in a dozen different directions, attempting to clear up all the loose ends. We run ourselves ragged, and throughout it all there is that date lingering just a few weeks in the future, election day. This year, with Goodloe's loss, that apprehension takes on a different aspect. The loss of our good friend has brought us all down to earth.

I often joked with GOODLOE that I would someday have a foot race with him. He was a great long-distance runner, and I know the peace and tranquillity and sense of accomplishment it brought to him. He was a shining example of pride in one's self, one's family, one's community, and one's country.

To GOODLOE's widow, Beverly, and his three children, I offer heartfelt condolences. May it be of some consolation to the Byron family that we share their deep sense of loss.

Mr. TRIBLE. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Virginia.

Mr. TRIBLE. Mr. Speaker, I, too, wish to express my own sense of personal loss on the death of GOODLOE BYRON. GOODLOE was a man of strength who served his Nation well. I will always remember working with GOODLOE as a member of the Committee on Armed Services, and in this body, on behalf of a strong national defense and increased naval shipbuilding.

I will miss my friend GOODLOE.

The SPEAKER. The Chair would ask the gentleman from Maryland (Mr. LONG) to yield to just one more Member, and then to ask for general leave for all Members so that they may present their remarks in the RECORD.

Mr. LONG of Maryland. I thank the Speaker, and I will do so.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Speaker, I join in sad remembrance of GOODLOE BYRON, a friend of 27 years, since we went through law school and then took the Maryland and the District of Columbia bar examinations together. And over the years we have been friends, although we have been separated geographically until recently when we have had the opportunity to be closer again here in the Congress.

It is sad to think that only last week I commented to his son that his dad looked just as he did when we were in law school.

We all take our time upon this Earth and then pass away, but in the case of GOODLOE BYRON I feel that he has fulfilled many needs in this world, as is evidenced in his district by the people he sought to serve so well, and he will long be remembered for that service.

● Mr. STEERS. Mr. Speaker, I want to join the other Members who have paid tribute to GOODLOE BYRON.

I had known him for many years prior to either one of us being in Congress, and became a closer friend through serving together.

I think the outstanding attribute of the Congressman was his totally unsullied reputation for integrity. He was a man who represented his district with distinction. He was diligent, intelligent, and a man of great principle.

His contributions to his constituents, to the State of Maryland, and to our

Nation will be sorely missed. I join those whom he represented in a feeling of sorrow and shock; I shall miss very much, my friend, GOODLOE BYRON.●

● Mr. SANTINI. Mr. Speaker, we were all deeply saddened by the sudden passing of GOODLOE BYRON, one of our most admired and respected colleagues.

Having served with GOODLOE on the House Commerce and Interior Committees, I was often impressed by the manner in which he handled himself and his work.

An effective legislator, GOODLOE was either a formidable opponent or valuable ally, depending on which side of a particular issue he chose to take.

Although we sometimes disagreed on various issues, I could not help but respect his dedication to his convictions and his unswerving loyalty to his constituents.

Like his mother and father before him, both of whom served in Congress, GOODLOE did what he thought was right for his district and for Maryland. He was a good Congressman, a fine gentleman, and a warm human being.

The U.S. Congress, the people of Maryland, and all America will miss him.●

● Mr. CARNEY. Mr. Speaker, it is with great sadness that I rise today to note the untimely death of my good friend and distinguished colleague, Congressman GOODLOE E. BYRON, of Maryland.

Congressman BYRON was born in the western Maryland town of Williamsport, and followed both his father, William D. Byron, and his mother, Katherine E. Byron, in representing the Sixth Maryland District in the U.S. Congress. After encountering a challenge in this year's Democratic congressional primary, Representative BYRON'S reelection was generally assumed.

He and I were both elected to the U.S. House of Representatives in 1970, and during my 8 years of working with him, I had come to respect his judgment and cherish his friendship.

For the past several years, Representative BYRON and I served on the Commerce Committee together, and it was then that I came to know him as a rare legislator—one who could represent the divergent interests of his constituency with equity and grace.

As many of us know, Congressman BYRON was an athlete, a runner who had participated in the Boston Marathon six times. In addition, he was an avid hiker, and had led hiking trips to Alaska and many national parks. When he died while jogging on the Chesapeake and Ohio Canal towpath last night, this Chamber lost a skilled legislator and a conscientious Member.

We have all benefited greatly from our association with Representative BYRON, and I know that we will remember him for his exemplary professional and personal qualities. We will miss Congressman BYRON'S presence in the House, and I join my colleagues in extending my deepest sympathy to his bereaved family.●

● Mr. FORD of Tennessee. Mr. Speaker, it is with a great sense of loss that I stand before you today to pay tribute to a beloved colleague, the Honorable GOODLOE E. BYRON of Maryland. GOODLOE BYRON served this body and the people of western Maryland very well. He dedicated his whole life to representing his fellow Marylanders, not only in the House of Representatives, but also in the Maryland House of Delegates and the Maryland State Senate.

GOODLOE BYRON came from a politically active Maryland family. Both his father, William D. Byron, and his mother, Katharine E. Byron, served in this body, and his grandfather represented Maryland in the U.S. Senate. GOODLOE continued this family tradition with pride and humility.

He was truly a gentle man, who took great pride in his athletic prowess, having participated in the Boston marathon six times and completing this grueling event each time. GOODLOE was also an avid hiker and did his part here in Congress to make sure that Americans would have better hiking facilities by sponsoring legislation that enlarged the Appalachian Trail.

GOODLOE was my next-door neighbor in the Longworth House Office Building, and we often had the chance to talk about legislation and anything else that was on our minds as we walked to and from the House floor together. I could always count on GOODLOE for a friendly smile or a kind remark.

Mr. Speaker, yesterday GOODLOE BYRON was taken from us. He was stricken with a heart attack while running along the Chesapeake and Ohio Canal towpath which he enjoyed so much. I shall miss GOODLOE BYRON very much, and my heart goes out to his wife Beverly, his children, staff, and friends.●

● Mr. ZABLOCKI. Mr. Speaker, I was shocked and saddened to learn of the sudden passing of our colleague from Maryland, Representative GOODLOE BYRON.

Like so many other things in life, it is difficult to understand the tragic taking of one so young and with so much potential. Representative BYRON served ably in the House and had a brilliant career ahead of him. His self-discipline and perseverance were exemplified by his work as a legislator and as an athlete. He strove for perfection of mind and body. His character was one of strength.

Mr. Speaker, I am deeply sorry for the sudden death of GOODLOE BYRON and offer sincere and heartfelt condolences to his wife, Beverly, and their children.●

● Mr. MCCLORY. Mr. Speaker, the shocking report of the sudden and premature passing of our colleague, Representative GOODLOE E. BYRON of Maryland must have a most chilling effect about this Chamber.

To know GOODLOE BYRON was to respect, admire, and love him. He was a gentle, dedicated, and wholesome individual whose entire life and ideals represented the highest in both the public and private life of our Nation.

My wife, Doris, and I have had occasion to know and be with GOODLOE and Beverly Byron frequently during the past several years. We have visited in each others homes and have shared the responsibilities and experiences of being delegates to the Interparliamentary Union meetings where we have been privileged to represent our U.S. Congress.

Mr. Speaker, I know that it will be hard for many of us to reconcile ourselves to serve in this body without GOODLOE BYRON as a colleague and as a friend. I can state quite frankly that I am deeply grieved at the report of his passing. I am sure that the prayers and love of all of us who knew and worked with him will be needed by his wife, Beverly, and by his children and other members of the Byron family.

In behalf of my wife, Doris, and me, I extend to Bev Byron and to all members of the family our love, respect, and deep sympathy.●

● Mr. MICHEL. Mr. Speaker, we have once more been saddened by the sudden death of a distinguished colleague. A few days ago, Ralph Metcalfe died. Now we learn of the death of GOODLOE BYRON. It is indeed a profound loss to the Congress and to the Nation to lose two such fine legislators in the space of a few days.

GOODLOE BYRON'S career in Congress is an example of the kind of legislative success that does not always make the headlines. We often hear the question: "What piece of legislation did he ever have his name on?" as if placing your name on bills is the only way to judge legislative ability. GOODLOE BYRON was the kind of Congressman who worked behind the scenes quite often, quietly and persistently doing what he thought was best for his constituency and the country. That kind of work does not always make the headlines or the top of the television evening news. But it demands time and energy and dedication and the willingness to do the tough spadework necessary for legislative success.

He was, of course, a great lover of the outdoors and his sponsorship of the enlarging of the Appalachian Trail was an example of knowledge and love of a subject leading to legislation.

His constituents and his colleagues will miss him and his family has our condolences on this sad and sudden loss.●

● Mr. FLYNT. Mr. Speaker, it was with a feeling of sorrow and shock that I learned early today of the untimely passing of our beloved friend and colleague, the Honorable GOODLOE E. BYRON, late a Representative of Maryland. Only recently, I saw him and perceived him to be a picture of good health and, early this morning, I learned of his sudden death in his beloved free State of Maryland.

GOODLOE was often described as the most conservative Democrat outside the Deep South and he has twice had to defend his solid conservative position and twice the people of his district have sustained him as their chosen Representative.

Mr. Speaker, I considered GOODLOE BYRON as one of my closest friends. He was a man for whom I had the highest admiration and respect. Throughout his life, he not only reflected credit upon himself but upon his family, his district, and his State.

Mrs. Flynt and I have attended serv-

ices in a church in Hagerstown, Md., where his father is honored with a memorial stained-glass window.

Representative BYRON was preceded as Representative of his district and his State not only by his father but by his mother as well. His grandfather served as U.S. Senator from Maryland. GOODLOE came to the Congress with a tradition of public service and was beloved by his fellow citizens who perceived him as one of their own.

During his service in the U.S. House of Representatives, he earned the admiration and respect of those of us with whom he served. Our Nation, his State, and his district have suffered a great loss in the death of this young man. He will be missed by those of us in this body who were honored and privileged to be included within his circle of friends.

Mrs. Flynt joins me in extending to Beverly and their children our heartfelt sympathy and condolences.●

● Mr. WON PAT. Mr. Speaker, I rise to note my deep regret over the passing of our two esteemed colleagues, Representatives RALPH METCALFE and GOODLOE E. BYRON. These two men served their districts and the entire Nation with distinction and honor. They truly will be missed by all of us who were privileged to serve with them in the House of Representatives.

It is somewhat ironic that both men expired from heart attacks. I would hope that the untimely demise of our colleagues serves as a warning to all of us that our health is the most cherished possession we have. As our outstanding physician, Dr. Carey so often reminds us, we must take care of ourselves.

RALPH METCALFE will long be remembered not only for his tremendous efforts in the Congress to assist American blacks in their drive for equality, but for his unparalleled feats on the athletic field. In particular, history will always record his accomplishments in the 1936 Olympics where he was the recipient of a gold medal. His efforts then served as a living rebuttal of the racism of Hitler's Nazi Germany. Congressman METCALFE was always striving for the best in the human spirit and his impressive record of achievement in everything he sought to do is a living monument to him.

Representative BYRON's sudden passing was equally tragic. He held so much promise and left us at such a young age. He was extremely close to his constituents and none could ask for a finer representation in Congress. I was privileged to serve with GOODLOE in the House Interior and Armed Services Committees. There he made major contributions to the legislative efforts of the committees. I extend my sympathy to Mrs. Byron and wish her every success in her efforts to take her husband's seat in November.●

● Mr. JONES of Tennessee. Mr. Speaker, I rise today to express my sorrow and regret of the recent death of our colleague, GOODLOE BYRON. I know much will be said here about his service to his country and his devotion to his family. I share those sentiments, but I also feel a deep regret at the loss of a good man.

I did not serve on any committees with GOODLOE, nor did we come from the same area of the country. However, during our service together in this body, we developed a lasting friendship, one that I shall always remember and cherish.

I knew GOODLOE BYRON to be a good and decent man who was dedicated to providing his congressional district with honest, forthright representation in the House of Representatives. I also knew him as a kind and loving family man who felt the obligations to his family deeply.

I want to express my condolences to Mrs. Byron and the children and say to them that I am among the many Members of this body that felt the loss of GOODLOE deeply. We shall all miss him greatly.●

● Mr. MAZZOLI. Mr. Speaker, I came to Congress in the same year as GOODLOE BYRON, and his passing is a sudden and unexpected shock to me.

It is always difficult to cope with the death of a friend, but in GOODLOE's case, it is doubly difficult.

His hard work and intelligence brought much to this House. He will be widely mourned.

I extend my condolences to his family.●

● Mr. HEFTEL. Mr. Speaker, to those of us who knew him and, therefore, admired him, the passing of GOODLOE BYRON was more than a tragedy. It was a cruel shock. Here was a young man of robust spirit whose life opened before him with all the promise of a new morning. Already, his record of accomplishments had earned him an honored place in his community, and in the Nation as a whole. But we all knew that there was so much more to come. And so we will miss his future as much as his past. But most of all, I think, we will miss having his wisdom and good sense to draw upon during the daily conduct of our affairs. It is our duty to insure that the memory of his example not be lost.●

● Mr. PERKINS. Mr. Speaker, I realize that I am not alone in being shocked and saddened by the sudden death yesterday of our colleague, GOODLOE E. BYRON.

For a vigorous young man, full of promise, to be cut down so soon is a great tragedy at any time. But in the case of this distinguished son of western Maryland, it is doubly tragic, for he was clearly a man who had captured the hearts of the people he served.

It is not given to many to be born into such a heritage of service. Both his father and his mother were able and effective leaders of their community, and both served their people in this Chamber.

It was an honor to have served with GOODLOE BYRON for these last 8 years, and to have seen his development into an able and worthy representative for the people of Maryland.

We are saddened by his passing, and extend our sympathy to his family. This House is a better place for his having been here.●

● Mr. MURPHY of Illinois. Mr. Speaker, I was shocked and saddened to learn of the death of GOODLOE E. BYRON, a fine Congressman. During his 8 years in the House, GOODLOE BYRON faithfully represented his constituents in western Maryland. I am confident that his wife, Beverly, will carry out her husband's policies with the same diligence and conscientiousness that he did.

Besides being a capable legislator, GOODLOE BYRON was a fine example of physical fitness. He had run in six Boston Marathons and seven John F. Kennedy 50-mile runs, a tremendous achievement for a man in his forties.

All of us in the House will miss the presence of GOODLOE BYRON. I wish Beverly Byron the very best as she assumes her responsibilities as Congresswoman of Maryland's Sixth Congressional District.●

● Ms. OAKAR. Mr. Speaker, I would like to take this opportunity to pay tribute to Congressman GOODLOE BYRON from the great State of Maryland.

It goes without mention, he will be missed personally and professionally in the House of Representatives. His untimely and unfortunate death transports a period of reflection and reticence for us all.

His wholesome attitude toward life touched each of our lives in a special way. His memory will live on both in the House of Representatives and in the minds of those of us who had the pleasure of his company and friendship.●

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, it was with great sadness that I learned of the death of our colleague, GOODLOE BYRON, and I am happy to join in paying a well-deserved tribute to his service in the House.

His untimly death has cut short a career of public service which promised to exemplify the best in American politics. Before entering the Congress he had already achieved a record of distinction as a lawyer and legislator in the State of Maryland. During his four terms in the House he quickly demonstrated an intelligence and competence which won him the respect of all of us.

An enthusiastic outdoorsman, it was not surprising that he had a particular interest in the environment and natural resources. His assignment to the Interior and Insular Affairs Committee gave him an opportunity to give special attention to legislation in these areas, and he made outstanding contributions to the work of that committee.

A man of indefatigable energy and courage, both physical and moral, his absence in the Congress will be keenly felt.

I would like to extend to his family my deepest sympathy.●

● Mr. LIVINGSTON. Mr. Speaker, the Honorable GOODLOE BYRON was my neighbor in the Longworth Building for the past 14 months of my service in the U.S. House of Representatives. During that time I considered him to be a fine, intelligent, and dedicated public servant. I was shocked to learn of his untimely death, and I am grieved that his constituents and his country will be deprived of his talent and service.

I am pleased to learn that his widow, Mrs. Beverly Byron, is expected to join us

in the 96th Congress, and wish to assure her of my support and friendship.●

● Mr. O'BRIEN. Mr. Speaker, my acquaintance with GOODLOE BYRON was probably not nearly as long or profound as was the case with many other of my colleagues. However, it was long enough for me to assess him as a special person indeed.

Perhaps it was his good judgment, perhaps it was his warmth, perhaps his ability in his job, and perhaps it was his high sense of responsibility. Whatever it was, certainly he represented the best of the qualities of the Congress, and his loss is one deeply felt and not easily replaced.●

● Mr. MITCHELL of Maryland. Mr. Speaker, the House of Representatives, the Maryland congressional delegation, and the residents of Maryland have been stricken with the loss of one of our most well-respected colleagues.

Congressman GOODLOE E. BYRON was well known for his accessibility to his constituency, and to others who may have needed assistance. The sincerity and sensitivity with which he served the Sixth District of Maryland indeed, is a lasting example for those of us who will continue to represent our Nation's citizenry.

As House Members, we knew GOODLOE BYRON in such capacities as a member of both the House Armed Services Committee's Military Installations and Facilities Subcommittee and the Interior and Insular Affairs Committee's Subcommittee on Indian Affairs and Public Lands. We in the Maryland congressional delegation knew Mr. BYRON as a Member to whom we could unhesitantly look for guidance and relentless support on numerous issues.

While his constituents knew him as we did, they also knew a slightly different side. They knew the GOODLOE BYRON who was strongly dedicated to physical fitness and a strong Federal commitment for programs in this area for all Americans. The sincerity with which he addressed this issue was well illustrated, particularly by his active participation in seven of the 26-mile Boston Marathons. Mr. BYRON believed that a strong mind is best complemented by a physically fit body.

GOODLOE BYRON will certainly be missed by this House, and particularly by the members of the Maryland congressional delegation. However, the spirit of respect and dignity with which he served will always be with us.●

● Mr. YATRON. Mr. Speaker, I join with the many friends of GOODLOE E. BYRON in expressing my deep sorrow at his untimely passing.

Following a long family tradition of service in the Congress Representative BYRON performed his duties with exceptional ability and unquestionable integrity.

During his 8 years in the House of Representatives, Congressman BYRON never allowed political considerations to overshadow his concern for the people of the Sixth District of Maryland and his desire for real improvement in their lives.

Besides his outstanding work in the House, GOODLOE was a strong advocate of physical fitness. He had run in six Boston Marathons and seven John F. Kennedy 50-mile runs.

This Nation has lost a warm and fine human being and an extremely competent Member of Congress. I would like to express my deepest sympathy to his wife, Beverly, and their three children. I fully enjoyed my years working with GOODLOE BYRON and I consider it a privilege to have known him.●

● Mr. DERWINSKI. Mr. Speaker, I wish to express my deep sorrow over the recent death of our distinguished colleague, GOODLOE BRYON. His outstanding record of faithful service and his strength of character earned him an honored place in the hearts of all those who had the privilege to know him.

During his 8 years in Congress. GOODLOE was truly a hard-working legislator who knew how to get things done, but his efforts always reflected his deep concern for the well-being of his constituents.

GOODLOE was an extremely effective member of the Interior and Insular Affairs Committee. Because of his keen interest in the environment and in the protection of our natural resources, GOODLOE was instrumental in the movement to protect existing trails and wild lands. His contribution in these areas will long be a testimonial to his leadership.

To each position he held, GOODLOE BYRON, brought a special dedication and a commitment to do his very best for the people of the Sixth District, for the people of Maryland and for the people of our Nation. I believe that I can say that his work was deeply appreciated by all those he represented.

On behalf of Mrs. Derwinski and myself, I would like to express my sincere condolences to his wife, Beverly, and the entire BYRON family on their loss. We all share that loss to some extent, but I am confident that Beverly will carry out her husband's policies with the same diligence and conscientiousness that he did. I wish her the very best as she assumes the responsibilities of representing the Sixth District of Maryland.●

● Mr. VAN DEERLIN. Mr. Speaker, Congress lost one of its finest athletes and gentlemen October 11 with the passing of our colleague, GOODLOE BYRON.

Heir to a family tradition of distinguished public service, GOODLOE ably represented Maryland's Sixth Congressional District for 8 years. He was a shoo-in for reelection. Our grief is tempered only by the fact that he will be succeeded in this body by his widow, Beverly, a well-qualified person in her own right and daughter of another distinguished man, Harry Butcher, once aide and confidant to General Eisenhower and now a leading California broadcaster.

GOODLOE, of course, was well known and properly renowned as a leading distance runner, a six-time competitor in the Boston Marathon. I ran with him on several occasions—other than Boston, I assure you—and experienced firsthand the beauty of his district while jogging along the C. & O. Canal towpath, near Frederick.

But GOODLOE also was an environmentalist in the finest sense of the word, and it is in this area that I think his contributions will be longest remembered.

He was a devoted backpacker and outdoorsman, activities that helped make the Byrons such a closely knit family. It was due in large measure to his interest and leadership that Congress this year enacted legislation to provide $90 million for development of the Appalachian Trail System.

GOODLOE and I served for a number of years together on the House Communications Subcommittee, where I respected him as a man of integrity who was true to his ideals. He was a good friend whose loss is keenly felt.●

● Mr. NATCHER. Mr. Speaker, I join with the many friends of GOODLOE E. BYRON in expressing my sorrow at his untimely passing.

Congressman BYRON, following a long family tradition of service in the Congress of the United States, performed his duties with exceptional ability and unquestionable integrity. He was an able and dedicated Representative of his State of Maryland and of his country.

The people of the Sixth District of Maryland knew him well. He gave of himself fully and unselfishly. His sincere concern for his constituents' needs and problems was ever constant. This was a kind, considerate and courageous man. He will be greatly missed by the people of Maryland and by his colleagues in the House of Representatives.

Mr. Speaker, I would like to extend my deepest sympathies to the wife and family of the Honorable GOODLOE E. BYRON.●

● Mr. JOHNSON of California. Mr. Speaker, it was with great sadness that I learned of the untimely death of our colleague, GOODLOE BYRON of Maryland. We will certainly miss him here in the Halls of Congress.

GOODLOE was an effective and conscientious legislator who had gained the wide respect of his colleagues. He came from a long line of public servants and was making his own mark on the Congress.

During his 8 years in the House of Representatives, he worked diligently to serve the people of Maryland's Sixth Congressional District. He was an effective spokesman for the people of this area, for he knew their problems and knew how to work within the legislative system to get them solved.

It is always shocking when a Member of Congress passes away, but we are particularly grieved because GOODLOE was young. He was a very fine Representative and had much to offer in future years. We will not soon forget his accomplishments and his presence among us.

To his wife Beverly and to his family, my wife and I extend our deep sympathy. They can take comfort in knowing that GOODLOE served in the House of Representatives with distinction and excellence.●

● Mr. SIKES. Mr. Speaker, the State of Maryland, the Congress, and the Nation suffered a grievous loss with the death of Congressman GOODLOE BYRON of Maryland's 6th District. His death at only 49,

takes from the Congress one of the positive men whom we all regarded as having limitless potential and ability.

Particularly for me, having had the pleasure of serving with both of GOODLOE's parents in the House, this is a very real, personal loss. GOODLOE's father, William Byron, and his mother, Katherine Byron, both represented the same district in Congress almost four decades ago. Additionally, his grandfather was a U.S. Senator from Maryland.

Although he was a valued member of the Interior and Insular Affairs Committee, it was his work on the Armed Services Committee that initiated our association. Serving on the Military Installations Subcommittee and on the Seapower Subcommittee, GOODLOE BYRON came to stand for a strong Navy and a strong national defense. His expertise in the somewhat encumbered military installations and construction field was renowned far beyond that of such a junior member of that subcommittee.

His constituents recognized the abilities and potential of GOODLOE BYRON for he had already won renomination and had less-than-token opposition in the upcoming general election.

Often described as one of the most conservative of the Democrats from outside the South, GOODLOE BYRON will especially be missed when the 96th Congress convenes in January.

My sincere sympathy is extended to Mrs. Byron and the family. They can be very proud of GOODLOE's achievements and service to this country. His work has strengthened our Nation. His passing is truly our loss. He was a great American.●

● Mr. O'NEILL. Mr. Speaker, it is with deep regret that I join my colleagues today in paying tribute to the Honorable GOODLOE E. BYRON, whose sudden and untimely passing yesterday has left a void that will be hard to fill here in the House of Representatives.

Quiet and softspoken, GOODLOE BYRON did not seek headlines in the House of Representatives. Nevertheless, he was extremely sensitive and responsive to the important needs of the people of the Sixth District of Maryland and that was graphically demonstrated by the fact his constituents elected him to serve as their Representative in Washington for four terms and renominated him in September for his fifth term.

As an officer in the U.S. Army, a member of the Maryland bar, and county attorney, a member of the State legislature and, finally, as a Member of the U.S. House of Representatives, GOODLOE BYRON rightfully earned a reputation for integrity, hard work, and strength of character. As a public servant he brought honor and distinction to the State of Maryland and the Nation.

GOODLOE came from a distinguished family of public servants: His grandfather was a U.S. Senator from Maryland, and his father and mother both preceded him as Members of the U.S. House of Representatives. GOODLOE was proud to follow in these footsteps and acknowledged frequently to his colleagues how his father taught him that it is more important to vote in behalf of your constituents than to try to force your personal philosophies upon them.

His keen interest in the environment and the protection of our natural resources earned him the reputation as a leader in the movement to protect existing trails and wild lands and to establish more trails where they were needed. While in the Maryland State Senate he sponsored a bill making Maryland the first State to provide protection for the Appalachian Trail, which crosses 39 miles of Maryland. The Appalachian Trail has been an important part of GOODLOE BYRON's Life and on March 21, 1978, the President signed into law GOODLOE's bill, H.R. 8803, which will complete the protection of the Appalachian Trail corridor.

I will always remember GOODLOE BYRON as a long-distance runner who ran six times in the famous Boston Marathon and seven times in the J.F.K. 50-mile-hike-and-run. Tenacity, perserverance, dedication, stamina, endurance, drive, and determination—these are the qualities that marked him as a champion outdoorsman and in achieving his legislative goals as a legislator. I know how much he loved and respected the outdoors and enjoyed running and hiking with his family. Perhaps it is fitting that his passing came while he was doing what gave him such a sense of personal enjoyment.

My wife, Millie, joins me in expressing our sympathy and sincere condolences to GOODLOE's wife, Beverly, and their three children, Goodloe, Jr., Mary, and Kim.●

● Mr. SEBELIUS. Mr. Speaker, I wish to take this time to pay tribute to our friend and colleague, GOODLOE BYRON of Maryland who died so unexpectedly Wednesday evening.

GOODLOE came from a long line of dedicated public servants and during his four terms in the Congress did an exemplary job of carrying on his fine family tradition.

During the past 4 years I have had the privilege of serving with him on the Interior and Insular Affairs Committee. Because of his special interests as an outdoorsman and an athlete, we also worked together on the National Parks Subcommittee. He always did his homework and tried to do the very best he could for his constituents and the national interests. I feel honored to have known and worked with such a man.

The State of Maryland has lost a valuable asset with the death of GOODLOE BYRON and we in the House of Representatives have lost a fine colleague.●

● Mr. ANDERSON of California. Mr. Speaker, this Congress lost yet another of its Members to an unwelcomed and unexpected death. GOODLOE BYRON was stricken with a heart attack while jogging in his home district in western Maryland. I feel sure that not only his colleagues and the people of the Sixth District of Maryland, but the populace as a whole mourn the loss of this fine man and dedicated Member of Congress.

GOODLOE had served the State of Maryland since 1962, when he was elected to the house of delegates. From 1966 to 1970, he did an excellent job as State senator. In 1970, he carried his reputation for excellence to the U.S. House of Representatives.

GOODLOE's task was not an easy one, for he represented one of the most culturally diverse districts in the Nation, a mixture ranging from large city suburbanites to Appalachian coal miners. To adequately serve the interests of such widely divergent groups is difficult at best; yet GOODLOE never shirked his duty or avoided his responsibility to the citizens of Maryland. His service on the Interior and Insular Affairs and on the Armed Services Committees was admirable. GOODLOE will be remembered for his complete devotion to the people of the sixth district and for his sincere desire to effectively represent the will of his constituents.

This Nation has lost a fine human being and an extremely capable Member of Congress. We all lament the sudden passing of one who seemed so young and full of life. Fate is sometimes very cruel; there is no choice but to accept its consequences. My wife, Lee and I would like to express our deepest sympathy to those who will miss him the most, his wife Beverly and their three children. Although little can be said to comfort them in this time of bereavement, I know that all of us extend our deepest sympathies, and share in their loss.●

● Mr. BIAGGI. Mr. Speaker, the House remains in a state of shock over the sudden death of our friend and colleague GOODLOE BYRON. I wish to pay tribute to this outstanding public servant and man.

For the past 8 years, GOODLOE BYRON served with special distinction as the Representative of the Sixth Congressional District in Maryland. He followed a family tradition which saw both his mother and father represent the Sixth District in the House. GOODLOE BYRON was a lifelong resident of the district which encompasses the beautiful countryside of western Maryland.

GOODLOE BYRON was a tireless worker on behalf of his constituents. While in the House GOODLOE served on the Armed Services and Interior Committees. In the latter capacity he worked with special effort to insure that the Potomac River and the C. & O. Canals and their many towpaths and hiking areas were preserved. The tens of thousands of area residents who use these facilities owe a great deal to the work of GOODLOE BYRON.

GOODLOE was a quiet but entirely effective leader. His contributions to the legislative process were both numerous and substantial. It was my distinct honor to have GOODLOE as a friend. His presence in the House will be missed.●

● Mr. FREY. Mr. Speaker, it is with a great deal of sadness that I join in tribute to our departed colleague, the gentleman from Maryland, GOODLOE BYRON. GOODLOE was elected 2 years after I got here and I had the fortune to become a good frend of his. We served on the same committee for a while and being relatively the same age and having the same interest in athletics, got to know each other well. As a matter of fact, just several days before his death we were discussing sports and what the future

would bring. As usual, GOODLOE looked at it as a challenge and was eagerly looking forward to the next 2 years in the Congress.

There are few words that can really help at a time like this, but I want GOODLOE's wife and three children to know that he was respected by his colleagues as a fighter for principles. Party did not come first for GOODLOE, but this country. He would look at an issue, decide what to do and work to bring about what he believed no matter what the political pressure. The people of his district obviously loved and respected him as is evidenced by his continued reelections. The people of his district, the State of Maryland, and this country have lost a fine Congressman and a gentleman, and I have lost a good friend. What he did, what he stands for, his beliefs, his courage, his competitiveness will always remain. Marcia and I send our thoughts and our prayers in sorrow.●

● Mr. ANNUNZIO. Mr. Speaker, I rise to join my distinguished colleague, Hon. CLARENCE D. LONG, of the Second District of Maryland, in paying tribute to the Honorable GOODLOE E. BYRON, who represented the people of the Sixth District of Maryland during the 92d through the 95th Congress. The death of my outstanding colleague has left a void in this House, for he served his Maryland constituents and the American people with devotion and dedication.

GOODLOE BYRON began his career of leadership in Maryland as a member of the Maryland House of Delegates from 1962–66, and he also served in the Maryland Senate from 1966–70, when he was elected to the U.S. House of Representatives.

During his distinguished service in the House before he was cut down in the prime of his career, Congressman BYRON served on the Committee on Armed Services and the Committee on Interior and Insular Affairs. His record of excellence and creative accomplishment was most commendable.

GOODLOE BYRON was a man of deep conviction, independent in thought and action, and was willing to challenge any person or institution in the pursuit of his high ideals and what he thought was right for his people, and he will certainly be missed here in Congress.

Mrs. Annunzio and I extend our deepest sympathy to his wife, Beverly, and to his children, Goodloe, Jr., Barton Kimball, and Mary McComas.●

● Mr. CARR. Mr. Speaker, GOODLOE BYRON was a capable legislator, but even more importantly, a warm human being who will be missed by all of us in Congress.

I served with GOODLOE BYRON on the Committee on Armed Services and the Committee on Interior and Insular Affairs, and it was a pleasure to work with him. It was a particular pleasure and privilege to know GOODLOE personally. We occasionally talked together about the difficulty of getting good exercise in such a fast-paced and demanding job as that of a Member of Congress. It was through these talks that GOODLOE interested me in jogging, and my life was thus improved by him.

GOODLOE BYRON will be sorely missed by all of us, and we can only hope that, for his family and friends, the pain of his passing will be lessened by the good memory of the time he shared with us.●

● Mrs. BOGGS. Mr. Speaker, it is with a very heavy heart that I join my colleagues in paying tribute to the Honorable GOODLOE E. BYRON who left us so suddenly and tragically.

I wish to express my deepest sympathy to Beverly and their children whose pain and grief I share because of my many years of personal association with the Byron family.

My own husband, Hale, served with GOODLOE's father, the Honorable William D. Byron, and I was with GOODLOE's mother, the Honorable Katharine Byron, in New Orleans when she received the tragic news that her husband's flight had crashed, sending Congressman BYRON to his untimely death. And I admired the strong way Katharine carried on, much the way Beverly has determined to run for GOODLOE's seat to continue the tradition of Byron representation of the Sixth Congressional District of Maryland.

The enlargement of the Appalachian Trail, which GOODLOE sponsored and championed in Congress, should serve us as a lasting reminder of his good nature and his dedication to the physical and spiritual needs of the American people. The Trail, which meanders through the districts of many of his colleagues from Georgia to Maine, will help millions of Americans to personally experience the beauty and the history of our Nation.●

● Mr. ICHORD. Mr. Speaker, the death of GOODLOE BYRON has robbed Maryland and the Nation of an unusually able public servant and the Members of this House of a fine colleague and friend. I was proud to have worked with him on the Armed Services Committee and deeply saddened by his untimely passing. GOODLOE will be greatly missed by all of us and it is indeed unfortunate that his distinguished career and life of public service has been called from us.

GOODLOE BYRON served with distinction in the Maryland Senate before coming to the House in 1970. He served his country in the U.S. Army and held steadfastly to the time-honored traditions of the Democratic Party. He was an active, deeply concerned individual and a friend and mentor to us all. Year after year GOODLOE BYRON gave of himself freely to the people of Maryland and America. Although he has left us prematurely, all who knew him and were served by him are grateful for his wisdom, compassion and leadership. We shall long be guided by them.●

● Mr. DE LA GARZA. Mr. Speaker, GOODLOE BYRON was both a friend of mine and a colleague here in the House of Representatives.

As a friend, I knew GOODLOE BYRON to be a man of strength and convictions, of humor and insight, of action and deeds.

As a colleague, I knew GOODLOE to be an able and powerful legislator, who weighed carefully all sides of a question before making up his mind—but who tenaciously clung to his considered opinion even if it was temporarily unpopular in the eyes of the fickle public.

GOODLOE BYRON's death was a tragedy we all feel—none more than his charming wife Beverly and his children Goodloe, Jr., Barton, and Mary. The pain is worsened because GOODLOE seemed one of the healthiest Members of this body—and his death was so unexpected.

GOODLOE BYRON was a good man. I will miss him.●

GENERAL LEAVE

Mr. LONG of Maryand. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the life, character, and public service of our late colleague, the gentleman from Maryland, Mr. GOODLOE BYRON.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

MASSIVE BUILDUP BY SYRIAN TROOPS IN LEBANON

Mr. WOLFF. Mr. Speaker, the current situation in Lebanon saddens us all and presents a cause for grave concern as we seek peace in the Middle East.

In the wake of the civil war between Moslem leftists and Palestinians, and Christian forces, in 1976 there was installed in Lebanon what has been termed the "Arab deterrent force." This so-called deterrent force is supposed to keep the peace and is made up of forces from a number of Middle Eastern states, though it is comprised mainly of Syrians.

This "peacekeeping force" is anything but that. Mr. Speaker, at this very moment, people—innocent people—are dying in Lebanon. Bitter fighting has erupted between the Christian Lebanese and the Syrian forces. Although the latest in a long string of cease-fires went into effect this past Saturday, this cease-fire can best be described as an "uneasy truce" and in actuality, violations of the cease-fire are commonplace. Indeed, there are reports that, even now, the Syrians are using the so-called cease-fire as a cloak to hide their attempts to reinforce their troops, perhaps for a final assault on the Christian population.

Today marks the continuation of talks aimed at finding a peace in the Middle East, for today, representatives of the United States, Israel, and Egypt are meeting downtown at Blair House to transform the Camp David framework into an actual peace treaty.

Let us hope that nothing stands in the way of a successful conclusion to this mission.

But we cannot forget what is happening in Lebanon today for it bears a direct relationship to any future peace in the Mideast. The U.S. Congress is concerned about this situation, and today, an informal group of Congressmen heard testimony from a number of Christian Lebanese on the current situation.

What is now clear is that Syria does not wish to keep the peace. Instead it wants to subjugate Lebanon into "greater Syria." What is now needed is firm United States and United Nations action to restrain the Syrian troops and then work for their withdrawal. Tomorrow,

concerned Members of Congress will take to the floor of the House to discuss this situation. I urge all Members to support us in our efforts.

PROGRESS MADE IN SPECIAL STUDY ON ECONOMIC CHANGE

(Mr. BOLLING asked and was given permission to address the House for 1 minute.)

Mr. BOLLING. Mr. Speaker, under the unanimous-consent permission which I have just obtained, I have taken a special order for later today to share with the Members of the House the progress we have made in the Special Study on Economic Change authorized by House Concurrent Resolution 248.

THE INEQUALITY IN TAX CREDITS FOR THE ELDERLY

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, I wish we were taking time to study what we are doing before we blithely pass upon H.R. 9893, tax credit for the elderly, without amending it so that it treats equally those retirees under age 65 and those over age 65. The bill as it is presently written penalizes the retiree when he becomes 65. This is simply not fair.

It is not that I am against giving the tax credit for the elderly. I sponsored a bill that would have increased the credit and I pledge that if this bill is defeated, I will again sponsor that bill next session. However, my bill would apply the same phaseout to those under 65. This is the only fair thing to do.

The committee bill actually accents the discrimination by raising the amount of the base of the credit. It is true that those over 65 and up will have the phaseout raised from $10,000 on a joint return to $17,500, but another retiree under age 65 will have no phaseout. The credit will mean more dollars to those under age 65 than those over 65. The phaseout does not apply to unearned income, so persons of affluence will be especially benefitted.

If it were possible, I would offer an amendment to the committee bill. Unfortunately this rather controversial, and expensive bill is on the Suspension Calendar and amendments are not in order. This problem was originally called to my attention when some of my over 65 constituents wrote to me and asked why they were having to pay more tax than they would have to pay if they were under 65. I had the committee staff look into it and could not believe that we had written this discrimination into the law. Let us not make that discrimination worse by passing this bill.

LENGTHY HOUSE SESSIONS TAKE THEIR TOLL

(Mr. CARTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARTER. Mr. Speaker, one of the greatest historians of the House today told me that when we start the 10 a.m. to 8 p.m. or 10 p.m. or midnight sessions, we lose one to three Members. This is a man who knows the history of the House perhaps better than any man in this room. He is my colleague, the gentleman from Kentucky (Mr. NATCHER.)

Sadly, Mr. Speaker, we have lost two of these Members already. I regret this very much, and I hope that we will limit the time of these sessions in the maddening rush to try to finish our work. Instead, I hope that we will act calmly and deliberately and save the life of the third Member.

Mr. Speaker, I deeply regret the death of our good friends and colleagues, the Honorable Ralph Metcalfe and the Honorable GOODLOE BYRON. May God sustain their families and assuage their grief.

THE WASHINGTON POST'S CRITICISM OF THE CONGRESSIONAL LEADERSHIP

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

● Mr. FRENZEL. Mr. Speaker, an editorial in this morning's Washington Post delivered the most searing indictment against the congressional leadership that I have seen yet.

The editorial points out that Congress biggest fault is mismanagement. The leadership is probably not unable to manage the peoples' affairs in a business-like manner, but it certainly is unwilling to do so.

The Post scores another bullseye in criticizing the overuse of the suspension calendar, a procedure already denounced by publications like the New Yorker. The House Republican Research Committee's Task Force on Reform, lead by our able colleague LARRY COUGHLIN, has been calling for improvements in the suspension procedure for 4 years. Naturally, our majority leadership has ignored those responsible requests.

The Post editorial also correctly identifies the leadership's political problem. It feels obliged to give its supporters whatever they want—staff, programs, expense allowances—even if those gifts are contrary to wishes of the people, or to the proper operation of the House.

I shall insert the editorial in the extension section of the RECORD today. It should command the attention of every person who wonders why his or her government does not work well under the present management.●

PROPOSED AMENDMENT TO ENDANGERED SPECIES ACT

(Mr. RONCALIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RONCALIO. Mr. Speaker and my colleagues, later today, following the consideration of S. 2727, the Amateur Sports Act of 1978, we are scheduled to consider the Endangered Species Act, H.R. 14104.

Mr. Speaker, I have an amendment to that act, which is vital to my State. The amendment, in effect, will contain certain findings which will permit the completion of a $1.6 billion powerplant 350 miles upstream from a 60-mile stretch of the Platte River, near Kearney, Nebr., which is one of 10 stopover or flyover habitats for certain sand and whooping cranes.

Again, Mr. Speaker, this amendment is vital to my State. It is not a direct, frontal attack upon the Endangered Species Act, but a careful precise exception based on facts unique to the Platte River. I will be grateful if all of the Members of the House will support the amendment, and favorable passage of H.R. 14104, as amended.

GENERAL LEAVE

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill H.R. 12929, Departments of Labor, and Health, Education, and Welfare Appropriations.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CONFERENCE REPORT ON H.R. 12929, LABOR-HEW APPROPRIATIONS, FISCAL YEAR 1979

Mr. FLOOD. Mr. Speaker, I call up the conference report on the bill (H.R. 12929) making appropriations for the Department of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1979, and for other purposes.

The Clerk read the title of the bill.

(For conference report and statement, see proceedings of the House of October 6, 1978.)

The SPEAKER pro tempore. Under the rule previously adopted, the conference report is considered as having been read.

The gentleman from Pennsylvania (Mr. FLOOD) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MICHEL) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Pennsylvania (Mr. FLOOD).

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and to insert a table and other extraneous material at the conclusion of my remarks.

Mr. Speaker, today we bring before the House the conference report on H.R. 12929, the Labor-HEW appropriation bill for fiscal year 1979. This conference report is the result of two long and arduous sessions with the Senate conferees, the first of which lasted over 10 hours. There are a total of 111 Senate amendments to the House bill, some of which contain several separate and distinct items on which the Senate and House bills do not agree. The House conferees are to be praised for their diligence, dedication, and willingness to devote many, many precious hours to the resolution of differences between the two Houses, which makes it possible for us to consider this conference report at this time.

Four months has elapsed since the Labor-HEW appropriation bill passed the House on June 13. The bill passed the Senate on September 27. At the present moment, the programs covered by this bill are without funding, since the Senate has not yet adopted the continuing resolution (H.J. Res. 1139) which passed the House on September 26. I am sure that I need not remind members that the fiscal year began on October 1.

The total appropriations provided in the conference report and recommended by the conferees amount to $56 billion in Federal funds and $4.8 billion in trust funds. The recommendation, in total, represents a reduction of $531,000,000 below the House bill and $1,285,000,000 the President's budget request. Unfortunately, I must add that there are, in addition, $17.6 billion in budget estimates for programs which were left out of both the House and the Senate bills because their authorizing legislation has expired. These programs will be covered by the continuing resolution until supplemental appropriations can be enacted next year.

The major change from the bill which the House passed last June is in the Basic Educational Opportunity Grants (BEOG) program. For this program, the conference recommendation is $2,600,000,000, or $763,600,000 less than the amount in the House bill. The Senate had cut out all of the funds contained in the House bill to extend the BEOG program to middle-income families, on the grounds that they would not be needed if tuition tax credits are enacted. The conference agreement restores $459,400,000 of the Senate cut, and recognizes that the tuition tax credit issue is still not resolved. We intend to take another look at the BEOG program in connection with next year's supplemental appropriation bill.

Another large change from the House bill which we are recommending is a reduction of $265.000.000 in appropriations for medicaid, which is based on the latest estimates of the Congressional Budget Office. We have also agreed to a portion of the Senate reduction in funds for impacted area aid. We have restored sufficient funds to insure that school districts do not receive less than they received last year. In toal, there is an increase of $11,100,000 for impacted area aid over fiscal year 1978.

Some but not all, of the reductions are offset by increases in other programs. Among the increases over the House bill which we have agreed to are:

Occupational Safety and Health	+$3,750,000
Mine Safety and Health	+2,000,000
Rural Health	+1,500,000
Black Lung Clinics	+7,500,000
Public Health Service Hospitals and Clinics	+20,000,000
National Institutes of Health (Including $27,000,000 for the National Cancer Institute)	+46,000,000
Mental Health Research and Training	+8,000,000
Emergency Aid for Desegregating Schools	+14,350,000
Education for the Handicapped	+14,812,000
Vocational Education State Grants	+25,500,000
Libraries	+8,500,000
Refugee Assistance	+7,800,000
Adoption Opportunities	+5,000,000

This is by no means an exhaustive catalog of all of the dollar changes from the House bill. The Labor-HEW appropriation bill contains funding for hundreds of programs, each of which must be dealt with separately. I intend to insert in the RECORD, at the conclusion of my remarks, a very detailed table which will show the amount agreed to by the conferees, together with appropriate comparisons with the House bill, the Senate bill, the budget estimates, and the fiscal year 1978 appropriation.

Mr. Speaker, I wish I could conclude my remarks at this point. Frankly, this is an appropriation bill, and in my opinion, we should be talking about dollars, and nothing else. Unfortunately, the annual appropriation bill is often the only vehicle which Members can find in which to express their views about a particular matter, and as a result, we find that every year the bill becomes cluttered up with legislative language on all sorts of subjects.

This is by way of a preface to my admission that your conferees have again not been able to resolve the abortion issue. Therefore, when you vote on this conference report, you will not be voting on the question of payments for abortions. That vote will come later, when we take up Senate amendment 103. At that time, I intend to offer a motion to insist on the House version of section 210, which, in my opinion, is vastly preferable to the Senate version.

Mr. Speaker, I urge all Members to vote for adoption of the conference report. This bill is well within the targets established by the second budget resolution. It is below the President's budget request, and it represents the results of 9 months of effort by Congress and a very careful weighing of priorities among the various programs funded in it. Also I have often said, this bill affects every man, woman, and child in America. It is one of the most important pieces of legislation which you will have an opportunity to vote on.

Mr. Speaker, the House during debate on June 8 on the fiscal year 1979 Labor-HEW appropriations bill voted overwhelmingly—290 to 87—for the amendment offered by the gentleman from Illinois (Mr. MICHEL) to reduce budget authority for HEW by $1 billion to be achieved by reducing fraud, abuse, and waste in the programs mentioned by the Department's Inspector General in his report to Congress of March 31, 1978. Conferees agreed to this provision.

I have received a communication from the Secretary of the Department of Health, Education, and Welfare, Joseph A. Califano, in which he sumarizes the Department's views on the Michel amendment and advises how his Department intends to proceed in administering its fiscal year 1979 appropriations in light of the amendment. Following is the text of the Secretary's letter which I take this opportunity to share with my colleagues:

THE SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., October 11, 1978.

Hon. DANIEL F. FLOOD,
Chairman, Subcommittee on Labor-HEW, Committee on Appropriations, U.S. House of Representatives, Washington, D.C.

DEAR DAN: I am writing to summarize our views concerning the Michel Amendment, Section 201 of the Labor-HEW Appropriation bill, and to advise you how we intend to administer our appropriations in light of the Amendment. The Amendment would reduce the budget authority for HEW by $1 billion, provided that the reduction is achieved by reducing fraud, abuse and waste in the programs cited by the Inspector General in his report of March 31, 1978.

Let me first briefly summarize our views on the proposed Amendment. First, it is important to note that, to a large extent, HEW's 1979 budget request, and the line items in the appropriations bill which the conferees have approved, already reflect the savings anticipated from our plan to reduce fraud, abuse and waste by $1 billion in fiscal year 1979. Second, our plan anticipates significant savings in Medicare, a program for which no appropriation action is required, and therefore, a program not covered by Section 201. Finally, our plan includes actions that reduce funds for grantees who are misusing the money and shift it to grantees who will use it properly, actions which will not reduce the budget but ensure that whatever is appropriated is properly spent.

As you know, following the release of the Inspector General's report of March 31, I established a specific reduction targets for each operating component within the Department, and a copy of the Department's plan was sent to each member of Congress on June 6. This plan described the full scope of our effort to reduce fraud, abuse and waste. Our FY 79 goal is $1.055 billion. This does not reflect what we will accomplish in the long run because many of our programs are confronted with deep-seated, systemic problems. The goal is a most ambitious one, however, given the long lead times to effect change and the fact that some incidence of leakage is inevitable.

The target includes activities in the following areas:

Improving Medicaid program operations and recipient eligibility;

Increasing activities to identify fraud and abuse in benefit payment programs;

Increasing the number and intensity of audits of grantees;

Strengthening the review and negotiation process to verify reimbursements and improve the integrity of Medicare claims;

Improving management in the SSI and AFDC programs; and

Reducing fraud, abuse, and waste in all student financial assistance programs.

As indicated above, a significant portion (approximately $640 million) of the $1 billion goal is already reflected in the 1979 budget submission. These savings are concentrated in Medicaid, AFDC, SSI, and the Guaranteed Student Loan Program. Savings in the Medicare program (not covered by the Department's appropriation bill) account for approximately $150 million. Programs where expenditures which will continue, but for the proper recipients and services, account for approximately $265 million.

In short, we intend to meet the objective

of the Michel Amendment not by reducing program appropriations but rather by the vigorous application of the measures I have identified which should result in savings of $1 billion. Indeed, we are legally prohibited from reducing the appropriations for the programs to which the Amendment applies (the programs cited in the Inspector General's report)—Medicaid, Medicare, AFDC, Social Security, SSI, Social Services, Student Assistance and ESEA, Title I—since grantees or individual beneficiaries are entitled by statute to Federal funds under these programs. Failure to make such payments would give rise to enforceable claims against the Government.

Let me emphasize that I am deeply and personally committed to reducing fraud, abuse and waste in our programs and fully expect the implementation of our plan to accomplish the savings contemplated by Mr. Michel's Amendment.

Sincerely,

JOSEPH A. CALIFANO, Jr.

CONFERENCE AGREEMENT—H.R. 12929—FISCAL YEAR 1979 DEPARTMENTS OF LABOR, HEALTH, EDUCATION, AND WELFARE AND RELATED AGENCIES APPROPRIATION BILL

	Fiscal year 1978 comparable appropriation	Fiscal year 1979 budget estimate	House bill	Senate bill	Fiscal year 1979 conference agreement	Conference compared to fiscal year 1978	Conference compared to 1979 estimates	Conference compared to House bill	Conference compared to Senate bill
SUMMARY

[1] Reflects $1,000,000,000 reduction as a result of sec. 201 fraud, abuse, and waste reforms.

[2] Reflects $2,000,000,000 reduction as a result of sec. 201 fraud, abuse, and waste reforms.

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Speaker, I note that the conferees have deleted funds and positions for two activities in the Office of the Assistant Secretary for Health. These are the health practices assessment and the special initiatives programs. There are some important programs involved in these cuts. For example, it would delete funding for the Office of Population Affairs, which was established by the Congress as part of the family planning program in the Public Health Service Act (Public Law 94–63). Another example is the critical need to work on problems of transferring new health technology into health practice. At least half of the staff which the bill deletes for health practices assessment works on this critical mission.

My question, Mr. Speaker, will the committee be receptive to proposals from the Department which would accept the overall dollar and position reductions in the Office of the Assistant Secretary for Health, but spread them according to the health priorities as viewed by the Secretary and the Surgeon General?

Mr. FLOOD. Mr. Speaker, I may say to my friend, the gentleman from California (Mr. WAXMAN), that, of course, as he knows, we are always willing to entertain reprograming proposals and supplemental requests.

Mr. WAXMAN. Mr. Speaker, I thank the gentleman.

Mr. MICHEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I find myself in the rather unusual position of having signed a Labor-HEW conference report, and I did so because we are bringing a bill back well under the Carter budget and because we included in the report some strong language clarifying the intent of the $1 billion amendment relating to waste, fraud, and abuse.

The conference report provides $56,054,029,000 in expenditures, an amount which does not include some $17 billion in unauthorized items. The total is $1,284,909,000 under the President's budget. It is also $531 million below the House version.

Most of the reduction from the budget can be accounted for by the $1 billion cut contained in my amendment, a $530 million reduction in the proposed increase for basic educational opportunity grants, and the allocation of $265 million less than requested for medicaid.

Likewise, most of the reduction below the House bill is due to the $773 million reduction from the House figure for the basic educational opportunity grants.

We had an oddity this year in that the Senate bill was some $2 billion below the House version, though most of that can be accounted for by the doubling of the Michel amendment to $2 billion and by the decision not to fund the President's middle-income student assistance proposal. But there were other reductions as well, such as in the ESEA title I and impact aid programs. The Senate conferees, however, showed a much great willingness to argue for their increases than their decreases, and the result was a conference report $1.5 billion above the Senate bill.

The conference went along with the $1 billion figure approved by the House for my amendment, rather than the Senate figure of $2 billion, because of a feeling that it is probably unrealistic to expect savings of as much as $2 billion in a single year's time.

Most importantly, however, we included language in the conference report making clear that the $1 billion reduction is in fact a real cut which the Secretary of HEW must adhere to. Secretary Califano had been claiming that my amendment represented merely an "exhortation" to reduce waste, fraud, and abuse, and that it did not legally require reductions in the programs cited by the Inspector General.

The conference report seeks to correct that "misunderstanding" on the Secreterms that he "shall not spend more tary's part by stating in unequivocal than the total allocated individually for these programs in this act minus $1,000,000,000."

I should point out that HEW lobbyists were all over our conference meeting trying to defeat this report language, and the Secretary himself sent a 3-page letter moaning about the difficulties of achieving this reduction.

I suggest to the Secretary that he would be doing the taxpayers of this country, as well as his own President, a much bigger favor if he would concentrate on reducing the waste, fraud, and abuse in his Department rather than on trying to find loopholes in order to escape congressional intent.

For the record, let me point out that the $1 billion reduction is really a very modest cut. I had originally planned to go with a $1.5 billion reduction; the Senate approved a $2 billion cut; and Mr. ASHBROOK asked for a $2.5 billion cut. My original $1.5 billion proposal exempted the trust fund programs; it exempted areas where legislation might be required to make savings, such as hospital cost containment; it took into account savings that had already been cranked in to the President's budget; and it contemplated no more than a 50-percent savings in most of the remaining areas. On top of all this, we cut the reduction by another $500 million in order to give the Secretary even more leeway. So I do not think we are asking for too much, and I do not think any of us need to hear any more whining from the Secretary about how difficult it is to make these savings.

Moving to some other items, the conference dropped the Miller amendment, which provided for a 2-percent across-the-board reduction and would have saved $397 million. This is becoming a pattern. We adopt these percentage reductions on the floor and then watch our conferees give them up without a fight in conference. If corresponding reductions were made in the line items, there might be justification for dropping the across-the-board provision, but in this case there clearly was no such justification.

I was likewise disappointed in our performance as conferees regarding the Walker amendment, which would have prohibited the application of ratios, quotas, or other numerical requirements. This was eagerly dropped, as was a milder Senate version. One would think that the conferees of both bodies at least owe it to their members to try and work out a compromise, but such was not the case.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. Yes, I am happy to yield to the author of that amendment.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I think it is perhaps well to note at this point that the House, with the Walker amendment, passed strong antiquota legislation. At the same time, the Senate also passed antiquota legislation or an antiquota amendment, which referred to higher education only.

In the course of the conference, both of those amendments got dropped. Does the gentleman believe that there is a shared opinion of both Houses at this point that there should be antiquota language in this bill?

Mr. MICHEL. Mr. Speaker, I will say to the gentleman that his language, as I pointed out earlier, was stronger. As I recall, the gentleman mentioned quotas, racial and numerical requirements, which was much more meaningful than this bland word "quota." And I would have preferred that. We were in the parliamentary situation, however, where the sequence in which those amendments were considered, the gentleman's amendment came first in the bill. When the House backed away from that position, lo and behold the Senate conferees, simply receded from their own position on the amendment with the milder language. As a result there is no expression from either House or Senate in this conference report on the subject of quotas. Unfortunately as House conferees we could not tell the other body what they should be doing with their own amendment. So we were caught in that parliamentary device or squeeze, which now leaves us without an amendment at all.

Mr. WALKER. If the gentleman will yield further, I think it is important to note that both Houses did pass antiquota language.

Mr. MICHEL. Yes.

Mr. WALKER. And we end up with a bill with no antiquota language in it. I realize parliamentary maneuvering that went on, but it seems that the will of both Houses was lost with regard to quota language.

Mr. MICHEL. Yes.

Mr. WALKER. I would say further to the gentleman that I hope I might have the opportunity to offer a recommittal motion that will give the House again an opportunity to go on record in favor of the weaker Senate language but, nevertheless, in favor of the antiquota language in this conference report.

Mr. MICHEL. Of course, that would be the gentleman's prerogative if he is recognized for that purpose. If it were a disagreeing amendment, of course, after the adoption of the conference report, the gentleman could very well make his case on a disagreeing amendment. But without that kind of a device in the parliamentary procedure, the gentleman would, of course, be within his rights to make that motion on the recommittal of the conference report with instructions.

Mr. WALKER. Mr. Speaker, I thank the gentleman.

Mr. MICHEL. Mr. Speaker, as I alluded to earlier, we settled on a figure of $2.6 billion for basic educational opportunity grants. This represents an increase of $460 million over the current level, but is $530 million short of what the President proposed as part of his middle income student assistance proposal. In other words, what we did was to go half way in the President's direction, in the expectation that the tax credit will ultimately be enacted into law, since it apparently will end up as part of the overall tax bill.

I think this represents a reasonable compromise, and will enable us to achieve the goal of assisting middle income families without busting the budget.

In the other student assistance programs, the conference report provides $550 million for work-study, $340 million for supplemental grants, $310 million for direct loans, and $76,750,000 for State scholarship incentive grants. All told, the Report provides a total of $3,922,650,000 for student assistance, a 21-percent increase over last year.

Another significant action the conferees took was to cut the Impact Aid program. I never thought I would see

the day, but we actually cut this program some $40.3 million below the budget request. The Senate bill contained a $57.3 million reduction, and while I would have preferred that figure, we at least went two-thirds of the way in that direction. The conference action provides the regular increase for category "A" children, but would keep category "B" allocations at last year's level. This represents a reasonable approach toward bringing this program under control, and I hope we can, at the very least, continue in this direction in future years.

In running down some of the other areas considered in conference, we added 200 industrial hygienist inspectors and support staff for OSHA, all over the budget and the House bill. I felt this increase was excessive, particularly since we added 100 just last year, and in view of the fact that to date, they have not even filled 69 of these positions.

The conferees accepted the Senate-passed Dole amendment which prohibits OSHA from assessing civil penalties for nonserious violations by an employer of 10 or fewer employees if the employer is making a good faith effort to eliminate a hazard found by a consultant.

The conference report retains the House language allowing OSHA to inspect any farm, regardless of size, where there is a temporary labor camp, but does contain language calling on the Secretary of Labor to place primary emphasis on farms with 10 or more employees.

The conferees accepted 80 percent of the Senate increase for Public Health Service hospitals, an amount which I felt was too high, particularly in view of reports that these hospitals are performing, at taxpayer expense, facelifts, breast changes, and other cosmetic surgery.

For NIH, we agreed on a total of $2,998,226,000, an increase of $46 million over the House and only $26 million under the Senate. The amount represents an increase of $351 million over the budget. The major increases over the House version include $28 million for cancer, $16 million for the Neurological Institute, and $6 million for the Institute of General Medical Sciences.

The report contains $144 million for health professions capitation grants, an increase of $57 million over the budget. The administration had sought to scale this program back, on the grounds that it was doing little to solve the maldistribution problem, and the Senate sought to go part way in this regard, but the conferees restored the figure to last year's level.

We have reduced funding for medicaid by $261 million below the budget, based on revised estimates. We have also included report language expressing concern over the length of time some States are taking in submitting their medicaid claims, and calling for a report from HEW on the possible impact of a time limitation. The Senate bill had such a limitation, and we ended up substituting this report language in its place, basically because some States expressed concern over a precipitous action in this regard. The States ought to be put on notice, however, that a limitation will likely be forthcoming if they do not start shaping up their administrative practices.

The Senate bill was $189 million below the House version for the ESEA title I program, but the Senate caved in without a fight and the conference settled on the higher House figure. The final amount is $100 million above the budget and $343 million above last year. Needless to say, these increases are excessive for a program that hasn't proven itself.

As with title I, the Senate conferees totally gave in on their $6.5 million reduction in the bilingual education program. The result is a $15 million increase in a program which evaluations have shown is not doing the job.

The conference report contains a $14,350,000 increase over the House bill for the emergency school aid program.

For vocational education, the increase is $8.4 million over the House bill. Of note here, we increased grants to States by $25.5 million over the House bill and $44.5 million over last year. This is offset by a $19.5 million reduction in programs of national significance. I want to make special reference to this latter item, because Congressman WYLIE has expressed concern over continued funding for the National Center for Research and Vocational Education, located at Ohio State University, and he is stuck up in an airplane returning from his district at this moment. The intent of the conferees was to continue funding for this center and the State occupational information coordinating committees, which together are currently being funded at about the $10 million level we provide in the report for this account. It is my understanding that the Office of Education worked long and hard to establish this center, and is strongly supportive of it. I would thus expect OE to willingly continue funding for it at the current level, and that certainly is the intent of the conferees.

I will be happy to yield to the chairman to ask if that was his understanding.

Mr. FLOOD. Yes; I think the gentleman has stated the situation very well. That certainly is my opinion and that of the conferees certainly on the House side.

Mr. MICHEL. I thank the distinguished chairman for his comment.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I want to concur with the gentleman from Illinois on this issue, because Congressman WYLIE had given me an amendment, if the gentleman recalls, to offer at the conference. The conference was closed at that point on amendments already resolved. The only things we were discussing were the three items in controversy, but I was assured by Members of the Senate also that HEW liked this program so much that maybe half of that fund would be used for the National Center at Ohio State.

Mr. MICHEL. As it was originally conceived, it was a 5-year plan. Three years have now been completed, and I think Mr. WYLIE's concern was where we have this much of an investment, and then wipe it out without an appropriate adjustment, I think he is certainly on good grounds in making the arguments he did.

One last item which should be mentioned is the number of positions funded in this bill. All told, excluding the unauthorized areas, we are providing 156,336 positions for the bureaucracy, an increase of 4,461 over last year and 1,631 over the President's budget. This includes an increase of 500 over the budget in the Public Health Service alone.

At a time when we are supposedly seeking to restrict the growth of the Federal bureaucracy, these personnel increases certainly do not represent a very good faith effort in this direction.

All in all, though, the pluses in this conference report probably outweigh the minuses, albeit by a small margin, and I thus urge its adoption.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield 3 minutes to my friend from Maryland (Mr. BAUMAN.).

Mr. BAUMAN. Mr. Speaker, I take this time only to apprise the membership of the situation in which we find ourselves from the point of view of those of us who strongly support the right to life. Of course, the first vote will occur on the conference report itself, and eventually we will reach the amendment that has been reported back in disagreement by both bodies regarding abortion.

The gentleman from Pennsylvania (Mr. FLOOD), the distinguished chairman of the subcommittee, to his great credit as a stalwart in this battle has again announced his intention to offer a motion to insist on the House position. But, what may occur first because of the parliamentary situation is the offering of a motion to recede and concur with an amendment which would continue present language regarding federally financed abortions, language that has been in effect since last December. That would come, Mr. Speaker, on a motion to recede and concur with that amendment. This language has already been adopted once by the House this year in the continuing resolution that is already in the other body and has not been acted upon.

It would be my intention or the intention of the gentleman from Illinois (Mr. HYDE)—who has been delayed flying in from Chicago this morning—to ask that the question be divided. So, we would be voting first on a motion to recede from the strong House position earlier endorsed by a rollcall vote several months ago, and I would hope that all Members would vote against that motion to recede.

That would place the two Houses in a position of having either to go back to conference and resolve the difference in some form or having the leadership I assume make the decision to go to the continuing resolution, as I said, that is now pending in the other body and allow that to pass. That would provide for funding at the conference levels. It would also continue last year's antiabortion language.

But, for those who feel strongly on the issue of life. I do not believe the House should recede to the other body in this matter, and I offer this explanation for the Members.

Mr. MICHEL. I have no further requests for time. Mr. Speaker.

Mr. FLOOD. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I take this time to engage the chairman of the Labor-HEW Appropriations Committee in a colloquy. I would like to direct a question to the chairman, but first I would like to commend the distinguished chairman of the Labor-HEW Appropriations Subcommittee and the other House conferees for fighting so vigorously to retain in this bill the full amount to fund the Middle Income Student Assistance Act. I am, of course, disappointed that the full House allowance for the basic grant program could not be preserved in conference. I understand that the major reasons for the insistence on a lower amount by the conferees from the other body were uncertainty over whether tuition tax credits will be enacted into law as well as uncertainty over the exact amount of basic grant funds that will be available to be carried over next year. I would hope that the subcommittee chairman would support a supplemental appropriation for the basic grant program early in the next Congress when these uncertainties are resolved. I would note that James McIntyre, the Director of the Office of Management and Budget, supported such a supplemental in his letter of October 2 to Senator MAGNUSON. I would also note that a supplemental would have to be enacted prior to March 15 in order for the additional funds to be available for grants to students in the 1979–80 academic year. Would the chairman be willing to support such a supplemental early in the next Congress?

Mr. FLOOD. Yes, I would say to my friend. I can assure the gentleman from Michigan that I would support such a supplemental within the time frame which he outlined.

Mr. FORD of Michigan. I thank the gentleman from Pennsylvania for his response.

Mr. Speaker, under permission granted, I include in my remarks at this point a letter addressed to me as chairman of the Subcommittee on Postsecondary Education, by the Under Secretary of Health, Education, and Welfare, Hale Champion, dated October 11, which describes the time frame for providing the necessary work for the student assistance programs prior to the March 15 date we have adverted to here:

THE UNDER SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., October 11, 1978.

Hon. WILLIAM D. FORD,
Chairman, Subcommittee on Postsecondary Education, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am pleased to respond to your request concerning the timing of a supplemental appropriation for FY 79 for the Basic Educational Opportunity Grant Program.

As you know, the Basic Grant Program is designed to be the foundation of student assistance on which aid packages are developed for individual students. As a result, the notification of the Basic Grant award levels must be closely coordinated with the award cycle of other student assistance programs and with institutional packaging calendars.

It is anticipated that the student application processing system will begin in January of 1979. Therefore, students will begin to receive their notices of eligibility in February. At the same time, we expect to notify institutions of their funding allocations under the Campus-Based Programs in early March so that the student award and decision process can begin during the middle of March.

The timetable would require that the Basic Grant Program provide the Schedule of Student Awards to institutions by mid-March at the latest. If it is decided that student award levels for FY 79 be increased through a supplemental appropriation, action on this supplemental would need to be completed by mid-March at the latest.

Sincerely yours,

HALE CHAMPION.

Mr. EARLY. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to my friend, the gentleman from Massachusetts.

Mr. EARLY. Mr. Speaker, I would just like briefly to take this opportunity to explain why I did not sign this conference report. I think it was a compromise effort on behalf of both the House and the Senate, but in the conference committee there were several particular programs I disagreed with. That is to be expected. The reason I did not sign the report was because of what I consider to be an irresponsible fiscal approach to Government embodied in the amendment 102, the Michel amendment.

I want to make it crystal clear that I think the amendment filed by the gentleman from Illinois was offered in good faith, but I think it is the most dangerous thing we can do in a budgetary process—that type of cut plus the across-the-board cut. What we have done Mr. Speaker, is take this $56 billion bill and suggest that we reduce it by $1 billion in 6 particular categories on account of the Inspector General's report which suggested that there was $7 billion of waste, abuse, and fraud implemented last year.

I claim that you cannot cut an item you do not appropriate moneys for, and we are suggesting that we appropriate $1 billion for waste, abuse and fraud. I think that is irresponsible.

In the six programs the gentleman from Illinois (Mr. MICHEL) suggests a $1 billion reduction. What we must watch is what is going to happen.

As I suggested, the gentleman from Illinois (Mr. MICHEL) offered his amendment in good faith, and it appeared in our bill as being a $1 billion reduction. When it went to the other body they immediately jumped on it, and in a floor amendment reduced that $1 billion to $2 billion. There would have been nothing to prevent them from reducing it to $3, $4, or $5 billion.

I think we are sending out the wrong signal. I think we have a responsibility to cut funds in each specific program. What we are saying to the American public today is that we have a bill of $56 billion with an additional $17 billion authorized but not acted upon. We are saying to them that it is only $56 billion; that we cut via the Michel amendment, $1 billion. But if we look at the bill it identifies the six programs that were cited in the Inspector General's report, where Mr. MICHEL wants the $1 billion reduction. But what we have done with the six programs, in this bill, is to increase every single one of them. We have increased them to the tune of $2,900 million.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. EARLY. I yield to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, the case the gentleman from Massachusetts (Mr. EARLY) makes in his own behalf is well taken. I understand what he is saying. But the crux of our problem here is that all of these are entitlement programs. Unfortunately there is so little oversight on these so-called entitlement programs that we never really get a shot at correcting a bad situation until after the fact. We continue to blindly appropriate for these entitlement programs because there is so little oversight.

Then we find out a year later the moneys have been misspent and we have to make some attempt to correct a bad situation. I am getting sick and tired of having to take all the criticism when we have no control over the situation. We have got to take some drastic action and I submit this is a step in the right direction.

This is the first time, to my knowledge, that we have directed a Secretary of HEW to address himself specifically to waste, fraud, and abuse. I share the frustration of the gentleman from Massachusetts (Mr. EARLY) because when you are dealing with these programs including multi-billions of dollars, there is bound to be some fraud, waste, and abuse and we just have to do our best to try and correct it and keep it to a minimum.

Mr. EARLY. The gentleman believes what he has just said but he has been frustrated over the years by not being able to reduce this bill when both of us know we could reduce it and not cut back on the services to the poor whatsoever. But what we are doing here, by letting this happen on the appropriations bill, is establishing a precedent.

Mr. Speaker, although I did not sign the conference report, I want to commend my colleagues on the conference committee for an outstanding joint effort. I did not sign this report because of the amendment 102, the Michel amendment, which I consider to be an irresponsible fiscal approach to Government. The Michel amendment, offered in the best of faith and with the best intentions, is a dangerous precedent for the congressional budget process. What Congress is doing, Mr. Speaker, is taking a $56 billion appropriations bill and reducing it by 1 billion in six particular programs identified by the Inspector General in his annual report of March 31, 1978. This amounts to an admission that the Labor/HEW Appropriations Committee has indeed appropriated $1 billion for waste, fraud, and abuse, and now is attempting to rescind that appropriation.

I would like to cite each of these programs identified by the Inspector General and bring to your attention what the conference committee has recommended for fiscal year 1979 appropriations in these areas. For medicaid we

have appropriated an additional $560 million over the fiscal year 1978 level.

For medicare the bill provides an increase of $518 million in payments to the health care trust funds for benefits not financed by normal payroll or premium contributions. We have increased the supplemental security income program by $308 million over the amount of funds provided in fiscal year 1978.

These funds are used to pay cash benefits to aged, blind, and disabled persons with little or no income. Benefits are adjusted automatically to reflect changes in the cost of living. For the assistance payments program, the bill provides an increase of $308 million over the fiscal year 1978 level.

This higher cost is due to increases in the individual welfare benefit payment levels which are expected to average about 4.5 percent.

For the grants to State for social services program the bill provides $269.4 million more than was available in fiscal year 1978. In addition, for student financial assistance, the conference committee has increased appropriations over fiscal year 1978 by $668.147 million.

Finally, for title I of the Elementary and Secondary Education Act, there is an increase of $342.132 million over the 1978 level of funding. The total increase over fiscal year 1978 appropriations for these six areas amounts to a staggering $2.974 billion.

I believe that a much more responsible approach to this issue of waste, fraud, and abuse is to examine each specific account identified in the Inspector General's report and attempt to achieve savings in each specific program. That is the most effective and fiscally responsible route to pursue. We hold months of hearings on this bill.

Each agency and bureau within the Department appears before the subcommittee and we appropriate for them based on the merits of their budget justifications. What we are doing by attempting to cut $1 billion from this bill, is admitting that we initially appropriated this billion dollars for waste, fraud, and abuse and now are attempting to rescind the appropriation. If cuts are to be made, they should be made in the specific line items during subcommittee consideration of this bill, and not as an across-the-board cut.

I want to emphasize that Mr. MICHEL offered his amendment with fiscal responsibility in mind and in response to the mismanagement of funds which HEW has admitted to. However, as a member of this subcommittee I have an obligation to my constituency and to the general public to be fiscally responsible and accountable. We are telling the public that this bill is only $56 billion because we cut $1 billion because of waste, fraud, and abuse in HEW programs. I suggest that the proper way to achieve savings in this bill is to identify the sources of waste, fraud, and abuse in each account and then to appropriate individually based on the savings which can be achieved.

For these reasons I oppose the Michel amendment to this bill.

Mr. FLOOD. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the conference report?

Mr. WALKER. Yes; I am, Mr. Speaker, in its present form.

The Clerk read as follows:

Motion to recommit offered by Mr. WALKER: Mr. WALKER moves to recommit the conference report on H.R. 12929 to the committee of conference with the following instructions to the managers on the part of the House:

That the House recede from its disagreement to the amendment of the Senate numbered 110; and concur therein.

● Mr. MOTTL. Mr. Speaker, one of the fine new educational programs now in operation is the National Center for Research in Vocational Education, located at Ohio State University.

During its short tenure, this new program, under the direction of Dr. Robert E. Taylor, has made tremendous forward strides in the field of vocational education. The National Center has furthermore done an excellent job in disbursing its findings across the country.

For the National Center to continue its fine work in this vital field of vocational education, it must be the recipient of $5.5 million of the $10 million agreed upon by conferees on the Labor-HEW appropriation legislation for programs of national significance.

It was clearly the intent of both House and Senate conferees that this fine program continue to operate at Ohio State University. It is incumbent upon this Congress that that intent be carried out to the fullest.●

The SPEAKER pro tempore (Mr. VANIK). Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 187, nays 200, not voting 43, as follows:

[Roll No. 892]

Ford, Tenn.	Pease	

The Clerk announced the following pairs:

On this vote:

Mr. Broyhill for, with Mr. White against.

Mr. Cochran of Mississippi for, with Mr. Ammerman against.

Mr. Hyde for, with Mr. Rahall against.

Mr. Sawyer for, with Mr. Sarasin against.

Mr. Crane for, with Mr. Brown of Michigan against.

Until further notice:

Mr. Teague with Mrs. Pettis.

Mr. Shipley with Mr. Caputo.

Mrs. Burke of California with Mr. Quie.

Mr. Krueger with Mr. Stockman.

Mr. Gonzalez with Mr. Ford of Tennessee.

Mr. Evans of Georgia with Mr. Harrington.

Mr. Sisk with Mr. Heftel.

Mr. Hefner with Mr. Tsongas.

Mr. Whitley with Mr. Ireland.

Mr. Jacobs with Mr. Moss.

Ms. Keys with Ms. Oakar.

Mr. Pease with Mr. Lundine.

Mr. Conyers with Mr. Blouin.

Mr. Fithian with Mr. Cavanaugh.

Mr. Le Fante with Mr. Diggs.

Mr. Cornwell with Mr. Mathis.

Messrs. DORNAN, JONES of North Carolina, BURGENER, SIKES, HUCKABY, PREYER, LONG of Louisiana, WINN, YOUNG of Texas, CARTER, BUCHANAN, WOLFF, BURKE of Florida, and MURPHY of New York changed their vote from "nay" to "yea."

Mrs. SCHROEDER, Mr. ECKHARDT, Mr. BURKE of Massachusetts, and Mr. LEDERER changed their vote from "yea" to "nay."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So the conference report was agreed to.

CONFERENCE REPORT ON H.R. 10173, VETERANS' AND SURVIVORS' PENSION IMPROVEMENT ACT OF 1978

Mr. MONTGOMERY submitted the following conference report and statement on the bill (H.R. 10173) to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–1768)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10173) to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Veterans' and Survivors' Pension Improvement Act of 1978".

TITLE I—PENSION FOR VETERANS AND SURVIVORS

DEFINITION OF "PERIOD OF WAR"

SEC. 101. Section 501 of title 38, United States Code, is amended by adding at the end thereof the following new paragraph:

"(4) The term 'period of war' means the Mexican border period, World War I, World War II, the Korean conflict, the Vietnam era, and the period beginning on the date of any future declaration of war by the Congress and ending on the date prescribed by Presidential proclamation or concurrent resolution of the Congress.".

INCOME EXCLUSIONS

SEC. 102. (a) Subsection (a) of section 503 of title 38, United States Code, is amended by—

(1) striking out clause (1);

(2) redesignating clause (2) as clause (1);

(3) redesignating clause (3) as clause (2) and striking out the comma and "and chapters 11 and 13 (except section 412(a)) of this title" in such clause;

(4) striking out clauses (4), (5), and (6);

(5) redesignating clause (7) as clause (3);

(6) inserting after such clause the following new clause:

"(4) amounts equal to amounts paid—

"(A) by a veteran for the last illness and burial of such veteran's deceased spouse or child, or

"(B) by the spouse of a living veteran or the surviving spouse of a deceased veteran for the last illness and burial of a child of such veteran;";

(7) redesignating clause (8) as clause (5);

(8) striking out clause (9);

(9) redesignating clause (10) as clause (6);

(10) striking out clauses (11), (12), (13) and (14);

(11) redesignating clause (15) as clause (7);

(12) striking out clauses (16) and (17); and

(13) adding at the end of such subsection the following new clauses:

"(8) amounts equal to amounts paid by a veteran, veterans' spouse, or surviving spouse or by or on behalf of a veteran's child for unreimbursed medical expenses, to the extent that such amounts exceed 5 per centum of the maximum annual rate of pension (including any amount of increased pension payable on account of family members but not including any amount of pension payable because a person is in need of regular aid and attendance or because a person is permanently housebound) payable to such veteran, surviving spouse, or child;

"(9) in the case of a veteran or surviving spouse pursuing a course of education or vocational rehabilitation or training, amounts equal to amounts paid by such veteran or surviving spouse for such course of education or vocational rehabilitation or training, including (A) amounts paid for tuition, fees, books, and materials, and (3) in the case of such a veteran or surviving spouse in need of regular aid and attendance, unreimbursed amounts paid for unusual transportation expenses in connection with the pursuit of such course of education or vocational rehabilitation or training, to the extent that such amounts exceed the reasonable expenses which would have been incurred by a nondisabled person using an appropriate means of transportation (public transportation, if reasonably available); and

"(10) in the case of a child, any current-work income received during the year, to the extent that the total amount of such income does not exceed an amount equal to the sum of—

"(A) the lowest amount of gross income for which an income tax return is required under section 6012(a) of the Internal Revenue Code of 1954, to be filed by an individual who is not married (as determined under section 143 of such Code), is not a surviving spouse (as defined in section 2(a) of such Code), and is not a head of household (as defined in section 2(b) of such Code); and

"(B) if the child is pursuing a course of postsecondary education or vocational rehabilitation or training, the amount paid by such child for such course of education or vocational rehabilitation or training, including the amount paid for tuition, fees, books, and materials.".

(b) Subsection (c) of such section is repealed.

INCOME AND NET WORTH REPORTS

SEC. 103. Subsection (a) of section 506 of title 38, United States Code, is amended to read as follows:

"(a) As a condition of granting or continuing pension under section 521, 541, or 542 of this title, the Administrator—

"(1) may require from any person who is an applicant for a recipient of pension such information, proofs, and evidence as the Administrator determines to be necessary in order to determine the annual income and the value of the corpus of the estate of such person, and of any spouse or child for whom the person is receiving or is to receive increased pension (such a child is hereinafter in this subsection referred to as a 'dependent child') and, in the case of a child applying for or in receipt of pension under section 542 of this title (hereinafter in this subsection referred to as a 'surviving child'), of any person with whom such child is residing who is legally responsible for such child's support;

"(2) shall require that any such applicant or recipient file each year with the Veterans' Administration (on such form as may be prescribed for such purpose by the Administrator) a report showing—

"(A) the annual income which such applicant or recipient (and any such spouse or dependent child) received during the preceding year, the corpus of the estate of such applicant or recipient (and of any such spouse or dependent child) at the end of such year, and in the case of a surviving child, the income and corpus of the estate of any person with whom such child is resid-

ing who is legally responsible for such child's support;

"(B) such applicant's or recipient's estimate for the then current year of the annual income such applicant or recipient (and any such spouse or dependent child) expects to receive and of any expected increase in the value of the corpus of the estate of such applicant or recipient (and for any such spouse or dependent child); and

"(C) in the case of a surviving child, an estimate for the then current year of the annual income of any person with whom such child is residing who is legally responsible for such child's support and of any expected increase in the value of the corpus of the estate of such person;

"(3) shall require that any such applicant or recipient promptly file a revised report whenever there is a material change in the estimated annual income of such applicant or recipient (or of any such spouse or dependent child) or a material change in such applicant's or recipient's estimate of the value of the corpus of the estate of such applicant or recipient (or of any such spouse or dependent child), and in the case of a surviving child, a material change in the estimated annual income or value of the corpus of the estate of any person with whom such child is residing who is legally responsible for such child's support; and

"(4) shall require that any such applicant or recipient applying for or in receipt of increased pension on account of a person who is a spouse or child of such applicant or recipient promptly notify the Administrator if such person ceases to meet the applicable definition of spouse or child.".

FREQUENCY OF PAYMENT OF PENSION BENEFITS

SEC. 104. (a) Chapter 15 of title 38, United States Code, is amended by inserting after section 507 the following new section:

"§ 528. Frequency of payment of pension benefits

"(a) Except as provided under subsection (b) of this section, benefits under sections 521, 541, and 542 of this title shall be paid monthly.

"(b) Under regulations which the Administrator shall prescribe, benefits under sections 521, 541, and 542 of this title may be paid less frequently than monthly if the amount of the annual benefit is less than 4 per centum of the maximum annual rate payable to a veteran under section 521(b) of this title.".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 507 a new item as follows:

"508. Frequency of payment of pension benefits.".

PENSION FOR SPANISH-AMERICAN WAR VETERANS

SEC. 105. Paragraph (3) of section 512(a) of title 38, United States Code, is amended—

(1) in subparagraph (A)—

(A) by inserting "(except the rate provided under subsection (g) of such section)" after "of this title";

(B) by striking out "World War I" and inserting in lieu thereof "a period of war"; and

(C) by striking out the comma and "except as provided in subparagraph (B)" in the second sentence of such subparagraph; and

(2) in subparagraph (B), by striking out "if such veteran" and all that follows in the first sentence and inserting in lieu thereof a comma and "as in effect on December 31, 1978, under regulations which the Administrator shall prescribe.".

PENSION OF VETERANS OF A PERIOD OF WAR

SEC. 106. (a) Section 521 of title 38, United States Code, is amended to read as follows:

"§ 521. Veterans of a period of war

"(a) The Administrator shall pay to each veteran of a period of war who meets the service requirements of this section (as prescribed in subsection (j) of this section) and who is permanently and totally disabled from non-service-connected disability not the result of the veteran's willful misconduct, pension at the rate prescribed by this section, as increased from time to time under section 3112 of this title.

"(b) If the veteran is unmarried (or married but not living with or reasonably contributing to the support of such veteran's spouse) and there is no child of the veteran in the custody of the veteran or to whose support the veteran is reasonably contributing, and unless the veteran is entitled to pension at the rate provided by subsection (d) (1) or (e) of this section, pension shall be paid to the veteran at the annual rate of $3,550, reduced by the amount of the veteran's annual income.

"(c) If the veteran is married and living with or reasonably contributing to the support of such veteran's spouse, or if there is a child of the veteran in the custody of the veteran or to whose support the veteran is reasonably contributing, pension shall be paid to the veteran at the annual rate of $4,651, unless the veteran is entitled to pension at the rate provided by subsection (d)(2), (e), or (f) of this section. If the veteran has two or more such family members, such annual rate shall be increased by $600 for each such family member in excess of one. The rate payable shall be reduced by the amount of the veteran's annual income and, subject to subsection (h)(1) of this section, the amount of annual income of such family members.

"(d)(1) If the veteran is in need of regular aid and attendance, the annual rate of pension payable to the veteran under subsection (b) of this section shall be $5,680. reduced by the amount of the veteran's annual income.

"(2) If the veteran is in need of regular aid and attendance, the annual rate of pension payable to the veteran under subsection (c) of this section shall be $6,781. If such veteran has two or more family members, as described in subsection (c) of this section, the annual rate of pension shall be increased by $600 for each such family member in excess of one. The rate payable shall be reduced by the amount of the veteran's annual income and, subject to subsection (h)(1) of this section, the amount of annual income of such family members.

"(e) If the veteran has a disability rated as permanent and total and (1) has additional disability or disabilities independently ratable at 60 per centum or more, or (2) by reason of a disability or disabilities, is permanently housebound but does not qualify for pension at the aid and attendance rate provided by subsection (d) of this section. the annual rate of pension payable to the veteran under subsection (b) of this section shall be $4,340 and the annual rate of pension payable to the veteran under subsection (c) of this section shall be $5,441. If such veteran has two or more family members, as described in subsection (c) of this section, the annual rate of pension shall be increased by $600 for each such family member in excess of one. The rate payable shall be reduced by the amount of the veteran's annual income and, subject to subsection (h)(1) of this section, the annual income of such family members.

"(f)(1) If two veterans are married to one another and each meets the disability and service requirements prescribed in subsections (a) and (j), respectively, of this section, the annual rate of pension payable to such veterans shall be a combined annual rate of $4,651.

"(2) If either such veteran is in need of regular aid and attendance, the annual rate provided by paragraph (1) of this subsection shall be $6,781. If both such veterans are in need of regular aid and attendance, such rate shall be $8,911.

"(3) If either such veteran would be entitled (if not married to a veteran) to pension at the rate provided by subsection (e) of this section, the annual rate provided by paragraph (1) of this subsection shall be $5,441. If both such veterans would be entitled (if not married to one another) to such rate, such rate shall be $6,231.

"(4) If one such veteran is in need of regular aid and attendance and the other would be entitled (if not married to a veteran) to the rate provided for under subsection (e) of this section, the annual rate provided by paragraph (1) of this subsection shall be $7,571.

"(5) The annual rate provided by paragraph (1), (2), (3), or (4) of this subsection, as appropriate, shall (A) be increased by $600 for each child of such veterans (or of either such veteran) who is in the custody of either or both such veterans or to whose support either such veteran is, or both such veterans are, reasonably contributing, and (B) be reduced by the amount of the annual income of both such veterans and, subject to subsection (h)(1) of this section, the annual income of each such child.

"(g) The annual rate of pension payable under subsection (b), (c), (d), (e), or (f) of this section to any veteran who is a veteran of a period of war shall be increased by $800 if veterans of such period of war were not provided educational benefits or home loan benefits similar to those provided to veterans of later periods of war under chapters 34 and 37, respectively, of this title or under prior corresponding provisions of law.

"(h) For the purposes of this section:

"(1) In determining the annual income of a veteran, if there is a child of the veteran who is in the custody of the veteran or to whose support the veteran is reasonably contributing, that portion of the annual income of the child that is reasonably available to or for the veteran shall be considered to be income of the veteran, unless in the judgment of the Administrator to do so would work a hardship on the veteran.

"(2) A veteran shall be considered as living with a spouse, even though they reside apart, unless they are estranged.

"(i) If the veteran is entitled under this section to pension on the basis of such veteran's own service and is also entitled to pension on the basis of any other person's service, the Administrator shall pay such veteran only the greater benefit.

"(j) A veteran meets the service requirements of this section if such veteran served in the active military, naval, or air service—

"(1) for ninety days or more during a period of war;

"(2) during a period of war and was discharged or released from such service for a service-connected disability;

"(3) for a period of ninety consecutive days or more and such period began or ended during a period of war; or

"(4) for an aggregate of ninety days or more in two or more separate periods of service during more than one period of war.".

(b) The item relating to section 521 in the table of sections at the beginning of chapter 15 of such title is amended to read as follows:

"521. Veterans of a period of war.".

VETERANS' NET WORTH LIMITATION

SEC. 107. Section 522 of title 38, United States Code, is amended to read as follows:

"§ 522. Net worth limitation

"(a) The Administrator shall deny or discontinue the payment of pensions to a veteran under section 521 of this title when the corpus of the estate of the veteran or, if the veteran has a spouse, the corpus of the estates of the veteran and of the veteran's spouse is such that under all the circum-

stances, including consideration of the annual income of the veteran, the veteran's spouse, and the veteran's children, it is reasonable that some part of the corpus of such estates be consumed for the veteran's maintenance.

"(b) The Administrator shall deny or discontinue the payment of increased pension under subsection (c), (d), (e), or (f) of section 521 of this title on account of a child when the corpus of such child's estate is such that under all the circumstances, including consideration of the veteran's and spouse's income, and the income of the veteran's children, it is reasonable that some part of the corpus of such child's estate be consumed for the child's maintenance. During the period such denial or discontinuance remains in effect, such child shall not be considered as the veteran's child for purposes of this chapter.".

PENSION FOR SURVIVING SPOUSES OF SPANISH-AMERICAN WAR VETERANS

SEC. 108. Subsection (d) of section 536 of title 38, United States Code, is amended—

(1) in paragraph (1)—

(A) by striking out "World War I" and inserting in lieu thereof "a period of war"; and

(B) by striking out the comma and "except as provided in paragraph (2)" in the second sentence of such paragraph; and

(2) in paragraph (2)—

(A) by inserting a comma and "as in effect on December 31, 1978" after "of this title" both places it appears; and

(B) by inserting a comma and "as in effect on such date" after "such selection 544".

PENSION FOR SURVIVING SPOUSES OF VETERANS OF A PERIOD OF WAR

SEC. 109. (a) Section 541 of title 38, United States Code, is amended to read as follows:

"§ 541. Surviving spouses of veterans of a period of war

"(a) The Administrator shall pay to the surviving spouse of each veteran of a period of war who met the service requirements prescribed in section 521(j) of this title, or who at the time of death was receiving (or entitled to receive) compensation or retirement pay for a service-connected disability, pension at the rate prescribed by this section, as increased from time to time under section 3112 of this title.

"(b) If no child of the veteran is in the custody of the surviving spouse, pension shall be paid to the surviving spouse at the annual rate of $2,379, reduced by the amount of the surviving spouse's annual income.

"(c) If there is a child of the veteran in the custody of the surviving spouse, pension shall be paid to the surviving spouse at the annual rate of $3,116. If the surviving spouse has custody of two or more such children, the annual pension rate shall be increased by $600 for each such child in excess of one. In each case, the rate payable shall be reduced by the amount of the surviving spouse's annual income and, subject to subsection (g) of this section, the annual income of each such child.

"(d)(1) If a surviving spouse who is entitled to pension under subsection (b) of this section is in need of regular aid and attendance, the annual rate of pension payable to such surviving spouse shall be $3,806, reduced by the amount of the surviving spouse's annual income.

"(2) If a surviving spouse who is entitled to pension under subsection (c) of this section is in need of regular aid and attendance, the annual rate of pension payable to the surviving spouse shall be $4,543. If there are two or more children of the veteran in such surviving spouse's custody, the annual rate of pension shall be increased by $600 for each such child in excess of one. The rate payable shall be reduced by the amount of the surviving spouse's annual income and, subject to subsection (g) of this section, the annual income of each such child.

"(e)(1) If the surviving spouse is permanently housebound but does not qualify for pension at the aid and attendance rate provided by subsection (d) of this section, the annual rate of pension payable to such surviving spouse under subsection (b) of this section shall be $2,908 and the annual rate of pension payable to such surviving spouse under subsection (c) of this section shall be $3,645. If there are two or more children of the veteran in such surviving spouse's custody, the annual rate of pension shall be increased by $600 for each such child in excess of one. The rate payable shall be reduced by the amount of the surviving spouse's annual income and, subject to subsection (g) of this section, the income of any child of the veteran for whom the surviving spouse is receiving increased pension.

"(2) For purposes of paragraph (1) of this subsection, the requirement of 'permanently housebound' shall be met when the surviving spouse is substantially confined to such surviving spouse's house (ward or clinical areas, if institutionalized) or immediate premises by reason of a disability or disabilities reasonably certain to remain throughout such surviving spouse's lifetime.

"(f) No pension shall be paid under this section to a surviving spouse of a veteran unless the spouse was married to the veteran—

"(1) before (A) December 14, 1944, in the case of a surviving spouse of a Mexican border period or World War I veteran, (B) January 1, 1957, in the case of a surviving spouse of a World War II veteran, (C) February 1, 1965, in the case of a surviving spouse of a Korean conflict veteran, or (D) May 8, 1985, in the case of a surviving spouse of a Vietnam era veteran;

"(2) for one year or more; or

"(3) for any period of time if a child was born of the marriage, or was born to them before the marriage.

"(g) In determining the annual income of a surviving spouse for the purposes of this section, if there is a child of the veteran in the custody of the surviving spouse, that portion of the annual income of the child that is reasonably available to or for the surviving spouse shall be considered to be income of the surviving spouse, unless in the judgment of the Administrator to do so would work a hardship on the surviving spouse.

"(h) As used in this section and section 542 of this title, the term 'veteran' includes a person who has completed at least two years of honorable active military, naval, or air service, as certified by the Secretary concerned, but whose death in such service was not in line of duty.".

(b) The item relating to section 541 in the table of sections at the beginning of chapter 15 of such title is amended to read as follows:

"541. Surviving spouses of veterans of a period of war.".

PENSION FOR CHILDREN OF VETERANS OF A PERIOD OF WAR

SEC. 110. (a) Section 542 of title 38, United States Code, is amended to read as follows:

"§ 542. Children of veterans of a period of war

"The Administrator shall pay to each child (1) who is the child of a deceased veteran of a period of war who met the service requirements prescribed in section 521(j) of this title, or who at the time of death was receiving (or entitled to receive) compensation or retirement pay for a service-connected disability, and (2) who is not in the custody of a surviving spouse eligible for pension under section 541 of this title, pension at the annual rate of $600, as increased from time to time under section 3112 of this title and reduced by the amount of such child's annual income; or, if such child is residing with a person who is legally responsible for such child's support, at an annual rate equal to the amount by which the appropriate annual rate provided under section 541(c) of this title exceeds the sum of the annual income of such child and such person, but in no event may such annual rate of pension exceed the amount by which $600, as increased from time to time under section 3112 of this title, exceeds the annual income of such child. The appropriate annual rate under such section 541(c) for the purposes of the preceding sentence shall be determined in accordance with regulations which the Administrator shall prescribe.".

(b) The item relating to section 542 in the table of sections at the beginning of chapter 15 of such title is amended to read as follows:

"542. Children of veterans of a period of war.".

SURVIVORS' NET WORTH LIMITATION

SEC. 111. Section 543 of title 38, United States Code, is amended to read as follows:

"§ 543. Net worth limitation

"(a)(1) The Administrator shall deny or discontinue payment of pension to a surviving spouse under section 541 of this title when the corpus of the estate of the surviving spouse is such that under all the circumstances, including consideration of the income of the surviving spouse and the income of any child for whom the surviving spouse is receiving increased pension, it is reasonable that some part of the corpus of such estate be consumed for the surviving spouse's maintenance.

"(2) The Administrator shall deny or discontinue the payment of increased pension under subsection (c), (d), or (e) of section 541 of this title on account of a child when the corpus of such child's estate is such that under all the circumstances, including consideration of the income of the surviving spouse and such child and the income of any other child for whom the surviving spouse is receiving increased pension, it is reasonable that some part of the corpus of the child's estate be consumed for the child's maintenance. During the period such denial or discontinuance remains in effect, such child shall not be considered as the surviving spouse's child for purposes of this chapter.

"(b) The Administrator shall deny or discontinue payment of pension to a child under section 542 of this title when the corpus of the estate of the child is such that under all the circumstances, including consideration of the income of the child, the income of any person with whom such child is residing who is legally responsible for such child's support, and the corpus of the estate of such person, it is reasonable that some part of the corpus of such estates be consumed for the child's maintenance.".

CONFORMING AMENDMENT RELATING TO SURVIVING SPOUSES' PENSION

SEC. 112. (a)(1) Section 544 of title 38, United States Code, is repealed.

(2) Chapter 15 of such title is amended by striking out the heading below section 543 of such chapter.

(b) The table of sections at the beginning of chapter 15 of such title is amended by striking out the item below the item relating to section 543 and by striking out the item relating to section 544.

TITLE II—DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING PARENTS

DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING PARENTS

SEC. 201. (a)(1) Paragraph (1) of subsection (b) of section 415 of title 38, United States Code, is amended to read as follows:

"(1) Except as provided in paragraph (4)

of this subsection, if there is only one parent, the monthly rate of dependency and indemnity compensation paid to such parent shall be $163, as increased from time to time under section 3112(b)(1) of this title and reduced by an amount, based upon the amount of such parent's annual income, determined in accordance with regulations which the Administrator shall prescribe under section 3112(b)(2) of this title.".

(2) Paragraph (3) of such subsection is amended by striking out "$3,770" and inserting in lieu thereof "$4,038" as increased from time to time under section 3112 of this title".

(3) The first sentence of paragraph (4) of such subsection is amended by striking out "the formula of paragraph (1) of this subsection or under the formula in subsection (d), whichever is the greater" and inserting in lieu thereof "paragraph (1) of this subsection or under subsection (d) of this section, whichever will result in the greater amount of such compensation being paid to such parent".

(b)(1) Paragraph (1) of subsection (c) of such section is amended to read as follows:

"(1) Except as provided in subsection (d) of this section, if there are two parents, but they are not living together, the monthly rate of dependency and indemnity compensation paid to each such parent shall be $115, as increased from time to time under section 3112(b)(1) of this title and reduced by an amount, based upon the amount of such parents' annual income, determined in accordance with regulations which the Administrator shall prescribe under section 3112(b)(2) of this title.".

(2) Paragraph (3) of such subsection is amended by striking out "$3,770" and inserting in lieu thereof "$4,038, as increased from time to time under section 3112 of this title"

(c)(1) Paragraph (1) of subsection (d) of such section is amended to read as follows:

"(1) If there are two parents who are living together, or if a parent has remarried and is living with such parent's spouse, the monthly rate of dependency and indemnity compensation paid to such parent shall be $109, as increased from time to time under section 3112(b)(1) of this title and reduced by an amount, based upon the amount of the combined annual income of the parents or the parent and the parent's spouse, determined in accordance with regulations which the Administrator shall prescribe under section 3112(b)(2) of this title.".

(2) Paragraph (3) of such subsection is amended by striking out "$5,070" and inserting in lieu thereof "$5,430, as increased from time to time under section 3112 of this title".

(d) Subsection (h) of such section is amended by striking out "$79" and inserting in lieu thereof "$85, as increased from time to time under section 3112 of this title,".

TITLE III—MISCELLANEOUS PROVISIONS AND CONFORMING AMENDMENTS

DEFINITION OF "PENSION"

SEC. 301. Paragraph (15) of section 101 of title 38, United States Code, is amended by inserting "or other periodic" after "monthly".

INCOME LIMITATION FOR RECEIPT OF DRUGS AND MEDICINES

SEC. 302. The second sentence of section 612(h) of title 38, United States Code, is amended by striking out "$500" and inserting in lieu thereof "$1,000".

EFFECTIVE DATES FOR CHANGES IN INCOME

SEC. 303. Clause (4) of section 3012(b) of title 38, United States Code, is amended to read as follows:

"(4) by reason of—

"(A) change in income shall (except as provided in section 3112 of this title) be the last day of the month in which the change occurred; and

"(B) change in corpus of estate shall be the last day of the calendar year in which the change occurred;".

CONFORMING AMENDMENT RELATING TO PROHIBITION ON CONCURRENT PENSIONS

SEC. 304. Paragraph (1) of section 3104(b) of title 38, United States Code, is amended by inserting "of this subsection and in section 521(i) of this title" after "(2) and (3)".

ANNUAL COST-OF-LIVING ADJUSTMENTS

SEC. 305. (a) Chapter 53 of title 38, United States Code, is amended by adding at the end thereof the following new section:

"§ 3112. Annual adjustment of certain benefit rates

"(a) Whenever there is an increase in benefit amounts payable under title II of the Social Security Act as a result of a determination made under section 215(i) of such Act, the Administrator shall, effective on the date of such increase in benefit amounts, increase each maximum annual rate of pension under sections 521, 541, and 542 of this title and the rate of increased pension paid under such sections 521 and 541 on account of children, as such rates were in effect immediately prior to the date of such increase in benefit amounts payable under title II of the Social Security Act, by the same percentage as the percentage by which such benefit amounts are increased.

"(b)(1) Whenever there is an increase in benefit amounts payable under title II of the Social Security Act as a result of a determination made under section 215(i) of such Act, the Administrator shall, effective on the date of such increase in benefit amounts, increase the maximum monthly rates of dependency and indemnity compensation for parents payable under subsections (b), (c), and (d), and the monthly rate provided in subsection (h), of section 415 of such title and the annual income limitations prescribed in subsections (b)(3), (c)(3), and (d)(3) of such section, as such rates and limitations were in effect immediately prior to the date of such increase in benefit amounts payable under title II of the Social Security Act, by the same percentage as the percentage by which such benefit amounts are increased.

"(2)(A) Whenever there is an increase under paragraph (1) of this subsection in such rates and annual income limitations, the Administrator shall, effective on the date of such increase in such rates and limitations, adjust (as provided in subparagraph (B) of this paragraph) the rates of dependency and indemnity compensation payable under subsection (b)(1) or (c)(1) of section 415 of this title to any parent whose annual income is more than $800 but not more than the annual income limitation in effect under subsection (b)(3) or (c)(3) of such section, as appropriate, and adjust the rates of such compensation payable under subsection (d)(1) of such section to any parent whose annual income is more than $1,000 but not more than the annual income limitation in effect under subsection (d)(3) of such section.

"(B) The adjustment in rates of dependency and indemnity compensation referred to in subparagraph (A) of this paragraph shall be made by the Administrator in accordance with regulations which the Administrator shall prescribe.

"(c)(1) Whenever there is an increase under subsection (a) in benefit rates payable under sections 521, 541, and 542 of this title and an increase under subsection (b) in benefit rates and annual income limitations under section 415 of this title, the Administrator shall publish such rates and limitations (including those rates adjusted by the Administrator under subsection (b)(2) of this section), as increased pursuant to such subsections, in the Federal Register at the same time as the material required by subsection 215(i)(2)(D) of the Social Security Act is published by reason of a determination under section 215(i) of such Act.

"(2) Whenever such rates and income limitations are so increased, the Administrator may round such rates and income limitations in such manner as the Administrator considers equitable and appropriate for ease of administration.".

(b) The table of sections at the beginning of chapter 53 of such title is amended by adding at the end thereof a new item as follows:

"3112. Annual adjustment of certain benefit rates.".

SAVINGS PROVISIONS FOR PERSONS ENTITLED TO PENSION AS OF DECEMBER 31, 1978

SEC. 306. (a)(1)(A) Except as provided in subparagraph (B), any person who as of December 31, 1978, is entitled to receive pension under sections 521, 541, or 542 of title 38, United States Code, may elect to receive pension under such section as in effect after such date, subject to the terms and conditions in effect with respect to the receipt of such pension. Any such election shall be made in such form and manner as the Administrator may prescribe. If pension is paid pursuant to such an election, the election shall be irrevocable.

(B) Any veteran eligible to make an election under subparagraph (A) who is married to another veteran who is also eligible to make such an election may not make such an election unless both such veterans make such an election.

(2) Any person eligible to make an election under paragraph (1) who does not make such an election shall continue to receive pension at the monthly rate being paid to such person on December 31, 1978, subject to all provisions of law applicable to basic eligibility for and payment of pension under section 521, 541, or 542, as appropriate, of title 38, United States Code, as in effect on December 31, 1978, except that—

(A) pension may not be paid to such person if such person's annual income (determined in accordance with section 503 of title 38, United States Code, as in effect on December 31, 1978) exceeds $4,038, in the case of a veteran or surviving spouse without dependents, $5,430, in the case of a veteran or surviving spouse with one or more dependents, or $3,299, in the case of a child; and

(B) the amount prescribed in subsection (f)(1) of section 521 of such title (as in effect on December 31, 1978) shall be $1,285;

as each such amount is increased from time to time under paragraph (3).

(3) Whenever there is an increase under section 3112 of title 38, United States Code (as added by section 304 of this Act), in the maximum annual rates of pension under sections 521, 541, and 542 of such title, as in effect after December 31, 1978, the Administrator of Veterans' Affairs shall, effective on the date of such increase under such section 3112, increase—

(A) the annual income limitations in effect under paragraph (2); and

(B) the amount of income of a veterans' spouse excluded from the annual income of such veteran under section 521(f)(1) of such title, as in effect on December 31, 1978;

by the same percentage as the percentage by which such maximum annual rates under such sections 521, 541, and 542 are increased.

(b)(1) Effective January 1, 1979, section 9 of the Veterans' Pension Act of 1959 (Public Law 86-211) is repealed.

(2)(A) Except as provided in subparagraph (B), any person who as of December 31, 1978, is entitled to receive pension under section 9(b) of the Veterans' Pension Act of 1959 may elect to receive pension under section 521, 541, or 542 of title 38, United States Code, as in effect after such date, subject to the terms and conditions in effect with respect to the receipt of such pension. Any such election shall be made in such form

and manner as the Administrator of Veterans Affairs may prescribe. If pension is paid pursuant to such an election, the election shall be irrevocable.

(B) Any veteran eligible to make an election under subparagraph (A) who is married to another veteran who is also eligible to make such an election may not make such an election unless boh such veterans make such an election.

(3) Any person eligible to make an election under paragraph (2) who does not make such an election shall continue to receive pension at the monthly rate being paid to such person on December 31, 1978, subject to all provisions of law applicable to basic eligibility for and payment of pension under section 9 (b) of the Veterans' Pension Act of 1959, as in effect on December 31, 1978, except that pension may not be paid to such person if such person's annual income (determined in accordance with the applicable provisions of law, as in effect on December 31, 1978) exceeds $3,534, in the case of a veteran or surviving spouse without dependents or in the case of a child, or $5,098, in the case of a veteran or surviving spouse with one or more dependents, as each such amount is increased from time to time under paragraph (4).

(4) Whenever there is an increase under section 3112 of title 38, United States Code (as added by section 304 of this Act), in the maximum annual rates of pension under sections 521, 541, and 542 of such title, as in effect after December 31, 1978, the Administrator shall, effective on the date of such increase under such section 3112, increase the annual income limitations in effect under paragraph (3) by the same percentage as the percentage by which the maximum annual rates under such sections 521, 542, and 543 are increased.

(c) Any case in which—

(1) a claim for pension is pending in the Veteran's Administration on December 31, 1978;

(2) a claim for pension is filed by a veteran after December 31, 1978, and within one year after the date on which such veteran became totally and permanently disabled, if such veteran became totally and permanently disabled before January 1, 1979; or

(3) a claim for pension is filed by a surviving spouse or by a child after December 31, 1978, and within one year after the date of death of the veteran through whose relationship such claim is made, if the death of such veteran occurred before January 1, 1979;

shall be adjudicated under title 38, United States Code, as in effect on December 31, 1978. Any benefits determined to be payable as the result of the adjudication of such claim shall be subject to the provisions of subsection (a).

(d) In any case in which any person who as of December 31, 1978, is entitled to receive pension under section 521, 541, or 542 of title 38, United States Code, or under section 9(b) of the Veterans' Pension Act of 1959, elects (in accordance with subsection (a)(1) or (b)(2), as appropriate) before October 1, 1979, to receive pension under such section as in effect after December 31, 1978, the Administrator of Veterans' Affairs shall pay to such person an amount equal to the amount by which the amount of pension benefits such person would have received had such election been made on January 1, 1979, exceeds the amount of pension benefits actually paid to such person for the period beginning on January 1, 1979, and ending on the date preceding the date of such election.

(e) Whenever there is an increase under subsections (a)(3) and (b)(4) in the annual income limitations with respect to persons being paid pension under subsections (a)(2) and (b)(3), the Administrator of Veterans' Affairs shall publish such annual income limitations, as increased pursuant to such subsections, in the Federal Register at the same time as the material required by section 215(1)(2)(D) of the Social Security Act is published by reason of a determination under section 215(1) of such Act.

AMENDMENTS CONCERNING PENSION FOR CERTAIN INSTITUTIONALIZED VETERANS

SEC. 307. Paragraph (, of section 3203(a) of title 38, United States Code, is amended to read as follows:

"(1)(A) Where any veteran having neither spouse nor child is being furnished domiciliary care by the Veterans' Administration, no pension in excess of $60 per month shall be paid to or for the veteran for any period after the end of the second full calendar month following the month of admission for such care.

"(B) Where any veteran having neither spouse nor child is being furnished hospital or nursing home care by the Veterans' Administration, no pension in excess of $60 per month shall be paid to or for the veteran for any period after the end of the third full calendar month following the month of admission for such care.

"(C) No pension in excess of $60 per month shall be paid to or for a veteran having neither spouse nor child for any period after the month in which such veteran is readmitted for care described in subparagraph (A) or (B) of this paragraph and furnished by the Veterans' Administration if such veteran is readmitted within six months of a period of care of not less than two full calendar months.".

STUDY OF PENSION BENEFITS PAID TO PERSONS OVERSEAS

SEC. 308. (a) The Administrator of Veterans' Affairs, in consultation with the Secretary of State, shall carry out a comprehensive study of the income characteristics of veterans of a period of war (as defined in section 101(11) of title 38, United States Code) and their survivors who are residing outside the fifty States and the District of Columbia, including those who are receiving pension benefits under chapter 15 of title 38, United States Code, or under section 9(b) of the Veterans' Pension Act of 1959, as in effect on the date of the enactment of this Act. The Administrator shall include in such study (1) an analysis of the issues involved in the payment of non-service-connected pension benefits to such persons, (2) analysis of such aspects of the economy of each foreign country and each territory, possession, and commonwealth of the United States in which a substantial number of such persons reside as are relevant to such issues, such as the rate of inflation, the standard of living, and subsistence levels in such foreign country or such territory, possession, or commonwealth, and (3) estimates of the present and future costs of the payment of pension benefits to such persons.

(b) The Administrator of Veterans' Affairs shall transmit a report to the Congress and to the President, not later than February 1, 1980, on the results of such study, together with the Administrator's recommendations as to the desirability of modifying the Veterans' Administration non-service-connected pension program for veterans of a period of war (as defined in section 101(11) of title 38, United States Code) and their survivors who are residing outside the fifty States and the District of Columbia.

TITLE IV—EFFECTIVE DATE

SEC. 401. The amendments made by this Act to title 38, United States Code, shall become effective on January 1, 1979.

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same with an amendment as follows: In lieu of the amendment of the Senate to the title of the bill, amend the title so as to read: "An Act to amend title 38, United States Code, to provide improvements in the pension program for certain veterans of a period of war with non-service-connected disabilities, for certain surviving spouses of veterans of a period of war, and for certain surviving children of veterans of a period of war, to increase the rates of dependency and indemnity compensation for surviving parents of certain veterans, to provide for automatic annual cost-of-living adjustments in the rates of pension and in the rates of parents' dependency and indemnity compensation, to prevent reductions in and terminations of pension and terminations of parents' dependency and indemnity compensation solely attributable to cost-of-living increases in social security benefits, and for other purposes.".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10173), to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, the Vietnam era, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text and an amendment to the title.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment and with a title amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

TITLE I. PENSION FOR VETERANS AND SURVIVORS

Both the House bill and the Senate amendment restructure the non-service-connected pension program for needy wartime veterans who are permanently and totally disabled from non-service-connected causes or age 65 and over and the needy survivors of wartime veterans.

Under both the House bill and the Senate amendment, the restructuring replaces the present method of determining the veterans' or surviving spouse's pension amount by using a maximum monthly rate, reduced by the other income of the veteran or surviving spouse according to rate-decrement income

limitation formulae. Under both the House bill and the Senate amendment, there would be a maximum annual rate, reduced dollar for dollar by the other income of the pensioner, including, generally, the income of all family members for whom additional pension is paid; and fewer allowable exclusions from other income would be permitted than under the current program.

Both the House bill and the Senate amendment provide for maximum annual rates for veterans and surving spouses according to family size; higher rates for those veterans who are in need of regular aid and attendance or permanently housebound; higher rates for surviving spouse in need of regular aid and attendance; and maximum annual rates for the surviving children of veterans in cases where there is no surviving spouse or the child is not in the custody of the surviving spouse.

COVERED WARTIME SERVICE

The House bill provides benefits for veterans of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, who meet specified service requirements for each period of war, and for the survivors of those veterans.

The Senate amendment provides benefits for veterans of a period of war, as defined in section 101(11) of title 38, United States Code, who meet the service requirements specified for periods of war generally, and for the survivors of those veterans. "Period of war" would include the Spanish-American war, Mexican border period, World War I, World War II, the Korean conflict, the Vietnam era, and any subsequent period of war.

The conference agreement provides that "period of war" for purposes of the restructured pension program shall be limited to the Mexican border period, World War I, World War II, the Korean Conflict, the Vietnam era, and any subsequent period of war.

SUBSTANTIAL GAINFUL EMPLOYMENT

The House bill provides that a veteran age 65 or over shall not be eligible for pension if such veteran is substantially gainfully employed.

The Senate amendment does not contain a comparable provision.

The House recedes.

Annual rates

Both the House bill and the Senate amendment provide for maximum annual rates, payable monthly to eligible veterans and survivors; and both provide that the veteran may receive additional pension for the veteran's spouse and children, and that the surviving spouse may receive additional pension for a child of the veteran in the surviving spouse's custody. Also, both the House bill and the Senate amendment provide that the applicable maximum annual rate shall be reduced by the pensioner's annual income, including in the case of veterans, the annual income of a spouse and children for whom the veteran is receiving additional pension, and, in the case of a surviving spouse, the annual income of children for whom the surviving spouse is receiving additional pension.

Maximum annual rates

The maximum annual rates provided for under the House bill, the Senate amendment, and the conference agreement are as follows:

	Conference agreement	House bill	Senate amendment
Veteran without dependent spouse or child	$3,550	$4,000	$3,240
Veteran with 1 dependent (spouse or child)	4,651	5,200	4,284
Veteran in need of regular aid and attendance without dependents (spouse or child)	5,680	6,160	5,340
Veteran in need of regular aid and attendance with 1 dependent	$6,781	$7,360	$6,384
Veteran permanently housebound without dependents	4,340	4,804	4,016
Veteran permanently housebound with 1 dependent (spouse or child)	5,441	6,004	5,060
Increase for each additional dependent child	600	600	660
Surviving spouse without dependent child	2,379	3,000	2,172
Surviving spouse with 1 dependent child	3,116	3,900	2,868
Surviving spouse in need of regular aid and attendance without dependent child	3,806	4,488	5,340
Surviving spouse in need of regular aid and attendance with 1 dependent child	4,543	5,388	6,384
Surviving spouse permanently housebound without dependent child	2,908	[1] 3,000	[1] 3,240
Surviving spouse permanently housebound with 1 dependent child	3,645	[1] 3,900	[1] 4,284
Increase for each additional dependent child	600	600	660
Surviving child where there is a surviving spouse eligible for pension benefits, but the child is not in such surviving spouse's custody	600	600	660
Surviving child where there is no surviving spouse	600	[2] 1,200	660

[1] No separate provision; amount shown would apply.
[2] Plus $600 for each additional such child, the total to be equally divided.

Veteran without dependents

The rates provided under the conference agreement are the result of compromises on several issues relating to rates. Under the House bill, the maximum annual rate for a veteran without dependents is $4,000; under the Senate amendment, that rate is $3,240. The conference agreement provides for a maximum annual rate for such a veteran of $3,550.

First dependent

Under the House bill, the maximum annual rate for a veteran with one dependent is $5,200; under the Senate amendment, $4,284. The conference agreement provides for a maximum annual rate of $4,651. Thus, the ratio between the rate for a veteran without dependents and a veteran with one dependent is 1:1.31, in lieu of the 1:1.30 ratio in the House bill and the 1:1.32 ratio in the Senate amendment. The conference agreement also applies this ration to the rates for a surviving spouse with one dependent child.

Each additional dependent

Under the House bill, the additional amount payable to a veteran or surviving spouse after the first dependent for each additional dependent is $600; under the Senate amendment, that amount is $660.

The Senate recedes.

Veterans in need of aid and attendance and housebound veterans

Under the House bill the addititonal amounts added to the basic rate for a veteran in need of regular aid and attendance and one who is permanently housebound are $2,160 and $804, respectively; under the Senate amendment, those amounts are $2,100 and $776.

The conference agreement provides that those amounts shall be $2,130 and $790, respectively.

World War I or elderly veterans

The House bill also provides that the annual maximum rate payable to any veteran attaining age 80 shall be $4,804, in the case of a veteran without dependents, and $6,004, in the case of a veteran with one dependent, plus $600 for each additional dependent. These rates are the same as the "household" rates in the House bill. Generally, veterans who will have attained the age of 80 by January 1, 1979, the effective date of the House bill, are veterans of World War I.

The Senate amendment provides for a 25-percent increase in pension benefits for veterans of a period of war if veterans of that period of war were not made eligible for VA educational assistance or home loan benefits similar to those provided under chapters 34 and 37 of title 38, United States Code, or prior corresponding provisions of law. This includes veterans of World War I, the Mexican border period, or the Spanish-American war.

The conference agreement provides for an increase of $800 in the applicable maximum annual rate for any veteran of a period of war if veterans of that period of war (including World War I veterans) were not made eligible for VA educational assistance or home loan benefits.

Veterans married to one another

In the case of two veterans married to one another each of whom is eligible on the basis of his or her own service and disability or age, the Senate amendment provides for a maximum annual combined rate that is the same as for a veteran with one dependent. Likewise, if either veteran is in need of regular aid-and-attendance or is "housebound", the rate would be the same as the aid-and-attendance or "housebound" rate, as appropriate, for a veteran with one dependent. If both veterans are "housebound" or in need of regular aid and attendance, or one is "housebound" and the other is in need of regular aid and attendance, the rate would be increased by an amount equivalent to two "housebound" or aid-and-attendance allowances, or one "housebound" and one aid-and-attendance allowance. In all such cases, $660 would be added for each dependent child of the veterans or of either veteran.

The House bill does not contain comparable provisions.

The conference agreement provides for the rates to be adjusted in accordance with the conference agreement on rates, and, with respect to married couples both of whom are veterans receiving pension benefits under current law, requiring that, unless both veterans elect benefits under the restructured program, neither may elect.

Surviving spouses

Under the House bill, the maximum annual rates for surviving spouses are established at three-fourths of the veterans' rates. Under the Senate amendment, the maximum annual rates for surviving spouses are the same as for veterans, where the surviving spouse is permanently and totally disabled or elderly or has a small or helpless child, and are established for other surviving spouses at two-thirds of the veterans' rates. Neither the House bill nor the Senate amendment provides for a "housebound" rate for disabled surviving spouses, but each provides for an aid-and-attendance rate for severely disabled surviving spouses, the House bill at approximately three-fourths of the veteran's aid-and-attendance rate, and the Senate amendment at a rate equal to the veterans' aid-and-attendance rate. The conference agreement provides for maximum annual rates, including aid-and-attendance and "housebound" rates, for surviving spouses at two-thirds of the veterans' rates.

Surviving children

Under the House bill, the maximum annual rate for a surviving child, where there is no surviving spouse, is $1,200, with $600 to be added for each additional child, the whole to be equally divided among the surviving children; if there is a surviving spouse, but the surviving child is not in such spouse's custody, the rate is $600 for each such child.

The Senate amendment provided for a maximum annual rate of $660 for each surviving child.

The conference agreement provides for a maximum annual rate of $600 for each surviving child.

PAYMENTS LESS FREQUENT THAN MONTHLY

Both the House bill and the Senate amendment, in order to minimize administrative costs associated with payments of small amounts, provide that pension benefits may be paid to veterans and surviving spouses less frequently than monthly if the amount of the benefit is less than a certain amount. Under the House bill, the amount is $10 per month ($120 per year); and under the Senate amendment, 4 percent ($129.60 per year) of the Senate single-veteran maximum annual rate.

The conference agreement provides that, under regulations to be prescribed by the Administrator, pension benefits may be paid less frequently than monthly where the amount of the annual benefit is less than 4 percent ($142) of the single-veteran maximum annual rate.

Dependent children

Both the House bill and the Senate amendment provide that a veteran shall receive additional pension for a child to whose support the veteran is reasonably contributing, and the House bill also provides that a veteran shall receive additional pension for a child in the veteran's custody.

The Senate recedes. Thus, the conference agreement provides that a child for whom a veteran shall receive additional pension may be a child in the veteran's custody or to whose support the veteran is reasonably contributing.

Determinations of income

Generally, under both the House bill and the Senate amendment, the total non-pension income of the pensioner and any dependents for whom the pensioner is receiving additional pension is considered in determining the pension amount. The House bill provides that the income of a veteran's spouse and child (excepting the child's earned income) shall be considered as the veteran's income to the extent that such income is reasonably available to the veteran, unless in the Administrator's judgment to do so would work a hardship on the veteran.

The Senate amendment does not contain a comparable provision. Thus, under the Senate amendment, the veteran's spouse's or child's income would be considered without regard to its reasonable availability to the veteran, or, in the case of a surviving spouse receiving additional pension for the veteran's child, to the surviving spouse.

The conference agreement provides that the veteran's spouse's income shall always be included in determining the pension amount payable to the veteran, and that the income of a veteran's child shall be considered as the veteran's or surviving spouse's income to the extent that such income is reasonably available to or for the veteran or the surviving spouse unless, in the Administrator's judgment, to do so would work a hardship on the veteran or the surviving spouse.

Surviving child's income

Both the House bill and the Senate amendment provide for benefits for the surviving child or children of a deceased wartime veteran. As under current law, such children would be eligible where either there is no surviving spouse or the surviving spouse is not eligible for pension benefits. Under both the House bill and the Senate amendment, a surviving child would also be eligible if the child is not in the custody of a surviving spouse who is eligible for pension benefits.

Both the House bill and the Senate amendment provide that the maximum annual rate payable to a surviving child would be reduced by the child's income from sources other than employment. The Senate amendment also provides that if the child is residing with a person who is legally responsible for the child's support, the annual amount payable would be equal to the amount by which the appropriate maximum annual rate, under the provisions governing surviving spouses' rates, exceeds the annual income of the child and such person or persons, but not to exceed the amount by which $660 (the maximum annual rate payable to a surviving child) exceeds the annual income of such child; the appropriate maximum annual rate would be determined in accordance with regulations prescribed by the Administrator, and the incomes of such persons would be determined according to the provisions governing determinations of the annual income of pensions. The House bill does not contain a comparable provision.

The House recedes. (As previously noted, the maximum annual rate payable to such a surviving child under the conference agreement is $600.)

Countable income and income exclusions

Current law provides that a pensioner's total annual non-pension income shall be included in determining the amount of pension payable, unless a specific exclusion from such income is authorized by law. Both the House bill and the Senate amendment continue this provision for the restructured program, and each provides for the following six exclusions:

(1) donations from public or private relief or welfare organizations;

(2) amounts equal to amounts paid by a surviving spouse or child for the veteran's just debts and the unreimbursed expenses of the veteran's last illness and burial;

(3) amounts equal to amounts paid by a veteran for the last illness and burial expenses of a veteran's spouse or by a veteran or surviving spouse for the last illness and burial expenses of a veterans' child;

(4) fire insurance policy proceeds;

(5) profit from the sale of real or personal property other than in the course of a business; and

(6) amounts in joint accounts acquired by reason of the death of the other co-owner.

COMPENSATION, DEPENDENCY AND INDEMNITY COMPENSATION AND PENSION PAYMENTS

The House bill provides for the exclusion of payments under chapters 11 (compensation), 13 (dependency and indemnity compensation) (except section 412(a)), and 15 (pension).

The Senate amendment does not contain a comparable provision, but provides that, for purposes of determinations of annual income, the annual income of a pensioner shall not include pension benefits.

The conference agreement provides that payments under chapters 11 and 13 shall not be excluded from annual income and that, in the case of a veteran receiving pension on the basis of his or her own service and another's service, the veteran shall receive only the greater benefit. Thus, in the case of a veteran married to another veteran who is receiving service-connected disability compensation, such compensation would be considered as income.

Educational expenses

Both the House bill and the Senate amendment provide for the exclusion of educational expenses. Specifically, the House bill provides for the exclusion of payments under chapter 31 (vocational rehabilitation) and 34 (veterans' educational assistance), and continues the current-law exclusion of payments under chapter 35 (dependents' and survivors' educational assistance).

The Senate amendment provides for the exclusion of amounts equal to amounts paid in the previous calendar year by a veteran or surviving spouse pursuing a course of education or vocational rehabilitation or training for educational expenses, including tuition, fees, books, materials, and in the case of such a veteran or surviving spouse in need of regular aid and attendance, related unusual transportation expenses.

The House recedes, with an amendment deleting the requirement that such expenses must have been incurred in the previous calendar year.

Unreimbursed medical expenses

Both the House bill and the Senate amendment provide for the deduction from a pensioner's annual income of certain unreimbursed medical expenses.

The House bill provides for the exclusion of amounts equal to all amounts paid by a veteran's spouse, surviving spouse, or child, for unreimbursed medical expenses if such expenses exceed 5 percent of the pensioner's annual income.

The Senate amendment provides for the exclusion of amounts equal to amounts paid in the previous calendar year by the veteran, the veteran's spouse, or the surviving spouse, or by or on behalf of a surviving child for unreimbursed medical expenses to the extent such expenses exceed the lesser of $100 or 5 percent of the annual income of the pensioner and are determined to be reasonably necessary for the health needs of the veteran or the veteran's spouse or children, the surviving spouse and children, or a surviving child. In certain cases, the exclusion would be disallowed if, after notice, the veteran continues to incur expenses for health-care services that are readily available at a VA-operated facility.

The conference agreement provides that unreimbursed medical expenses shall be excludable to the extent that they exceed 5 percent of the maximum annual rate that would be applicable, based on the number of family members for whom pension is payable, without regard to whether the pensioner is in need of regular aid and attendance or is housebound.

This provision in the conference agreement is designed to assure equity for each pensioner by making the non-deductible portion of such expenses vary only according to the number of persons for whom the pensioner is receiving additional pension, rather than according to the amount of the pensioner's non-pension income as in the House bill and, in part, in the Senate amendment, or a fixed amount such as $100, as the Senate amendment. The conferees note that, in generally accepting the House formulation of this exclusion, it is their intention that the VA not construe this provision as requiring any change (except as necessary with respect to amounts) in regulations specifying the persons for whom such expenses may be incurred, the types of allowable expenses, or the administrative provisions under which the pensioner may be reimbursed for such expenses—including lump-sum reimbursements where appropriate—or other regulations governing the administration of the current medical-expenses exclusion.

CHILD'S EARNED INCOME

Both the House bill and the Senate amendment provide for the exclusion of a dependent or surviving child's earned income. Under the House bill, all of a dependent or surviving child's earned income would be excluded. Under the Senate amendment, the current-work—earned—income of any child, including a surviving child, would be excluded up to the amount (presently $2,950) which would require the child to file a Federal income tax return under section 6012(a)(1)(A)(i) of the Internal Revenue Code of 1954

(26 U.S.C. 6012(a)(1)(A)(i)). The Senate amendment would further exclude any current-work income of any child, including a surviving child, who is pursuing a post-secondary course of education or vocational rehabilitation or training, to the extent of amounts paid by such child for such course of education or vocational rehabilitation or training, including amounts paid for tuition, fees, books, or materials. "Current-work" income would be defined as earned income within the meaning of appropriate sections of the Internal Revenue Code of 1954.

The House recedes, with an amendment deleting the Senate definition of current-work income, so that current-work income will mean earned income within the meaning of VA regulations defining earned income.

CURRENT-WORK INCOME AND WORK-TRAVEL EXPENSES

The Senate amendment also provides for the following exclusions:

(1) A partial exclusion of the family current-work income of a veteran or surviving spouse, limited to $780, plus one-half the remainder, in the case of a veteran or surviving spouse, and $1,560, plus one-half the remainder, in the case of a veteran or surviving spouse in need of regular aid and attendance.

(2) An exclusion of amounts equal to amounts paid by a veteran or surviving spouse in need of regular aid and attendance for unusual employment-related travel expenses in commuting between home and work.

The House bill does not contain comparable provisions.

The Senate recedes.

NET WORTH LIMITATIONS

Both the House bill and the Senate amendment continue the current-law requirement that pension be denied or discontinued if the pensioner's estate—net worth—is such that, under all the circumstances, including the consideration of the pensioner's income, it is reasonable that some portion of the pensioner's estate be used for his or her support. The House bill adds to the current-law provision that pension may be denied or discontinued if the pensioner's net worth is excessive, by providing for such denials or discontinuances in the case of a veteran whose spouse's net worth is excessive, and by providing for the denial or discontinuation of additional pension to a veteran or surviving spouse for a child if the child's net worth is excessive.

The Senate amendment provides that pension may be denied or discontinued if the net worth of a pensioner, or of any spouse or child for whom the pensioner is receiving additional pension, is excessive, and also provides expressly for the exclusion from the determination of the net worth of any dependent or surviving child of amounts reasonably set aside for educational or similarly worthwhile vocational goals.

The Senate recedes. Thus, under the conference agreement, additional pension to a veteran or surviving spouse for a child may be denied or discontinued if the child's net worth is excessive. The conferees note that the intention of these provisions is to prevent the payment of additional pension for the support of a child where the child has sufficient funds for support. The conferees urge the VA to take precautionary steps to assure that these provisions are not abused by a transfer of assets from the veteran or surviving spouse to the child.

Also, although the conference agreement does not contain the Senate's express exclusion from a child's net worth of certain amounts reserved for education, the conferees note that it is the current practice of the VA not to consider those amounts, and urge the VA to conform its regulations to accord with its current practice in this regard.

Surviving child's support

The Senate amendment provides that pension may be denied or discontinued in the case of a surviving child who is living with a person legally responsible for the child's support if such person's net worth is excessive.

The House bill does not contain a comparable provision.

The House recedes.

PENSIONERS' REPORTING REQUIREMENT

Both the House bill and the Senate amendment provide for resource reports—income and net worth reports—by pensioners, and the House bill also requires that all pensioners file such reports annually with the VA. The Senate amendment provides for such reports annually by all pensioners under the restructured program except those exempted under regulations to be prescribed by the Administrator for categories of persons all of whose income is regularly received and derived from Federal programs.

The Senate recedes.

The Senate amendment, but not the House bill, also requires the prompt reporting by a veteran or surviving spouse of a change in a dependent's status and, with respect to a surviving child living with a person legally responsible for the support of the child, requires such reports to include information as to the income and net worth of such a person.

The House recedes.

ELECTION OF BENEFITS

Civil War and Indian War pensioners

The Senate amendment, provides for elections by survivors of Civil War and Indian War veterans—to be irrevocable if pension benefits are actually paid pursuant to such an election—for benefits under the restructured program.

The House bill does not contain comparable provisions.

The Senate recedes.

Spanish-American War pensioners

The Senate amendment provides for similar elections by Spanish-American War veterans and survivors and by Spanish-American War pensioners who have previously elected current-law pension. Under the House bill, the current-law provision permitting Spanish-American War pensioners irrevocably to elect benefits under the provisions of law applicable to veterans of later periods of war and their surviving spouses would not be changed. The Senate amendment also provides that the automatic eligibility of certain Spanish-American War veterans for aid-and-attendance benefits under provisions of law relating to veterans of later periods of war shall not be extended to include automatic eligibility for aid-and-attendance benefits under the restructured program.

The conference agreement provides for grandfathering, under regulations to be prescribed by the Administrator, of any Spanish-American War veteran or surviving spouse who is receiving or who becomes entitled to receive such current-law aid-and-attendance benefits.

Current-law pensioners

The Senate amendment expressly provides for current pensioners to make elections to participate in the restructured program. Such elections would be irrevocable if pension is actually paid pursuant to such an election.

The House bill does not contain comparable provisions. However, the House bill provides that the grandfathering provisions of the House bill do not apply in any case for any period after pension is granted, pursuant to application, under title 38 as amended by the House bill.

The House recedes.

TITLE II. DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING PARENTS

The Senate amendment provides for restructuring of the parents' dependency and indemnity compensation (DIC) program along the lines of the restructured pension program (including indexing to the Consumer Price Index increases) and, as a condition of eligibility, a requirement that the parent received one-half or more of his or her support from the veteran during the one-year period immediately preceding the veteran's death. The following annual rates, reduced by the amount of the parent or parent's annual countable income and the income of a remarried parent's spouse which is available to or for such parent, would apply:

One parent or each parent, if the parents are living apart	$3,240
Two parents living together	4,284
One parent (or each parent, if the parents are living apart) in need of regular aid and attendance	5,340
Two parents living together, one of whom is in need of regular aid and attendance	6,384
Two parents living together, both of whom are in need of regular aid and attendance	8,484

Parents receiving benefits under provisions of law in effect on the date before the effective date of the new program could either elect parents' DIC benefits under the restructured program if they are eligible, or continue receiving benefits under such provisions as in effect on the day before the effective date of the new program as long as they remain eligible under the terms and conditions of such provisions. No parent who becomes entitled to parents' DIC on or after the effective date of the restructured program would be entitled to receive benefits under provisions of law in effect on the day before such effective date unless such parent's application was pending on such day.

The House bill does not contain comparable provisions; but the conferees note that H.R. 11887, passed by the House on September 18, 1978, provides for a cost-of-living increase of 6 percent in the maximum monthly rates of parents' DIC and in the annual income limitations, with corresponding adjustments in the rate-decrement-income limitation formulae.

The conference agreement provides for a cost-of-living increase of 7.1 percent (the amount projected by the Congressional Budget Office as the increase in the Consumer Price Index for the period from January, 1978, to January, 1979) in the maximum monthly rates and annual income limitations, as follows:

1 parent	$163
2 parents together (each)	115
2 parents not together (each)	109
Parent in need of regular aid and attendance	85

The annual income limitations would be $4,038 for 1 parent and $5,430 for 2 parents living together. The conference agreement also provides for annual automatic adjustments—"indexing"—of the maximum monthly rates and the annual income limitations, according to the percentage adopted for the restructured pension program (which would in turn be based on the Consumer Price Index increase, as adopted for Social Security benefits) and at the same time, with annual adjustments in the less-than-maximum rates to be made under regulations to be prescribed by the Administrator, in accordance with the method employed—rate-decrement income limitation formulae—under current law. The conferees note that the intention of this provision is to assure that parents receiving DIC, who also receive Social Security benefits, other Fed-

eral benefits indexed in accordance with the annual Social Security cost-of-living increase, or other cost-of-living increases, will not be terminated from the parents' DIC program as a result of such cost-of-living increases.

Under the conference agreement, the parents' DIC maximum monthly rates and annual income limitations will be increased by 7.1 percent, effective January 1, 1979, and further increased, effective July 1, 1979, by the same cost-of-living percentage as Social Security benefits are increased. The Social Security percentage is generally based on the increase in the Consumer Price Index from the first quarter (using an average of the monthly index for the three months of the quarter) of the previous year to the first quarter of the year in which the increase is to become effective. For both the January, 1979, and July, 1979, increases in parents' DIC, the less-than-maximum rates will be adjusted by approximately the same percentages as are used in the maximum monthly rates.

Thus, during this transition, recipients of parents' DIC will receive payments which have been adjusted by the Consumer Price Index measured in part for both increases over the same period. However, this adjustment generally would represent a fairly small change in the rate of payments to any individual, and in the case of recipients receiving constant ($5.00) monthly payments, no change.

TITLE III. MISCELLANEOUS PROVISIONS AND CONFORMING AMENDMENTS

DEFINITION OF PENSION

Both the House bill and the Senate amendment redefine pension, currently defined, in part, as a monthly payment. Under the House bill, pension would be defined, in part, as a payment, and under the Senate amendment, as a monthly or other periodic payment.

The House recedes.

END-OF-THE-YEAR RULE

Both the House bill and the Senate amendment amend the "end-of-the-year" rule, which provides that the effective date of a reduction in or discontinuance of pension or parents' DIC by reason of a change in income or net worth shall be the last day of the calendar year in which the change occurred, to provide for an "end-of-the-month" rule for changes in income. Thus the effective date of a reduction of discontinuance resulting from a change in income generally would be the last day of the month in which the change occurred. The Senate amendment also changes the "end-of-the-year" rule to an "end-of-the-month" rule for changes in net worth.

The Senate recedes.

VA PRESCRIPTION DRUGS: ELIGIBILITY FOR FORMER PENSIONERS

The House bill amends existing section 612(h) of title 38, which provides that veterans who are totally and permanently disabled from non-service-connected causes and in need of regular aid and attendance, but who are no longer eligible for pension benefits because their incomes exceed the annual income limitations, shall be entitled to receive prescription drugs and medicine from the VA without charge to the veteran, provided that the veteran's annual income does not exceed the applicable annual income limitation by more than $500, by increasing that amount to $1,000.

The Senate amendment does not contain a comparable provision.

The Senate recedes.

The conferees note that such a veteran would be able to receive free VA drugs and medicines as long as the veteran's annual income does not exceed by more than $1,000 the applicable maximum annual rate, in the case of a veteran who becomes eligible for the benefits of this provision on or after the effective date of the restructured program, or the applicable annual income limitation, in the case of a grandfathered veteran.

INDEXING TO CPI FOR FUTURE RATE INCREASES

Indexing

Both the House bill and the Senate amendment provide for automatic annual adjustments—"indexing"—of the maximum annual pension rates in the restructured program. In addition, the Senate amendment provides for indexing of the restructured parents' DIC program and the dollar amounts of the partial exclusion of current-work income in both the restructured pension and parents' DIC programs, and for publication in the Federal Register, at the same time as Social Security materials relating to cost-of-living increases are published, of the maximum annual rates and dollar amounts as so increased.

The conference agreement provides for (1) indexing of the maximum annual pension rates, (2) indexing of the maximum monthly rates, monthly aid-and-attendance allowance, and annual income limitations in the parents' DIC program, and administrative adjustments along the lines of the rate-decrement income limitation method currently employed for such adjustments in the less-than-maximum rates of that program; and (3) publication in the Federal Register at the same time as materials relating to Social Security cost-of-living increases are published, of the pension, DIC, and other rates and income limitations as so increased.

Pension increases at same rate as social security cost-of-living increases

In the case of persons receiving pension benefits and benefits under any other Federal program which are increased in accordance with the annual Social Security cost-of-living increase, the Senate amendment provides for the recomputation of the amount of pension to which a person is entitled under the restructured program at the same time that Social Security benefit payments are increased. The Senate amendment also provides for such recomputations under the restructured parents' DIC program. The Senate recedes, with the understanding that the purpose of the recomputation provision is fully achieved under the indexing and other provisions.

The conferees note that under both the House bill and the Senate amendment, there would be assurance that not only would such pensioners no longer suffer reductions in benefits attributable to cost-of-living increases in such non-VA Federal benefits, but also that their aggregate incomes—pension plus Social Security income—would rise in accordance with the Consumer Price Index.

Under the restructured program, the benefit rate payable to pensioners who also receive Social Security benefits (or benefits under any other Federal program indexed like Social Security) would be increased by the same percentage as Social Security benefits, and at the same time; and the new pension rate, based on the new annualized Social Security (or other Federal) benefit rate, would be paid from the date of change until the next date upon which a similar change takes place—generally, from July of one year until July of the following year. Thus, for pensioners whose only non-pension income is Social Security (or other Federal) benefits, there would be assurance that their aggregate incomes—pension plus Social Security (or other Federal) benefits—would rise in accordance with the Consumer Price Index; this would also be true for pensioners whose non-Federal income increases in accordance with the Consumer Price Index.

LIMITED RETROACTIVITY FOR PENSIONERS ELECTING BENEFITS

The Senate amendment provides that any person currently receiving pension who elects to receive pension under the restructured program within three months of the effective date of the new program shall receive benefits retroactive to the effective date to the extent that they exceed amounts already paid to such person.

The House bill does not contain a comparable provision.

The House recedes with an amendment extending the limited period of retroactivity to nine months. The conferences note that the intention of this provision is to provide the VA with ample time to inform pensioners currently on the rolls about the restructured program and to encourage elections on the part of those pensioners who would be benefited.

"GRANDFATHERING" PROVISIONS

Current pensioners

Both the House bill and the Senate amendment provide for limited protection—"grandfathering"—to current pensioners who are not eligible for, or do not elect, benefits under the restructured program. The House bill provides that such persons shall continue to receive monthly pension benefits in the same amounts as they are receiving on the effective date. However, if a veteran's or surviving spouse's dependent, for whom the veteran or surviving spouse is receiving additional pension, dies or no longer meets the definition of dependent, the additional amount paid on account of the dependent would be discontinued; and, if a veteran receiving pension because of permanent and total disability is determined to be no longer so disabled, the veteran's pension would be discontinued.

The Senate amendment provides that any pensioner receiving pension on the effective date may continue to receive pension under the terms and conditions of the current program as long as he or she remains eligible.

The conference agreement provides that any grandfathered pensioner may continue to receive the same rate of pension so long as such pensioner's income does not exceed the current-law annual income limitations, as increased to keep pace with inflation. Under the agreement, the current-law annual income limitations of $3,770 (veteran or surviving spouse without dependents); $5,070 (veteran or surviving spouse with one dependent) and $3,080 (surviving child) would be increased by 7.1 percent—to $4,038, $5,430, and $3,299, respectively—effective on January 1, 1979, and thereafter would be indexed according to the percentage adopted for the restructured pension program, and at the same time.

In the case of a married veteran, where the effect of a cost-of-living increase in the couple's Social Security or other retirement benefits might increase the couple's countable annual income so that it exceeds the applicable income limitation by a small amount, the conference agreement would provide for indexing of the $1,200 current-law exclusion of a veteran's spouse's income in determining the amount of the couple's annual income for pension purposes. In this way, the pension benefit to the veteran would continue unchanged.

The conference agreement thus will assure that no veteran or survivor currently receiving pension will ever be forced off the rolls because of increases in other income—such as social security benefits—that are based on or are no greater than increases in the Consumer Price Index.

Under these provisions, the pension of a grandfathered pensioner would be terminated if (a) the pensioner's net worth becomes excessive (using the net worth criteria in effect on December 31, 1978); or (b) the pensioner's annual income exceeds the income limitations of the current program, as indexed. In addition, if a grandfathered pensioner receives additional pension for a dependent who dies or ceases to qualify as a dependent,

the additional pension would be terminated, as would the pension payable to a veteran who is determined to be no longer permanently and totally disabled; and the pension payable to survivors who no longer meet the applicable definitions would also be terminated.

"Section 306 pension"

In the conferees' view, the pension benefits provided under the grandfathering provisions of the conference report should be identified by a standard nomenclature. Thus, it is the intention of the conferees that pension under the grandfathering provisions should be referred to as "Section 306 pension", according to the section of the conference report containing those provisions, and that any reference to such pension in any regulation, directive, or other official document of the United States shall refer to such pension as "Section 306 pension".

RATES FOR CERTAIN INSTITUTIONALIZED PENSIONERS

The Senate amendment provides for an increase from $50 to $60 in the maximum monthly pension payable to a veteran who has no spouse or child and who is institutionalized at VA expense, and in the case of such a veteran being furnished hospital or nursing home care by the VA, extends from 2 to 3 months, and, in certain cases, an additional 3 months, the period of time during which the veteran may be institutionalized before any reduction in the veteran's pension benefit may be made as a result of such institutionalization.

The House bill does not contain comparable provisions.

The House recedes with an amendment deleting the provisions for the additional 3-month extension.

PENSIONERS RESIDING OUTSIDE THE 50 STATES

Benefits

The Senate amendment provides for a limitation of benefits under the restructured pension and parents' DIC programs to persons residing in the 50 States or the District of Columbia, and provides that persons residing elsewhere who become eligible on or after the effective date may apply for and receive benefits under the current-law pension or parents' DIC program.

The House bill does not contain comparable provisions.

The Senate recedes.

Study

The Senate amendment also requires a comprehensive study (to be submitted to the Congress by February 1, 1979) by the VA of the issues involved in the payment of pension benefits to persons residing outside the 50 States and the District of Columbia, including analyses of those aspects of the economies of the countries or United States territories, possessions, or commonwealths where such persons reside which are relevant to such issues, estimates of present and future costs of pension benefits to such persons, and recommendations to the Congress on the desirability of modifying the pension program with respect to such persons.

The House bill does not contain a comparable requirement.

The House recedes, with an amendment modifying the specifications of the study and extending the due date to February 1, 1980. The conferees urge the VA to take prompt measures to ensure that the study is submitted to Congress in a timely fashion, with due regard for the time required for the Executive Branch clearance process.

TITLE IV.—EFFECTIVE DATE

The House bill provides for an effective date of January 1, 1979. The Senate amendment provides for an effective date of October 1, 1978, for all amendments made by the proposed Act to title 38 and for certain other provisions; the remaining provisions would be effective upon enactment. The conference agreement provides for an effective date of January 1, 1979, for all amendments made by the proposed Act to title 38; other provisions would be effective upon enactment.

OMB STUDY

The Senate amendment requires a report by the Director of the Office of Management and Budget, to be submitted within one year of the proposed Act's enactment date, including a description of the coordination between the VA and the Social Security Administration with respect to the delivery of veterans' pension, social security retirement and disability, and supplemental security income benefits; recommendations for improving coordination (including legislative recommendations); a description of inconsistencies and inequities in the treatment of needy persons; and an assessment of the feasibility and desirability of reconciling unjustifiable differences among those programs, in terms of program features such as benefit amounts, countable income, asset limitations, and accounting periods. The House bill does not contain a comparable provision.

In lieu of the study to be conducted by the Office of Management and Budget, the conferees agree that such study should be conducted by the General Accounting Office.

The conferees will request, in writing, that the Comptroller General, in consultation with the Director of the Office of Management and Budget, conduct the study and that he prepare a report to be submitted to the Congress on the results of such study on or before October 1, 1979.

STATE OR LOCAL MATCHING-FUND REQUIREMENT FOR EDUCATION LOANS

The Senate amendment eliminates the State or local matching-fund requirement for the repayment of VA educational loans in connection with the program of accelerated payment of educational assistance.

The House bill does not contain a comparable provision.

The Senate recedes.

BUDGET AUTHORITY

The Senate amendment clarifies that none of its provisions shall be deemed directly or indirectly to authorize the enactment of new budget authority, except for the amendments to title 38, United States Code, that provide for new spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974. The House bill does not contain a comparable provision.

The Senate recedes.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF REPORTS FROM THE COMMITTEE ON RULES

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1769) on the resolution (H. Res. 1426) providing for the consideration of reports from the Committee on Rules, which was referred to the House Calendar and ordered to be printed.

Mr. BAUMAN. Mr. Speaker, I do not think the gentleman from Missouri has properly filed his report. The resolution was considered this morning in the Rules Committee with no agenda, no notice. It was the intention of the gentleman from Maryland to move to reconsider this resolution. Now, it is jammed through here when we have been in session in the Rules Committee for only 15 minutes.

I think the members of the Rules Committee deserve something better than that. I question whether a quorum was even present.

The SPEAKER. The report has been filed.

Mr. BAUMAN. I make a point of order that a quorum was not present in the Rules Committee at the time the action was taken.

Mr. BOLLING. If the gentleman will yield——

Mr. BAUMAN. I do not have the floor.

The SPEAKER. The Chair will recognize the gentleman from Missouri.

Mr. BOLLING. Mr. Speaker, there was a quorum present. The vote was perfectly proper. No objection was heard, and I filed the report.

Mr. BAUMAN. And there was no notice given, as the rules of the Rules Committee require, of that proposed action.

The SPEAKER. Is the gentleman addressing the Chair?

Mr. BAUMAN. Mr. Speaker, the gentleman is addressing the gentleman from Missouri, who filed this; through the Chair.

The SPEAKER. Well, as far as notice is concerned, that is a matter of the interpretation of the rules of the Rules committee, to be raised within the committee and not in the House..

Mr. BAUMAN. I made a point of order that a quorum was not present. It is up to the gentleman from Missouri to present us with a transcript proving that it was.

Mr. BOLLING. Mr. Speaker, that is not up to the gentleman from Missouri. The proceeding is entirely in order.

The SPEAKER. The Chair will take the word of the gentleman from Missouri who was present in the committee that there was a quorum present.

CONFERENCE REPORT ON H.R. 12929, LABOR-HEW APPROPRIATIONS

Mr. FLOOD. Mr. Speaker, in order to expedite the disposition of these amendments—there are over 100 of them, as the Members know—I would like to suggest that all the amendments on which we are asking the House to recede and concur be considered en bloc.

Accordingly, Mr. Speaker, I ask unanimous consent that Senate amendments numbered 2, 6, 13, 18, 20, 22, 27, 35, 45, 60, 66, 77, 81, 83, 90, 100, 104, 106 be considered en bloc.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. ASHBROOK. Mr. Speaker, unequivocally I object.

The SPEAKER. Objection is heard.

NATIONAL CENTER FOR VOCATIONAL EDUCATION

(Mr. WYLIE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. WYLIE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

I have just been informed that the gentleman from Illinois (Mr. MICHEL) the gentleman from Pennsylvania (Mr. FLOOD) and the gentleman from Massachusetts (Mr. CONTE) have engaged in a colloquy which addressed the question of legislative intent with reference to the National Center for Vocational Education at Ohio State University.

Yesterday, I was informed that consideration of this conference report would be coming up today as the second order of business. I was in Columbus for an open house at the Worthington High School last evening and perceived no difficulty in arriving on the floor in time to participate in the colloquy. Unfortunately, my air transportation, TWA Flight 426, was in a hold pattern for 56 minutes over Washington National Airport. This appears to be a ridiculous situation that ought to be looked into as the sky was clear over our Nation's capital and the visibility unlimited. If the plane had arrived on schedule, I would have had time to engage in the prearranged colloquy.

My real purpose in taking the floor now is to express my appreciation to Congressmen MICHEL, FLOOD, and CONTE for the assistance they have rendered me and the National Center for Vocational Education. The importance of vocational education cannot be overemphasized. This vital Center provides the Federal Government with its primary source of vocational education research which is disseminated throughout the entire country.

It was important that congressional intent be established that the program is to be continued at its present funding level. Robert Taylor, the Executive Director of the Center, is a good friend and has done an excellent job in directing operations and not allowing the Center to continue would truly be a waste of money the taxpayer has already invested in this worthy program.

The colloquy makes it clear that there will be no lapse in what everyone agrees is an excellent program.●

CONFERENCE REPORT ON H.R. 12929 LABOR–HEW APPROPRIATIONS

AMENDMENTS IN DISAGREEMENT

The SPEAKER. The Clerk will designate the first amendment in disagreement.

Senate amendment No. 2 is as follows: Page 3, line 1, after "year" insert ": *Provided further*, That amounts received or recovered pursuant to section 208(e) of Public Law 95–250 shall be available for payments".

MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLOOD moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein.

The SPEAKER. Without objection, the motion is agreed to.

Mr. ASHBROOK. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the motion offered by the gentleman from Pennsylvania (Mr. FLOOD).

The question was taken; and on a division (demanded by Mr. ASHBROOK) there were—yeas 110; nays 1.

So the motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 6 is as follows: Page 8, line 8, after "fishing" insert ": *Provided further*, That none of the funds appropriated under this paragraph shall be obligated or expended for the proposal or assessment of any civil penalties for the violation or alleged violation by an employer of 10 or fewer employees of any standard, rule, regulation, or order promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful or repeated violations and violations which pose imminent danger under section 13 of the Act) if, prior to the inspection which gives rise to the alleged violation, the employer cited has (1) voluntarily requested consultation under a program operated pursuant to section 7(c)(1) or section 18 of the Occupational Safety and Health Act of 1970 or from a private consultative source approved by the Administration and (2) had the consultant examine the condition cited and (3) made or is in the process of making a reasonable good faith effort to eliminate the hazard created by the condition cited as such was identified by the aforementioned consultant, unless changing circumstances or workplace conditions render inapplicable the advice obtained by such consultants.

MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLOOD moves that the House recede from its disagreement to the amendment of the Senate numbered 6 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 9 is as follows: Page 11, line 16, after "$681,092,000," insert "including 9,413 full-time permanent position,".

MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLOOD moves that the House recede from its disagreement to the amendment of the Senate numbered 9 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: "including 9,258 full-time permanent positions.".

The motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 13 is as follows: Page 12, line 18, after "$159,060,000," insert "including 3,982 full-time permanent positions".

MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLOOD moves that the House recede from its disagreement to the amendment of the Senate numbered 13 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 15 is as follows: Page 13, line 5, after "$889,192,000" insert ", including 2,076 full-time permanent positions".

MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLOOD moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: ", including 2,062 full-time permanent positions".

The motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 16 is as follows: Page 13, line 11, after "$485,584,000" insert ", including 791 full-time permanent positions".

MOTION OFFERED BY MR. FLOOD

Mr. FLOOD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLOOD moves that the House recede from its disagreement to the amendment of the Senate numbered 16 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: ", including 788 full-time permanent positions".

The SPEAKER. Without objection, the motion is agreed to.

Mr. ASHBROOK. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the motion offered by the gentleman from Pennsylvania (Mr. FLOOD).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. The Chair will count. One hundred and thirty-two Members are present, not a quorum.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 385, nays 11, not voting 34, as follows:

Mr. Neal with Mr. Ireland.
Mr. LaFalce with Mr. Stockman.
Mr. Diggs with Mr. Rhodes.

Mr. KELLY and Mr. MILLER of Ohio changed their vote from "yea" to "nay."

Mr. BUTLER changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

CONFERENCE REPORT ON H.R. 12250, DESIGNATING BOUNDARY WATERS CANOE AREA WILDERNESS AND ESTABLISHING BOUNDARY WATERS CANOE AREA MINING PROTECTION AREA

Mr. PHILLIP BURTON submitted the following conference report and statement on the bill (H.R. 12250) to designate the Boundary Waters Canoe Area Wilderness, to establish the Boundary Waters Canoe Area Mining Protection Area, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–1770)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. (12250) to designate the Boundary Waters Canoe Area Wilderness, to establish the Boundary Waters Canoe Area Mining Protection Area, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same as follows:

FINDINGS

SEC. 1. The Congress finds that it is necessary and desirable to provide for the protection, enhancement, and preservation of the natural values of the lakes, waterways, and associated forested areas known (before the date of enactment of this Act) as the Boundary Waters Canoe Area, and for the orderly management of public use and enjoyment of that area as wilderness, and of certain contiguous lands and waters, while at the same time protecting the special qualities of the area as a natural forest-lakeland wilderness ecosystem of major esthetic, cultural, scientific, recreational and educational value to the Nation.

PURPOSES

SEC. 2. It is the purpose of this Act to provide for such measures respecting the areas designated by this Act as the Boundary Waters Canoe Area Wilderness and Boundary Waters Canoe Area Mining Protection Area as will—

(1) provide for the protection and management of the fish and wildlife of the wilderness so as to enhance public enjoyment and appreciation of the unique biotic resources of the region,

(2) protect and enhance the natural values and environmental quality of the lakes, streams, shorelines and associated forest areas of the wilderness,

(3) maintain high water quality in such areas,

(4) minimize to the maximum extent possible, the environmental impacts associated with mineral development affecting such areas,

(5) prevent further road and commercial development and restore natural conditions to existing temporary roads in the wilderness, and

(6) provide for the orderly and equitable transition from motorized recreational uses to nonmotorized recreational uses on those lakes, streams, and portages in the wilderness where such mechanized uses are to be phased out under the provisions of this Act.

BOUNDARY WATERS CANOE AREA WILDERNESS DESIGNATION AND MAP

SEC. 3. The areas generally depicted as wilderness on the map entitled "Boundary Waters Canoe Area Wilderness and Boundary Waters Canoe Area Mining Protection Area" dated September 1978, comprising approximately one million and seventy-five thousand five hundred acres, are hereby designated as the Boundary Waters Canoe Area Wilderness (hereinafter referred to as the "wilderness"). Such designation shall supersede the designation of the Boundary Waters Canoe Area under section 3(a) of the Wilderness Act (78 Stat. 890) and such map shall supersede the map on file pursuant to such section. The map of the wilderness shall be on file and available for public inspection in the offices of the Supervisor of the Superior National Forest and of the Chief, United States Forest Service. The Secretary of Agriculture, hereinafter referred to as "The Secretary," shall, as soon as practicable but in no event later than one year after the date of enactment of this Act, publish a detailed legal description and map showing the boundaries of the wilderness in the Federal Register. Such map and description shall be filed with the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the United States Senate. Such map and description shall have the same force and effect as if included in this Act. Correction of clerical and typographical errors in such legal description and map may be made.

ADMINISTRATION

SEC. 4. (a) The Secretary shall administer the wilderness under the provisions of this Act, the Act of January 3, 1975 (88 Stat. 2096; 16 U.S.C. 1132 note), the Wilderness Act of 1964 (78 Stat. 890, 16 U.S.C. 1131–1136), and in accordance with other laws, rules and regulations generally applicable to areas designated as wilderness.

(b) Paragraph (5) of section 4(d) of the

Wilderness Act of 1964 is hereby repeated and paragraphs (6), (7), and (8) of such section 4(d) are hereby redesignated as paragraphs (5), (6), and (7).

(c) Effective on January 1, 1979 the use of motorboats is prohibited within the wilderness designated by this Act, and that portion within the wilderness of all lakes which are partly within the wilderness, except for the following:

(1) On the following lakes, motorboats with motors of no greater than twenty-five horsepower shall be permitted: Fall, Lake County; Newton, Lake County; Moose, Lake County; Newfound, Lake County; Sucker, Lake County; Snowbank, Lake County; East Bearskin, Cook County; South Farm, Lake County; Trout, Saint Louis County; Basswood, except that portion generally north of the narrows at the north end of Jackfish Bay and north of a point on the international boundary between Ottawa Island and Washington Island; Saganaga, Cook County, except for that portion west of American Point; *Provided:* That, on the following lakes, until January 1, 1984, the horsepower limitations described in this paragraph shall not apply to towboats registered with the Secretary: Moose, Lake County; Newfound, Lake County; Sucker, Lake County; Saganaga, Cook County, as limited in this paragraph.

(2) on the following lakes and river, motorboats with motors no greater than ten horsepower shall be permitted: Clearwater, Cook County; North Fowl, Cook County; South Fowl, Cook County; Island River east of Lake Isabella, Lake County; Sea Gull, that portion generally east of Threemile Island, Cook County; Alder, Cook County; Canoe, Cook County.

(3) On the following lakes, or specified portions of lakes, motorboats with motors of no greater than ten horsepower shall be permitted until the dates specified: Basswood River to and including Crooked Lake, Saint Louis and Lake Counties, until January 1, 1984; Carp Lake, the Knife River, and Knife Lake, Lake County, until January 1, 1984; Sea Gull, Cook County, that portion generally west of Threemile Island, until January 1, 1999; Brule, Cook County, until January 1, 1994, or until the termination of operation of any resort adjacent to Brule Lake in operation as of 1977, whichever occurs first.

(4) On the following lakes, or specified portions of lakes, motorboats with motors of no greater than twenty-five horsepower shall be permitted until January 1, 1984; Birch, Lake County; Basswood, Lake County, that portion generally north of the narrows at the north end of Jackfish Bay and north of a point on the international boundary between Ottawa Island and Washington Island.

(d) The detailed legal description and map to be published pursuant to section 3 of this Act shall contain a description of the various areas where the motorized uses permitted by this section are located. No provision of this section shall be construed to limit mechanism portages or the horsepower of motors used on motorboats in the following areas within the wilderness:

Little Vermilion Lake, Saint Louis County; Loon River, Saint Louis County; Loon Lake, Saint Louis County; that portion of the Lac La Croix, Saint Louis County, south of Snow Bay and east of Wilkins Bay.

(e) For the purposes of this Act, a snowmobile is defined as any motorized vehicle which is designed to operate on snow or ice. The use of snowmobiles in the wilderness designated by this Act is not permitted except that the Secretary may permit snowmobiles, not exceeding forty inches in width, on (1) the overland portages from Crane Lake to Little Vermilion Lake in Canada, and from Sea Gull River along the eastern portion of Saganaga Lake to Canada, and (2) on the following routes until January 1, 1984:

Vermilion Lake portage to and including Trout Lake; Moose Lake to and including Saganaga Lake via Ensign, Vera and Knife Lakes East Bearskin Lake to and including Pine Lake via Alder Lake and Canoe Lake.

In addition to the routes listed above, the Secretary may issue special use permits for the grooming by snowmobiles of specified cross-country ski trails for day use near existing resorts.

(f) The Secretary is directed to develop and implement, as soon as practical, entry point quotas for use of motorboats within the wilderness portions of the lakes listed in subsection c, the quota levels to be based on such criteria as the size and configuration of each lake, and the amount of use on that lake: *Provided,* That the quota established for any one year shall not exceed the average actual annual motorboat use of the calendar years 1976, 1977, and 1978 for each lake, and shall take into account the fluctuation in use during different times of the year. Provided further that on each lake homeowners and their guests and resort owners and their guests on that particular lake shall have access to that particular lake and their entry shall not be counted in determining such use.

(g) Nothing in this Act shall be deemed to require the termination of the existing operation of motor vehicles to assist in the transport of boats across the portages from Sucker Lake to Basswood Lake, from Fall Lake to Basswood Lake, and from Lake Vermilion to Trout Lake, during the period ending January 1, 1984. Following said date, unless the Secretary determines that there is no feasible nonmotorized means of transporting boats across the portages to reach the lakes previously served by the portages listed above, he shall terminate all such motorized use of each portage listed above.

(h) The motorized uses authorized by this section shall be confined to those types of snowmobiles, motorboats and vehicles which have been in regular use in the Boundary Waters Canoe Area prior to the date of enactment of this Act. The Secretary may set forth additional standards and criteria to further define the type of motorized craft which may be permitted.

(i) Except for motorboats, snowmobiles, and mechanized portaging, as authorized and defined herein, no other motorized use of the wilderness shall be permitted. Nothing in this Act shall prohibit the use of aircraft, motorboats, snowmobiles, or other mechanized uses in emergencies, or for the administration of the wilderness area by Federal, State, and local governmental officials or their deputies, only where the Secretary finds that such use is essential.

RESORTS

SEC. 5. (a) The owner of a resort in commercial operation during 1975, 1976 or 1977 and located on land riparian to any of the lakes listed below may require purchase of that resort, including land and buildings appurtenant thereto, by written notice to the Secretary prior to September 30, 1985. The value of such resort for purposes of such sale shall be based upon its fair market value as of July 1, 1978, or as of the date of said written notice, whichever is greater, without regard to restrictions imposed by this Act:

Fall, Lake County, Moose, Lake County, Snowbank, Lake County, Lake One, Lake County, Sawbill, Cook County, Brule, Cook County, East Bearskin, Cook County, Clearwater, Cook County, Saganaga, Cook County, Sea Gull, Cook County, McFarland, Cook County, North Fowl, Cook County, South Fowl, Cook County, Jasper Lake, Lake County, Ojibway, Lake County.

(b) An owner requiring purchase of a resort under this provision may elect to retain one or more appropriate buildings and lands not exceeding three acres, for personal use as a residence: *Provided,* That the purchase price of the Government for a resort shall be reduced by the fair market value of such buildings and lands, with the same valuation procedures outlined above.

(c) With respect to any privately owned lands and interests in lands riparian to the lakes listed above, and if the Federal Government has been required to purchase a resort on said lake, said lands shall not be sold without first being offered for sale to the Secretary who shall be given a period of one hundred days after the date of each such offer within which to purchase such lands. No such lands shall be sold at a price below the price at which they have been offered for sale to the Secretary and if such lands are reoffered for sale they shall first be reoffered to the Secretary: *Provided,* That this right of first refusal shall not apply to a change in ownership of a property within an immediate family.

(d) There are authorized to be appropriated such sums as may be necessary for the acquisition of lands and interests therein as provided by this section.

TIMBER SALE CONTRACTS

SEC. 6. (a) The Secretary is directed to terminate within a period of one year after the date of passage of this Act, all timber sale contracts in the Boundary Waters Canoe Area Wilderness. There shall be no further logging of the virgin forest areas formerly enjoined from logging by the United States District Court on said contract areas during the termination period.

The purpose of said termination period is only to permit completion of the harvesting of timber within existing areas under contract that are not within the areas described above and permit the taking of ameliorative measures, including land and cover restoration that will, at the earliest feasible date, make the imprint of man's work substantially unnoticeable on the lands included as wilderness in this Act.

(b)(1) In the event that termination of timber sale contracts in subsection (a) reduces the total national forest volume which a purchaser has under contract on the Superior National Forest to less than two years cut based on the average volume of Superior National Forest timber harvested by the purchaser in the last three years, the Secretary may, with the consent of the purchaser substitute, to the extent practicable, timber on other national forest lands approximately equal in species and volume to the timber sale contract affected. In offering substitute timber, the Secretary shall negotiate the substitution at a price that is mutually equitable considering such factors as species, volume, logging accessibility, and other terms of the agreement.

(2) The United States will pay just compensation for any timber contracts terminated or modified by this Act, consistent with amendment V to the Constitution of the United States. Losses due to costs incurred in directly fulfilling the terms of such contracts shall be paid by the United States. Any action for the recovery from the United States of cost as provided above shall be brought in a court of competent judisdiction. Any such judgments shall be paid from the claims and judgments fund (31 U.S.C. 724a).

(c) Within the limits of applicable laws and prudent forest management;

(1) the Secretary shall, in furtherance of the purposes of subsection (a) of this section and of section 4 of the National Forest Management Act of 1976 (90 Stat. 2949), expedite the intensification of resource management including emphasis on softwood timber production and hardwood utilization on the national forest lands in Minnesota outside the wilderness to offset, to the extent feasible, the reduction in the programmed allowable timber harvest resulting from reclassification of the Boundary Waters Area, and the Secretary shall make a review of progress to date in 1983, and a forecast of planned achieve-

ments by 1985 and shall submit, as a part of the 1985 program under the schedule called for in the Resources Planning Act of 1974, a Plan and recommendations for 1985–1990. In administering the Superior National Forest, the Secretary is authorized and directed to engage in artificial and natural regeneration, release, site preparation, and other forms of timber production enhancement.

(2) The Secretary, in carrying out the requirements in section (c)(1), is authorized and directed to cooperate with the State of Minnesota and its political subdivisions to develop and implement a system of grants, for the development of renewable resources on State, County and private lands. He may also seek the cooperation of other Federal departments and agencies to assure a coordinated approach to renewable resources development.

(d) There is authorized to be appropriated, in addition to such sums as may otherwise be appropriated for the Superior National Forest from existing authorities established by law, the following additional sums for the fiscal years 1980 through 1990 inclusive:

(1) to carry out the purposes of subsection 6(c)(1) an additional $8,000,000 annually; and,

(2) to carry out the purposes of subsection 6(c)(2) an additional $3,000,000 annually. Provided, however, that the Federal share of any grant made pursuant to subsection 6(c)(2) shall not exceed 80 percent of the total cost of said grant.

(e) Funds appropriated pursuant to this section shall remain available until expended. Authorizations in excess of funds appropriated in a given fiscal year shall remain available for appropriation in subsequent fiscal years.

(f) In addition to those personnel who would otherwise be available, the Secretary is authorized to appoint and fix the compensation (not to exceed that of grade 15 on the General Schedule for Federal employees) of additional full-time personnel for the Superior National Forest to carry out the purposes of this Act.

LAWS APPLICABLE TO CERTAIN LANDS AND WATERS IN THE SUPERIOR NATIONAL FOREST
